EDUCATIONAL RESOURCES

INFORMATION CENTER

Resources in Education (RIE) is processed for printing by Computer Sciences Corporation, under contract with the U.S. Department of Education, Office of Educational Research and Improvement (OERI), and is published monthly by the U.S. Government Printing Office (GPO) with printing funds approved by the Office of Management and Budget. The contents of *RIE* do not necessarily reflect official OERI policy.

RIE is available on subscription (12 issues/year), or as individual issues, from the Superintendent of Documents, U.S. Government Printing Office (GPO), Washington, D.C. 20402. Inquiries regarding prices should be directed to the Superintendent of Documents.

Introduction

Resources in Education (RIE) — A monthly abstract journal announcing recent report literature related to the field of education, permitting the early identification and acquisition of reports of interest to the educational community.

Sponsor: Educational Resources Information Center (ERIC)
National Library of Education (NLE)
Office of Educational Research and Improvement (OERI)
U.S. Department of Education
Washington, D.C. 20208-5720

ERIC is a nationwide information network for acquiring, selecting, abstracting, indexing, storing, retrieving, and disseminating significant and timely education-related reports. It consists of a coordinating staff in Washington, D.C. and 16 Clearinghouses located at universities or with professional organizations across the country. These Clearinghouses, each responsible for a particular educational area, are an integral part of the ERIC system. The Clearinghouses are listed on the inside back cover.

Organization of Journal: *Resources in Education* is made up of resumes and indexes. The resumes provide descriptions of each document and abstracts of their content. Resumes appear in a "Document Section" and are numbered sequentially by an accession number beginning with a prefix ED (ERIC Document). The indexes appear in an "Index Section" and provide access to the Resumes by Subject, Personal Author, Institution, and Publication Type.

Availability of Documents: The documents cited in *Resources in Education*, except as noted, are available from the ERIC Document Reproduction Service (EDRS), in both microfiche (MF) and paper copy (PC), or microfiche only. Availability in microfiche only may be determined by the source, for proprietary or copyright reasons, or by ERIC for reasons related to legibility and reproducibility. The price per document is based on the number of pages and is subject to change over time. An ERIC Price Code Schedule permits the user to convert all price codes to actual dollar amounts. Current price information for documents, microfiche, and subscriptions to microfiche collections is to be found in the section entitled "How to Order ERIC Documents" in the most recent issue of RIE.

How to Submit Documents to ERIC: If you have documents that you would like to have considered for announcement in *Resources in Education* (RIE), you should send clean, legible copies (in duplicate, if possible) to the ERIC Processing and Reference Facility, 1100 West Street, 2d Floor, Laurel, Maryland 20707-3598. A reproduction release, giving ERIC permission to reproduce in paper copy and microfiche (or microfiche only), and signed by the author or official representative of the source institution, is requested for all documents selected for inclusion in RIE. Standard reproduction release forms may be obtained from the ERIC Facility (a sample appears at the back of this issue of RIE).

How to Order RIE: The U.S. Government Printing Office (GPO) prints *RIE* and functions as subscription agent. Detailed subscription information appears on the page in the back of RIE entitled "How to Order *Resources in Education*".

ERIC Clearinghouse Publications

This page highlights publications announced in this issue of *Resources in Education* which were created by the ERIC Clearinghouses and which have been selected as having special significance for educators. For each brief citation appearing here, there is a full abstract appearing under the same ED number in the pages of the issue.

In addition to collecting the literature of education for announcement in *Resources in Education* and *Current Index to Journals in Education*, the ERIC Clearinghouses analyze and synthesize the literature in a number of different formats designed to compress the vast amount of information available and to meet the varying needs of ERIC users. These formats include research reviews, state-of-the-art studies, interpretive studies on topics of high current interest, research briefs, annotated bibliographies, digests, and compilations. While some publications are comprehensive reviews designed for those who are interested in pursuing a subject in depth, others are brief analyses designed for the busy practitioner whose time for staying abreast of new developments in education is limited.

ERIC publications are published either by the ERIC Clearinghouses responsible for producing them or through cooperative arrangements with other organizations. Original copies are usually available directly from the responsible Clearinghouse or from the source listed in the citation. In addition, the publications announced in *Resources in Education* are contained in all ERIC microfiche collections, and are available in reproduced paper copy and/or microfiche from the ERIC Document Reproduction Service (EDRS), 7420 Fullerton Road, Suite 110, Springfield, Virginia 22153-2852 Telephone: 1-800-443-ERIC (3742).

DOCUMENT SECTION

SAMPLE DOCUMENT RESUME

ERIC Accession Number—identification number sequentially assigned to documents as they are processed.

Institution.
(Organization where document originated.)

Language of Document—documents written entirely in English are not designated, although "English" is carried in their computerized records.

Publication Type—broad categories indicating the form or organization of the document, as contrasted to its subject matter. The category name is followed by the category code.

ERIC Document Reproduction Service (EDRS) Availability—"MF" means microfiche; "PC" means reproduced paper copy. When described as "Document Not Available from EDRS," alternate sources are cited above. Prices are subject to change; for latest price code schedule see section on "How to Order ERIC Documents," in the most recent issue of RIE.

Descriptors — Career Guidance, *Career Planning, *Demand Occupations, *Employed Women, *Employment Opportunities, Females, Labor Force, Labor Market, Postsecondary Education

Identifiers — Consortium of States, *National Occupational Competency Testing Institute

Women's opportunities for employment will be directly related to their level of skill and experience and also to the labor market demands through the remainder of the decade. The number of workers needed for all major occupational categories is expected to increase by about one-fifth between 1990 and 1999, but the growth rate will vary by occupational group. Professional and technical workers are expected to have the highest predicted rate (39 percent), followed by service workers (35 percent), clerical workers (26 percent), sales workers (24 percent), craft workers and supervisors (20 percent), managers and administrators (15 percent), and operatives (11 percent). This publication contains a brief discussion and employment information (in English and in Spanish) concerning occupations for professional and technical workers, managers and administrators, skilled trades, sales workers, clerical workers, and service workers. In order for women to take advantage of increased labor market demands, employer attitudes toward working women need to change and women must: (1) receive better career planning and counseling, (2) change their career aspirations, and (3) fully utilize the sources of legal protection and assistance that are available to them. (Contains 45 references.)

Informative Abstract

Document Resumes

The document resumes in this section are arranged in numerical order by ED number, and also alphanumerically by Clearinghouse prefix and Clearinghouse accession number.

As explained in the Introduction, each Clearinghouse focuses on a specific aspect of education. The reader who is interested in one of these major aspects (e.g., Reading) may, however, find pertinent resumes among the entries of virtually any Clearinghouse, dependent on the orientation of the document. For this reason, it is important to consult the Subject Index if a comprehensive search is desired.

The following is a list of Clearinghouse prefixes and names used in this Section, together with the page on which each Clearinghouse's entries begin:

	Page		Page

Identifiers—*Resources in Education

Resources in Education (RIE) is a monthly abstract journal that announces (catalogs, indexes, abstracts) documents of interest to the educational community (including researchers, teachers, students, school board members, school administrators, counselors, etc.). Each issue announces approximately 1,100 documents and provides indexes by Subject, Personal Author, Institution, Publication Type, and ERIC Clearinghouse Number. This special Computer Output Microfiche (COM) edition is prepared directly from the ERIC magnetic tape database prior to publication of the printed journal and therefore is lacking the cover and other regular introductory and advertising matter contained in the printed journal. The COM edition contains only the first three of the five indexes in the printed edition. The first accession in each issue of RIE is the issue itself. In this way, the monthly microfiche collection for each issue is immediately preceded by a microfiche index to that collection. This practice began with the RIE issue for May 1979. (CRW/WTB)

Descriptors—*Administrative Organization, Administrator Characteristics, *Adult Education, Agency Cooperation, *Educational Administration, *Financial Support, Program Costs, Staff Utilization, *State Departments of Education, State Programs, Tables (Data)

This document consists of eight graphs/lists and nine tables summarizing the results of the National Adult Education Professional Development Consortium's second biannual survey of administrative practices for the state and territorial adult education offices. Data are presented on the following topics: state staffing patterns; state services overseas; federally funded programs managed; state directors' salaries; state agencies; interagency collaboration, support, and agreements; agency restructuring; state-local funding processes; and local program characteristics and staffing patterns. The following are among the findings included: (1) in 1992, 21 state directors managed staffs of fewer than 5 people, whereas only 17 state directors had staffs of fewer than 5 people in 1994; (2) in 1994, adult education staff had a median salary of \$39,000 and an average salary of \$37,519, and the national average and mean salaries of state directors equaled \$52,498 and \$50,000, respectively; (3) 11 states reported agreements with their departments of labor, 28 reported agreements with their departments of human services/welfare/social services, 8 reported agreements with their departments of corrections, and 5 had agreements with their departments of vocational rehabilitation services; and (4) programs in 14 states/territories were restructured in 1993 or 1994. The core features of the preindustrial model of school-to-work transition are needed now. An environment must be recreated in which young people see the vital connections among education, training, and work that were once so clear. The emerging consensus model has these features: combined formal schooling and structured on-the-job training leading to a qualification; an intellectually-demanding curriculum that requires students to apply knowledge to real-world problems; a curriculum and set of work experiences focused enough to qualify students for entry-level work, but broad enough to provide skills for mobility; and job experiences. A three-tier system of education and skills standards has been proposed. This system would lead to a Certificate of Initial Mastery with which a student could go on to college, enter the work force, or enroll in a program of professional and technical education and training leading to a Tier II skills certificate. The system should provide for funding and development of dropout prevention and dropout recovery programs. Out-of-school young people should be working toward the same qualifications as young people in school. They would need a much wider range of support, the prospect of public placements, and a point of entry into the school-to-work transition system. Employers and unions must be involved in local organizations in career centers around which the school-to-work transition system would be organized at the local level. (YLB)

Feminist Teaching Methods for Adult and Popular Educators. An Annotated Bibliography.

University of the Western Cape, Bellville (South Africa). Centre for Adult and Continuing Education.

Report No.—ISBN-1-86808-201-6

Pub Date—Feb 94

Note—34p.

Pub Type—Reference Materials - Bibliographies (131)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Adult Education, Annotated Bibliographies, Educational Change, *Equal Education, *Feminism, Foreign Countries, Multicultural Education, Politics of Education, Racial Discrimination, Sex Discrimination, *Sex Fairness, Teacher Role, *Teaching Methods, *Womens Education Identifiers—*Feminist Pedagogy, South Africa

This bibliography contains annotations of 69 articles that were chosen from a range of education journals between the years of 1990-1993. Popular education and feminist methodologies are the reference points. The bibliography contains resources that explore the intersections of gender, race, class, and culture and resources that link women and popular education and that examine key concepts such as power, empowerment, resistance, difference, and dialogue. All these areas are inherent in the educational encounter and critical in informing popular education and feminist methodologies. Articles have been drawn from over 30 education journals and 12 other journals that had a development or women's focus. Each entry follows this format: author(s), title, source, date, and annotation. A list is attached of 21 books that relate directly or indirectly to feminist pedagogy. (YLB)

Descriptors—Adult Education, Blacks, *Community Development, Consciousness Raising, *Economic Development, Feminism, Foreign Countries, Political Attitudes, Power Structure, Public Policy, *Sex Fairness, *Womens Education, Workshops

Identifiers—*Gender Training, *South Africa

Seventeen people from various parts of South Africa gathered at the Workshop for Gender Trainers to enhance their training and to focus on the gender and development approach. Sessions 1-2 on the second day dealt with gender training nightmares. During session 3, participants discussed what could have been done either to avoid the problems that had arisen or to deal with them in more effective ways. Session 4 summed up the two complementary theories behind gender training: gender and development approach and consciousness-raising approach. Other issues were men's groups, mixed gender groups, and theoretical frameworks currently being used. Session 5 used the story of the fox, the stork, and the plate of food to show the crucial role that questioning can play in gender training and in getting participation. Session 1 on the third day continued reflection on the process of questioning. Session 2 provided an overview of the gender analysis framework was provided. Session 3 addressed the importance of looking at women's practical needs and their strategic interests. Session 4 examined real cases where gender relations had been an important element in a development project and prepared a lesson plan from them. Session 5 examined different aspects and dimensions of power. Session 1 on the fourth day explored power and resistance. Session 2 addressed linking together training skills, gender theory, and power. Sessions 3-4 focused on workshop evaluation and networking. (Appendixes include a participant list and agenda.) (YLB)

Descriptors—*Academic Aspiration, *Academic Education, Career Choice, *College Bound Students, College Preparation, College Programs, Demand Occupations, *Education Work Relationship, Employment Patterns, *Employment Projections, Higher Education, High Schools, *Noncollege Bound Students, Technical Occupations

This book focuses on the plight of the academic middle of graduating high school students. These students have been led to believe that the only way to succeed is to attend a four-year college, even though they are unprepared for college work. As a result, half of the students who begin college fail to graduate, and even those who do graduate often fail to find college-level jobs after they finish college. The book describes factors in this situation, including the following: intense pressure from parents, schools, colleges, and society for students to attend four-year colleges; college prep curricula that leave half of their graduates unprepared for college work; open admissions policies in colleges; and lack of knowledge of appealing alternatives to four-year degrees on the part of parents, students, and schools. It demonstrates that technical, craft, and repair occupations that require less than a bachelor's degree will pay better than any occupations except the professions in the years ahead and will provide more job openings than occupations requiring college degrees. The book recommends the following steps to making preparation for such occupations more acceptable: (1) providing systematic career guidance for students and structured feedback for parents; (2) redesigning college prep for all students; (3) ensuring equal status and focused academics; and (4) bringing "average students" to excellence. The book contains 75 references. (KC)

Identifiers—*Computer Assisted Career Guidance, Oakland University MI

This report provides an overview of the continuing development and use of the computer-assisted career guidance systems at the Adult Career Counseling Center (ACCC) of Oakland University (Michigan) during its 12th year of operation (September 1994-June 1995). The 12 sections of the report cover the following: (1) history of the development of the center; (2) mission; (3) description of the center; (4) description of the computer-assisted career guidance systems in use at the ACCC-DISCOVER for Colleges and Adults, SIGI PLUS (System of Interactive Guidance and Information Plus), Michigan Occupational Information System, Harris Selector, and Resume Writer; (5) client demographic information; (6) analysis of client responses to ACCC exit forms; (7) typical case studies; (8) public relations; (9) inservice training; (10) coordination with practicum center; (11) research at ACCC; and (12) plans for improving services at the ACCC. Three appendixes include a report of the Pontiac Adult Career Counseling Center, a summary of auxiliary grant-supported services, and an overview of career counseling resources at Oakland University. According to the report, the ACCC has provided services for more than 9,000 adults during its 12 years of operation. A majority of those served were college graduates, about three-quarters were women, and many were in stages of life transitions. Most of those served rated the services as extremely helpful or very helpful. (KC)

Identifiers—Nurse Midwives, United Kingdom

A study examined structures, processes, and practices of assessing competence in nursing and midwifery education programs in Britain. The methodology included documentation, interviews, and observations. Most interviewees were clear about the shortcomings of traditional assessment. In a satisfactory partnership, all the partners made a significant contribution to the design of the assessment strategies and documents and felt a sense of ownership. Continuous dialogue was essential. Increasing the number of independent witnesses and increasing the evidence base were proposed to overcome inadequacies of the widely used checklist assessment format. The following contextual issues were raised by interviewees with regard to practice placement: liaison and continuity of support, course constraints, workplace demands, and individual commitment. Principles required for effective monitoring and development included the following: in-

volvement of all relevant groups, appropriate support, putting discussion about assessment on the agenda, action based on discussion, and development on the national level. Dialogue was found to be a mechanism for combining learning and assessment in which theory was examined in the light of practice and practice in the light of theory. Recommendations were made for action to develop the assessment of competence in nursing and midwifery education. (Appendixes contain 18 references, 160-item bibliography, and a list of survey methods.) (YLB)

Descriptors—*Cognitive Style, *Critical Thinking, *Educational Needs, Educational Research, Foreign Countries, Needs Assessment, *Nursing Education, Postsecondary Education, *Self Evaluation (Individuals), *Teaching Methods

Identifiers—*Reflective Thinking, United Kingdom
A study focused on how British students reflected on their experience of the nursing diploma of higher education (Dip. HE) programs and on how teachers perceived students' reflective activity and facilitated their associated learning needs. The main methods of collecting data about experiences and perceptions of learning contexts were interviewing and participant observation, supplemented by documentary evidence. Two case study centers were chosen—one on its first intake of Dip. HE students and another with 3 years' experience of Dip. HE. Findings indicated that the formal use of "reflection" was new to a number of established teachers and most students. Teachers emphasized the hope that reflection would increase understanding, develop self-awareness, enhance the ability to analyze, encourage deeper thinking, and promote independence. The settings teachers were using to facilitate reflection were chiefly group sessions, individual tutorials, clinical interactions, and learning journals. Teachers described and illustrated a sequence of four stages of reflection in helping students to link theory and practice: describing aspects of their practical experience, analyzing them, understanding how the situation could have been different, and seeing how they could behave in a future similar occurrence. Students talked about the value of support from their peer group. (Appendixes include a 17-item bibliography, and interview schedules. Contains 51 references.) (YLB)

Identifiers—Nurse Midwives, United Kingdom

A research project evaluated the contribution of biological, behavioral, and social sciences to nursing and midwifery education programs in Britain. The study of scientific knowledge relevant to recently qualified nurses and midwives was confined to six topics: fluids, electrolytes, and renal systems; nutrition; acute pain; shock; stress; and self-esteem. The study first addressed the literature on the nature of professional knowledge. Four main strategies were used in interviews to elicit information about the use of scientific knowledge in practice: recent cases, orientation of new staff to a clinical area, learning required of a student, and concept mapping. To ascertain how scientific knowledge was used by experienced practitioners, researchers took advantage of the matrix format of the knowledge maps by combining the answers to two questions, one with a knowledge focus and one with a practice focus. Findings indicated that assumptions made in nursing education programs about learning and learning support in service settings tended to be overoptimistic. Analysis of case studies suggested that the psychological imperative for students to become accepted into service settings could not be ignored. A large number of practical mediation strategies had been developed in education settings on a piecemeal basis by individual lecturers, but there was too little mediation and individual sessions were attempting to achieve more than was feasible. (Appendixes include a summary of research methods. Contains 36 references.) (YLB)

Identifiers—United Kingdom

A British research study documented and defined the level of functioning of advanced neonatal nurse practitioners (ANNPs) in comparison with qualified nurses and junior pediatric medical staff working in the same neonatal units. Subjects were ANNPs, ANNP students, and clinician mentors in 10 units. Data were collected through interviews, questionnaire, diary or checklist, and observation. The role of ANNPs included the following tasks: deciding on patient admission, examining newborns, carrying out discharge examinations on the babies, providing emergency care, carrying out investigations, prescribing in accordance with guidelines, and teaching junior doctors and nurses. ANNPs saw their expanding role as appropriate professional development. Changes their expanded role brought included greater support for junior medical staff, better patient care, and improved communication. Students expressed a need for support, were satisfied with the theoretical input received, felt some areas were covered insufficiently, and enjoyed the learning experience. Clinicians raised the issue of funding and felt that classroom-based teaching had prepared the ANNP students very well. The majority of junior medical staff thought that all nurses should be taking on more as part of their job, but some felt threatened by the introduction of ANNPs. Conclusions were that misunderstandings about the role, problems of dual roles, and absence of sufficient funded ANNP posts made the transition to the role of ANNP difficult. Identifiers—Nurse Midwives, United Kingdom

This report examines the assessment of competence in nursing and midwifery education in Britain within a context of changes in health needs, values about health care and service provision, policy/ideology, and education. Chapter 1 explores alternative approaches to conceptualizing the issues involved in the study of assessment, competence, and assessment of competence. Chapter 2 addresses the issues identified by staff and students in their experiences of the assessment of competence. Chapter 3 examines the features and experiences of planning a system of assessment by giving an overview of the relevant features of the operating context of institutions by "mapping the system" and by describing experiences of staff operating within that "map." Chapter 4 provides an outline of the range of assessment texts and the evidence bases produced. Chapter 5 considers the professional development experiences of students, educators, and practitioners involved in the assessment process. Chapter 6 examines the relationship between assessment and learning from the viewpoints of staff and students. Chapter 7 focuses on knowledge and assessment of that knowledge in classroom-based written assessment. Chapter 8 addresses the use of dialogue in assessment. Chapter 9 explores the key areas of discourse of assessment practice. Chapter 10 explores the discourses of theory, knowledge, and practice. Eleven recommendations are made for changes in the assessment of competence in nursing and midwifery education. The report contains 161 references. (YLB)

Identifiers—*United Kingdom

A study compared the outcomes of the three types of nurse education programs offered in the United Kingdom: the registered general nurse (RGN) program, Project 2000 diploma program, and integrated degree program. The research design involved the following: Simulation A (client scenario followed by information-seeking question); Simulation B (video of admission interview followed by care plan development); nonparticipant observation of students in clinical setting; and interviews with students. Ninety-nine subjects participated in Simulation A. They requested a large range of data. A minority used a systematic format, with more integrated degree program participants adopting such an approach as compared with Project

2000 program participants, with RGN program participants falling between. Only half adopted a multi-focal approach to their information seeking. Ninety-eight subjects participated in Simulation B. Both the integrated degree and RGN program participants obtained a higher global score, with the Project 2000 diploma participants achieving consistently lower scores in most units of analysis. Ninety-nine subjects participated in the observation element. Integrated degree program participants achieved statistically higher scores than those in the other two programs. Ninety-nine participated in the interview. The client focus of most integrated degree programs participants was evident. A greater professional focus was evident in Project 2000 program and RGN program participants' interview data. (Appendices contain 310 references and instruments.) (YLB)

Identifiers—*Nurse Midwives, United Kingdom

An study explored the extent to which integration of a philosophy of health in the educational curricula of nurses, midwives, and health visitors in Britain had been achieved. Four case studies and consultancy were undertaken, and both pre- and postregistration curricula were examined. Semistructured interviews, discussions, classroom observations, and questionnaires were used with college staff, students, and hospital and community practitioners. Findings indicated that a philosophy of health had not been successfully integrated into pre- and postregistration courses for nurses and midwives. Community nursing courses appeared to have achieved more success. Aspects of a philosophy of health and health promotion were well represented within the curricula but in a fragmented and disjointed way. The predominant philosophy of health espoused in most curricula tended toward traditional approaches that emphasized physical health focused on individual lifestyles rather than advocacy, empowerment, community participation, and development. Three principal recommendations were as follows: nurses, midwives, and health visitors should develop their own conceptualization of health promotion; all educational programs should include regular consolidating sessions on health promotion; and nursing facilitators should help and direct students and practitioners to apply health promotion theory to practice. (Appendices contain instruments and 94 references.) (Author/YLB)

Identifiers—*United Kingdom

A study examined the relationships between teaching, support, supervision, and role modeling in clinical areas in nursing education courses within the context of Britain's Project 2000, an educational reform initiative. The main data sources were semistructured interviews with a total of 53 students, 37 practitioners, and 15 tutors in 3 nurse education centers and case studies conducted in 3 adult branch centers and 3 mental health branch centers. It was widely reported that the helping roles adopted by practitioners and tutorial staff were often understood in different ways, not systematically assigned, and relegated according to competing demands. Most practitioners wanted greater clarification of their different roles, greater familiarity with the Project 2000 curriculum, and training in assessment. Students wanted longer placements and more contact with practitioners. Assessment of students' practice was deemed problematic. Tutorial staff played an insignificant role in assessing practice, and no intentional role modeling was reported. Learning objectives were not always regarded as realistic, and tutors complained that not all practitioners commanded the knowledge necessary for working with the students. Appendices include the following: tables detailing respondents' responses and characteristics; study timetable; interview schedules/guides; fragment of verbatim transcript of one interview; and observation protocol. Contains 139 references.) (MN)

Descriptors—Case Studies, Definitions, Educational Theories, Foreign Countries, Literature Reviews, National Surveys, *Nursing Education, *Obstetrics, Postsecondary Education, Questionnaires, *Shared Resources and Services, *Teacher Attitudes, *Teacher Education, *Team Teaching, Theory Practice Relationship

Identifiers—Nurse Midwives, *United Kingdom

A study evaluated shared learning in educational programs preparing students for employment as nurses, midwives, and health visitor teachers in the United Kingdom. Data were collected from the following: descriptive survey of 17 centers preparing teachers in nursing/midwifery/health visiting (response rate, 12 centers); interviews with course leaders at 5 of the centers; survey of 58 program completers and interviews with 17 newly qualified teachers from the 5 centers; and interviews with 8 mentors and 4 managers in colleges of nursing/midwifery. Most centers promoted shared learning activities, albeit to different extents. Half the centers focused on shared learning solely from a theoretical perspective. Little evidence of application of the principles of shared learning within the teaching practice component of the curriculum was found. Consensus regarding the objectives of shared learning was lacking; however, there was general agreement on the potential benefits and barriers to shared learning. It was determined that teachers of nursing/midwifery/health visiting are already in shared learning environments incorporating other health professionals and professionals from a wider framework of general education. (Twenty-five tables/figures are included. Appendixes are the following: study questionnaires and cover letters, interview schedules, and table detailing new teachers' definitions of shared learning/shared teaching/team teaching. Contains 62 references.) (MN)

Descriptors—Case Studies, Delphi Technique, *Educational Change, Foreign Countries, National Surveys, *Nursing Education, *Obstetrics, Postsecondary Education, Questionnaires, Tables (Data), *Teacher Attitudes, *Teacher Qualifications, *Teacher Role

Identifiers—*Nurse Educators, Nurse Midwives, United Kingdom

A study examined the evolving role of nurse teachers in the United Kingdom in light of the educational reforms known as Project 2000. Data were collected from the following: case study of 1 college of nursing/midwifery; surveys of 60 teachers and in-depth interviews of 10 respondents at the case study site; and modified Delphi study of a total of 600 individuals involved in nursing/midwifery education (including a sample of 267 nurse teachers and 56 midwife teachers who were randomly selected from the United Kingdom Central Council for Nursing, Midwifery, and Health Visiting database). The nurse teachers reported working in a rapidly changing environment. Approximately 25% reported that their college of nursing/midwifery had relocated into higher education and 36.1% of colleges had formed links with more than one higher education institution. The respondents were concerned about the future role of nurse teachers. According to 87.9% of the sample, it is likely that lecturers in higher education will eventually teach the science courses required of nursing students and nurse teachers will teach nursing theory and practice. Most nurse teachers did not have a nursing degree or regularly engage in clinical practice. (Seventy-four tables/figures are included. Contains 100 references.) (MN)

Descriptors—*Computation, *Educational Finance, Foreign Countries, *Mathematical Formulas, National Surveys, *Nursing Education, *Obstetrics, Postsecondary Education, Questionnaires, *Teacher Student Ratio

Identifiers—Nurse Midwives, United Kingdom

A study examined the calculation of staff-student ratios (SSRs) in nursing and midwifery education in courses validated by the English National Board for Nursing, Midwifery and Health Visiting (ENB). Data were collected from questionnaires mailed to all 108 colleges of nursing and midwifery and higher education institutions offering ENB-validated courses and semistructured interviews with 10 senior managers in nursing and midwifery education. Thirty-nine usable questionnaires were returned. The study established a lack of standardization in the components of the formulas used by the various institutions to calculate SSRs. The interviews revealed three main methods of funding: funding based on SSR, per capita funding; and funding based on course costings that were largely determined by the funding body. Among the study recommendations were the following: (1) develop a standardized formula for calculating SSRs based on whole time equivalent students and staff; (2) calculate SSRs at

those levels in organizations defined as the administrative unit or division in which nursing/midwifery education is located; and (3) express the formula used to calculate resources for nursing/midwifery education as per capita funding. (The bibliography contains 20 references. Appendixes include the survey instruments and cover letters and a list of field work objectives.) (MN)

Descriptors—Child Health, *Educational Needs, *Educational Practices, Foreign Countries, Health Needs, *Home Programs, Literature Reviews, National Surveys, *Nurses, *Nursing Education, Parent Attitudes, Postsecondary Education, Questionnaires, Student Attitudes, Teacher Attitudes

Identifiers—*United Kingdom

A study examined the preparation of sick children's nurses to work in communities in the United Kingdom. Data were collected from the following: literature review; mail survey of the 43 colleges of nursing currently conducting the United Kingdom's Child Branch program for children's nursing (response rate, 81%); 18 focus group interviews with a total of 13 tutors, 43 students, and 15 pediatric community nurses at 4 colleges; and interviews of 13 parents of children with various health conditions regarding their perceived needs for children's nursing services. The community experiences of students preparing for employment as sick children's nurses were found to vary widely in length, nature, and quality. The study findings were used to develop a preferred model for preparing nurses to care for children in the community. Among the model's components were the following: a comprehensive community experience lasting at least 12 weeks and including lists of minimum learning experiences and outcomes; mentorship by a recognized pediatric nurse; a strong children's nursing focus; and a period of rostered community practice that includes competency assessments. (Eighteen tables, and a 62-item bibliography are included. Appended are the study consent form, questionnaire, and cover letters. Contains 113 references.) (MN)

Employees' Knowledge of Carpal Tunnel Syndrome.

Pub Date—95

Note—12p.

Pub Type—Information Analyses (070)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Adult Education, *Educational Needs, *Employee Attitudes, *Health Promotion, Industrial Training, *Knowledge Level, *Labor Education, *Occupational Safety and Health

Identifiers—*Carpal Tunnel Syndrome

A study examined employees' knowledge of the causes of carpal tunnel syndrome (CTS), its prevention, and their legal rights after being diagnosed with CTS. A 24-item questionnaire was administered to a random sample of 30 Chicago-area employees who had been afflicted with CTS. Of those surveyed, 99% considered their CTS injury related to their job, preventable, neither genetic nor influenced by gender, and related to their lack of knowledge surrounding legal rights and job safety issues. Although 99% of the respondents were not informed of their legal rights after their CTS injury, 88% received pain compensation, 70% were given a different job, 80% were given adequate time from the job, 90% were given rest time to compensate for their CTS, and 92% considered the follow-up treatment they received adequate. All 30 respondents believed that CTS has reduced their job performance/abilities. The respondents were concluded to have a very good working knowledge and understanding of CTS; however, existing education and

information concerning CTS was deemed ineffective and haphazard in certain occupations. It was therefore recommended that dispensing of information about CTS should be both part of the employee orientation process and an ongoing part of employee education in work and medical settings. An Organization's Economic Return on Training Investment.

Pub Date—Sep 95

Note—13p.; Paper presented at the World Conference of the International Federation of Training and Development Organizations (24th, Helsinki, Finland, September 11-14, 1995).

Pub Type—Speeches/Meeting Papers (150) - Reports - Research (143)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Adult Education, *Cost Effectiveness, Foreign Countries, *Industrial Training, *Manufacturing Industry, Outcomes of Education, *Productivity, *Program Costs

Identifiers—*Return on Investment, *Taiwan

A study examined the relationship between investment in training and labor productivity in a sample of 237 large and medium-size Taiwanese firms producing auto parts. Of the 162 firms (68.4%) that returned usable questionnaires, 142 (59.9%) had training programs and 131 (55.3%) provided full cost data. The data were analyzed by multiple regression to determine the relationship between investment in training and labor productivity at the firm level while controlling for other variables affecting labor productivity. In U.S. dollars, the 131 firms' total training costs in 1992 averaged \$79,784 (\$31,847 in direct costs and \$47,937 in opportunity costs). The number of workers per firm averaged 285, and the firms' per-worker training investment and direct training costs averaged \$280 and \$112, respectively. The average yearly sales per worker for all the firms reporting training was \$91,280. A multiple regression analysis established that, if an average firm had a current value added per worker of approximately \$43,040 and an average investment in total training cost per worker of \$280, increasing the investment in training per worker by 10% (\$28) could yield an increase in value added per worker of \$430, provided the increase could occur without any need for compensatory investments in capital or other additional resources. Research on the Effectiveness of Outdoor Management Training.

Pub Date—Sep 95

Note—11p.; Paper presented at the World Conference of the International Federation of Training and Development Organizations (Helsinki, Finland, September 11-14, 1995).

Pub Type—Speeches/Meeting Papers (150) - Reports - Research (143)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Adult Education, Educational Research, Evaluation Methods, Interpersonal Relationship, Leadership Training, *Management Development, Organizational Development, *Outdoor Education, Peer Relationship, Program Effectiveness, Program Evaluation, Staff Development, *Team Training, Teamwork

A 6-year study of outdoor-based management training (OMT) programs used traditional evaluation methods and new methods designed specifically for these unique programs. A survey of 1,000 training directors indicated that this type of training was very controversial. The next step was to use traditional training and organizational behavior evaluation methodologies to explore the impact of a 1-day ropes course on group and individual behaviors. Evaluation work was based on Kirkpatrick's (1994) four levels of evaluation: reaction, learning, behavior, and results. Two types of behavior were evaluated through a Likert-type questionnaire: individual and group. Results indicated a significant improvement in the overall functioning of the work group but no significant changes in individual behavior. Some participant variables found to influence the effectiveness of outdoor programs were as follows: intact/nonintact work groups, volunteers/nonvolunteers, gender composition of groups, supervisor attendance at the program, indoor/outdoor, and the facilitators. The evaluation was expanded to use a control group, open-ended

questions, focus group interviews, a structured on-the-job observation, and participant journals. Evaluations of programs in other countries produced evidence that the programs had an impact on the overall culture of the organization. Two issues for the future were identified: the need to certify facilitators and the need to look at the underlying conceptual framework. (Contains 10 references.) (YLB)

This publication provides the evaluation policies, procedures, and standards to which an automobile technician training program must adhere to be granted certification by the National Institute for Automotive Service Excellence. The policies section has three parts: the automobile areas that may be certified and minimum requirements for certification; information about evaluation team leaders, on-site evaluation team members, task lists, tools and equipment, and automobile program evaluation; and discussion of policies on articulation agreements, recognition for certification, appeals and action for revocation. The procedures section provides an overview of the process for certification. The next section contains the 10 program standards in these areas: purpose, administration, learning resources, finances, student services, instruction, equipment, facilities, instructional staff, and cooperative agreements. The task list follows. Lists of assumptions and definitions are provided. The tasks are divided into the following: engine repair, automatic transmission and transaxle, manual drive train and axles, suspension and steering, brakes, electrical/electronic systems, heating and air conditioning, and engine performance. Lists are also provided of applied academics (language arts and communications, mathematics, science) and workplace skills. The final section lists tools and equipment, including hand tools, general lab/shop equipment, and specialty tools and equipment. (YLB)

This guide contains the materials required to teach a six-unit course on responsible citizenship that was developed for secondary-level vocational education students in Oklahoma. The following are among the topics covered in the individual instructional units: getting to know your government (types of political systems, historical documents of the United States, powers of the federal government's three branches, reserved and shared powers of federal and state governments; local government (functions/concerns of country and city governments); making laws (rights guaranteed by the Bill of Rights, human rights, steps/stages in the legislative process, the system of checks and balances); enforcing laws (state and federal courts, law enforcement processes/personnel, financing of law enforcement); voting (voting requirements, importance of voting); and supporting your community (community involvement, interacting with public officials, community organizations, benefits of community work). Each instructional unit includes some/all of the following: performance objectives, suggested activities for instructors, handouts, information sheets, supplements, transparency masters, job sheets, written tests, lists of suggested readings, and answers to assignment sheets and written tests. Also included are guidelines for using the various components included in the instructional units and measuring student performance and a table detailing the required criteria for competency-based education programs. Descriptors—Computer Uses in Education, Courseware, *Curriculum Development, Educational Technology, *Hypermedia, Models, Statewide Planning, *Systems Approach, *Technology Education

Identifiers—*Model Industrial Technology Systems Project, *Ohio

Ohio's Model Industrial Technology Systems (MITS) project was initiated in 1987 to achieve the following: identify good activities in the areas of physical, communication, and bio-related technology; standardize the activities' format; and provide a coding system for their eventual use in a hypermedia system. To date, 220 activities have been modified by MITS, which was initially based on the Hypercard system provided with Macintosh computers. Activities in the MITS can be organized by grade level/concentration and/or referenced to outcomes and goals. The MITS system breaks out activities first into their respective performance indicators and enabling outcomes. The system produces index cards for all activities identified during searches. Once selected, activities can be called up in Microsoft Word or Works. Each activity includes basic information about its objectives, presentation, development, and content, as well as a student activity pack. The Hypercard's two main limitations—that it is not cross-platform and not in color—have been solved by using the Macromedia-developed program Authorware, which can run on Windows/DOS or Macintosh computers, and by using the program called Oracle Media Products, which appears to have all the characteristics of Hypercard with color. (Sample screens from the MITS are included.) (MN)

Identifiers—*Southeastern Regional Voc Tech High School MA

Southeastern Regional Vocational-Technical High School located in South Easton, Massachusetts, and which serves approximately 1,300 students from multicultural backgrounds and various socioeconomic communities, is currently using several types of interactive instructional technologies. The school's graphic communication program is a laboratory with state-of-the-art tooling, and its computerized office technology program uses IBM computers that are networked through the Novell system, allowing students to work dependently and independently in three settings: medical, legal, and general. Students in the school's health services programs use CD-ROM to learn medical technology; robot dolls with interchangeable HyperCards allow for simulations of illness and irritability. The school's science laboratories use laser discs and a video lab system that provides instructors with Flexcam cameras and microscope adapters for interactive television laboratory applications. Teachers at Southeastern have access to several graphics workstations that help them prepare/present stimulating arrays of interactive lessons. The students and teachers who use the new interactive instructional technologies are excited by its prospects and are learning the immediacy of interactive technology. The teachers have become facilitators, and the students have become fine-tuned apprentices ready to accept the challenges posed by a rapidly changing society. (MN)

Identifiers—*Wisconsin

This guide contains the materials required to teach a 36-hour program of competency-based instruction designed to meet the needs of teen single parents who require additional skill building before entering the job market or a job training program. The course is divided into 4 learning modules that cover 18 competencies as follows: taking responsibility for oneself (assessing self-esteem and self-talk, making transitions, maintaining wellness, understanding one's legal rights); communicating effectively (developing effective verbal communication and listening, maintaining effective behavior); balancing family, school, and self (managing stress, time, and finances; developing a personal support system; and nurturing children); and skills to enhance effectiveness (developing self-motivation, making appropriate and realistic decisions, accessing role models and mentors, attaining/enhancing basic academic skills, and understanding differences in the work force). Each module contains some or all of the following components: list of materials provided for each competency; overview of the content addressed in each section; list of additional resources; background information about each topic, including outlines for instructors, student handouts, and transparency masters; and learning activities. Also included are strategies for conducting class discussions and learning activities and lists of teen barriers to education, employment, and empowerment and skills required for the workplace. (MN)

Identifiers—Secretaries Comm on Achieving Necessary Skills, Wayland Baptist University TX

A strategic planning model for planning and conducting outcomes assessment was developed and implemented at Wayland Baptist University in Lubbock, Texas. First, the Secretary's Commission on Achieving Necessary Skills (SCANS) model was used to survey 100 undergraduate students regarding their perceptions of skills they would need after graduation. The SCANS survey findings were used during implementation of the following seven-step model planning process: select planners for the outcomes assessment; assess strengths, weaknesses, opportunities, and threats; conduct a thorough needs assessment and identify desired outcomes; establish administrative, methodological, feedback, and component strategies; design and/or identify appropriate instruments, strategies, and methods of data collection; gain acceptance for the assessment agenda from partners and internal/external constituencies; and gain commitment of resources and es-

tablish joint planning processes for the future. After analysis of the assessment findings, plans were formulated to develop the following: student orientation course to prepare students for Wayland's degree program and for outcomes assessment; capstone course for all graduating seniors; and objectives and success criteria for the university and each of its units/divisions. The process of collecting and using outcomes assessment data to improve Wayland's programs has already begun. (Appended are transparency masters detailing the model and the survey findings and outcomes assessment surveys/checklists.) (MN)

Descriptors—*Educational History, *Educational Legislation, *Educational Practices, *Educational Trends, Postsecondary Education, Secondary Education, *Technology Education, *Vocational Education

This book provides an overview of the history and development of vocational and applied technology education. It includes a brief account of the origin and early forms of education for work, the various experiments for including education for work into the schools of Europe, the introduction of apprenticeship in the colonial period, the development of education for work in U.S. schools prior to the passage of the Smith-Hughes Act of 1917, and the evolution of federal legislation that has shaped vocational and applied technology education. Emphasis is placed on legislation for special populations, and vocational student organizations—essential components of each of the vocational and applied technology education programs. Ten national student organizations are profiled. Each of the seven chapters of the book includes objectives, a self-assessment, and activities. Two appendices contain legislative references and a chronological chart summarizing the legislation and history of vocational education. The book contains 132 references. (KC)

This document, which is intended for curriculum managers at British further education colleges, presents guidelines for developing and implementing a college assessment policy based on the principle that the objectives of all assessment procedures and policies are as follows: enhance the assessment provision within colleges; ensure that assessment is consistent and fair to all students; allow colleges to monitor their assessment provision; and provide clear evidence for external bodies. Discussed in part 1 are the following aspects of developing a college assessment policy: principles and assessment entitlements in operation within a college; the assessment stages for students from entry to exit; the assessment processes used within colleges; and quality assurance and control procedures for monitoring assessment practice. Part 2 contains codes of practice defining cross-college provision for the following: initial assessment; accreditation of prior learning; core skills assessment; recording of

achievement; and access to fair assessment. Examined in part 3, which focuses on implementing policy and codes of practice at the program level, are the following: assessment entitlements and regulations; assessment planning; and assessment design and grading criteria. Appended are the following: national body requirements; sources of information about assessments and audits; and sample auditing questions. (MN)

Identifiers—*Great Britain, National Vocational Qualifications (England)

Between February and July 1995, Great Britain's further education (FE) sector was examined to gather information for use in making policy decisions regarding FE. The major phases of the project were as follows: development of an occupational map by research and interviews with individuals involved in administering and delivering FE services; development of a functional map based on information gathered during project team meetings, steering group and regional practitioner workshops, and feedback from sector organizations/colleges; and coordination of the functional map with existing national standards by identification and collation of existing standards to identify gaps. The resultant occupational map included information about the following aspects of the FE sector: jobs/job titles; the FE sector as a part of Great Britain's labor market; employment in the subsectors of FE; qualifications and staff development; initial teacher training, other service qualifications; support staff; other staff development; numbers of qualified staff; FE in Scotland; adult education, and trends/changes in the sector. Included in the functional map was information about values in the FE sectors, the functions of the key areas of FE, and overlaps or connections with other sectors. (Appended is information about the project objectives and methodology and the FE sector's size and scope.) (MN)

Identifiers—Australia (New South Wales), *TAFE (Australia)

This report summarizes the results of a project to

develop a professional competence description for teachers in technical and further education (TAFE) in New South Wales to inform the initial and continuing educational needs of the profession. Chapter 1 discusses the conception of competence that underpins professional practice and includes a brief summary of the literature that has addressed teacher competence. Chapter 2 explores the contexts in which professional practice occurs in the TAFE environment and outlines the problems associated with drawing distinctions between the competence required of beginning and more experienced TAFE teachers. Chapter 3 outlines the research methodology used in the collection of data to develop the competence descriptions, including a workshop, questionnaire, memorable incident interviews, extended workplace interviews, and a literature review. Chapter 4 outlines the professional competence description. The description is divided into three domains of practice: adult teaching and learning, professional practice, and organizational development. Each domain is divided into a number of practice areas and includes a statement that indicates the knowledge base that underpins practice in these areas. Each practice area is described using three components: action, example, and performance guide. Appendixes show the results of the modified functional analysis, questionnaire schedule, semistructured guides for interviews, and annotations of 30 references. (YLB)

This conference report provides summaries of presentations of country case studies from a project to investigate factors that impinged upon the status of technical and vocational education (TVE) in Asian and Pacific countries. The report includes the case study project terms of reference, a list of delegates, and agenda. Summaries follow of the case studies from these countries: Australia (Peter Bruhn); Bangladesh (Adbur Rafique); China (Zeng Zida); Fiji (Nelson Delailomaloma); India (Arun Mishra); Indonesia (Mohamad Bakri); Japan (Muneharu Iwamoto); Republic of Korea (Taeck-duck Kim); Malaysia (Hee Tieng Fok); Pakistan (S. Zaheer A. Gillani); Thailand (Siripon Choom-nom); and Vietnam (Nguyen Minh Duong). "Summary of Key Issues Identified in Country Case Studies" (Peter Bruhn) is followed by nine recommendations: strategies to innovate TVE systems to cope with changing demands of the labor market caused by national economic development; policies to promote close linkages between TVE institutions and industry; allocation and use of financial resources to support TVE; measures to improve teacher quality; efforts to include entrepreneurial orientation and skills in TVE; procedures to promote articulation between TVE and the education system; ways to improve career guidance and counseling; policies to improve the participation of special social groups in TVE; and development of TVE in the informal sector. The working group report on entrepreneurial skills for small business exemplary curriculum concludes the report. (YLB)

A project considered issues that might contribute toward raising the status of technical and vocational education (TVE) in Asia and the Pacific region. It also provided a review of TVE in Australia, Bangladesh, China, Fiji, India, Indonesia, Iran, Japan, Republic of Korea, Malaysia, Pakistan, Thailand, and Vietnam. Researchers involved in the project endeavored to provide a number of examples of best practice that might act as models for other countries desiring to improve the status of TVE. The countries showed considerable variation with regard to their stage of development, country economic conditions, the state and approach to the provision of TVE, and the problems that affected these countries. Issues addressed in the case studies included strategies to innovate TVE systems to cope with changing demands of the labor market caused by national economic development; policies to promote close linkages between TVE institutions and industry; efforts to include entrepreneurial orientation and skills in TVE; measures to improve teacher quality; procedures to promote articulation between TVE and the education system; and policies to improve the participation of special social groups in TVE. These factors were found to affect the status of TVE: articulation, recognition of learning, broad based training, curriculum, quality, teachers, industry linkages, and duplication. (The report begins with lists of researchers and the case studies and concludes with the recommendations.) (YLB)

Identifiers—*Australia

The realization of the need for reform in Australia's vocational education and training (VET) system stems largely from changing economic circumstances and a changing industrial relations environment. The reforms are intended to provide the following: national coherence in training arrangements and outcomes, improved quality and more widespread provision, greater flexibility in training delivery, a stronger focus on the needs of industry, participation by disadvantaged groups, and increased public recognition of the value of training. A central aspect of the reforms is the establishment of a competency-based training system. The National Training Reform Agenda has established the directions for future development of VET in Australia. Components of the new system include the following: competency-based training; development of National Competency Standards; Australian Standards Framework; Australian Qualifications Framework; National Framework for Recognition of Training; development of training curriculum; flexible delivery of training; convergence of general and vocational education; and increasing the involvement of young people in education and training. Other important aspects of

the new national training system are the promotion of closer linkages between vocational education institutions and industries and improved participation of special social groups. (Illustrative best practice examples show the new system in action. Appendixes contain a glossary and 58 references.) (YLB)

The National Council for Skill Development and Training and the Bangladesh Technical Education Board (BTEB) determine the technical vocational education and training (TVET) policy guidelines and implementation strategies. The TVET programs run by the government agencies, nongovernmental agencies, and private institutions are nonstandard and nonuniform except for the vocational training institutes and technical training centers. The TVET system is quite inadequate to meet the internal job market and overseas employment demand for skilled workers. The National Skill Standard (NSS) classification is not in operation in the job market. The main thrust of TVET reform is the introduction of NSS both in the job market and in the training institutions. Significant issues that require attention are as follows: (1) a large-scale unmet demand for skilled labor in the internal job market and for overseas employment warrants strengthening of TVET facilities; (2) NSS classification should be established and put into operation in the internal job market and for overseas employment; and (3) the TVET system should be articulated with the general stream of education. (Appendixes include the NSS classification, and tables detailing gross domestic product and employment and demand for skilled workers. Contains 18 references.) (YLB)

Identifiers—*China

Since the early 1990s, China's government has followed a socialist market economy system. Accordingly, the technical and vocational education (TVE) should be restructured to meet its needs. Reform of the TVE system has four aspects. First, reform of the planning system includes a move from a central plan of enrollment to planning according to local needs, a move from government assignment of jobs to students seeking their own jobs, and a move from total government funding to mixed funding from government, fees from students, donations

from enterprises, and profits from school-run enterprises. Second, reform of the administration system involves a shift from TVE schools set up by government departments to the encouragement of trades, enterprises, social organizations, and individuals to set up and run TVE schools; from assigning graduates to jobs only in their training areas to allowing them to seek jobs in other fields; and encouragement of more schools to set up school-owned enterprises. Third, readjustment of specialties and curricula by vocational schools to reflect labor needs, such as setting up or adding such specialties as tourism, hotel service, cosmetology, and information services in cities and multicultivation, repair services, construction, and restructure specialties in rural areas. Fourth, reform of the instruction process includes introduction of competency-based education, implementation of the skill-oriented certificate for workers, and qualification certification. (YLB)

Identifiers—*Fiji

The Fiji economy has undergone structural transformation as the importance of agriculture, construction, social and community services, finance, and insurance declined, whereas that of hotels and catering, transportation, communication, and mining rose. Capacity utilization, including absorption of already trained and educated people into vacancies created by emigration, continues to allow growth in the short term; new investments are needed in manufacturing, tourism, and agricultural activities. The University of the South Pacific provides vocational training through various short courses. On the local scene, the few vocational training institutions attempt to conform to overall objectives of the education sector and provide training in a varying range of disciplines and at different levels. These institutions include the following: Fiji Institute of Technology; Fiji National Training Council; Telecommunications Training Center; Fiji College of Agriculture; Montfort Boys Town; Garments Fiji Limited; Fiji Forestry School; and Center for Appropriate Technology and Development. Much job-specific training is undertaken in house and on the job by most of the larger employers. Most institutions issue their own certificates of qualification. A major hurdle in the modernization of technical and vocational education and training is the heavy emphasis on the processes of training in a situation where there are no firm policies to determine the direction of training. (Appendixes contain data tables and a list of 12 references.) (YLB)

Identifiers—*India

Education has a place of high priority on India's development agenda. The technical/vocational education (TVE) system is multisectoral with each ministry responsible for labor force development in that sector. The TVE programs in the formal education system are either state delivered or financed. The higher secondary vocational education program is the emerging mode for skill training for informal and unorganized sectors and aims to the educational requirements for self-employment. Technician education is primarily the responsibility of the polytechnic; the Ministry of Labor looks after craftworker and apprenticeship training. Educational policy formulation is a complex exercise, carried out at many levels by all concerned agencies. India has passed less educational legislation than many other countries. Steps being taken to improve TVE include a major World Bank-financed scheme that addresses the present weaknesses. TVE problems are identified by public officials, voluntary organizations, mass media, and education. Future directions of improvement are as follows: introduction of first degree-level vocational courses; internal resource generation through the vocational program outreach studies in schools; creating and expanding the open learning system for greater flexibility in delivery and for wider outreach, and effective linkage with industry and the world of work; an entrepreneurial orientation to TVE; and articulation between TVE and general education. Identifiers—*Indonesia

After its independence in 1969, Indonesia studied and analyzed its previous colonial system of technical and vocational education (TVE) and took steps to overcome the shortcomings. TVE was required to provide expansion of work opportunities and industrial development to promote national development. Until 1989, attention was given to further improve TVE and increase its quantity, although the main mission was still increasing student enrollment. As part of quality improvement, the curriculum was developed and improved, the number of teachers was increased, new buildings were constructed, and books and workshop equipment were purchased. "School integrated development" as a new strategy for quality improvement was introduced in 1989. Efforts were intended to increase the efficiency and effectiveness of the school institution. This approach demanded all activities of school elements be interrelated as a system. Students, curricula/programs, teachers, facilities, and graduates were improved, developed, and renovated simultaneously in a system in which they influenced each other. Each school was encouraged to establish production units and closely link with industry through partnerships. The most recent development of the close link between TVE schools with industry was implementation of the "dual system" in which parts of the curriculum were conducted in industry in a day- or block-release system. (Appendixes include a glossary, data tables, and organizational charts.) (YLB)

The technical and vocational education (TVE) system in Iran suffers from a lack of social status in comparison to academic education. Recent and future planning is directed toward changing the existing ratio of approximately 10:90 (TVE in comparison to academic) at the secondary level to 50:50 by the end of the second 5-year plan. The lack of trained TVE teachers is one of the most important obstacles that TVE is facing. Nonformal and formal TVE teacher training institutions and the Union of Universities of Technology's (UUT) Technical and Vocational Teacher Training School are acting to train TVE teachers. To implement and complete its second 5-year economic development plan, Iran must train 35,000 technicians and 120,000 trainees by 1999 in the TVE system. To achieve these goals, two major policymaking organizations have been formed: Higher Council for Educational Planning (HCEP) and Supreme Council for Technological Education (SCTE). Practical steps taken so far include the following: establishment of the UUT, which aims to provide common facilities and linkage between industry and educational institutions; incorporation of TVE in the second 5-year plan; an international seminar on technological education; and establishment of teacher training institutions. To ensure a successful path for the future development of TVE in Iran, the social status of the TVE system and its graduates must be raised. (YLB)

Identifiers—*Japan

In the course of Japan's economic progress, remarkable changes have occurred in the structure of industry and employment. Workers are in extremely short supply in such occupations as mining, manufacturing and construction, services, transportation and communication, sales, and professional and technical. On the basis of recommendations of the Central Council for Education, the Monbu-Sho (the Ministry of Education) is now considering specific measures for upper secondary education reform. Three policy measures are to be pursued intensively: the reform of the school and course system, the improvement of the methods and content of education, and a revision of the selection process for admission to upper secondary school. These measures have been implemented in 1993, among them the creation of a new course called the "integrated course" in which students have freedom in course selection and career guidance is offered. The Monbu-Sho is investigating the training of technicians in high schools and aims to develop a vocational education plan for the future. Strategies to innovate technical and vocational education sys-

tems to cope with the changing demands of new technologies include the following: improvement in instructional strategies and content of information technology subjects; development of an electromechanical engineering course; and incorporation of managerial and system technologies into vocational courses. Measures are also being taken to promote vocational education and improve teacher quality through staff development. (YLB)

Identifiers—*Korea

Korea must develop a new policy framework to sustain its economic development. Democratic principles, such as voluntary participation and creative initiatives by the private sector, should replace government guidance and control as the economy's engine of growth. Major goals of the new economy are as follows: promotion of industrial structural adjustment; establishment of rules for fair competition; promotion of technology development; development of the information industry; development of small and medium-sized firms; development of the agricultural and fishery sectors; reform of vocational education and labor relations; and efficient use of energy and resources. The vocational system training has been shaped and initiated mainly by the government as part of outward-looking economic development strategy. As the Korean economy has grown and undergone structural change, the demand for authorized vocational training has increased. Issues include entry workers without proper vocational qualifications, significant change in the gender of the work force, and few opportunities for vocational training for the handicapped. Future policies need to address the lack of skilled workers and human resource development that reflects individual needs. Strategies to reform the vocational training system include establishment of a technician training system, a career education system, modular instruction, a dual system in technical high school education, and school-industry cooperation. The economic profile of Malaysia has changed from an economy mainly based on agriculture and the production of tin ore to a more balanced economy with continuing growth in the manufacturing and industrial sectors. Educational programs need to be upgraded and improved, particularly the direc-

tion and development of technical and vocational education (TVE). The TVE system has responded accordingly. The tremendous growth in TVE facilities is in accordance with the increasing demand in the manufacturing and industrial sectors. The uplifting of the image of TVE is due to the corresponding increasing importance of employment in the industrial sectors, government's efforts at promoting TVE, and the changing nature of VTE programs. The government has been actively involved in the continued development of TVE programs. A cabinet committee assessed needs of TVE and recommended broad policy reforms to strengthen the current educational and training delivery system and improve the effectiveness and efficiency of skills training. The Ministry of Education has initiated programs promoting close linkages between VTE institutions and industries. Such linkages have been strengthened with the introduction of the "Time Sector Privatization Policy" plan that allows industries and the public to use training facilities for a fee during free times. (Three such TSP programs are included as case studies.) (YLB)

This report provides a general overview of technical and vocational education in Pakistan, with information on the country's economy, climate, population, and culture. It summarizes the history and present practices of these types of education in the country and suggests measures to improve the quality of teachers and instructors. Sixteen appendixes present tables of information on vocational education programs in the country. Some of the information provided in this overview includes the following: (1) at the time of Pakistan's independence in 1947, there were only two engineering colleges, a few vocational institutions, and no polytechnics; (2) at present, 45 polytechnics, 11 colleges of technology, and more than 400 vocational institutions have been established, with plans to double that number by the year 2002; and (3) much emphasis is being put on improving the quality of teachers and educational administrators. The 1994 Work Program of the European Centre for the Development of Vocational Training reflected two priority areas of activity—qualifications and vocational training systems—and the expectations concerning the outcome of these activities at the European Union (EU) level. Projects carried out under the qualifications priority area had three aims: (1) to shed light on the coverage of and need for vocational qualifications; (2) to set up or improve information systems on qualifications within Member States or at EU level; and (3) to explore how companies draw up training programs. One

section of the work carried out under the heading of vocational training systems was concerned with producing a continuous flow of up-to-date information on the structure, functioning, and development of the vocational training systems in the Member States through publication of 12 national monographs. A number of projects analyzed problems arising from the interactions between initial training systems, employment, and the labor market. Analysis of the need for vocational counseling among different categories of young people was completed. The project also sought to improve and strengthen cooperation between vocational training research institutions. Information, documentation, and publication services were also provided. (Appendixes include data tables, diagrams, and lists of Management Board members, staff, and 1994 publications.) (YLB)

Aselin, Susan B. Frantz, Nevin R.
Collaborative Instructional Leadership for Workforce Preparation of Youth.

Pub Date—Dec 95

Note—9p; Paper presented at the American Vocational Association Convention (Denver, CO, December 1995).

Pub Type—Opinion Papers (120) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Cooperative Planning, *Educational Cooperation, Graduate Study, Masters Degrees, *Masters Programs, Program Development, Program Implementation, Secondary Education, Special Education, Special Education Teachers, Special Needs Students, Teacher Improvement, *Team Teaching, Teamwork, Vocational Education, Vocational Education Teachers

In an effort to support the public schools' initiatives to develop effective schools for all students, particularly those who are work bound, the College of Education at Virginia Polytechnic Institute and State University instituted a graduate program aimed at preparing collaborative instructional leaders. The major goal of the program was to develop a team of instructional leaders from academic, vocational, and special needs subject areas that would collaborate in new approaches to teaching and learning for workbound students in their schools. A group of four faculty representing the areas of secondary, special needs, vocational education, and school leadership formed a cooperative partnership in Fall 1995 to plan and deliver the program. A Master's program was developed that would be delivered off campus. A common curriculum with flexibility to pursue either a Master's degree in curriculum and instruction or vocational and technical education was prepared. The proposed program was shared with the superintendents of schools and their staff responsible for the academic, vocational, and special needs programs in the local school division. A group of 46 teachers representing 8 local school districts were chosen to participate. The first phase of the program was aimed at building collaborative team skills and a knowledge base about work force preparation programs, academic course content, and educating special and diversified student populations. Two additional phases were planned. (YLB)

Imrie, Brad And Others
Commitment to Higher Vocational Education.

City Univ. of Hong Kong.

Report No.—ISBN-962-442-069-6

Pub Date—Jun 95

Note—209p.

Pub Type—Historical Materials (060) — Reports - Descriptive (141)

EDRS Price - MF01/PC09 Plus Postage.

Descriptors—Colleges, *Educational Certificates, *Educational Development, Educational Quality, Foreign Countries, Higher Education, Student Certification, *Vocational Education

Identifiers—*Hong Kong

This publication is a history of the College of Higher Vocational Studies (CHVS) since it was established in 1991 and provides commentary on developments in higher vocational education in Hong Kong during a period of unprecedented change and development in the provision of the Higher Diploma. "Principal's Diary" (Bradford Imrie) describes the significant first week in January 1993. "CHVS Commitment" (Bradford Imrie) provides an overview of the achievements of CHVS during a period of rapid growth and of considerable institutional change. More detail can be found in the sec-

tion on selections from the "College Memorandum (Extracts) 1991-95." The three CHVS, "Annual Reports (Extracts)" also give an overview. Seven submissions provide insights into various issues that have been addressed since 1991: "Engineering: Professional and Vocational"; "Governor's Address at the Opening of the 1992-93 Session of the Legislative Council, Proposals: Vocational Education" (Christopher Patten); "Critical Appraisal of the Functions of the CHVS (1991-92)"; "Submission to the University and Polytechnic Grants Committee of Hong Kong: Higher Education 1991-2001"; "Teaching and Learning Quality Process Audits" (Bradford Imrie); "Assessment of Teaching and Learning Quality"; and "University and Polytechnic Grants Committee Review of Development of Higher Education in Hong Kong-Sub-Degree Work." Nine papers are included: "Assessment for Quality in Vocational Education"; "Marketing Higher Diploma Courses in the Hong Kong Context" (Dominic Chan, Bradford Imrie); "Higher Vocational Education in Hong Kong" (Shantil Patel, Bradford Imrie); "Professional Standards: Judgements of Performance and the Rights of Students"; "Binary Policy in Higher Education-Hong Kong and the United Kingdom"; "Labor Market Considerations in Hong Kong: Developments at the Higher Vocational Level"; "International Recognition of Vocational Qualifications"; and "International Cooperation with Higher Vocational Qualifications: A Case Study." The final section is the 1995 edition of College Information Leaflets by Adeline Lau and Bradford Imrie. (YLB)

Imrie, Bradford W.
International Co-operation with Higher Vocational Qualifications: An Example.

Pub Date—Dec 95

Note—14p; Paper presented at the American Vocational Association Convention (Denver, CO, December 1995).

Pub Type—Speeches/Meeting Papers (150) — Reports - Descriptive (141)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Cost Effectiveness, *Educational Certificates, *Educational Cooperation, Foreign Countries, Higher Education, *International Cooperation, International Educational Exchange, Job Skills, *Student Certification, Technical Institutes, Vocational Education

Identifiers—*England, *Hong Kong

An initiative was undertaken to develop cooperation with higher vocational qualifications between two "new" universities that were formerly polytechnics: City University of Hong Kong (CUHK) and the University of Northumbria at Newcastle (UNN) in England. The higher vocational qualifications were the Higher Diploma (HD) from CUHK and the Higher National Diploma (HND) from UNN, accredited by the Business and Technology Education Council (BTEC). There were two aims: to obtain international recognition for the HD and to provide HD graduates with the opportunity of concurrent registration with BTEC to obtain the HND. Issues that were discussed in regard to implications for students/graduates, staff, and for CUHK included the considerable cost-benefit for the students. Assessment reporting requirements meant additional work for staff and students, although this would be offset against revenue and the less tangible benefits potentially available from international cooperation. It was apparent that there was a need to develop worldwide systems for recognition of higher vocational qualifications that represented capacity outcomes essential for social and economic development, particularly in developing countries. CUHK recommended that the offer of a Memorandum of Cooperation should not be accepted. (Contains 16 references.) (YLB)

Imrie, Bradford W.
International Recognition of Vocational Qualifications.

Pub Date—May 95

Note—13p; Paper presented at the International Vocational Education and Training Association Conference (South Africa, May 1995).

Pub Type—Speeches/Meeting Papers (150) — Reports - Descriptive (141)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Cost Effectiveness, *Educational Certificates, *Educational Cooperation, Foreign Countries, *Higher Education, *International Co-

operation, International Educational Exchange, Job Skills, *Student Certification
Identifiers—Australia, England, European Community, *Hong Kong

Certain issues are relevant to the international recognition of vocational qualifications: (1) the assumption that each country does or should value vocational education and training; (2) the quality of the national system and the implications for international recognition of qualifications, including recognition of the accrediting and awarding bodies; and (3) quality assurance and assessment systems being developed in various countries that will contribute to international recognition of qualifications and be used by countries to monitor and judge qualifications from other countries. Clearly, the policies represented by the European Community (EC) Directives will have far-reaching effects as the EC network expands. As part of the EC, the United Kingdom's National Vocational Qualifications Framework will also have a strong influence internationally through the network of Commonwealth countries. Three bodies offer the Higher Diploma (HD) in Hong Kong. A proposal for a memorandum of cooperation whereby HD students would be entitled to a degree by the University of Northumbria at Newcastle was declined. Overseas universities offer programs in Hong Kong that recognize higher vocational qualifications and with conversion courses designed for HD entry. The role of the International Vocational Education and Training Association should be that of a change agent that works with other bodies to ensure more recognition and support is given to higher vocational education. Crocker, Robert E. And Others
Learning Style, Brain Modality, and Teaching Preferences of Incarcerated Females at the Pocatello Women's Correctional Center.

Pub Date—4 Dec 95

Note—14p; Paper presented at the American Vocational Association Convention (Denver, CO, December 4, 1995). Research funded by the Idaho Commission on Women's Programs.

Pub Type—Reports - Research (143) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Adult Education, *Adult Learning, *Brain Hemisphere Functions, *Cognitive Style, Correctional Institutions, Educational Research, Females, *Prisoners, Student Attitudes, *Teaching Methods

Identifiers—*Pocatello Womens Correctional Center ID

A study identified the learning style preferences and brain hemisphericity of female inmates at the Pocatello Women's Correctional Center in Pocatello, Idaho. It also identified teaching methodologies to which inmates were exposed while in a learning environment as well as preferred teaching methods. Data were gathered by the Learning Type Measure to determine preferred learning style, the Hemispheric Mode Indicator to determine brain hemisphericity, and the Q-Sort method to identify teaching method preferences. Participants also provided information regarding teaching methods to which they were exposed most during their education. Sixty-three inmates volunteered to participate. Hands-on classes were the obvious preference in teaching methods. The majority of the participants were right brain (56 percent) and were type one and type four learners (64 percent). Implications from these findings were as follows: hands-on type classes should be a point of focus for the institution where the study took place and should become a strong consideration for other similar institutions; kinesthetic/tactile activities should be considered as having great value and be included in curriculum; and much attention should be given to lesson development that is kinesthetic/tactile in nature. (Appendixes include methodology task list, demographic information questions, and Q-Sort recording sheet.) (YLB)

 Identifiers—*Manual Training Schools

John Runkle, president of the Massachusetts Institute of Technology (MIT), viewed the Moscow Imperial Technical School exhibit at the Philadelphia Centennial Exposition of 1876 and saw the Russian method of manual training as the answer to the dilemma of combining theory and practice in engineering instruction. On August 17, 1876, shops in which all the mechanic arts needed by prospective engineers would be taught were established at MIT. As a result of the publicity provided by Runkle, manual training schools took root across the United States. The two most influential were in St. Louis (Missouri) and Chicago (Illinois). At Washington University, Calvin Woodward established the Manual Training School. His method of organizing instruction was so attractive that the St. Louis public schools took up manual training. At the time of its inception, the Chicago Manual Training School was the only independent educational institution of its kind in the world. Due to opposition from traditional educators who subscribed to faculty psychology (the theory that the brain consisted of faculties that could be strengthened through mental training) and who controlled the content of public education, manual training took hold first in private schools and at the elementary education level. Forces contributing to the demise of manual training were its association with the discredited theory of mental training, the novelty effect, and the increased demand for skilled workers and vocational education. (Contains 15 references.) (YLB)

Vocational Education Influence on Underemployment in Taiwan, Republic of China.

Pub Date—2 Dec 95

Note—23p.; Paper presented at the Annual Meeting of the International Vocational Education and Training Association, American Vocational Association Convention (Denver, CO, December 2, 1995).

Pub Type—Speeches/Meeting Papers (150) — Reports — Research (143)

EDRS Price — MF01/PC01 Plus Postage.

Descriptors—Employed Women, Females, Foreign Countries, Males, *Outcomes of Education, Secondary Education, *Underemployment, Unemployment, *Vocational Education, *Vocational Followup

Identifiers—*Taiwan

A study to identify the influence of vocational education on an individual's underemployment analyzed data from a Taiwan labor use survey conducted in May 1993. Data were restricted to 9,415 respondents who were currently employed, aged 20-65, and not in the army; who had participated in general or vocational high school education; and for whom all data were complete. Findings indicated the following: males found full-time employment more easily; male vocational business high school participants were less likely to be underemployed than male general high school participants; younger people were less likely to be underemployed than those above age 40; and married women had a higher probability of being underemployed than single women, whereas married men had a higher probability of becoming fully employed than single men. Living in a region with a high unemployment rate made female and general high school participants more likely to become underemployed. Women or general high school participants who lived in a municipality were more likely to be fully employed than their reference groups who lived in rural areas. The probability of being underemployed was higher for workers in the service sector than those in the industry sector. The probability of being fully employed was higher for workers in a large company. Men or general high school participants who had changed jobs in the last year had a higher probability of becoming underemployed. (Appendixes include 11 references and 5 data tables.) (YLB)

Automated Student and Adult Learner Follow-up Study. Final Report for Program Year 1994-1995.

Texas State Occupational Information Coordinating Committee, Austin.

Spons Agency—Texas Higher Education Coordinating Board, Austin.

Pub Date—20 Nov 95

Contract—55100005

Note—99p.

Pub Type—Reports — Research (143)

EDRS Price — MF01/PC04 Plus Postage.

Descriptors—College Graduates, Community Colleges, Data Analysis, Data Collection, *Graduate Surveys, High School Graduates, High Schools, Salaries, State Programs, Technical Institutes, Two Year Colleges, *Vocational Followup

Identifiers—*Texas

The chief accomplishment of the Texas Automated Follow-Up System in program year 1994-95 was a major expansion of services to secondary education. Data were collected on the results achieved by former seniors who exited high schools in 25 volunteer districts. Because the pilot districts were not necessarily representative of all school districts in the state, the study provided evidence only that automated record linkage techniques were a cost-effective method for gathering information about former students' post-exit achievement. Data analysis did indicate that the labor market offered little hope for high wage employment for former students with only a high school diploma and that there were exceptions. Follow-up was conducted on the entire 1993-94 exit cohort from community and technical colleges, a first-wave employer follow-up on the entire 1992-93 exiting cohort of former community and technical college students, and a second-wave longitudinal study of the entire 1991-92 exit cohort of former community and technical college students. Findings indicated that the training relatedness of employment among community and technical college leavers was an important factor in decreasing the traditional earnings gaps between men and women and former students were likely to experience occupational volatility during the 2 years after leaving a community or technical college. (Appendixes include sample publicity and school district outreach materials, file layouts and data specifications, and 30 endnotes.) (YLB)

Identifiers—Mississippi

This document describes courses in grades 7-9 as well as comprehensive career planning that resulted from the Mississippi Tech Prep Initiative. Career Discovery at the seventh-grade level introduces students to career opportunities and the skills needed for various career paths. Computer Discovery at the eighth-grade level exposes students to a multimedia environment and fundamental computer skills. Technology Discovery at the ninth-grade level enables students to explore technology resources, processes, and systems and select paths leading to career development and advanced education. Course descriptions provide course goals, course outline with unit titles and numbers of days of instruction, and a sample unit of instruction. Components of each sample unit of instruction are a list of competencies and suggested objectives, suggested teaching strategies, suggested assessment strategies, and suggested references. The description of the career/educational plans that are initiated in the 7th grade and updated each year through the 12th grade includes an overview, discussion of key players, and description of key components. Using the Career Orientation and Planning Profile (COPP) and the Myers-Briggs Type Indicator (MBTI) To Strengthen Adult Students' Knowledge of Self and of the Work World.

Pub Date—2 Dec 95

Note—10p.; Paper presented at the American Vocational Association Convention (Denver, CO, December 2, 1995).

Pub Type—Speeches/Meeting Papers (150) — Reports — Research (143)

EDRS Price — MF01/PC01 Plus Postage.

Descriptors—Adult Education, *Career Choice, Career Counseling, Career Education, Career Exploration, *Career Planning, Decision Making, Educational Research, Females, *Job Training, Personality Measures, Personality Traits, Program Effectiveness, Self Evaluation (Individuals), Underemployment, Unemployment

Identifiers—*Career Orientation and Planning Profile, *Myers Briggs Type Indicator

A study worked with three groups of female students to determine whether using the Career Orientation and Planning Profile (COPP) and the Myers-Briggs Type Indicator (MBTI) would enable adults to make better career choices the second time around. The students were women in the Access to Careers and Training (ACT) program for unemployed or underemployed individuals currently receiving or eligible for Aid to Families with Dependent Children. The three groups were a capital city population of 15, an urban population of 10, and a rural population of 12 ACT participants. The capital city group completed only the COPP, the rural population only the MBTI, and the urban group both. The hypothesis was that one of the three procedures would produce a more complete set of plans and identify a more positive attitude toward job seeking and job finding. Data from the three groups were analyzed by comparing the original career choice to the final choice of each participant. Findings seemed to indicate that the treatment that made the most difference was the COPP by itself. Recommendations were as follows: a training session on how to administer and interpret the COPP; more time for the COPP and MBTI; more appropriate matching of the groups; and development of a program including the COPP and MBTI. (Participant comment and a summary of COPP work with adults are appended.) (YLB)

Ferry, Natalie M.

The Use of Reflection-in-Action by Adult Educators: An Inquiry into Schon's Epistemology of Practice.

Pub Date—Nov 95

Note—7p.; Paper presented at the Annual Meeting of the American Association for Adult and Continuing Education (Kansas City, MO, November 1995).

Pub Type—Reports — Research (143) — Speeches/Meeting Papers (150)

EDRS Price — MF01/PC01 Plus Postage.

Descriptors—Adult Education, *Adult Educators, Beginning Teachers, Critical Thinking, Decision Making, Decision Making Skills, Educational Research, Extension Education, Learning Strategies, Master Teachers, *Problem Solving, *Reflective Teaching, Teacher Improvement, Thinking Skills

A qualitative study documented the use of reflection-in-action by adult educators in problematic situations. Its focus was to investigate the mental processes involved in problem solving. Since individuals engage problem situations from a personal conceptualization that is unobservable, qualitative interviewing was used to provide respondents with the greatest opportunity to express their understanding of their decision processes. A standardized open-ended interview protocol with think-aloud problem situations was used to collect data that revealed the individual's inferences and identified salient features of a situation and strategies used. During phase 1, a questionnaire with a problematic situation was sent to 52 novice and experienced extension educators. In phase 2, an interview protocol was used to generate descriptions of individuals' problem-solving processes. Data were inductively analyzed using Strauss and Corbin's (1990) coding process. Five primary themes emerged: definition of problematic incident, generation of solution alternatives, testing-in-action of selected solutions, reaction to incongruence, and reflection-in-action: a learning strategy. Reflective educators, whether novice or experienced, used reflecting-in-action and reflecting-on-action as a means of developing expertise. Results indicated that experience alone was not the master teacher of the reflective process. (Contains 18 references.) (YLB)

Identifiers—"Division of Labor (Household), England, Netherlands, Sweden

Drawing on research from a number of European countries, the contributors to this book present nine detailed studies on women's work spanning 2 centuries and dealing with a variety of work environments. "General Introduction" (Gertjan de Groot, Marlou Schrover) provides an overview of the book's content. "Frames of Reference: Skill, Gender, and New Technology in the Hosiery Industry" (Harriet Bradley) explores the processes that lie behind the devaluation of women's work. "The Creation of a Gendered Division of Labour in the Danish Textile Industry" (Marianne Rostgard) describes how the division of labor once established lived on to become an unquestioned tradition. "Foreign Technology and the Gender Division of Labour in a Dutch Cotton Spinning Mill" (Gertjan de Groot) argues that the gender division of labor was transferred from England to the Netherlands along with the technology. "The Mysteries of the Typewriter: Technology and Gender in the British Civil Service, 1870-1914" (Meta Zimmet) draws on the feminist critique of the literature to explore the introduction and spread of typewriting before the First World War. "A Revolution in the Workplace? Women's Work in Munitions Factories and Technological Change 1914-1918" (Deborah Thom) examines the theory of dilution and substitution. "Gender and Technological Change in the North Staffordshire Pottery Industry" (Jacqueline Sarby) examines factors that influenced and altered the sexual division of labor. "Periodization and the Engendering of Technology: The Pottery of Gustavberg, Sweden, 1880-1980" (Ulla Wikander) seeks to establish general trends and specific periods for changes. "Creating Gender: Technology and Femininity in the Swedish Dairy Industry" (Lena Sommarstedt) explores how women retained for so long but eventually lost their control over mechanized dairy production. "Cooking Up Women's Work: Women Workers in the Dutch Food Industries 1889-1960" (Marlou Schrover) shows technological change influenced women's work but was seldom the direct reason for the regendering of work. An index is appended. (YLB)

Descriptors—Adult Basic Education, *Adult Literacy, Course Content, *Inservice Teacher Education, Learning Activities, *Learning Disabilities, *Literacy Education, *On the Job Training, Units of Study, *Workshops

Identifiers—353 Project, Pinellas County School System FL

This document contains three guides for facilitating the three workshops. The guides resulted from a project conducted in Pinellas County, Florida, Public Schools to produce a comprehensive, 18-hour training program and follow-up services for administrators, teachers, and tutors working with adults with learning disabilities (LD) in literacy programs. The program is designed to increase teacher and tutor awareness and effectiveness in providing instruction to adults who have, or suspect they have, learning disabilities. A survey showed that 91 percent of the 98 adult basic education/general education development (ABE/GED) teachers in the county believed that many of their students had learning disabilities and that the teachers would like more information so that they could improve the instruction of LD students. Each of the workshops

focuses on different topics: (1) overview and recognition of learning disabilities; (2) language strategies; and (3) mathematics strategies. Each guide consists of a workshop agenda; workshop preparation instructions; step-by-step instructions for each workshop agenda item; handout, transparency, and flipchart masters; pre- and posttest masters; and workshop follow-up memoranda. A list of 33 agencies, organizations, materials sources, and materials is included. (KC)

To meet the challenge of a workplace shaped by technological change and global competition, employers and employees must identify their mutual interests in dealing with change and work together to plan career development programs that will benefit employers (by improving productivity and competitiveness) and employees (by enhancing their value in the labor market and their employability prospects). Among the steps that employers must take are the following: recognize the partnership between employers and employees in the struggle to stay competitive; provide timely, useful labor market information; provide job information that supports career planning; provide guidance/counseling services; and provide support for employees pursuing their career development plans. Employees must take the following actions: understand the employer-employee partnership and take responsibility for their role in the partnership; stay informed; clarify their motivations and expectations; engage in career planning; and make career development a continuous process. Employers and employees wishing to begin a work-based career development program should do the following: work together; assess their current situation; and seek outside help from local community colleges, trade associations, government agencies, the National Skill Standards Board, and/or other nonprofit organizations. This guide is intended for education and training suppliers, manufacturing extension programs/centers, economic development institutions, and other service providers involved in helping companies become more productive. It explains how to organize and support learning consortia consisting of companies that have come together to develop new capabilities, build their employees' skills, and increase their enterprises' productive capacities. The guide is divided into nine sections each of which deals with one of the following issues in forming a learning consortium: creating a concept; building membership; creating an organization; establishing a mission and goals; assessing needs; developing a program; delivering the program; evaluating the consortium; and building sustainability. Appendixes constituting approximately 50% of the guide include the following: summary of approaches to addressing the nine issues in forming a learning consortium; sample contact information, mission statements, and assessment tools used by consortia; lists of high performance work practices, skills required for effective participation within a learning consortium, and the best practice guidelines of the National Workforce Assistance Collaborative (NWAC) best practice guidelines; lists of 3 resource organizations and 34 print resources pertaining to learning consortia; and lists of NWAC board and advisory group members and products/services. This guide, which is intended for businesspersons and/or labor representatives, contains guidelines and questions for determining whether prospective training providers have the skills to develop/deliver successful employee training programs tailored to a particular firm's needs. The guide is divided into eight sections. Section 1 explains the guide's purpose, defines employee training, and presents an overview of the guide's structure. Instruction on using the checklist is provided in section 2. Section 3 introduces questions pertaining to the following issues, which should constitute the core of an employee training interview: business objective, workplace requirements, employee needs, employee assessments, qualified staff, and evaluation as a way of ensuring training quality. Discussed in section 4 are the types of answers that interviewers should expect from the training providers interviewed. Sections 5 and 6 consist of an interview worksheet and comparison chart for recording/comparing the responses of the different training providers interviewed. In section 7, employee training is discussed within the larger context of work force and workplace change, and other products designed to help small and midsize companies effect change through employee training are listed. Section 8 contains lists of National Workforce Assistance Collaborative board and advisory group members. (MN)

This product checklist, which is intended for businesspersons and/or labor representatives responsible for reviewing/selecting employee training materials, contains a series of questions to use in determining whether employee training products follow best practice and will meet the needs of specific firms and build the productive capacity of their employees. Section 1 explains the checklist's purpose, defines employee training, and presents an overview of the checklist's structure. Instructions for using the checklist are provided in section 2. The actual checklist, which is presented in section 3, includes an annotated listing of the key elements of each of the following steps in the development/implementation of employee training programs: program development, program preparation, curriculum development, instructional development, training staff preparation, program delivery, and training and program evaluation. A comparison chart that contains space to compare the merits of different training products is included in section 4. In section 5, employee training is discussed within the larger context of work force and workplace change, and other products designed to help small and midsize companies effect change through employee training programs are listed. Section 6 includes a list of individuals serving on the National Workforce Assistance Collaborative's board and advisory groups. (MN)

An Evaluation of Tech Prep in Ohio. Year One Final Report.

MGT of America, Inc., Tallahassee, FL.

Spons Agency—Ohio Board of Regents, Columbus.

Pub Date—6 Nov 95

Note—294p.

Pub Type—Reports - Evaluative (142) - Tests/Questionnaires (160)

EDRS Price - MF01/PC12 Plus Postage.

Descriptors—Community Colleges, Consortia, Educational Policy, *Educational Practices, Educational Trends, *Education Work Relationship, Employee Attitudes, Employer Attitudes, High Schools, *Outcomes of Education, Parent Attitudes, Postsecondary Education, Professional Development, Program Effectiveness, Program Evaluation, Questionnaires, Research Needs, School Business Relationship, State Surveys, *Statewide Planning, Student Attitudes, Technical Institutes, *Tech Prep, Two Year Colleges, Universities, Vocational Directors, Vocational Education Teachers, Vocational Schools

Identifiers—*Ohio

In January 1995, a private research firm conducted the first year of a 5-year evaluation of tech prep (TP) in Ohio. State- and consortium-level baseline data about the following were collected: state policies/practices for TP; role of consortia in TP; professional development of instructors/administrators for TP; selected groups' knowledge/attitudes about TP; and impact of TP on current/former students. Data were collected from the following: interviews with 21 consortium coordinators, 22 school district and 22 joint vocational services district representatives, 24 community/technical college and 9 four-year university representatives, 20 business/industry and 11 labor representatives, 10 parents of TP students, and 12 TP students; survey of all 712 students and parents of students enrolled in TP in 1994-95; and survey of 287 business/industry representatives identified by consortium coordinators as individuals familiar with the efforts of local TP consortia. Data from the interviews, the 70 responses to the student/parent survey (10% response rate), and

the 113 responses to the business/industry survey (39% response rate) were analyzed. Issues requiring further study were identified, and the evaluation plans for the remaining 4 years of the study were detailed. (Appendices constituting approximately 75% of this document contain the 14 survey instruments and tallied results.) (MN)

Identifiers—*Correctional Officers, *Florida (Collier County)

The Collier County (Florida) Sheriff's Office has initiated a voluntary career development program for law enforcement and corrections officers holding ranks of lieutenant and below. The career development program is implemented through a systems approach that integrates career planning and individual assessment with performance evaluation, training, education, and compensation. The program's desired outcomes are to increase job satisfaction, improve levels of performance, and promote a healthier organizational climate. All program participants receive individual and group counseling, and all participating supervisors attend 2-day career development and performance evaluation workshops that emphasize supervisors' roles/responsibilities in providing technical and career information and serving as mentors. Participants also undergo an extensive assessment program that includes batteries of tests and self- and peer assessments. The curriculum consists of four core components: academic endeavors; community service; physical fitness; and firearms proficiency. The fifth component, job rotation/special assignment, may also be offered by special arrangement. A system of monetary rewards that is distinct from the agency's eight-step salary schedule is used to reward officers for participating in the program. To date, interest in the career development program has been highest among younger deputies with fewer than 5 years at the agency. (MN)

Identifiers—*Council on Occupational Education, *Quality Assurance

The Council on Occupational Education, Inc. (COE) is a not-for-profit corporation that was established in 1994 to serve as a national accreditor for all providers of postsecondary work force training and education who can meet its standards. The COE has developed a new system of quality assurance for occupational education that emphasizes the following components: occupational skill standards as the basis for program design; skill assessment/certification as the basis for assessing program effectiveness with individuals; and job placement of training recipients as the basis for assessing institutional effectiveness in meeting job market needs. COE's mission is to ensure quality and integrity in career and work force development. COE has proposed working closely with all levels of government. The Council meets regularly with representatives of other national vocationally related accreditors and has a major (although not exclusive) commitment to publicly funded occupational education programs.

In addition to accrediting career and work force development providers, COE also provides the following accreditation-related support services: program quality review; professional development for management and instructional personnel; and distribution of news and information of importance to its institutional members. (Appended are the mission statement, 10 guiding principles, and list of services offered by the COE.) (MN)

Descriptors—Community Colleges, *Educational Benefits, *Educational Change, *Educational Objectives, *Educational Research, High Schools, Literature Reviews, *Program Development, Research Reports, *Tech Prep, Two Year Colleges

Published studies of tech prep were reviewed to identify and assess tech prep's potential for improving secondary-level educational programs in general and in Mississippi in particular. The beginnings of tech prep in Mississippi were traced to community colleges in the late 1960s-early 1970s. In the 1990s, operation of tech prep programs was shifted to high schools in partnership with Mississippi's community colleges. Although tech prep in Mississippi was viewed as having potential value for all students, its greatest contributions to date may have been for the large group of middle-ability students who are estimated to constitute 40-60% of the secondary student body, including some potential dropouts. Like many states, Mississippi has designed tech prep to include hands-on programs in math, science, and communications in grades 7-9 that emphasize problem solving and decision making. In grades 11-12, the emphasis of tech prep shifts to applying academic theory in solving practical problems. Despite substantial differences between the various states' plans for tech prep, most consider helping students see the relationship between theoretical academics and practical problems to be a strong feature. According to the literature reviewed, 35 states either have implemented or plan to implement tech prep programs. (Contains 19 references.) (MN)

Toward the Twenty-first Century: Air Command and Staff College Curriculum from Theory to Practice.

Pub Date—95

Note—22p.

Pub Type—Reports - Research (143) - Tests/Questionnaires (160)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Change Agents, *Curriculum Development, Educational Improvement, Higher Education, *Military Air Facilities, *Military Schools, Military Science, *Military Training, Officer Personnel, Theory Practice Relationship

Identifiers—Emancipatory Learning

Responding to a perceived need resulting from the collapse of the Soviet Union, the dismantling of the Berlin Wall, and the end of the Cold War, the Air Command and Staff College (ACSC) at Maxwell Air Force Base (Alabama) revised its curriculum. Data for the descriptive study were gathered through interviews of the leadership of the school and questionnaires sent to the 75 instructors and 580 students. Responses were received from 44 instructors (59 percent) and 134 students (23 percent). The survey instrument was developed around Grundy's (1987) three fundamental human interests—technical interest, practical interest, and emancipatory interest—to see which of these interests the respondents considered most appropriate to the curriculum. From the interviews, the underlying theory behind the new curriculum was found to be heavily influenced by the practical and emancipatory disposition. From results of the questionnaire, the instructors tend to lean toward a curriculum informed by practical interest. About the same number of students think the curriculum should be informed by the emancipatory disposition as think it is actually technical in the way it is practiced. Most of the students who think the curriculum should be practical in design also think it is practical in practice. A

far smaller percentage of students than faculty think the curriculum is actually designed in an emancipatory way. The curriculum of the school was changed as a result of the efforts of Colonel Warden, the Commandant of ACSC, who functioned as a change agent to overcome the dogma that had been established over a long time. As the school's new curriculum nears the end of its second year, there is a gap between theory and practice but it is not a large one. To satisfy faculty and students, the practical interest should be developed more thoroughly, and the faculty should eventually become more emancipatory in their practice. (The school's vision, mission statement, and objectives and the survey document are included in the report.) (KC)

Descriptors—Developed Nations, Educational Attitudes, Employer Employee Relationship, Employment Practices, Foreign Countries, Labor, Secondary Education, Teacher Attitudes, Values Clarification, Values Education, Vocational Education Teachers, Work Attitudes
Identifiers—Netherlands

Teachers in the Netherlands were asked what their goals are with regard to the development of values related to labor in their students. The study focused on the role of teachers in education—on their opinion about the pedagogical task of education. Differences between general secondary education and vocational education teachers and differences between teachers in different types of schools were studied, along with differences among economics, social studies, career counseling, and subject teachers in vocational education. Data were gathered through a written questionnaire in which teachers indicated on an interval scale how much importance they attached to each of the specified goals related to labor, how much attention they paid to each particular goal, and why they had chosen that goal. Survey results from 415 teachers showed that teachers not only transfer knowledge and skills to their students but also stimulate the development of values related to labor in their students. Attitudes that teachers wished to instill included the following: one's own effort determines success; values related to adjustment to changing labor conditions are important; and one should stand up for him/herself on the job. There were hardly any differences between teachers in the various school types with respect to the factors influencing their choice of goals. Some variations were noted between teachers of various subjects. (Contains 17 references.) (KC)

This manual was written to help educators with little or no experience to create a tech prep program. The guide presents a step-by-step process for planning, development, and implementation of the program. The manual contains 10 chapters organized in 4 sections. The two chapters of the first section introduce tech prep, provide a rationale for tech prep and explain the tech prep program. In the second section, three chapters contain information about the planning phase, explaining the tech prep consortium, defining the tech prep program, and providing organizing tips for the program. The three chapters of the third section covers the implementation phase of a tech prep program, including inservice education for teachers, curriculum changes, and involving business and industry. The final section contains two chapters on implementing the

tech prep program, with information about promotion and evaluation. Four appendixes contain definitions, a list of 19 resources, a tech prep checklist, and a list of core proficiencies. (KC)

This packet contains an instructor's manual, instructor's resource package, and a student workbook for an 18-week course in foods and nutrition for students in grades 10-12. The curriculum has the following goals: to help students apply science concepts and principles to their daily lives; to provide students with accurate information about foods and nutrition as a basis for making informed food choices; to help students build consumer skills and workplace skills; and to heighten student awareness of the global context of food and of the many opportunities in nutrition-related careers. The instructor's manual contains the following: information on measuring student performance gains; required criteria for competency based education; a curriculum and duty and task crosswalk; a basic skills matrix; a profile of training mastery; and one set per unit of an instructor's guide, answers, and test code sheets. The instructor's resource package contains one set per unit of a learning activity package sheet, transparency masters, and written test. The student workbook contains one set per unit of objective sheets, information sheets, assignment sheets, and job sheets. The 11 units of the curriculum cover the following topics: valuing food in your world; examining food, nutrients, and the body; handling and storing food; using recipes; applying food science principles; profiling food products; making healthy food choices; developing consumer skills; planning home-prepared meals; serving and dining etiquette; and exploring careers. Using Assessment Information in Educational Decision Making: A Study of Ohio Vocational Teachers' Assessment Practices.

Pub Date—[Dec 95]

Note—11p.; Paper presented at the American Vocational Association Convention (Denver, CO, December 1995).

Pub Type—Speeches/Meeting Papers (150)—Reports—Research (143)

EDRS Price—MF01/PC01 Plus Postage.

Descriptors—Decision Making, Evaluation Methods, Instructional Development, Secondary Education, Student Evaluation, Teacher Attitudes, Vocational Education Teachers
Identifiers—Ohio

A study was conducted to describe Ohio secondary vocational education teachers' use of student assessment information in making instructional decisions. The target population for the study was all teachers who taught in secondary vocational education programs in Ohio public schools. A questionnaire was mailed to a random sample of 393 secondary vocational education teachers stratified by program area; 290 usable questionnaires (74 percent response rate) were received. The questionnaire asked teachers to indicate the extent to which they use information derived from 6 types of assessment methods in addressing 10 different instructional decisions. The six types of assessment methods were as follows: objective paper and pencil items; informal observations; standardized test scores; performance assessments; portfolios; and essay type items. The 10 decision areas in which as-

essment results are commonly used were the following: plan for instruction; diagnose student weakness; monitor student progress; communicate achievement; motivate students; evaluate instruction; evaluate instructional materials; group students; encourage self-assessment; and assign grades. Teachers rated information provided from performance assessments as being of more use in addressing day-to-day classroom decisions than information obtained from the other five assessment methods. Teachers also relied heavily on objective paper and pencil methods and informal observations. Recommendations included the following: (1) because teachers often use performance assessments, teacher preservice education curriculum should pay particular attention to the development of competence in the use of performance assessments; (2) the Ohio Department of Education should encourage teachers to use standardized test results; (3) further research should be conducted in the area of the use of portfolios in assessment; and (4) further research should be conducted on vocational education teachers' attitudes toward standardized testing and the use of authentic assessment methods. Pub Type—Reports—Research (143)

EDRS Price—MF01 Plus Postage. PC Not Available from EDRS.

Descriptors—Adult Basic Education, Adult Literacy, Educational Benefits, Foreign Countries, Literacy Education, Needs Assessment, Numeracy, Program Effectiveness, Program Evaluation, Student Attitudes, Teacher Attitudes
Identifiers—Northern Ireland

A project investigated the extent to which the current adult basic education (ABE) provision was meeting the needs of participants in Northern Ireland. Interviews were conducted with key individuals from 22 agencies providing adult literacy and numeracy support, selected tutors and managers of ABE (n=62), and 55 ABE students. Students had a variety of reasons for participation, often both vocational and personal. Barriers were mainly dispositional, including the fear of being seen to have ABE needs, of traveling to unsafe areas, and of not being able to cope with course content. Situational barriers included the costs incurred by participation. Child care considerations also affected students' participation and regular attendance. Students gave particular praise to course content, styles of teaching, and teachers' qualities. In contrast to initial assessment and induction guidance, pre-entry guidance was minimal. Participants considered guidance and support while on courses to be excellent. The majority of coordinators and managers of ABE provision felt that, overall, available funding for ABE in Northern Ireland was insufficient. Full-time staff were the best qualified, but most ABE teaching was done by part-time and volunteer tutors with lower levels of relevant qualifications. Benefits included helping improve skills needed at work and increasing promotion prospects, improving the quality of life, and increasing self-esteem. Contains eight references. (YLB)

Implications of Welfare Reform for Workforce Development. Issue Brief.

National Governors' Association, Washington, D.C.

Pub Date—5 Dec 95

Note—16p.

Pub Type—Opinion Papers (120)

EDRS Price—MF01 Plus Postage. PC Not Available from EDRS.

Descriptors—Adults, Employment Programs, Federal Legislation, Job Development, Job Training, Labor Force Development, Program Improvement, State Programs, Welfare Recipients

Identifiers—Welfare Reform

The latest round of proposed state and federal welfare reforms has major implications for state work force development systems. These systems will face new demands generated by the need to help welfare recipients find jobs before they reach the time limits on aid and the need for states to meet the new work participation rates for federal welfare programs. In addition, states may be implementing new work force development block grants at the same time that they are implementing new welfare block grants. The adult education and work force development systems have been playing a central role in welfare reform for some time; however, the newest reforms to the welfare system will mean that states will be required to place many more welfare recipients in jobs or in work activities. Education and job training will not be the principal focus of welfare-to-work programs because most welfare recipients must be in actual jobs or work activities for their participation to count toward federal work participation requirements. These differences mean that policymakers in the adult education and work force development systems will have to rethink the role their programs play in welfare reform. Job search, unpaid work experience, and subsidized jobs will play a much larger role. Many job training courses, such as those at community colleges, may have to be reconfigured to fit into the timeframe of recipients who need such training but who have access to income support for only 2 years. Work force development systems may also be asked to help former recipients stay in jobs or find new ones, or to create work for recipients who are reaching the limits of their aid. All of these welfare-related demands on work force development systems come at a time when federal funding for these systems has been sharply reduced. States may be able to shift some of their current investments in welfare systems to work force development systems to provide job training and income support to families that are now on the welfare rolls. Technology: A New Paradigm for Adult Education

Administrators.

Pub Date—95

Note—9p.

Pub Type—Opinion Papers (120)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Administrator Attitudes, *Adult Education, *Computer Uses in Education, *Educational Administration, Educational Improvement, *Educational Needs, *Educational Technology, Microcomputers

As part of the Michigan Adult Education Inquiry Project, five adult education practitioners from three metropolitan school districts investigated the application of computer technology in adult education administration. The research focused on finding out how technology can assist administrators in a more efficient performance of their duties. Through a literature search, five management functions were identified: planning, directing, organizing, staffing, and evaluating. Three technology applications were applied to refine and enhance the functions of management: computer-based communications; management information system technology; and desktop applications software. Several barriers to implementation of computer technology were identified, such as lack of technology support from the school district for adult education and expecting teachers to teach new software programs without training or the hardware to run the programs. To be successful, adult education administrators need to support access to and use of information and knowledge tools, be willing to train and retrain themselves and their staff, and find creative ways to solve hardware and software shortages. This workbook addresses key issues in the design of an overall strategic planning process and the subsequent implementation process for public and nonprofit organizations. The workbook is divided into two sections. Part I presents an overview of the strategic planning and implementation process and the benefits to be gained by using it. The coverage of the context and process of strategic change includes five readiness assessment worksheets. Part 2 covers each of the 10 key steps of the process in more detail. The 10 steps are as follows: initiate and agree on a strategic planning process; clarify organizational mandates; identify and understand stakeholders and develop/refine mission and values; assess the environment to identify strengths, weaknesses, opportunities, threats; identify and frame strategic issues; formulate strategies to manage issues; review and adopt the strategic plan; establish an effective organizational vision for the future; develop an effective implementation process; and reassess strategies and the strategic planning process. Each step description includes sections on purpose and possible desired planning outcomes, and offers worksheets to facilitate the process. The book ends with listings of resources (brainstorming guidelines, snow card guidelines, a strategic planning workshop equipment checklist, and a conference room set-up checklist); a glossary with 11 definitions; and a bibliography containing nine references. Document Not Available from EDRS.

Descriptors—Adult Education, Change Strategies, Definitions, *Guidelines, Institutional Administration, Mission Statements, *Nonprofit Organizations, Policy Formation, Program Administration, Program Development, *Public Agencies, Public Policy, *Strategic Planning

This book shows how leaders and managers of public and nonprofit organizations can use strategic planning to strengthen their organizations. This expanded edition includes many new examples of successful and unsuccessful strategic planning practices, along with new chapters that address how to implement strategies, how to reassess strategies and the strategic planning process, and how to fulfill the key leadership roles that must be undertaken if strategic planning is to be effective. The book is organized in three parts. Part one introduces the reader to the dynamics of strategic planning. Chapter 1 introduces the concept of strategic planning and why such planning is important for governments, public agencies, nonprofit organizations, and communities. Chapter 2 presents an approach to strategic planning called the Strategy Change Cycle. Chapters 3-10, which make up part two, describe in detail how to apply the approach step by step. Part three includes two chapters (11 and 12) designed to help leaders understand what they will need to do to get started with strategic planning and to make it work. Chapter 11 covers the many leadership roles and responsibilities necessary for the exercise of effective strategic leadership for public and nonprofit organizations. Chapter 12 assesses the strategic planning experiences of the four organizations used as examples; the chapter also provides guidance on how to begin strategic planning. Five resource sections are provided: (1) a model external scanning process; (2) a review of literature on strategic issue identification; (3) process guidelines for using ovals to develop strategic issues maps and advice on how they can be converted into strategy maps; (4) a re-

view of literature related to potential strategies for public and nonprofit organizations; and (5) concepts related to developing a vision of success. The bibliography contains 481 references. (KC)

Descriptors—Academic Education, Adult Education, *Adult Learning, *Inservice Teacher Education, Instructional Materials, *Integrated Curriculum, Labor Force Development, Program Development, Teachers, *Teacher Workshops, Teaching Guides, *Trainers, Training, *Training Methods, Vocational Education

Identifiers—*Secretarys Comm on Achieving Necessary Skills

This guide begins with a rationale for teaching applied academics courses. The next section contains a summary of the following important factors in the Secretary's Commission on Achieving Necessary Skills (SCANS) effort: characteristics of high performance workplaces, lessons offered by high performance schools, guidelines for restructured assessments, outlines of the foundations and competencies determined to be necessary by SCANS, differences between the conventional and SCANS classrooms, SCANS perspective on writing, and a chart of assignments that integrate the SCANS competencies into the core curriculum areas. The next section defines the role of the trainer/facilitator. It lists what facilitators and presenters/trainers do, skills facilitators and presenter/trainers need, and small group facilitation strategies. A section on learning theories/styles covers principles of learning, factors influencing learning, and a self-assessment of one's individual instructional style. The section on concepts of adult learning addresses characteristics of the adult learner, adult learning principles, and teaching adults. The next section describes several teaching/training strategies and methods. A section on workshop/inservice planning provides a checklist for teacher training and information on agendas, breaks, course materials, equipment, evaluations, packets, registration, handouts, facilities, and instruction. Other sections contain sample training agendas, sample lesson plans, "master" sheets for training workshops, and reference and suggested readings. (YLB)

This portfolio establishes the work and the skill levels of learning support students as well as being a vehicle for driving curriculum and establishing achievable work outcomes for these students. The portfolio was developed to give students, parents, and educators the opportunity to work together collaboratively to identify needed appropriate work skills, and to enable the student to display a collection of works that represents the achievement of those skills. The portfolio, the first in a series of three that cover the secondary grade levels, is for grades seven and eight and is geared to culminate in documented employment skills. The portfolio represents sequential growth and development in the areas of career development, vocational development, community work experience, and work habits. The portfolio is divided into the following sections: vocational curriculum-based assessment inventory, mathematics achievement, reading achievement, physical aptitudes, community exposure, work habits, career attitudes and experiences, and career exploration. Each section provides for

assessment and achievement. Transition portfolio forms provide space for identified yearly outcomes and goals. (KC)

Learner Outcomes as Articulated in Adult Education Literature: An Annotated Bibliography.

Pub Date—95

Note—6p.

Pub Type—Reference Materials - Bibliographies (131)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Adult Basic Education, *Adult Education, *Adult Learning, *Andragogy, Citations (References), *Educational Research, *Lifelong Learning, *Outcomes of Education, Program Effectiveness, Program Evaluation, Research Reports, Student Evaluation

This annotated bibliography contains 14 citations of books, papers, and videotapes that pertain to learner outcomes in adult education. The following are cited: "Understanding and Facilitating Adult Learning" (S. Brookfield); "Self-Direction for Lifelong Learning" (P. Candy); "Helping Adults Learn Workshop" (A. Chackerian); "Adults as Learners" (K. Cross); "Learning and Reality: Reflections on Trends in Adult Learning" (R. Fellenz, G. Conti); "Critical Thinking and Self-Directed Learning in Adult Education: An Analysis of Responsibility and Control Issues" (D. R. Garrison); "Patterns of Learning" (C. Houle); "Assessment: Strategies for Adult Undergraduate Students" (C. Kasevorn, C. Marienau); "The Adult Learner: What Do You Expect?" (R. Kegan); "The Modern Practice of Adult Learning" (M. Knowles); "An Update on Adult Learning Theory" (S. Merriam, ed.); "Transformative Dimensions of Adult Learning" (J. Mezirow); "Adult Education: Evolution and Achievements in a Developing Field of Study" (J. Peters, P. Jarvis); and "Learning to Learn across the Life Span" (R. Smith). (KC)

Lessons on Using Internet.

Skagit Valley Coll., Mount Vernon, Wash.

Spons Agency—Washington State Board for Community and Technical Colleges, Olympia.

Pub Date—Jan 95

Note—75p.

Pub Type—Guides - Non-Classroom (055)

EDRS Price - MF01/PC03 Plus Postage.

Descriptors—*Adult Basic Education, *Adult Educators, Computer Oriented Programs, *Electronic Mail, *Information Networks, Information Utilization, Instructional Materials, *Internet

Intended for beginning Internet users and adult basic education instructors, this manual presents a very basic, instructional approach to exploring the Internet, with explicit instructions on what to do, places to go, and interesting things to try. An introduction on getting started is followed by sections on electronic mail, including using the Skagit Valley College network and finding the Internet e-mail option on Windows. Other sections address subscribing to Usenet news groups and listservs and using Gopher as a navigating tool. The next two sections are optional for a beginner. They cover file transfer protocol and the World Wide Web. The next section discusses applications of the Internet for educators and provides a review of some educational resources with related learning skills. The final section lists sources of further information. Appendixes contain the following: guidelines for Internet protocols and "netiquette"; "smileys"; tips for choosing a secure password; Internet contacts by college; glossary of terms for Internet resources; and creating a signature file. Descriptors—*Adult Basic Education, Adults, *Adult Students, Cultural Influences, *Educational Attitudes, Educational Practices, *Hispanic

Americans, *Mexican Americans, *Participation, Social Action, Student Attitudes

Identifiers—*Colorado

A study focused on the extent to which historical and contemporary subjectivities interplay with structural and cultural constraints to influence the decision making and human agency of Mexican American adults of the Southwest in nonparticipation in adult education. The issue of nonparticipation was explored from a social action paradigm. Data were also gathered regarding the action taken in response to perceived educational needs and desires. Information was collected from open-ended interviews with 30 Mexican American and Chicano/a adults (22 females and 8 males) in 2 urban communities in Colorado. Findings of the study include the following: (1) study participants exhibited tremendous cultural pride and identity, which influenced individual decisions and actions to engage in culturally insensitive social institutions; (2) a majority of individuals reported past efforts to upgrade academic and vocational skills; (3) almost all study participants indicated a lack of faith in the dominant enterprise of education based on experiences of educational exclusion in childhood or adulthood, intercultural struggles, and larger social and economic inequalities; (4) participants resist discriminatory educational practices by refusal, by creating their own opportunities for learning, by relying on cultural norms and values, and by perceiving themselves by character instead of by educational credentials. Adults who had participated in adult education reported teacher insensitivity, monocultural curriculum, poor quality programs, and a lack of intercultural understanding. (Contains 93 references.) The University of the Third Age (U3A) Movement and Its Rise in New South Wales: In the Great Tradition of Liberal Adult Education?

Pub Date—95

Note—36p.

Pub Type—Reports - Research (143)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Adult Education, *Educational Development, *Educational History, Educational Research, Foreign Countries, Liberal Arts, *Older Adults, *Universities

Identifiers—*Australia (New South Wales), *Universities of the Third Age

This paper begins with a brief history of the University of the Third Age (U3A), which began in France in 1972, when a professor at the University of Toulouse conducted a summer school for retired people with a program of lectures, concerts, guided tours, and other cultural activities. It identifies the defining characteristic of the U3A movement in France as its attachment to the term "university." In Britain, the U3A movement was the creation of its members who decided what was to be taught, by whom, in what ways, and at what cost. U3A was relatively late in coming to Australia. The first groups were established in Melbourne in 1984 and continued to grow and epitomize the community-based, do-it-yourself British model. Following eight pages of background, information obtained through a survey of 16 U3As in New South Wales is presented as vignettes, arranged in the chronological order in which the U3As were established. Each U3A is introduced and its regular and distinctive features are highlighted. A conclusion suggests that whether the U3A movement in Australia is in the tradition of British liberal adult education is not the real issue; the real issue is whether, as a movement whose time had come in the 1970s, U3A can sustain its momentum through the 1990s into the 21st century and beyond. It proposes that, for U3A to retain its momentum and relevance, it needs to address the related issues of broadening the membership base and forming a national organization. Appendixes include 42 references, participant list, and draft letter requesting information. (YLB)

EDRS Price - MF01 Plus Postage. PC Not Available.

Descriptors—Adult Education, *Andragogy,

*Comparative Analysis, *Comparative Education, Cross Cultural Studies, Educational Research, Foreign Countries, International Education, International Educational Exchange, *Research Methodology, Research Needs, *Research Problems, Research Projects, Seminars

A seminar collected, shared, and discussed the consensus on definitions, standards, methods, and current problems in research methodology in comparative andragogy. Alfred Hierold opened the seminar with a brief history of the evolution of the University of Bamberg. The opening session focused on the importance of the researcher as a tool in comparative research. The first working session reviewed the diverse purposes of comparative research. Alexander Charters et al. provided an historical and current review of the structures, patterns, and methods used in adult education comparative research. Four quite different research processes were described and critiqued based on four books: "Landmarks in International Adult Education", "Workers and Postsecondary Education", "Strengthening Adult and Continuing Education", and "Continuing Education in Higher Education, Academic Self-Concept, and Public Policy in Three European Countries". Seminar participants considered problems and pitfalls in current comparative andragogy. Colette Dufresne-Tasse reported that adult education in the museum has never been subjected to in-depth comparative analysis. Zoran Jelenc reported on adult education research trends in Central and Eastern European countries. Wolfgang Jutte addressed problems in translation in comparative adult education. Madeleine Blais described a comparison of the effects of university studies on various dimensions of the adult's life between Montreal and Caracas. Mahoto Yamaguchi's concerns related to the development of indicators as an effective source of basic data to help comparative analysis. Concerns remaining at the seminar's end were identified. (YLB)

Descriptors—Adult Education, *Automation, Competence, Competency Based Education, Developed Nations, Foreign Countries, *Job Skills, *Manufacturing, Manufacturing Industry, *On the Job Training, *Technological Advancement, Vocational Education

Identifiers—*Germany

High tech systems not only generate new structures in the production process, but also involve profound changes in job organization, which in turn imply that job qualifications must be modified. In view of the changes within engineering systems and the relevant technologies, it seems expedient to choose a curricular approach based on the concepts of key qualifications and key contents. A model production system serves as a teaching plant at which students would develop company-specific key qualifications. The teaching plant is an assembly plant composed of six self-reliant, but networked learner subsections. A material flow is determined by the structure of production cells (micro view), and the plant represents the product-related production of a model car. To simulate the sequence of the production steps, beginning with the vehicle as ordered by the customer, the production planning system follows the normal company practice and includes elements of the forecasting phase and of production planning. The course provides for a training program in which faults within automated systems must be eliminated. The course covers three major categories of competencies: expert, methodological, and social. Instructional methods include team conferences, self-study of manuals, and group or cooperative learning. Production statistics serve as evidence of the performance in the learning process. (Contains 10 references.) (YLB)

This document contains both an instructor's guide and a student guide for a city planning learning activity for technology education classes. The instructor's guide provides the following: an overview of technology education, a summary of activities and supplies needed for students to complete the learning activity, a supplies and materials worksheet for the instructor, an overview of the city planning learning activities, pretests and posttests with answer sheets, and an evaluation summary. The student's section contains the following: a summary of activities, pretest instructions, assignments, goal, glossary of terms, priority academic student skills, objectives, related competitive events for the Technology Student Association, academic and workplace applications, impact statements, career search ideas, posttest instruction, and additional problems to solve. The learning activities are based on the "SimCity2000" (TM) computer program. (KC)

It Works! Vocational Exploration as Drop Out Prevention.

Pub Date—94

Note—8p.

Pub Type—Opinion Papers (120)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Basic Skills, *Career Exploration, *Dropout Prevention, *High Risk Students, *Pre-vocational Education, Secondary Education, *Skill Development

Identifiers—*Pocono Mountain School District PA

A pilot vocational exploration program in the Pocono Mountain School District (Pennsylvania) was conducted for students who were at risk of dropping out of school after failing eighth grade. The program, conducted as a ninth-grade class, allowed at-risk students to receive concentrated, personalized help in basic academic skills while exploring vocational areas of their choice. Close home-school alliances were also set up to help the students with problems. The program was voluntary and required students' attendance and effort. The program proved successful in preventing failure on the part of many of the students in the pilot program. Many of the students tried harder and achieved with smaller classes and personalized help. Instead of dropping out, they were able to continue in school and enter the technical program in 10th grade. Descriptors—Business Education Teachers, *Educational Needs, High Schools, Mainstreaming, Special Education, *Special Needs Students, *Teacher Attitudes, *Teacher Education, *Teacher Qualifications, Trade and Industrial Teachers, *Vocational Education Teachers

Identifiers—*Indiana

A study was conducted to identify strengths and weaknesses in vocational teacher preparation and attitudes for working with special populations students in secondary education in Indiana. The study collected information from 527 vocational teachers representing 39 of the 47 area vocational districts (about one-half of the vocational teachers in the state) using a survey. Some of the results of the survey are the following: (1) the average number of special populations students the teachers served during the

last school year was 21; (2) almost half the teachers had no postsecondary credit-hour training related to special populations; (3) about half the teachers had 15 hours or less of seminars or workshops related to working with special populations, and an additional 25 percent had no training; (4) about half the teachers were familiar with Individualized Education Plans, although fewer than 40 percent had ever participated in preparing such a plan; and (5) many teachers were interested in additional training in working with special needs students, but very few had time or resources to get this training. (Two separate short reports detail the answers of vocational business teachers and trade and industry teachers to the survey.) (KC)

Descriptors—Administrator Attitudes, Adults, Dual Career Family, Employed Parents, *Employed Women, *Employee Attitudes, Employer Attitudes, Employment, *Employment Patterns, *Family Work Relationship, Flexible Working Hours, Foreign Countries, *Mothers, *Reentry Workers

Identifiers—Great Britain

A study was conducted of women managers and professionals in Britain who had taken a "career break"—from a few weeks to many years—to have a baby. The study sought to examine the decision to return to work after having a child, and whether the practical management of breaks could be improved; to discover the career patterns of women returning from a break in the period since their return; and to look at how returners feel about combining work and family life and what practical issues are of most concern to them. The results of the study were based on questionnaires completed in the summer of 1991 by 785 women (of 1,651 surveyed) who were working for 45 different employers. Some of the results of the study were as follows: (1) most of the women had taken only one break, at about age 30, and most had returned to full-time employment, although a significant percentage had worked part time at some time or were doing so at the time of the survey; (2) the women were mildly positive about most aspects of their breaks; (3) childcare concerns and the desire for time off when childcare arrangements break down were the most frequent concerns of the women; (4) one-third of the women had been promoted since returning to work; (5) most of the women wanted flexible hours and many had such arrangements; many also wanted to work part time but would not do so because of perceived damage to their careers; (6) the respondents were generally positive about access to training and development, did not feel isolated, and thought attitudes toward working mothers were improving; and (7) the stress of combining work with family life emerged as the most negative aspect of their experience. (The document includes 42 appendices that contain the questionnaire and analyses of study data. The report contains 18 references.) (KC)

titudes, *Employment Practices, *Employment Qualifications, Foreign Countries, *Job Skills, Job Training, Policy Formation, Public Policy

Identifiers—*National Vocational Qualifications (England)

A study was conducted in Britain between October 1990 and June 1991 to evaluate the implementation and delivery of National Vocational Qualifications (NVQs) and the implications for the training of trainers. (NVQs are a device for assessing performance; they represent the systemization of the skills and competencies required in a wide variety of occupations and at different levels.) The study focused on the construction industry but its findings are applicable to many other industries. Data were collected through 20 in-depth interviews with key organizations concerned with the introduction of NVQs generally and in the construction industry in particular, and 7 case studies were made of a cross-section of construction companies and their off-site training providers. The research identified two sets of issues that together are inhibiting and negating the use of NVQs: (1) structures that are necessary preconditions for the implementation of NVQs are inadequate, particularly in access to information about NVQs and in funding and resources for training providers, employers, and trainees; and (2) industrial organizations are causing NVQs that are not occupationally based to proliferate and inhibit the transfer of skills between and within industries, and many NVQs are too limited and narrowly defined. The research showed the need for the training of trainers to maintain high training standards and the credibility of NVQs. The study concluded that the introduction of NVQs alone is unlikely to change either employers' incentive to train or the take-up of vocational training. Additional policies are required for the NVQs to meet the training needs of the future. (Contains 33 references.) (KC)

Identifiers—*Great Britain

This document reports results of a study conducted in Britain to determine employers' policies toward recruiting and employing people with disabilities and what kinds of help and assistance employers need if they are to be able to do more in this area. Data were collected through an extensive literature review, a mailed survey of a sample of 1,855 randomly chosen companies and 351 "good practice" organizations as a control group, with an overall response rate of 52 percent, and in-depth case studies of 21 employers. Results are organized in seven chapters that focus on the following areas: employment of people with disabilities; organizations that do not employ people with disabilities; employers' policies toward people with disabilities; the pros and cons of employing people with disabilities; actions taken to employ people with disabilities; and use of external help, support, and advice. Recommendations to help employers increase their employment of persons with disabilities are given. Extensive appendices detail research methods and sample characteristics; the questionnaire and literature review are included. The report contains 65 references. (KC)

Descriptors—Adults, Developed Nations, *Educational Needs, *Employment Patterns, *Employment Practices, Foreign Countries, Futures (of Society), Job Skills, *Job Training, Postsecondary Education, *Retailing
Identifiers—*Europe

A study examined occupational and skill change within the retail sector in Europe so that training and development schemes can be put in place. Data were collected in the following ways: compilation of information on the level of employment, skills, and training in the retail sector of European countries; compilation of national data on broad-based business and organizational trends, employment skills, and training data; and case studies of a cross-section of companies and establishments. Some of the major findings were the following: (1) the retail sector across Europe reflects the traditions of each of the nations, with retailing highly developed and structured in the north and less structured in the south; (2) the retail sector will become more homogeneous during the next decade by the creation of the European Union, but employment patterns will remain disparate; (3) part-time work is a factor in much of the retail industry; (4) training takes up 1-3 percent of labor costs, comparable to manufacturing, banking, and insurance industries; (5) most continuing education is company based; (6) advanced technology has been rapidly introduced into the retail industry; (7) greater emphasis is being placed on the development of interpersonal skills for customer service; and (8) more human resources and training personnel are being employed. The study concluded that the European retail sector will probably employ about the same number of people in the year 2000, but in fewer, larger establishments, and with more female employees. More training is expected. (The report contains 36 references and 7 case studies of companies in Germany, Greece, Ireland, Italy, Northern Ireland, Spain, and the United Kingdom.) (KC)

Descriptors—College Graduates, Doctoral Degrees, *Education Work Relationship, *Employment Opportunities, *Employment Patterns, Employment Projections, Entry Workers, Foreign Countries, *Graduate Students, Graduate Study, Higher Education, *Labor Market, *Labor Supply, Literature Reviews, Masters Degrees, Professional Continuing Education, Recruitment, Relevance (Education), Supply and Demand, Trend Analysis
Identifiers—*Great Britain

A study examined the current and projected labor market for graduates of master's degree, doctoral degree, and other professional continuing education programs in Great Britain. The latest available data regarding employment patterns, supply, and recruitment postgraduates in scientific/engineering fields were reviewed, and future trends were identified. Both the perceived purpose of postgraduate study and the output and employment of postgraduates were found to have increased considerably over the past decade. Although the traditional role of postgraduate study as a first step to industrial research or academic teaching careers has decreased, its role in training and development has increased and will likely continue to do so. Because postgraduate study is increasingly serving as a means of alleviating specific skill shortages and as an extension to first degree study, the balance in output of postgraduates has shifted away from Ph.D. study and toward master of sciences and postgraduate diplomas in more vocationally oriented disciplines. Little evidence

exists of the clear benefits of postgraduate study to individuals in terms of career progress or financial rewards. The supply of postgraduates will likely increase along current lines, and labor market demand for postgraduates who are "super-specialists" in scientific/engineering fields is unlikely to increase significantly. (Contains 48 references.) (MN)

Identifiers—*National Vocational Qualifications (England), *Scottish Vocational Qualifications

A study examined British employers' adoption of National Vocational Qualifications and Scottish Vocational Qualifications (NVQ/SVQs) and the occupational standards underpinning them. Data regarding current/projected use of the NVQ/SVQs and their perceived costs, benefits, and difficulties of implementation were collected from the following: literature review; interviews with key organizations, Employment Department representatives, and selected major employers; telephone survey of 1,506 employers; and 50 case studies of employing organizations in 9 sectors. Although 75% of employers surveyed had heard of NVQ/SVQs, only 44% of firms with more than 500 employees and 6% of firms with fewer than 50 employees were using them. It was projected that approximately 78% of large firms and 14% of small firms would eventually use NVQ/SVQs. Use of NVQ/SVQs was highest in the construction and energy/water sectors. NVQ/SVQs were used mainly to provide initial training but were also used for retraining and certification of employees' existing skills/competencies. Barriers to using NVQ/SVQs included lack of employer support for the ideas underpinning the NVQ/SVQs and the NVQ/SVQs' poor presentation, inflexibility, and high cost of implementation. (Thirty-five tables/figures are included. Appended are the following: 20 additional tables of statistical information; questionnaire and discussion guide; list of organizations interviewed; and glossary.) (MN)

Identifiers—Europe, *United Kingdom, United States

This document, which was developed after an extensive literature review and study of the United Kingdom's labor market and job search methods, is intended to be a tool for Employment Service personnel assisting unemployed job seekers. First, the following aspects of the job search environment are considered: occupational labor markets and recruit-

ment channels; the recruitment orientations of different types of employers; characteristics of unemployed job seekers and the psychological effects and problems of unemployment that may impinge on their job search behaviors; the institutional Employment Service framework and public policies in the United Kingdom; and international perspectives on the assisted job search. Next, a simple generic model of the job search process is presented that calls for the following three stages of actions by Employment Service personnel: initial advice and guidance; initial implementation of job search activity; maintenance and fine tuning of job search strategies; and review of job search procedures and job choices. Appended are the following: 93-item bibliography, list of experts consulted, discussion guide, research specification, and list of 54 reports about employment and the labor market in the United Kingdom. Identifiers—*National Vocational Qualifications (England)

The use of National Vocational Qualifications (NVQs) within work organizations in the United Kingdom was examined in a study of 15 large employers. Human resources development managers and NVQ candidates within each firm were interviewed/surveyed as were the individuals responsible for NVQ implementation at six firms. Only a few employers had disseminated information about NVQs widely, and only employees who had been involved in NVQ activity as assessors or candidates were likely to know about them. Although many employers were clear about a number of important potential benefits of NVQs, they were also usually aware of the major costs associated with delivery of NVQs and had reservations about the suitability of NVQs for the job and work force. Among the employees and trainees surveyed (272 usable responses), the most popular reason for working toward NVQs was to get a nationally recognized qualification. Job security and career-related motives were also considered important by many respondents. Employers and employees alike expressed considerable support for NVQs and expected them to improve job performance and employee morale. The most common criticism of NVQs was their confusing language. Seventeen points of good practice were identified. (Appendixes include the survey instrument and tables detailing the survey responses.) (MN)

The U.S. Labour Market for New Graduates. Report 267.

Sussex Univ., Brighton (England). Inst. of Manpower Studies.

Spons Agency—Employment Dept., London (England).

Report No.—ISBN-1-85184-192-X

Pub Date—94

Note—129p.

Available from—BEBC Distribution, 15 Albion Close, Parkstone, Poole BH12 3LL, England, United Kingdom (35 British pounds).

Pub Type—Reports - Research (143)

EDRS Price - MF01/PC06 Plus Postage.

Descriptors—*College Graduates, Employment Level, *Employment Opportunities, *Employment Patterns, Employment Projections, *Entry Workers, Foreign Countries, Higher Education, *Labor Market, Labor Supply, Literature Reviews, Nontraditional Students, Recruitment, School Business Relationship, *Supply and De-

mand, Tables (Data), Trend Analysis, Two Year Colleges
Identifiers—Impact Studies, United Kingdom, *United States

The U.S. labor market for new graduates of two- and four-year colleges was studied to determine the impact of the large increase in output of graduates that occurred in the 1950s and 1960s. The study was based primarily on published research evidence and available statistical material, supplemented by a small number of interviews with experts in the United States and United Kingdom. It was discovered that, although the economic returns of a college education and growth rate of starting salaries have declined since the early 1970s, the advantages of a college degree remain substantial in terms of relative earnings, higher labor force participation rates, lower unemployment rates, and better access to higher-level occupations. The following were among the study findings identified as being particularly relevant for the United Kingdom: (1) despite the increase in the number of new graduates in the United States, higher education remains greatly valued; (2) employers are attaching increased importance to work experience when recruiting graduates and are looking for a range of personal and core skills in applicants; and (3) the concept of continuing education, whereby education is viewed as a lifelong process, is becoming increasingly prevalent. Descriptors—*Dance, *Dance Education, *Drama, Educational Needs, Educational Opportunities, *Educational Supply, *Education Work Relationship, *Employment Patterns, Financial Support, Foreign Countries, Graduate Surveys, Labor Market, National Surveys, Outcomes of Education, Postsecondary Education, Questionnaires, School Attitudes, Secondary Education, Student Attitudes, Tables (Data), Teacher Attitudes, Trend Analysis, Vocational Education
Identifiers—*United Kingdom

A study examined the career paths and training of dance and drama students in the United Kingdom. First, a comprehensive picture of careers and training in dance and drama was generated through visits to 12 schools and interviews with selected school staff, 36 students, and other relevant professionals. Next, individuals who are economically active in the dance and drama labor markets were surveyed by mail. Of the 1,978 individuals surveyed, 934 (47.2%) responded. Although 78% of the dance respondents and 71% of the drama respondents were satisfied with the overall quality of the training they received, fewer than half were satisfied with their preparation for work in their profession. More than half reported needing additional training. Money, time, and lack of good courses were cited as the main barriers to further training. Evidence was strong that the present system of funding training based on discretionary funding is no longer working. Three-fourths of the estimated 20,000-25,000 individuals employed in dance were dance teachers, and three-fourths of the estimated 40,000 individuals in the drama labor market were performers. (Contains 70 tables/figures and 44 references. Appended are the following: 18 supplementary figures/tables; description of the research methodology; and list of drama schools.) (MN)

Descriptors—Adult Education, *Adult Programs, Educational Policy, *Education Work Relationship, *Employment Services, Foreign Countries, *Job Search Methods, Outcomes of Education, Participant Characteristics, *Program Effectiveness, Tables (Data), Training, *Unemployment
Identifiers—*United Kingdom

The effectiveness of Training for Work, which is the United Kingdom's main public program for helping long-term unemployed adults find jobs, was examined through interviews with training managers in 8 training and enterprise councils (TECs), 53 training providers, and 374 individuals who had joined Training for Work in spring/summer 1993 and left to seek work. It was discovered that, although the TECs recognized the importance of job search training in achieving positive job outcomes after Training for Work, they generally left decisions regarding the nature and scope of job search training to local providers. According to the training providers, participants received an average of 9 days of job search training (approximately 9% of the available training days), with 3 days centered on self-preservation skills. However, of every 10 participants, only 4 received job search training and 3 did not want it. Approximately half of job search training recipients credited it with improving their confidence and having a marked effect on the intensity and scope of their job search. The job search success rate after leaving Training for Work averaged 32% for those who had received job search training versus 26% for all leavers. (Includes 49 tables/figures.) (MN)

Descriptors—Case Studies, *Credits, Educational Needs, Educational Policy, *Education Work Relationship, *Employer Attitudes, Employment Patterns, Employment Projections, Foreign Countries, *Job Training, *Labor Market, School Business Relationship, Secondary Education, Tables (Data), Trend Analysis, *Youth Employment
Identifiers—Training and Enterprise Councils (Great Britain)

A study examined the extent to which employers in the United Kingdom (UK) are involved in the youth labor market and in the UK's Training Credits model within the South London Training and Enterprise Council (SOLOTEC) area. Data were collected from the following sources: review of labor market trends; qualitative interviews with 36 employers selected to represent a mix of individuals employing and not employing young people; telephone survey of 250 employers (in 9 occupational areas) with 11 to more than 200 employees; and analysis of future labor market trends. Fewer than half the employers interviewed actually employed any young people in their workplace. One-fourth of those not employing young workers reported preferring older workers, and one-fourth considered their available jobs unsuitable for young people. Most employers were generally content with the quality of young workers. Once young people had gained employment, their prospects for receiving further training were very favorable. Employers were generally aware of and involved with a wide range of government training initiatives. Approximately half of the employers had heard about Training Credits; however, only a small minority were actually involved with the initiative. (Forty-nine tables/figures are included. Appended are an explanation of the shift-share methodology. Contains 27 references.) (MN)

Descriptors—Adult Education, *Career Development, Case Studies, Educational Needs, Foreign Countries, Individual Needs, *Labor Force Development, *Needs Assessment, Questionnaires, *Self Actualization, *Skill Development
Identifiers—*Personal Development Plans (United Kingdom), *United Kingdom

The use and effectiveness of personal development plans (PDPs) in planning career and skill development activities for individuals within employing organizations in the United Kingdom was examined through case studies of seven firms and telephone interviews with representatives of seven other firms. The case studies/interviews focused on the following key issues for practitioners involved in developing PDPs: philosophy; scope and content of PDPs as vehicles for self-organized learning; relationship between the focus of PDPs and their links with other processes; implementation and support; ownership, control, and confidentiality; and impact. Most firms had all employees develop PDPs; however, some limited their use of PDPs to managers or white-collar staff. All PDPs covered similar areas but varied in the amount of guidance given to users regarding defining areas for development and development actions. Nine guidelines for developers of PDPs were formulated, including the following: make the key outcomes sought from introducing PDPs clear to all parties; make the processes used to generate PDPs realistic in terms of target group and level of available resources; and avoid focusing solely on skill development for employees' current jobs. (Appended are the interview schedule and information about the 14 firms studied. The bibliography contains 54 references.) (MN)

Descriptors—Adult Education, Educational Needs, *Evaluation Methods, Foreign Countries, *Industrial Training, Literature Reviews, Models, *Needs Assessment, *Program Evaluation, *Training Objectives
Identifiers—*United Kingdom

The literature on training evaluation and evidence from a number of employers who are actually undertaking some training evaluation activities were reviewed and synthesized into a cyclical model for evaluating training. First, the following direct benefits of evaluating training were identified: quality control; efficient training design; enhanced professional esteem; enhanced negotiating power; and identification of appropriate assessment criteria and intervention strategies. Next, a model of the training process was developed that consists of the following stages: identifying training need by determining the skills/attributes required of and actually possessed by job holders; designing, preparing, and delivering training; discovering trainees' attitudes toward training and extent of learning; discovering whether the lessons learned during training have been transferred to the job and are being used effectively on the job; evaluating the effects of training on the organization; and reinforcing positive behavior to ensure that the advantages of training are maintained in the long term. The

impossibility of evaluating every training event was acknowledged, and guidelines were provided for prioritizing evaluation activities with consideration for the importance, difficulty, and frequency of tasks for which training is being provided and weighing those factors against the costs of training. (Contains 39 references.) (MN)

Identifiers—*United Kingdom

The following activities were conducted to identify strategies for improving the representation of women in professional, managerial, and technical occupations in the United Kingdom's building industry: literature review; mail questionnaire to which 468 (63.8%) of the 733 women contacted responded; group discussions with 32 women employed in the building industry, career advisers, building educators, and employers; and telephone interviews with seven key industry figures. The findings were synthesized into a plan calling for the following actions: promote public awareness of the role of women in building; support educational initiatives in building; promote general school/college liaison activities; offer work placements/work shadowing for girls/young women and teachers/career advisers; improve parents', teachers', and career advisers' knowledge of careers in building; make the business case for equal opportunities in the building industry; ensure that the principle of equal opportunity is followed in recruitment activities; help older women enter professional careers in building; train women in the skills needed to deal with difficult people; counter the negative image of women-only events; ensure that building employers take equal opportunities seriously; and help women combine work and family life. (Contains 29 tables/figures and 174 references. Appended are the following: study methodology, questionnaire, and 14 additional tables/figures.) (MN)

Identifiers—*United Kingdom

Career issues facing individuals employed in organizations in the United Kingdom were examined in 12 1-day workshops that were attended by more

than 150 individuals from 65 different organizations. The following career issues received particular attention: the career development environment; changes in organizational career management; the shift to self-development; roles/responsibilities in career development; developing an organizational strategy for careers; and unresolved issues/tensions in individuals' and organizations' career and labor force development objectives. The workshops made it clear that many of the United Kingdom's major employing organizations are in a state of career chaos. In many organizations, large-scale job losses and/or successive changes in organizational structure and skill requirements have erased career paths and even wiped out the notion of career development. For most of the work force, the rhetoric of development has never been stronger and real hope of serious career development opportunities have rarely been bleaker. Tensions were discovered between short- and longer-term goals and between individuals' career aspirations and organizations' goals. It was concluded that individuals must assume more personal responsibility for their career development and that organizations and employees must support each other's development goals. A workplace literacy project was conducted at the Nabisco Richmond Facility for the following purposes: to determine what academic skills are necessary to perform 10 selected jobs, to develop a validated assessment to evaluate an employee's literacy skills, to develop a job-specific curriculum to improve skill deficits, and to provide an individualized education program so that each employee can gain the skills needed for personal and job goals. Approximately 100 employees volunteered for assessment and training. During the project, a listening learning module was developed and pilot tested and modules on reading and mathematics were developed. Because of delays in the project, however, employees did not complete the training at the time of project completion. The materials developed are continuing to be implemented at the plant, to an enthusiastic response from employees and a decrease in waste, defects, and absenteeism that can be partially attributed to the program. Outside evaluation also showed the program to be a success. (The report includes the external evaluation report, a validated assessment of job skills, and materials for the listening learning module.) (KC)

Identifiers—National Workplace Literacy Program

This publication lists some of the curriculum resources that were produced through the National Workplace Literacy Act, as amended by the National Literacy Act of 1991. The curriculum resources in this publication were developed during 1992-1993 of the demonstration program. The curriculum materials are indexed by industry and cross-referenced. The majority of the curriculum materials fall under three industry categories: health care; manufacturing; and textiles, with 12-16 curriculum resource products described under each category. In addition, some products are described in the following areas: agriculture, construction, custodial employment, general skills, government, hotel and housekeeping, occupations, workplace literacy, metalworking, service, waste handling, and wine. Each description includes the following: availability information; the business, industry, or union population served; the number served; the partners; information about the project and the products; and cost. Eight appendices provide information about the following: (1) grantees included in the publication; (2) United Migrant Opportunity Services, Inc.; (3) Iowa Western Community College; (4) Massachusetts Department of Education; (5) Wisconsin Board of Vocational, Technical and Adult Education; (6) Center for Advanced Study in Education/City University of New York Graduate School; (7)

Parkway Area Adult Basic Education; and (8) the ERIC Clearinghouse on Adult, Career, and Vocational Education and the Curriculum Coordination Centers. (KC)

EDRS Price - MF01/PC04 Plus Postage.

Descriptors—*Adult Basic Education, Adult Literacy, Compliance (Legal), *Early Childhood Education, *Family Programs, Federal Legislation, *Literacy Education, Program Descriptions, Program Implementation, *State Programs

Identifiers—*Family Literacy

This report provides an overview of how the federally funded, state-administered adult education program under the Adult Education Act, as amended by the National Literacy Act, expanded programs and services to eligible parents and their children through family literacy programs in program year 1993-94. Some programming efforts include unified programs that integrated adult basic education, parenting skills, early childhood education, parent and child time, and home visits. The profiles were compiled from information collected through telephone conversations with selected state directors of adult education or staff members and reviews of state plans and annual narrative reports. Profiles of 50 states and the District of Columbia are included in this publication. The profiles include information on the following: state staff contacts, funding sources, number of family literacy programs, program implementation, ages of children served, curriculum used with children, parent and child assessment tests, coordinating agencies or organizations, staff development, issues and barriers, and special efforts. Descriptors—*Career Development, *Computer Mediated Communication, Computer Uses in Education, *Continuing Education, Course Content, Curriculum Design, *Curriculum Development,

Distance Education, Foreign Countries, Graduate Study, Higher Education, Leadership Training, Student Attitudes, Teacher Attitudes

Identifiers—University of Calgary (Canada)

Two computer-mediated courses were developed and taught in an innovative master of continuing education program at the University of Calgary (Canada): Career Development in Organizational Settings and Leadership in Organizations. Within the context of the computer-mediated communication (CMC) system, the courses were structured in conferences depicted and accessed from student computer desktops. Instructor issues were related to the process of teaching/learning (amount of time required to deliver courses, sense of "connection" to and between students, student reactions to assignments and learning activities, and how students, instructors, and administrators dealt with technical problems) and content of courses (breadth and depth). Student issues were related to process (value of exploring each topic in relation to self, lack of "real" communication, struggle to articulate "theories-in-use," democratizing effect of the CMC classroom, and frustration with technical problems) and content (struggle to understand much broader definitions of key concepts, amount of time, and relevance of the courses). The most unique challenges in the CMC classroom were technical. Building a "learning community" was of critical importance in creating a successful virtual classroom. Recommendations were made for building successful computer-mediated learning environments. The abbreviated course syllabi is appended. Contains 22 references. (YLB)

The concept of a "seamless education" has taken hold of the public imagination in recent years. Changes in the way society views higher education and what it expects from education are forcing colleges to reconsider the way learning is structured and credentials are awarded. Likewise, the importance of education as preparation for work, in particular for the high performance jobs of the future, has taken on new significance as the nation focuses on regaining its global competitiveness. Four national trends identified in the literature summarize the forces of change that underlie the need to examine seamless education and to make it a reality in postsecondary vocational-technical education. The trends are as follows: (1) higher education as a right and a requirement for all and a necessity for the quality of life for individuals and the country; (2) institutional accountability to the public; (3) educational access and social equality, with more "nontraditional" college students; and (4) global competitiveness and work force preparation—leading to integration of academic education and progression from associate degrees to Bachelor's degrees. Identifiers—*United States (Southeast)

States have experienced varying levels of success in the transfer of credits between institutions of higher education and in the development and implementation of articulation policy, agreements, and structures. A look at the approaches currently being used in the southeastern region of the United States can help to identify options and provide a basis for comparison of articulation alternatives for Georgia. It also identifies competing alternatives for Georgia graduates of occupational associate degree programs who are unable to find acceptable credit transfer within their home state colleges. Information for the research was gathered by telephone interviews with personnel from state education offices in the states surrounding Georgia: Alabama, Florida, North Carolina, South Carolina, and Tennessee. The research found that Florida, North Carolina, and South Carolina have a separate state board for postsecondary two-year institutions and community college systems, whereas in Tennessee, two-year colleges and technical schools are under the university board of regents and in Alabama one board of education governs both postsecondary technical and K-12 education. Structural arrangements for postsecondary vocational education institutions in the five states vary from large, centralized community college systems (North Carolina, Florida) that integrate technical and academic education, to states (Tennessee, Alabama) that continue to separate the noncollegiate and technical schools from the collegiate and university-parallel two-year colleges. South Carolina has integrated vocational and academic programs at the community colleges, but does not have a coordinated system in the state. Regional accreditation for all five states is from the Southern Association of Colleges and Schools-Commission on Colleges. Legislative assurance of transfer between two- and four-year colleges exists in some form in three states for associate degrees. The research concluded that each of the five states has addressed many of the same issues facing Georgia and that removing barriers to adult learners' progression from occupational courses to baccalaureate degrees is an ongoing process. Descriptors—*Articulation (Education), *College Transfer Students, *Community Colleges, Technical Education, *Transfer Policy, Two Year Colleges, Vocational Education

A research study explored the barriers to transfer of credit courses from two-year community and technical colleges to four-year colleges and universities, with special attention to the concerns of postsecondary occupational-technical program transfer. Several categories of problems were identified in the national literature on higher education transfer: attitudinal, institutional, geographical, financial, curricular, and structural barriers. Key issues and arguments in each category were explored and discussed. The research concluded that transfer of credits was more successful when community colleges separated two-year transfer programs and vocational-technical programs. A suggestion was also made that comprehensive community colleges with four-year programs might be better able to serve the needs of the diverse types of students who enroll in community colleges. Descriptors—Adult Education, Bilingual Education, Immigrants, *Language Acquisition, *Limited English Speaking, Private Sector, Public Sector, *Second Language Instruction, *Second Language Learning, Vocational Education, *Vocational English (Second Language)

This critical review of the literature examines the characteristics and needs of limited English proficient (LEP) adults and the programs and services typically available to them. The complexities of the LEP population are explored first, including differences in education, English proficiency, labor market experience, and economic status. Availability of programs and services for LEP adults in both the public and private sectors is described. Private sector initiatives in business and industry and community-based organizations are discussed. The vocational instructional delivery system for LEP persons includes several approaches: bilingual education, "sheltered" content instruction, and multilingual/multicultural methods. To increase awareness of the issues involved, the paper discusses how people acquire a second language and what methods are most beneficial in aiding second language development. The monograph concludes by decrying the lack of reliable information about the LEP population and the bias against instruction in the native language. Recommendations for improving access to programs and services encompass a number of areas: enforcement of civil rights legislation, more support for bilingual/multilingual instruction, improvement in the research base, more training for service providers, and collaboration among organizations. The paper contains 60 references and a glossary. (SK)

Descriptors—*Articulation (Education), Educational Change, Educational Cooperation, *Education Work Relationship, High Schools, Integrated Curriculum, Postsecondary Education, *Technical Education, *Tech Prep, Vocational Education In the 1990s, the changes brought about by technology, the global economy, and demographics have necessitated the reform of educational systems. One response, given impetus by federal legislation, is tech prep, an articulated secondary-postsecondary program that provides technical preparation in an occupational field, integrates academic and vocational education, and leads to placement in employment. This paper poses questions and offers answers from the literature regarding tech prep as an educational reform approach. The queries address major issues concerning tech prep strategies, processes, teams, and evaluation and planning. The answers offer a practical response, example, or consideration. The introduction presents the tech prep vision and why it is needed. The next section addresses strategies that are proving effective, their target audience, and how they should be implemented. The importance of tech prep processes, including the establishment of performance standards, professional teacher development, and collaboration with employers is discussed. Teamwork as an essential ingredient in tech prep success is highlighted, including the involvement of all stakeholders from business, industry, labor, education, and the community in planning, curriculum development, and evaluation. The role of evaluation and planning in consortia and

at the state level is described. The last section considers the future of tech prep and why it should continue, providing a checklist of questions that can be used to assess existing programs and guide their future development. (SK)

Descriptors—Foreign Countries, Life Events, *Stress Management, *Stress Variables, Teacher Alienation, *Teacher Attitudes, Teacher Behavior, *Teacher Burnout, *Teacher Morale, Teacher Motivation, Teacher Welfare, Teaching Conditions, Teaching Load

Identifiers—England, United Kingdom

In many countries today teaching has been identified as one of the most stressful occupations. The total annual cost of stress to the British Education Service has been estimated as high as 360 million U.S. dollars. The objective of this research study with teachers in the Department of Education at the University of Manchester was to identify stressors and stress management strategies for teachers in the North West of England. Data was collected from 100 teachers, multiple school site visits, and 40 focused teacher interviews. The research paradigm used, illuminative research, encourages interpretive human skills and concentrates on information gathering concerned with description and interpretation rather than measurement and prediction. Findings indicated certain work related factors were common stressors, even though causes of stress might be different. Categories of stressors included: teacher/pupil relationships; relationships with colleagues; relationships with parents and the wider community; innovation and change; school management and administrations; and time factors. Factors which contribute to stress in schools at both personal and organizational levels suggest individuals differ in how they respond to and manage stress. There appears to be a major stigma attached to the idea that individual British teachers suffer from stress. (JBJ)

Identifiers—ERIC Digests

Career certainty refers to the degree to which individuals feel confident, or decided, about their occupational plans. Since Parsons first classified people into career-decided and career-undecided groups, counseling researchers and practitioners have worked to formally assess career choice status. These efforts have yielded two generations of instruments useful for gauging clients' levels of and reasons for indecision as well as degrees of certainty about their career choices. First generation measures of career choice status yield total indecision scores. They have generated research on identifying multiple subtypes of undecided people and on developing differential interventions for each type. Second generation measures differ significantly from earlier instruments in that they were developed explicitly to assess multiple dimensions of ca-

reer indecision. Counselors can use these scales to identify specific barriers that prevent a client from reaching a career-decided state. Surveying clients in terms of their choice status continues to help researchers understand the complexity of career indecision and choice status. It also aids practitioners in planning appropriate career counseling interventions. (JBJ)

Identifiers—ERIC Digests

Career exploration is a developmental stage identified by career development theorists and occurs typically during adolescence when boys and girls try out various work roles in part time work, volunteer work, or in school/community activities. This digest focuses on gender differences in the role of assessment in the exploration process. Girls have been found typically to explore careers from a narrower set of career options than do boys. This occurs based on occupational sex role socialization. Career education programs and classes in high school have attempted to reduce stereotyping in a variety of ways. The most frequently used measures to aid in career exploration during adolescence are career interest inventories. The National Institute of Education Guidelines for reducing sex bias in interest measurement were followed to a large extent by both interest measurement test developers and publishers in the decade following their publication. However, the continuing evidence that gender differences exist in career interest measurement strongly suggests that such assessment is accompanied with counseling. (JBJ)

Identifiers—ERIC Digests

The term "employability skills" refers to those skills required to acquire and retain a job. In the past, employability skills were considered primarily of a vocational or job-specific nature; they were not thought to include the academic skills most commonly taught in schools. Current thinking, however, has broadened the definition to include not only many foundational academic skills, but also a variety of attitudes and habits. Recent usage of the term has described the preparation of foundational skills upon which a person must build job-specific skills. These skills include: communication, personal and interpersonal relationships, problem solving, and management of organizational processes. Ever growing numbers of employers are assessing these skills, primarily in reading and mathematics, prior to hiring. However, educators still show greater interest in employability skills assessment than do employers. Several efforts at employability assessment are discussed. When selecting an approach for assessing employability skills, the following criteria must

be kept in mind: (1) the assessment must clearly mirror the nature of the skill required; (2) the skill assessed should be teachable; and (3) each assessment must be evaluated in the context of its purpose. (JBJ)

Identifiers—ERIC Digests

Recent efforts to improve education have led to a new look at assessment. As pedagogy has changed to focus on learner-centered education, the need to make assessment an integral, on-going part of instruction has become obvious. Concurrently, federal initiatives to promote educational reform have required the provision of career development opportunities and have demanded accountability in this area. The portfolio concept is one way to meet this challenge by giving students ownership of their work and standards by which they can be measured. States and local districts must define the career development standards they wish to implement, allow students the opportunity to take responsibility for their career development, offer the necessary career guidance and counseling to support student learning, and assess both the program and the individual to assure that the expected outcomes are being achieved. The portfolio provides the format for the process and documentation of career development while giving individuals and programs standards for assessment. (JBJ)

Descriptors—Codes of Ethics, Counselor Evaluation, *Ethics, *Evaluation, Evaluation Methods, Evaluation Problems, Peer Evaluation, *Professional Associations, *Standards

Identifiers—ERIC Digests

Promoting ethical practices in assessment is considered to be a very important goal of the organizations involved in assessment. Codes are intended to increase the awareness of ethical practice among their memberships and to promote ethical uses of assessment in various contexts such as teaching, counseling, evaluation, and research. The level of enforcement that each organization takes is directly tied to the character of membership in the organization, whether it is voluntary or tied to a credential or designation. The more stringent the requirements are for membership in an organization, the easier it is for that organization to establish a more formal means of discipline and enforcement. Educating others to understand and to engage in ethical practices is a critical goal. Illustrations of good and bad practice within realistic assessment contexts and discussions of ethical dilemmas are excellent ways of promoting ethically responsible practice in assessment. (JBJ)

Identifiers—ERIC Digests

More valid assessments for multicultural populations would help counseling professionals better serve their clients and improve the lives of many people whose backgrounds and experiences may differ from those of White clients. Four common misuses of multicultural contexts are: (1) assuming that labeling something solves the problem; (2) using measures normed on White populations to assess non-White people; (3) ignoring the cultural assumptions that go into the creation of assessment devices; and (4) not considering the implications of the use of measures with clients from various racial and cultural groups. Some suggestions for improving multicultural assessments are: (1) concentrate on empirical and operational definitions of groups, not just labels; (2) identify measures specifically designed for multicultural groups; (3) encourage the consideration of cultural factors in the earliest conceptual stages of instrument development; and (4) increase opportunities for an exchange of information between those with quantitative training in instrument development and those with an interest and expertise in multicultural issues. Research on the validity and reliability of measures for specific multicultural groups is needed. (JBJ)

Identifiers—Canada

Teachers often spend more time in the classroom dealing with disruptions and conflict than they do teaching. This report describes a study (n=18) that was conducted to assess the effects of a school-based group treatment program on social skills development and anger management for students with behavior problems in an urban Saskatchewan (Canada) setting. The 10-session treatment program was based on a cognitive-behavioral skills deficit approach from Goldstein's Anger Control program for adolescents. The study explores the obstacles that occur when conducting research involving students with behavior problems and identifies the difficulties in the delivery and implementation of anger management programs. The students' perceptions of the program effectiveness and the need to develop their own skills in controlling anger is described. Support is provided for the students' need to develop social skills and ways of managing anger, and for the teachers' ongoing efforts to teach these skills. The survey instrument with responses is included. Contains 27 references. (JBJ)

Music as a Treatment Channel of Adolescent

Destructivity.

Pub Date—[94]

Note—22p.

Pub Type—Information Analyses (070)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Adolescents, Counseling, Counselors, Delinquency, *Institutionalized Persons, *Music Therapy, *Self Destructive Behavior, Therapy, Violence, Youth Problems

A young person showing strong destructive symptoms often has too much hatred toward adults, other authorities, and society for the "voice of reason" to penetrate or reach some fixed point in his or her psyche. Music, however, activates emotions raising problems of the real field of life to be dealt with in symbolic form. This paper discusses the theory and practice of music therapy in the treatment of institutionalized adolescents. Cognitive developmental psychology and the theories of Piaget, Freud, and Lewin are examined. Sections are: "Is Music an Early Form of Thinking?"; "Visions of Despair in the Background of Destructive Adolescents"; "Does Teenage Music Help in the Treatment of Destructivity?"; "Music in the Field of Life"; "Can Music Solve Crises in Real Life?"; and "The Opportunities of Music in Community Work." Music is seen as a treatment modality which may reach emotionally disturbed teenagers and traumatized individuals. (JBJ)

Descriptors—Adolescents, *Attendance, Attendance Patterns, *Case Workers, *Program Evaluation, Secondary Education, Social Work, State Agencies, Welfare Agencies, *Welfare Recipients, *Welfare Services

Identifiers—*Learnfare, Wisconsin

Wisconsin's Learnfare program requires 13- to 19-year-old recipients of Aid to Families with Dependent Children (AFDC) to maintain good school attendance or risk losing a portion of their families' grants. The program offers those with attendance problems the opportunity to work with case managers to identify causes of their poor attendance, as well as services such as child daycare, transportation, and alternative education programs to assist in solving attendance problems. The case management process in 10 counties was reviewed. During the 1992-93 school year, poor attendance made more than 4,700 teenagers in these counties a priority for receiving case management services. County implementation of presanction procedures was also reviewed, as were steps in the case management process. It was estimated that 14.1 percent of teenagers for whom case management offers were defined as a priority actually responded to an offer and received an assessment. Two major barriers to effective delivery of case management services were: (1) in most counties, efforts to coordinate Learnfare services with the schools were inadequate; and (2) case managers received inadequate guidance in defining sound case management practices. Recommendations for improvement are provided. Appendices which account for half of the document include presanction notice, presanction checklist and 10 Wisconsin counties case management profiles. Descriptors—*Child Advocacy, Child Neglect, *Childrens Rights, Child Welfare, Elementary Secondary Education, Helping Relationship, Juvenile Courts, Juvenile Justice, Legal Aid, Public Service, Social Agencies, *Voluntary Agencies, Volunteers, Youth Agencies

Each year nearly 400,000 children in the United States are thrust into court through no fault of their own. Often these children also become victims of the United States' overburdened child welfare system. A Court Appointed Special Advocate (CASA) volunteer is a trained citizen who is appointed by a

judge to represent the best interests of a child in court. Children helped by CASA volunteers include those for whom home placement is being determined in juvenile court. Most of the children are victims of abuse and neglect. This fact sheet, through a question and answer format, explains what CASA is, the role of a CASA volunteer, affiliations of CASA, and the history of CASA. A map of the United States details the locations of the 556 CASA programs located in all 50 states. (JBJ)

Identifiers—California

For generations American society and educational institutions have considered pregnant and parenting female students as throwaway students. They have been given little consideration or encouragement to stay in school. At times they were not even allowed to attend school. With 80% of teenage mothers never finishing high school, it is vital to look at the problems that keep these teen parents from attending school. Using insight gleaned from the experiences of California's Nueva Vista High School Ridgeway Teen Parent Program, this paper describes the needs of pregnant and parenting students and the successful service components needed to support them in reaching their goal of high school completion. A series of developmental stages necessary for a program to achieve student success is outlined. A discussion of the role of community agencies including how they can be used to provide much needed support services is also developed. Four appendices present a survey of program needs and information on regional contact persons. (JBJ)

Note—66p.; Master's Practicum Report, Nova University.

Pub Type—Dissertations/Theses - Practicum Papers (043) — Tests/Questionnaires (160)

EDRS Price - MF01/PC03 Plus Postage.

Descriptors—*Adopted Children, *Adoptive Parents, Attachment Behavior, *Child Abuse, *Parent Child Relationship, Parent Counseling, Parenting Skills, Parent Participation, Parent Responsibility, *Sexual Abuse, *Social Support Groups

No effective system existed in an Illinois state child welfare agency to provide post legal education and training to every parent who had adopted a sexually abused, attachment disordered child through this agency. Adoptions were failing because post placement support and training was not available to parents who had adopted special needs children. The goal of this project was to improve the parenting ability of participating adoptive parents and to create a sense of support among this population. A 12-week family support and educational process was designed and implemented to assist parents who had been identified as struggling to maintain their adoptive placement. The curriculum included extensive information on attachment and sexual abuse. Parents were given specific behavior management techniques researched and designed to improve the emotional health of special needs adoptees. A pre- and post-training questionnaire was administered to parents in order to assess the effectiveness of their support and educational experience. Improved understanding of their children was reported, as well as improved parenting skills. Children reported an overall sense of improved well-being. Staff reported improved agency community relations and lessened frustration. Appendices provide forms and questionnaires used in this study. (JBJ)

Worldwide there is great variation in how licensing young people to drive is handled. The minimum age for regular licensure varies, generally from 15 to 18 years. Prerequisites and conditions for licensure vary. Some licensing policies are more effective than others in controlling injuries associated with youthful driving: crashes involving young drivers constitute a major public health problem in every motorized society in the world. The first year of licensed driving is the riskiest of all. Inexperienced drivers of any age have a higher crash risk than more experienced drivers of the same age, but youthful age itself is strongly associated with crash risk. In setting licensing policies, societies are deciding how to handle the tradeoff between safety for young drivers (and others that share the road with them) and the mobility needs and desires of young people. Restrictive measures on youthful drivers reduce the crash and injury problem. Restrictive measures used throughout the world include: night driving curfews; prohibitions against driving on expressways; lower maximum speeds; and restrictions on carrying passengers without an adult present. Graduated licensing is a system that starts with a learners permit and systematically lifts restrictions under the rationale that there is no substitute for on-the-road driving as a means of gaining experience. In an effort to prevent substance use and abuse by children and adolescents, the California Drug, Alcohol, and Tobacco Education (DATE) Program was initiated in 1991. This report evaluates the program from perspectives of school district personnel, and students, generating an explanation of the "whats" and "hows" of drug prevention programs. Among school district personnel, nearly 250 students in grades 5-12, considered "at-risk for substance abuse" and "thriving" in their school, were interviewed in 40 focus groups. This data was combined with survey data from more than 5,000 randomly selected students in grades 7-12. The data strongly suggest that many student substance use decisions are either neutrally and/or negatively influenced by their school-based drug education. Researchers identified mismatch between how educational implementation/delivery compared with students' perception of issues. As grade level increased student dissatisfaction increased. Most

school district personnel and students believed that DATE services: (1) result in developmentally inappropriate programs; (2) undermine school personnel's credibility by giving students only one perspective, which students perceive as biased; and (3) help create policies that exclude those who are most in need of help. Appendices include 1992 and 1993 interview questions and "An Alternative View to the Risk Orientation." (JBJ)

A Preliminary Investigation of Factors Affecting Educational Attainment of Children of Divorce.

Pub Date—Aug 95

Note—18p.

Pub Type—Information Analyses (070)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Academic Achievement, *Children, Court Litigation, *Divorce, *Educational Attainment, Elementary Secondary Education, Family Problems, *Feminization of Poverty, Literature Reviews, Poverty, Sex Bias, Sex Discrimination

The total number of children affected by divorce has more than tripled since 1960, even though the total number of children has declined from the 1970s to the 1980s. In 1988 female-headed households with children and no spouse present constituted 44.7 percent of all families at or below the poverty level. The purpose of this paper is to show that inequitable treatment of women in our legal system, directly affects their children's achievement in school as measured by standardized test scores and other measures. Specific educational studies that have been conducted on children of divorce are described, showing lower mean performance IQ, lower SAT scores, and lower educational attainment. This inequity affects children's chances of fulfilling their potentials. It inhibits the United States from competing globally when children are not properly educated to meet the challenges of the future. Contains 11 references. (JBJ)

Social Roles Contribute to Age and Sex Stereotypes.

Pub Date—Aug 95

Note—10p.; Paper presented at the Annual Meeting of the American Psychological Association (103rd, New York, NY, August 11-15, 1995).

Pub Type—Speeches/Meeting Papers (150) — Reports — Research (143)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—College Students, Higher Education, Racial Factors, *Role, *Role Perception, Role Theory, Sex Stereotypes, Social Cognition, *Stereotypes

The purpose of this study was to test hypotheses drawn from the social role model about the process that people use in deciding what other people are like, focusing on the difference that other people's age, race, and sex make. A sample of non-Latino White students ($N=671$) ranging in age from 18 to 81 years used the Bem Sex-Role Inventory (BSRI) to rate a person in one of 12 target groups (a race-unspecified or African-American woman or man in their late 20s, late 40s or late 60s). Race-unspecified targets were almost always seen as non-Latino Whites. Old persons and women were seen as significantly more communal and less agentic in personality than younger adults and men, respectively. When students' estimates of the likelihood that the target they were rating was retired was controlled, the main effect for age of target in communal traits disappeared. This finding supports the interpretation that age stereotypes partly stem from perceivers' observations of people's social roles. (Author/JBJ)

ment, *Social Control, Social Influences, *Social Structure, Victims of Crime, *Violence

Violence is a part of daily life in the United States, the world's leader in the number of homicides, rapes, and assaults. This working paper examines the issue of violence in the United States from a gender equity perspective. Gendered violence is reinforced by cultural beliefs that allow individuals and groups to use violence to establish and maintain systems of control over others. Looking closely at the different ways in which we continue to perpetuate violence against women and girls, based on deeply ingrained gender-role stereotypes and expectations, helps us to see all the arenas—sexual harassment, date rape, battering, homophobic violence, and street violence—as linked. Within all areas the commonalities are clear: rigid gender-role expectations and the role of socialization create an acceptance of violence. The role of our society in supporting nonviolence can be strengthened through social institutions. Especially crucial to this is the role of education, a major carrier of the culture, which can help shape students' attitudes and behaviors toward nonviolence. By exploring violence as a gender issue, we hope to create an understanding of the entire issue of violence and offer hope for stemming all violence. Contains 49 endnotes; citations for over 100 books, journal articles, and videos; and a listing of 39 organizations located throughout the United States. (JBJ)

Descriptors—At Risk Persons, *Correctional Institutions, *Correctional Rehabilitation, *Crime, *Criminal Law, *Criminals, Justice, Law Enforcement, *Legislation, Police Action, Prisoners, Public Policy, Recidivism, Sentencing, Substance Abuse

Five million people in the United States are under the supervision of the criminal justice system, 1.5 million in prisons or jails, the rest on probation or parole, and the inmate population continues to grow. Taxpayers spend billions of dollars each year on prisons and jails, yet the solution to crime problems remains elusive. To assist in understanding the complexities of the criminal justice issue, this book contains the following chapters: (1) "The Prison Boom" describing the magnitude and consequences of prison population growth; (2) "The Cost of Incarceration" analyzing costs of prison construction and operation; (3) "Who Goes to Prison" describing America's incarcerated population; (4) "Why Inmate Populations Are Up" analyzing factors that have caused the prison population to rise so steadily; (5) "Drugs, Crime, and Imprisonment" providing an overview of the U.S. drug problem and impact of anti-drug policies on law enforcement, the courts and prisons; (6) "A Continuum of Sanctions" illustrating the range of sanctions available to punish, supervise, and treat offenders; (7) "What the Public Thinks" reporting the findings of research that examines society's view on sentencing policies; and (8) "Resources" providing a list of experts who can give further information on criminal justice issues. Contains a total of 205 references. (JBJ)

Conflict & Gang Violence Prevention Using Peer Leadership: Training Manual for CHAMPS.

CHAMPS Peer Leadership, Inc., Scottsdale, AZ.

Pub Date—[95]

Note—261p.

Pub Type—Guides - Non-Classroom (055)

EDRS Price - MF01/PC11 Plus Postage.

Descriptors—Anger, *Conflict Resolution, *Crime Prevention, Delinquency Prevention, Elementary Education, Elementary School Students, Interpersonal Communication, Juvenile Gangs, Peace, *Peer Influence, *Peer Teaching, Problem Solving, Social Cognition, *Teaching Guides, Violence

Conflict and violence on the part of adolescents and pre-adolescents has been a growing problem. Young people will respond to an "anti-gang message" if that message is delivered from their peer group. This manual describes a peer approach to impact young people about productive ways to han-

dle conflict. Older students are trained to operate puppets and present age appropriate pre-recorded lessons to K-3 students. Younger students respond well and listen to the older students. At the 4th through 6th grade level, peer led activities are provided to use within the classroom. Students take turn leading activities, becoming "part of the solution" rather than "part of the problem." This manual covers the program through the following chapters: (1) The program: An introduction; (2) The kit: What you have and how to use it; (3) The Need: Elementary conflict, gang & violence prevention is a must; (4) The puppeteers: Selection, training and techniques; (5) The method: K-3 puppet scripts and activities and the 4-6 peer led activities; (6) The facts: Conflict, gang & violence information for you, your staff and your parents; and (7) The results: How to evaluate the program and your students. This speech focuses on the ways in which many individuals try to teach others about emotional health and well-being without having accomplished the same for themselves. The speaker posits that some are better talkers than doers because to really find a sense of health and stability, one must forget about oneself; one must become "absent" of self rather than focused on self. Further, a sense of well-being and fulfillment will never be found with the intellect by dwelling on what this personal sense of self thinks it wants, needs, or deserves. There are eight characteristics or attitudes of an emotionally healthy adult: sees what needs to be done and does it; (2) lives life in silent integrity; (3) serves others; (4) is creative and a good problem solver; (5) accepts changes and disruptions; (6) is not influenced by peer pressure; (7) is kind, gracious, courteous, giving and compassionate; and (8) has a sense of humor. Teaching young children and working with their parents is the perfect employment for anyone seeking emotional health because many daily demands are made to forget oneself, so ideas, certainty, and goodness can flow. These demands are what force the practice of this absence of self so fulfillment can follow. Educator attitudes towards the parents of the children they teach create the environment in which parents can learn about children, parenting, and emotional health. The speaker exemplifies this philosophy through discussions of parenting and child behavior. (JBJ)

Harassment, like other forms of violence against women, is not a new problem. It is not a problem that will just go away, but it can be stopped. This guide is designed for use by organizations and em-

players to help them develop policies and implement programs in their workplace that address workplace sexual harassment. It focuses on Canadian employers' responsibilities and the organizational benefits of stopping sexual harassment in the workplace. Chapters are: (1) The Nature of Sexual Harassment; (2) How Is Sexual Harassment Defined?; (3) Impacts and Costs of Sexual Harassment; (4) The Legal Framework; (5) Taking Action; (6) Case Studies; and (7) The Benefits of Prevention. Succinct chapter summaries and several quizzes help the reader retain the material. Other resources are a listing of Canadian phone numbers and agencies that can help, sample policies and procedures; a listing of related videos and films; and a reading list. (JBJ)

Working in partnership with the Ontario Women's Directorate, Camco Inc. has taken a planned approach in determining appropriate workplace initiatives to help its employees address the issue of balancing paid work and family responsibilities. Camco surveyed employees to identify their needs and determine what kinds of programs would best respond to those needs. This results of Camco's survey and issues raised by the company's workforce are examined focusing primarily on flexible working arrangements—the option preferred by most Camco employees. Implications for employees, employers, and unions are discussed and an implementation plan is presented. This publication is part of the Ontario Women's Directorate Change Agent Program, the goals of which include improving the economic status and representation of women in the labor force and providing tangible examples of project initiatives for organizations to consider when developing their own employment equity programs. Chapters are: (1) Identifying Employee Needs; (2) Flexible Working Arrangements: Options and Issues; (3) Flexible Working Arrangements: Implications; and (4) Developing an Implementation Plan. Also included are a description of the Ontario Women's Directorate and a copy of the questionnaire. (JBJ)

The dynamics of the Canadian workforce have changed. Demographic, social and employment trends, coupled with the changing face of the Canadian family, will increasingly challenge business and industry in the '90s. This practical resource guide for employers explores the changing relationship between family and paid work, and how that new relationship affects organizations and employers. It examines various flexible working arrangements employers may wish to consider, as well as a range of benefits, programs and services which can help employees balance work and family priorities. A number of pragmatic issues affecting the implementation of any family-based option are also reviewed. It shows how leading companies have developed strategies to benefit from these changes. Chapters are: (1) The New Dynamics of the Workplace; (2) The Changing Face of the Family; (3) Planning for Change; (4) Flexible Working Arrangements; and (5) Benefits and Services. Additional information includes: Where to find help; employee/employer benefits; a checklist for employers; and work and family fact sheet. Contains a 31-item bibliography and 53 endnotes. (JBJ)

Language can both reflect and shape the way people are treated in today's society. It can be used to open doors when it is gender inclusive, or to create barriers when it is not. The goal of this booklet is to encourage gender-inclusive language. Bias-free language is effective language. A number of studies demonstrate that an audience is more likely to "get the message," and to remember information, when inclusive language is used. This guide can help eliminate gender bias in writing, speech, and images. It is not meant to be a complete treatment of the subject, but rather a practical resource. The chapters are: (1) The Language Barrier: An Introduction to the "why" of inclusive language; (2) It's a Matter of Clarity: Reasons for arguments against inclusive language; (3) Sticky Wickets, and How to Avoid Them: Some advice on the "rules" of inclusive language; (4) Words to the Wise: A glossary; (5) Language on the Move; (6) Women Speak up About Sex-Biased Language; (7) Cracking Down on Bias: Insiders share their strategies; (8) Word Buffs, Take Note; and (9) Suggested Reading, a 12-item annotated bibliography. Canadian business is changing. Competition is stiffer, markets are shifting. The workforce is also changing. Flexibility in when, where, and how work

gets done is key to attracting the employees organizations need to gain a competitive edge. Many companies, organizations, and unions are recognizing the interdependence of work life and family life. Union Gas is one organization that has responded to shifting patterns of work life and home life. In 1990, the company put together a task force of employees and asked them to look at emerging workplace issues. A number of key issues were identified: an aging workforce; a shortage of skilled entry-level workers; greater labor force diversity; and employees' changing lives and lifestyles. For many Union Gas employees, the number one workplace issue is balancing work life and home life. Accordingly, the company decided to look more closely at its response to paid work and family issues. This document describes Union Gas' experience and policies to encourage other employers to identify employee needs and take steps toward creating more family-supportive workplaces. Chapters are: (1) Support for Family Care; (2) Retiree Support; (3) Flexible Work Arrangements; (4) Family Leaves; (5) Relocation Assistance; (6) Health and Wellness Promotion; (7) Conclusion; and (8) The Policies. Descriptors—Athletes, Athletics, Course Content, *Curriculum Guides, High Schools, High School Students, Lesson Plans, Secondary Education, *Sex Bias, Sex Discrimination, *Women's Athletics, Womens Studies

There continues to be oppression among female athletes, even after the enactment of Title IX in 1972. Female athletes in secondary schools deal with low self-esteem, eating disorders such as anorexia and bulimia, and depression. Female athletes struggle with societal pressures to maintain a model-like figure, while trying to train and perform for an athletic event. This 3-day curriculum focuses on secondary female athletes 16-18 years of age. The purpose of this curriculum is to educate these females on the discrimination they face, to provide them with tools to become aware of oppressive acts, to build self esteem and confidence, to provide awareness of racial discrimination among female athletes of color, and to provide role models of successful and talented female athletes. The curriculum covers (in order by day): (1) societal issues, stereotypes and incidents within female athletes; (2) how the media portrays male and female athletes differently; (3) questionnaires and activities the students can engage in, along with discussion of racism issues in female athletics; (4) salary differences between male and female athletes and societal pressures placed upon female athletes to perform to a societal ideal; and (5) positive aspects of being a female athlete. Effects of Support on the Attitude of the Primary Caregiver of a Child with Down Syndrome.

Pub Date—Nov 94

Note—38p.; Paper presented at the Southern Association for Counselor Education & Supervision (Charlotte, NC, November 3-6, 1994), the Southeastern Conference of Counseling Center Personnel (Chattanooga, TN, November 9-11, 1994), and the Tennessee Counseling Association, (Chattanooga, TN, November 20-22, 1994).

Pub Type—Reports - Research (143) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—*Caregiver Child Relationship, *Child Caregivers, Child Rearing, Disabilities, *Down Syndrome, Family Attitudes, Interpersonal Relationship, Mental Retardation, *Parent Attitudes, Social Networks, *Social Support Groups, Stress Management, Stress Variables
Parents of children with mental or physical handicaps often experience overwhelming feelings of stress and anxiety. Research indicates that support for the primary caregiver can help alleviate some stressors involved in raising a child with a handicap. This study examined how level of support affects feelings of satisfaction the primary caregiver has

when raising a Down Syndrome child. It was hypothesized that the caregiver's positive feeling of satisfaction would correlate positively with level of support found within the informal support system (family, relatives, friends) and level of utilization of the formal support system (doctors, teachers, support groups). It was also hypothesized that the informal support system would be more beneficial than formal networks of support. Data were collected using a 35-item questionnaire from a national sample of 82 volunteers and were analyzed using a one-way analysis of variance and correlational techniques. A significant correlation was found between positive feelings of satisfaction and both informal support formal support. However, the informal support system was not found to be more beneficial. These findings indicate that help from any level of ecological influence may have positive effects on primary caregiver's feelings of satisfaction. Contains 24 references. (Author/JBJ)

Many factors influence the development and socialization of American adolescents including peers, schools, family, and the community. This paper examines how the relationship of extracurricular participation influences academic growth. To determine if selected personal and academic variables during high school currently affect college academic performance, 292 college students participated in the study. The degree of participation in extracurricular activities was assessed using a self-report questionnaire designed to provide responses about the students' academic and extracurricular experience during high school years. Participation was also broken down into separate areas of sports, music, dance, theater, and other activities. Data were collected on social, academic recognition, and affiliation as well. Analyzed data compared academic grade point average, educational aspirations, and various social supports that influence academic performance. Additionally, based on information gathered, recommendations are offered for future research, as well as discussion of benefits and limitations of the study. Contains 10 graphs and 30 references. A Study of the Difference between the Likelihood of Males and Females Being Sexually Abused.

Pub Date—Aug 94

Note—55p; Research Paper, Sam Houston State University.

Pub Type—Reports—Research (143)

EDRS Price—MF01/PC03 Plus Postage.

Descriptors—Adolescents, *Child Abuse, Incest, Incidence, Preadolescents, Rape, Secondary Education, *Sex Differences, *Sexual Abuse, Victims of Crime

Identifiers—Texas (Harris County)

The purpose of this study was to explore the difference between the sexual abuse of males and females. The study group was a caseload of clients from the Northside Family Resource Center in the Houston area, a branch of the Mental Health Mental Retardation Association (MHMRA) of Harris County, Texas. The researcher studied 21 children, age 10 through 17 years. A 14-question questionnaire was used to collect information about the sexual abuse of children. The data indicated that there was a difference in the likelihood of males and females being sexually abused at a 0.01 level of significance allowing the rejection of the null hypothesis which stated there would be no significant difference in sexual abuse between males and females. Other findings suggested that there was no significant relationship between the sexual abuse of chil-

dren and race or the number of adults in the home. It was recommended that further studies be conducted on a larger population sample. Fifteen appendices provide materials used in the study, including the questionnaire, and 13 tables. (Author/JBJ)

Descriptors—Assertiveness, College Students, Higher Education, Individual Power, *Life Satisfaction, Mental Health, *Personality Traits, *Self Esteem, Sex Differences

Identifiers—California Psychological Inventory, Dominant Behavior, Good and Good Self Esteem Scale, Life Satisfaction Index A

In U.S. society dominance appears extremely desirable. The purpose of this study was an attempt to measure the relationship between dominance, self-esteem, and life satisfaction. Research questions were: "Do the people who score high on the Dominance scale of the California Psychological Inventory have higher self-esteem scores as measured by the Good and Good Self-Esteem Scale?" and "Do life satisfaction scores on the Life Satisfaction Index A show a significant correlation with dominance and self-esteem scores?" The subjects came from introductory psychology classes and upper-division psychology classes. There were 116 males and 188 females who took part in the study. The results indicated that those who scored high on the Dominance scale also scored high on the Self-Esteem scale. It was also found that those who scored higher on the Dominance and/or the Self-Esteem scale also had higher scores on life satisfaction. Upperclassmen scored higher on both dominance and self-esteem, and males scored higher on self-esteem. There were no interaction effects on gender, dominance, and self-esteem on life satisfaction. Contains 16 references. (JBJ)

Descriptors—Allied Health Personnel, *Health Occupations, *Health Personnel, Incidence, Physical Health, Professional Occupations, *Substance Abuse

Identifiers—Tennessee (Rutherford County)

Drug abuse is a serious problem in today's work force. It is found in every occupation, from the entry-level employee to the chief executive officer. Among health care professionals alcohol is the number-one substance abused, prescription drugs are second, and cocaine is third. Substance abuse among health-care professionals in Rutherford, Tennessee and surrounding counties was investigated in this study. There were 1,817 subjects surveyed by mail. Each subject received a questionnaire and cover letter. There were 775 surveys completed, a return rate of 43%. A one-way analysis of variance (ANOVA) found a significant difference in prescription drug use among the groups of health-care professionals. A 2x7 factorial ANOVA found that the occupation of health-care professionals significantly affects their tolerance for working with drug abusers. A third ANOVA did not find a significant difference in users and nonusers' knowledge of substance abuse. The chi-square test found that the gender of the respondent was correlated with the gender he/she believed was the more likely to be impaired. The results of this study show that substance abuse is not a significant problem among the health-care professionals of Rutherford and surrounding counties. Contains 19 references. (Author/JBJ)

Brown, Robert S.

Mentoring At Risk Students: Challenges and Potential, No. 217.

Toronto Board of Education (Ontario).

Report No.—ISBN-0-88881-241-8; ISSN-0316-5786

Pub Date—Oct 95

Note—34p.

Pub Type—Information Analyses (070)

EDRS Price—MF01/PC02 Plus Postage.

Descriptors—At Risk Persons, Foreign Countries, *High Risk Students, High Schools, High School Students, Interpersonal Relationship, *Mentors, Modeling (Psychology), *Potential Dropouts, Special Needs Students, Teacher Student Relationship

Identifiers—Canada

"Planned", "artificial", or "formal" mentoring of students at risk of dropping out of high school has become an important component of many school systems over the past few years. Mentoring of at risk students appears to have originated in the United States in the 1980's. In Canada, at risk student mentoring programs have grown substantially in the past few years. The diverse use of the term "mentoring" has concerned a number of researchers and practitioners in the field, who note that the term is used for such a broad set of activities and objectives that it may become meaningless. The link between mentoring program and results—while promising—has not yet been definitively shown by available research. Implementation of planned mentoring, in trying to replicate the "magic" of natural relationships, often runs into logistical snags. The programs often exist in a sort of administrative limbo and are often financially fragile. Recent research suggests that in contrast to earlier expectations, mentoring should be thought of as modest interventions given the number of limitations facing programs. Results of these newer innovations will not be known for some years. A great deal more needs to be done before the true picture of mentoring is seen. Contains 63 references. (JBJ)

Reconsidering Sex Roles and Aging: Preliminary Data on Some Influences of Context, Cohort, Time.

Pub Date—[95]

Note—22p.

Pub Type—Reports—Research (143)—Tests/Questionnaires (160)

EDRS Price—MF01/PC01 Plus Postage.

Descriptors—Age Differences, *Aging (Individuals), *Individual Development, Middle Aged Adults, Rural Population, Sex Differences, *Sex Role, Sex Stereotypes, *Sexual Identity, Social Development, Urban Population, Young Old Adults

Identifiers—Bem Sex Role Inventory

The Bem Sex Role Inventory was administered to adults age 60 and over to examine the nature of their scores on this scale in light of their current developmental demands and life circumstances. This study examined whether there is reason to believe that the nature of mature adults' scores is influenced by four things: passage of time; cohort in which respondents were born; rural or urban context; or by chronological adult age. This continuation of earlier studies readministered the Bem Sex Role Inventory to community dwelling urban older adults who had been tested the first time when they were age 60 or older. At the same time, additional community dwelling cohorts of older adults were tested. Although none of the respondent samples strongly endorsed the Bem items, predictions that Masculinity scale items would be more strongly favored by rural participants, and that middle-aged participants' responses would differ by gender more than older participants' responses were supported. However other differences related to time, age, and gender ran counter to predictions. Results were interpreted in light of theories of sex role development, prior research on sex roles and aging, and the limitations of current measures of roles. Contains 16 references. A table of statistical analysis is appended. (JBJ)

Planning To Meet Career Development Needs: School-to-Work Transitional Programs: Program Guide, Second Edition.

National Occupational Information Coordinating Committee (DOL/ETA), Washington, DC.

Pub Date—Oct 95

Note—29p.

Pub Type—Guides - Non-Classroom (055)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Administrator Guides, Career Counseling, *Career Development, Career Education, Career Planning, Comprehensive Programs, *Education Work Relationship, Elementary Secondary Education, *Federal Legislation, Program Development, *Program Guides

Identifiers—School to Work Opportunities Act 1994

The purpose of this guide is to help those who are planning implementation grants for funding through the School-to-Work Opportunities Act (STWOA) and for local districts who are planning for implementation of school-to-work transition programs. It is a program guide designed to provide a framework through which each state or district might plan to address the career development needs identified in the Act. It also demonstrates how existing resources, both organizational and material, form a framework to support career development planning and implementation. Chapters include: (1) Why Should We Have a Comprehensive Career Development Program? (2) What Is Career Development? (3) What Are the National, State, and Local Roles in Career Development? (4) How Do We Design a Comprehensive Career Guidance and Counseling Program? (5) What Are Some Best Practices at Each Level? (6) What Are Issues to Consider in Planning? (7) Selected Resources, Products, and Training and How They Relate to Career Development Needs; and (8) Organizations That May Be Helpful to You. Appendices are: (1) Selected Text of School-to-Work Opportunities Act; (2) An Action Plan: Developing a Comprehensive Developmental Career Guidance Program That Meets the Needs of School-to-Work Transition Initiatives; (3) State Occupational Information Coordinating Committee Addresses and Telephone Numbers; and (4) Career Guidance and Counseling Program Information: OVAE. Why Does Phonics Work?: Process vs. Declaration.

Pub Date—95

Note—6p.

Pub Type—Opinion Papers (120)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Elementary Education, *Phonics, *Reading Instruction, *Reading Skills, *Sight Method, *Skill Development

Identifiers—Words

Reading is a skill—learning how the alphabet works by using it. Learning how to do it involves practice in building letters into words. As the decoding process is practiced, phonics moves into long-term storage. Building the skill of reading has the same 4 aspects as developing other skills: (1) the beginner uses the motion of his vocal organs to repeat the sounds the letters represent; (2) once the beginner discovers how to build 3-letter words with the short vowel, succeeding steps are merely variations on the first step; (3) the first early discovery of how to build those 3-letter words may be startlingly rapid; and (4) once the skill has been obtained it is not forgotten. In contrast, there is the look-say or whole word method in which recognition is factual, declarative. While look-say victims turn up in fourth grade unable to read more difficult texts, phonics users have moved on into reading whatever is available. (RS)

Lives in the Balance: Teaching about Pets and Pet Care.

Pub Date—13 Nov 95

Note—12p.; Paper presented at the Combined Meetings of the Great Lakes International Reading Association and the Southeast International Reading Association (Nashville, TN, November 11-15, 1995). Best available copy.

Pub Type—Speeches/Meeting Papers (150) — Reference Materials - Bibliographies (131) — Guides - Classroom - Teacher (052)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Animal Caretakers, *Animals, Class Activities, Elementary Education, *Pets, Reader Text Relationship, Thematic Approach

Identifiers—*Reading Uses, Trade Books

This paper presents lists of books about pets and pet care, a list of pet theme ideas, an anticipation guide, and a list of community and professional resources. The 23-item list of books about pets and pet care (published between 1940 and 1994) is divided into sections on teacher's choices, nonfiction, recent books, and teacher resources. The 21-item list of pet theme ideas offers suggestions for class activities. The paper then presents a description of the purpose and procedures of the "anticipation guide," which creates a mismatch between what students may know and what is presented in the text. The paper also presents an anticipation guide about cats. The paper concludes with a list of information available from six local-level and four national-level community and professional resources. (RS)

Arthur, Janice E.

What Is the Effect of Recreational Reading on Reading Achievement of Middle Grade Students?

Pub Date—[95]

Note—13p.

Pub Type—Reports - Research (143)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Comparative Analysis, Intermediate Grades, Low Income, Middle Schools, *Reading Achievement, Reading Research, *Recreational Reading

Identifiers—Aliteracy, *Middle School Students

A study investigated whether middle-school students who identify recreational reading as a hobby obtain significantly higher reading achievement scores than those middle-school students who have not identified recreational reading as a hobby. Subjects, 55 students in grades 4, 5, and 6 at the Earle Elementary Public School located in a predominantly low socio-economic neighborhood, completed a hobbies and interest checklist. Five students who identified themselves as recreational readers and five students who did not identify recreational reading as a hobby were randomly selected and had their reading achievement scores from the Iowa Tests of Basic Skills compared. Results indicated that recreational readers in grade 4 had higher reading achievement scores than students who were not recreational readers. Results also indicated no statistically significant differences in reading achievement scores for recreational and nonrecreational readers in grades 5 and 6. Recommendations include: (1) primary grade students should be read to by their teachers daily; (2) silent sustained reading should occur at the beginning of each school day; (3) school staff members should be offered a professional development program to explore the influence of recreational reading in reading achievement; and (4) a parent education program that will guide them in how to nurture and support reading by choice should be implemented. (Contains nine references and one table of data.) (RS)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Classroom Environment, Elementary Education, Instructional Effectiveness, *Reading Improvement, *Reading Instruction, *Reading Motivation, *Reading Strategies, *Student Motivation, Thinking Skills

Identifiers—*Concept Oriented Reading Instruction, Trade Books

Concept-Oriented Reading Instruction (CORI) offers children the opportunity for endless challenges and discovery. Engaged literacy learners are motivated, have conceptual understanding, use cognitive strategies, and interact socially. CORI is a classroom context that promotes literacy engagement in terms of seven dimensions: observational, conceptual, self-directed, strategic, collaborative, self-expressive, and coherent. To teach CORI, teachers need lots of trade books, imagination, a plan, and at least one other teacher or a team of

teachers to share ideas and give and receive feedback. Three of the most salient and important benefits of CORI are: (1) the development of long-term motivation; (2) development of long-term motivation coupled with higher-order thinking skills and strategy use; and (3) CORI helps students to think conceptually and cogently. Shu, Hua Anderson, Richard C.

Role of Radical Awareness in the Character and Word Acquisition of Chinese Children. Technical Report No. 615.

Center for the Study of Reading, Urbana, IL.

Pub Date—Nov 95

Note—23p.

Pub Type—Reports - Research (143)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Beginning Reading, *Chinese, Elementary Education, Foreign Countries, *Ideography, Reading Research, Reading Skills, *Word Recognition, Word Study Skills

Identifiers—*China

A total of 292 Chinese children in the first, third, or fifth grade in Beijing, China, participated in one of two experiments investigating radical awareness; that is, the knowledge that a component of most Chinese characters, called the radical, usually provides information about a character's meaning. The technique was to present two-character words familiar from oral language but which the children had not seen before in print. One of the characters was written in Pinyin, the alphabetic system that every Chinese child learns in the first two months of first grade. The children's task was to select a character to replace the Pinyin. The first experiment showed that third graders and fifth graders are able to select characters containing the correct radicals even when the characters as a whole are unfamiliar to them, which must mean that they are aware of the relationship between a radical and the meaning of a character. The second experiment showed that children are better able to use radicals to derive the meanings of new characters when the radicals are familiar and the conceptual difficulty of the words is low. Children rated by their teachers as high in verbal ability display more awareness of radicals than children rated lower in verbal ability. (Contains 28 references, 5 tables of data, and ANOVA summaries for each of the experiments.) (Author/RS)

Descriptors—*Early Intervention, *Educational Change, Literacy, Primary Education, Program Development, Program Implementation

Identifiers—Reading Management, *Reading Recovery Projects

A literacy intervention is designed to produce accelerated change, moving student achievement rapidly and providing for sustained performance over time. Adopting a complex intervention is a problem-solving process that requires understanding of the conceptual congruity of all aspects of the theory, intervention, and training underlying the intervention. Some of the elements within Reading Recovery address the complexity of implementation and the accompanying structures that support meaningful change. Structures include those that foster sustained teaching success, leadership structures for addressing complexity, and structures for leading consensus-building communication. The presence of a strong network of support for the broader concepts of an intervention helps to build assurances of quality during initial adoption that can then be maintained in subsequent implementations. One aspect of the Reading Recovery network that lends stability to the project as it expands is the constructive nature of the on-going professional development that promotes continual discourse regarding quality and consistency among a large number of continually expanding project sites. As a provider, Reading Recovery has structured central data and information centers to support expansion efforts. The role of interventions, embedded in host systems, that provide substantial change for the most

needy individuals in the system is an essential role for the transformation of American education. (Contains 15 references.) (Author/RS)

Descriptors—Bilingualism, Cross Cultural Studies, Elementary Education, Higher Education, *Language Acquisition, Language Role, *Languages, *Literacy, *Metalinguistics, *Reading Processes, Reading Research, *Reading Writing Relationship

Identifiers—*Emergent Literacy, Phonemic Awareness

Defining metalinguistic awareness as the ability to reflect on and manipulate the structural features of language, this article examines the hypothesis that the metalinguistic demands of learning to read are shaped by the structure of a language and its associated writing system. The article examines the relationship between phonemic awareness and alphabetic literacy, for example in English, and the role of metalinguistic awareness and non-alphabetic literacy, for example, in Chinese. The ways that bilingualism increases certain aspects of metalinguistic awareness are also examined. The article concludes by noting an instructional implication of the metalinguistic hypothesis: that it is the youngest, least advantaged, least able children who will benefit most from instruction that helps them become aware of the structure of their writing system and its relationship to their spoken language. Contains 16 references. (Author/SR)

WEE Science—Integrating Content Area Reading and Science Education. Technical Report No. 620.

Center for the Study of Reading, Urbana, IL.
Pub Date—Nov 95
Note—34p.

Pub Type—Reports - Research (143)
EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Classroom Research, *Content Area Reading, Cooperative Learning, Grade 5, Instructional Effectiveness, Integrated Activities, Intermediate Grades, Pilot Projects, Reading Research, *Science Education

Identifiers—Trade Books

Two pilot studies of a new science program called WEE Science were conducted in fifth-grade classrooms. The pilots lasted for 7 days in one of the classrooms and 9 days in the other. At the beginning of the program the students chose a science tradebook from among the many that the researchers, teachers, and librarians had selected and brought to the classroom. The students then formed groups based on the topics of the books and asked questions (Wondering) about the content. After choosing one of the "wonderments" to pursue further, the students formed and implemented a plan for investigating (Exploring). In each classroom, each student explored, working in cooperating groups of two or more. The students then explained (Explaining) to a group of their peers what they had wondered and what and how they had explored. The students' wonderments, activities, plans, and explanations were recorded in a science notebook that had been designed for that purpose. In addition, the classrooms were videotaped while WEE Science was in progress. The researchers analyzed the notebooks and videotapes to help them in their exploration and explanations of WEE Science. While the pilot studies were successful in that most students eagerly participated in all phases of the project, some problems were encountered which created another round of wondering for the researchers. Some of these were: evaluating students' work, responding to science misconceptions of students, teaching some students to record observations in their notebooks, deciding where WEE Science would fit best in the curriculum, and anticipating its reception in the science education community. (Contains 22 references. An appendix presents selected pages from the WEE Science Student Notebook used in the pilot study.) (Author/RS)

Identifiers—*Educational Issues, Global Issues, *Language Evolution

Important and dramatic changes are occurring in five broad areas of literacy: the movement toward universal literacy; the changing demands for literacy in the workplace; the creation of a global society; how languages are evolving; and the way literacy practices are becoming immersed in new technologies. Future literacy needs will demand a continual rethinking of the purposes of schooling in relation to society, and in particular, an ongoing critical analysis of the way in which access to societal resources change in response to changing conceptions of literacy. The traditional separations among disciplines of study and types of work are in question, implying the need for more integrated conceptions of literacy and literacy development. The globalization of trade, work, language, history, and politics is reconstituting and expanding conceptions of literacy. Literacy is changing along with changes in languages, especially English. Literacy is inextricable from conceptions of and uses of information and communication technologies, including both new technologies like the Internet and older ones like the book. Whether changes in literacy will lead to greater access to information and tools, to more liberatory education, to multicultural understanding, to improved social relations, or to a more democratic society remains to be seen. (Contains 52 references, 5 notes, and a table listing 14 Internet resources.) (RS)

Identifiers—Boise Public Schools ID, Boise State University ID, Fire Safety Education

This report describes the methods used to plan, organize, and teach an integrated thematic unit in the Spring of 1994 at Fairmont Junior High School in Boise, Idaho. The unit was planned collaboratively with assistance from preservice teachers and their professors at Boise State University, the principal and teachers at the junior high school, and members of the Partners in Education board at Fairmont Junior High. The thematic unit—the Mock Fire Disaster—focused on the dangers and consequences of unplanned fires. Evaluations by the junior high teachers and responses of the secondary students were generally favorable and thoughtful. The collaborative efforts of the school, university, and community organizations alleviated some of the time, materials, and energy blocks to the development of integrated thematic units. Contains 22 references and a table of data. Sample lesson plans and excerpts from student essays are attached. (Author/RS)

*Science Education, *Scientific and Technical Information

Identifiers—*Explanations, Text Factors

This paper outlines Explanation Construction Theory, a psychological theory of how people come to comprehend scientific explanations. Explanation Construction Theory has three components: (1) a theory of how scientific knowledge is represented in memory; (2) a taxonomy of different representations that can be formed in response to an encounter with a text presenting a theory; and (3) a set of factors that influence which of these representations will be constructed. The paper outlines each of these components and illustrates the three components by presenting examples from the domain of chemistry. The paper concludes by discussing some instructional implications of Explanation Construction Theory. Contains 26 references and a table that presents a detailed example of an explanatory model of evaporation. (Author/RS)

Descriptors—*Context Clues, Elementary Secondary Education, Literature Reviews, *Reading Research, *Second Language Learning, *Vocabulary Development, Vocabulary Skills, Word Recognition

Identifiers—*Word Learning

The importance of context in vocabulary learning is evident from two common-sense observations: what a word means often depends on the context in which it is used, and people pick up much of their vocabulary knowledge from context, apart from explicit instruction. Available evidence supports a relatively strong version of each of these observations. Research in learning words from context reveals significant limitations of "guessing meanings from context" as a means of learning words. A single encounter with an unfamiliar word in context seldom reveals more than a fraction of the word's meaning. However, evidence can also be found that shows the limitations of decontextualized forms of vocabulary learning. Though wide reading cannot be viewed as a panacea, there is good reason to consider it a necessary condition for the development of a large reading vocabulary. Although the limits of contextual guessing must be recognized, context remains an important source of information. And although learning from context is demonstrably more difficult in a second language, second-language readers gain significant word knowledge simply from reading, and increasing their volume of reading produces significant gains in vocabulary knowledge and other aspects of linguistic proficiency. Effective use of context to disambiguate words, or to infer the meanings of unfamiliar words, depends on a variety of types of knowledge—world knowledge, linguistic knowledge, and strategic knowledge. To some extent, world knowledge and strategic knowledge can help compensate for limitations in second-language learners' linguistic knowledge. (Contains 67 references and 2 notes.) (Author/RS)

On the Logical Integrity of Children's Arguments. Technical Report No. 628.

Center for the Study of Reading, Urbana, IL.
Pub Date—Nov 95
Note—31p.

Pub Type—Reports - Research (143)
EDRS Price - MF01/PC02 Plus Postage.

Descriptors—*Children, Communication Research, Discourse Analysis, Grade 4, Intermediate Grades, *Language Patterns, Logical Thinking, *Persuasive Discourse

Identifiers—*Communication Behavior, Conversation

A study investigated properties of children's naturally occurring arguments. The arguments were sampled from transcripts of 20 discussions held in 4 fourth-grade classrooms. The principal findings were that children's arguments are filled with seemingly vague referring expressions; that the arguments sometimes do not contain explicit

conclusions; and that the arguments almost never contain explicit warrants to authorize conclusions. However, the missing or obliquely identified information usually is given in the text or preceding discussion or is a commonplace from everyday life and readily inferable by actively cooperative participants in the discussion. Children seldom back their arguments by appealing to general principles, except when the foundation for the argument is disputed or seems confusing. At a more general level, findings suggest that it is possible to give a coherent account of children's arguments within the framework of informal deductivism augmented with speech act theory. (Contains 27 references, 1 note, and 1 table of data.) (Author/RS)

Descriptors—Case Studies, Intermediate Grades, *Reader Text Relationship, *Reading Instruction, Reading Processes, Reading Research, *Reading Strategies, Research Needs, *Text Structure Identifiers—Text Types

Two theoretical perspectives are woven together to frame an approach to classroom reading instruction. Viewing reading instruction from a literary perspective and a psychological perspective has the potential to help students understand the distinctions between different text types and the various purposes for reading—information, enjoyment, and emotional engagement. Three vignettes describe actual intermediate-grade reading lessons, specifically focusing on practices relevant to the theories. To help students achieve a high level of engagement and understanding, the classroom reading program needs to incorporate both the literary perspective and the psychological perspective. Studies to explore the use of pseudo-fiction or even novels in teaching content may be needed. More work needs to be done to examine the state of classroom practices in terms of discourse force and the adoption of stance. (Contains 21 references.) (Author/RS)

Reexamining the Issue of Authenticity in Picture Books.

Pub Date—[95]
Note—14p.
Pub Type—Opinion Papers (120)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors—Asian Americans, Authors, *Children's Literature, *Cultural Awareness, Cultural Traits, Elementary Education, *Ethnic Stereotypes, Folk Culture, Illustrations, *Picture Books Identifiers—*Authenticity, Cultural Sensitivity, *Trade Books

The cultural authenticity of picture books, for both literary and art quality, is examined. In a study done by the Council on Interracial Books for Chil-

dren (CIBC) in 1976 "How the Children's Books Distort the Asian American Image," 66 children's books published from 1945 through 1976 were examined and problems of serious stereotypes were found. Of the 24 picture books in the analysis, 22 were found to be "racist, sexist, and elitist." At the 21st Annual International Conference of Children's Literature Association in 1994, a study by Violet H. Harada indicated improvement in authenticity of picture books with 90% of the works using positive non-stereotypical portrayals and 70% presenting authentically described cultural details. Throughout these studies, however, the meaning of "authenticity" is not clearly defined. There is a fundamental difference between the concepts of authenticity and of non-stereotyping. Examples from popular picture books show how sometimes even small errors can be important for the cultural groups in question. Also, members of a cultural group do not always agree with each other on cultural values. Writers and illustrators need to train themselves to distinguish the values, facts, and attitudes which members of a culture as a whole would consider worthy of acceptance and belief. Several studies indicate that folktales represent an extremely high percentage of multicultural picture books. Writers need to carefully select and adapt stories, engaging in research to reflect the culture of origin and to make their value implications compatible with those of recipient cultures. Identifiers—*National Assessment of Educational Progress
This revised report presents a look at national and state-level findings of students' overall proficiency in the National Assessment of Educational Progress (NAEP) 1994 reading assessment for grades 4, 8, and 12 and provides comparisons with the performance of their 1992 counterparts. The first chapter introduces the report, discussing topics such as the NAEP, the national sample, the trial state assessment program, the proficiency scale, achievement levels, and cautions in interpretations. The second and third chapters present a first look at the average reading proficiency and the attainment of achievement levels by America's students, discussing average national reading proficiency and average reading proficiency by region and by major reporting subgroups (race/ethnicity, gender, parents' educational level, public and nonpublic schools, and cross-state proficiency findings). Major findings include: (1) the average reading proficiency of 12th-grade students declined significantly from 1992 to 1994; (2) across all three grade levels, female students continued to display higher reading achievement than male students; (3) reading proficiency was higher on average for students whose parents had more education; and (4) students attending nonpublic schools displayed higher average reading proficiency than their counterparts attending public schools. Appendixes present national and state sample descriptions, reporting subgroup(s) definitions, comparisons among states based on average proficiency, cross-state proficiency and achievement level tabular summaries, and state contextual background factors. Contains 7 figures and 12 tables of data. (RS)

Identifiers—Culturally Different Students, *National Center for the Study of Writing and Lit, *Research in Progress, Teacher Researchers

Noting that within the area of literacy, writing is a young area of study, this research report looks at the impact of the national Center for the Study of Writing and Literacy's 10 years of sustained research. The paper first considers how Center research projects and activities have been tied together to address three interlocking sets of questions: (1) What writing demands are made upon students in key educational, family, community, and workplace settings? (2) How do students meet these demands? and (3) How do teachers help students meet these demands, and how can student progress be measured? The paper then states that in Center projects that involve teacher research, a striking role was found for writing in the professional development of teachers, based on reflection and inquiry that grows out of various forms of teacher research. The paper then points out that one of the biggest challenges facing the United States today is finding ways for varied cultural groups to come together in multicultural classrooms and communities. The paper provides several case studies illustrating this line of research, including one study of immigrant adolescents learning to write in English. The paper then elaborates on research into the changing literacy requirements in the workplace, discusses diverse methods of writing assessment, and considers cultural differences between readers and writers. The paper concludes by stressing the centrality of writing and literacy for an individual's success in school and the workplace and its importance to the effective functioning of the larger community. Identifiers—*Gender Issues, *Homosexual Literature

Teachers committed to breaking the silence on lesbian and gay issues in college-level writing classes can consult a growing body of literature by teachers similarly committed. None of this literature, however, has yet identified ways to bring readers in "queer" theory to the undergraduate writing class. Examining the work of four teachers who are progressive in their use of gay and lesbian issues in the classroom can provide suggestions for teachers as to how they might use "queer" theory to enhance their approaches. Doris Davenport, for instance, deliberately employing a challenging style that some of her colleagues call "confrontational," creates a tumultuous and transformative experience for her students, from whom she demands and often gets honesty and a willingness to confront cultural institutions. Any theory students get in her classroom, however, comes from her, and because no teacher, maverick or mainstream, is credible to all students, she encounters resistance. Three other teachers, L. E. Hart, S. H. Parmeter, and Sarah Sloane, stress the importance of a classroom where it is safe for students to write authentically—an objective that theory can be useful in furthering. Judith Shapiro's work on transsexualism is an excellent example of theory with which to engage students with gay issues. Questions for discussion and writing in the college classroom can be based on Shapiro's book. (Contains 7 sources for pedagogical use and 10 references.) (TB)

Descriptors—*Conservation (Environment), *Environmental Education, Higher Education, Interdisciplinary Approach, *Literary Styles, Naturalism, Romanticism, Wilderness, *Writing (Composition), *Writing Instruction

Identifiers—*Nature Writing
A college composition teacher carries his convictions about wilderness preservation into the classroom. Like millions of others, he is drawn to the natural world and to literature about it; however, he is not sure what this type of literature should be called. The designation of a genre of "nature writing" is problematic, summoning, as it does, vague images of watery Romanticism. Nature writing today encompasses a great deal more, including some accounting of Nature's wild and sometimes malignant side. "Literary nonfiction" is too broad and "travel literature" suggests that nature writing is mainly descriptive when it is much more. Most writing can be viewed as argumentative, including nature writing. Almost all specimens of the genre praise the beauty of the natural world, but they are also intermixed with varying amounts of blame for its destruction. This dual purpose of praise and blame indicates that nature writing functions as "epideictic" or ceremonial discourse, which at least since the time of Homer has functioned as a means of drawing readers into the writer's ethos. A number of points can be made about the importance of encouraging students to read and write about nature and the environment: (1) all people have a perspective on their interconnectedness with their environment; (2) "tree hugging" and tree clear cutting are both ideological positions that may be explored through the making of arguments; and (3) environmental literature is interdisciplinary. (Attached is a 28-item list of texts for teaching environmental writing.) (TB)

Identifiers—Authorship

Offering more practical ideas and a rich description of how their curriculum moved from writing and reading to include inquiry, the first half of this book focuses on the authoring cycle and the ways in which educators have used the cycle as a curricular framework. The second half of the book provides detailed descriptions of "curricular engagements" (classroom strategies) within this framework. Chapters in the book are: (1) Visions of Literacy; (2) The Authoring Cycle as a Curricular Framework for Writing; (3) The Authoring Cycle as a Curricular Framework for Reading; (4) The Authoring Cycle as Curricular Framework for Inquiry; and (5) Maintaining a Community of Inquirers. In between each chapter in the first half of the book are articles by teachers who use the authoring cycle as a conceptual framework for thinking about curriculum: "Teachers and Kidwatchers" (Tim O'Keefe); "Getting Started: Establishing a Reading/Writing Classroom" (Kathryn Mitchell Pierce); "Creating a Collaborative Environment" (Gloria Kauffman); and "When Teachers and Parents Inquire" (Kathy Egawa). The 20 curricular engagements in the second half of the book include activities such as the author's circle, portfolios, bookmaking, classroom newspapers, family stories, journal writing, Readers Theatre, shared reading, and a visitor's corner. Contains 270 references. (RS)

Descriptors—Critical Theory, *Essays, Higher Education, *Language Role, Linguistics, *Literary Criticism, *Rhetoric, *Rhetorical Theory

Identifiers—*Burke (Kenneth), Logology

As a writer and critic, Kenneth Burke defies convenient pigeonholing. Even if just one segment of Burke's public writings is considered, the 40-plus critical essays of the post-Libbie (his Muse and secretary), post-LSA (Language as Symbolic Action) era, the difficulty of categorizing him remains. The earlier periods of his life are more or less defined by decade, which presents a rather hollow version of Burke. The search for an understanding of this post-Libbie period must strive for a suitable strategy for appreciating the full complexity of Burke's work. Burke said language not only enables but requires situations to be approached strategically. So as a means of reviewing the works of this period, a list of strategies for classifying them is helpful. First, the scholar might take the lead of other Burkean commentators and identify the distinctive nature of the late essays. James Chesebro (1993), for instance, identifies 1968 as the year that Burke finally gave up the "comedic posture" and got into the serious business of ontological inquiry. Second, the scholar could treat the final essays as Burke's attempt to finalize his system. Third, the scholar might list and characterize Burke's co-huggers of the period, from Wellek, Jameson, and Howell to Vintana, and Lentricchia and Booth. Fourth, the scholar might compare the situatedness of these essays with the situatedness of earlier works. Fifth, the scholar might account for the temporal progression among the essays or a sub-group within the essays. (Contains 26 references.) (TB)

Descriptors—*Drama, *English Literature, Higher Education, Language Usage, Modernism, Poetry, *Reading Aloud to Others, *Renaissance Literature, Teaching Methods

Identifiers—Literary Canon, *Optimism, Postmodernism, Recitation, *Shakespeare (William)

Labeling literary or artistic periods is always tricky, and labeling an emerging period (such as this post-postmodern one) is, of course, impossible. Harold Bloom has labeled this period the "chaotic age" because of the canon wars that have raged among factions. One writer with a place in any canon and who is an anodyne to the chaos of the present period is Shakespeare. One effective way of teaching Shakespeare is to read his words aloud. Educators must remember that they are teaching college students today who have not been read to and who have not necessarily read Shakespeare in high school. The instructor who reads aloud need not see himself/herself as a showoff or "ham"; rather, he or she should see himself/herself as a facilitator, a presenter. Students learn to appreciate and understand Shakespeare by listening to his work read aloud. Choice excerpts from "Romeo and Juliet," "King Lear," and "The Merchant of Venice" demonstrate the beauty of Shakespeare's language and how well that beauty lends itself to recitation. In addition, Shakespeare suggests a theme for the present era—optimism. Despite dark periods in history, including a number of sonnets that depict the tortuous entanglements of love, Shakespeare was wise enough to be an optimist and this optimism comes through even in his great tragedies. Examples of optimism can be found in "King Lear," "Much Ado about Nothing," and "Taming of the Shrew." (TB)

Descriptors— Comparative Analysis, Cultural Awareness, *Discourse Analysis, Higher Education, *Literary Criticism, *Popular Culture, *Rhetorical Theory

Identifiers— Bakhtin (Mikhail), Kingston (Maxine Hong), Presley (Elvis)

It seems that this paper, as if it were some textual Elvis, by the author's own admission has eluded him. With the set of commas included in the title of the paper, it is not clear whether 2 or 3 people are being referred to. The paper's first version took Bakhtin as the reigning monarch of English studies and applied his complicated and complicating theories of dialogism to Maxine Hong Kingston's "No Name Woman." But then, on second thought, the paper considers that some of those attending the 4C's (Conference on College Composition and Communication) presentation in Tennessee might have come for the "Elvisness" of the panel, to be "all shook up." Noting that Elvis is an American icon, the paper also notes that Elvis is dead. The paper points out that just as Elvis' becoming so carnivalized and internally persuasive means that his audience can never recover his essence, the original reason for his mass popularity, so too is the reader unable to know "No Name Aunt," the adulterous figure in Kingston's book. Obviously, this paper takes a turn—it began as a deriding impersonation of the academic paper but has itself become carnivalized, turned topsy turvy, retreating into the object of its ridicule. The paper suggests that it is impossible to laugh at Kingston because carnival is concerned with the masses, the folk, not the individual. The paper concludes that Elvis, as a non-writer, was powerless to do anything but occupy a class of his own, while Kingston, as a writer, is able to rescue her aunt from the same fate. (TB)

Descriptors— Case Studies, Feminism, Higher Education, Interpersonal Relationship, *Sex Differences, *Student Behavior, *Teamwork, *Technical Writing, Writing Research

Identifiers— Gender Issues, Student Empowerment
 A case study questioned essentialist feminist assumptions about the marginalization of females in technical writing courses. A student team composed of a female (Jane, the team leader) and three males enrolled in an advanced writing course required of juniors and seniors majoring in the applied sciences to investigate solutions to the student parking problem on campus. Data consisted of transcripts of audiotapes from two instructor-team conferences and team- and self-assessments written by the team members at the end of the course. While three members of the team, including the leader, emphasized

the team's cooperative research and writing, all four members singled out Jane as their leader, indicating that the primary mode of collaboration for this group was hierarchical. All four members of the group recognized Jane's role as team leader; the difference lay in their depicting her leadership as democratic, motivating, or dominating. Jane may not fit the feminine role of "natural collaborator" advocated by some, but she did succeed where essentialist feminists theorize she would fail. (RS)

Identifiers— *University of Washington

In recent years, traditional teacher training programs for graduate teaching assistants which value a rather narrow definition of academic work have produced a limiting path of professionalization. The problem can no longer be figured as a matter of emphasis—should more training resources be directed toward pedagogy instead of content area scholarship?—but rather as a failure of definition, a misreading of the profession. Graduate students are treated as preprofessionals. It is assumed that they need not (and perhaps cannot and will not) assume full responsibility for teaching or for developing their own pedagogical methods/materials, their own theories of writing and education, nor their own professional sense of place. The English Department at the University of Washington believes that its experience with teaching assistants offers a valuable alternative to the traditional apprenticeship model. At the University of Washington, graduate students have a variety of courses they can teach and a similarly extensive range of administrative roles in which they can participate. For example on the expository writing committee, graduate students, who are elected by their peers, work with faculty committee members in such tasks as selecting textbooks for 100-level composition courses and inviting nationally known scholars in pedagogy to speak on campus. Other opportunities to work as administrators are with the Educational Opportunity Program and the computer-integrated composition program. (TB)

Identifiers— *Classical Rhetoric, Greece (Ancient), *Greece (Athens)

Recently, rhetoricians have been trying to explain the absence of women from the history of rhetoric by locating female rhetoricians in classical era canonical texts. This effort, similar in intent to the movement towards redefining the literary canon, challenges the traditional Western rhetorical canon to create a more inclusive and accurate representation of its history. It is time to call for a new definition of rhetoric, one that broadens its scope beyond the modern interpretations of Platonic and Aristotelian traditions of public agonistic argumentation among peers. Within the realm of this new understanding of rhetoric will be the discourse practices of those not permitted regular participation in the traditional forum. Scholars should consider the discursive practices outside the "agora" under contemporary perceptions of rhetoric, and by doing so rewrite rhetorical history from classical times to the

present, including a consideration of the rhetoric of the oppressed. In this case, the oppressed groups are wives and/or relatives of legitimate male citizens. In ancient Athens, any speech by women was grounded in the premise that they were of inferior status addressing an audience of superiors, which prohibited their ability to argue publicly. In fact, wives of legitimate citizens were so secluded from the public that they were prohibited from negotiating in the marketplace. The religious expressivist participation they were permitted (such as the cult of the goddess Athena) provided them with one of their only forums for discourse. (Contains 43 references.) (TB)

Descriptors— Autobiographies, *Creative Writing, Critical Theory, Cultural Context, Higher Education, *Language Role, Rhetoric, *Rhetorical Theory, Self Concept, *Writing Instruction

Identifiers— *Author Text Relationship, Composition Theory, Personal Writing, *Voice (Rhetoric)

"Voice" has become a dangerous term. It has tended to imply romanticism, expressivism, and individualism—dangerous things. There are, however, two safe or prudent thoughts that can be expressed about voice and writing and four dangerous or adventuresome thoughts. The first point is that the choice between the use of terms such as text and discourse over a term like voice is not one between right and wrong but one between alternative lenses. The first two emphasize the interdependence of all utterances; the latter emphasizes individuality. Both emphases are useful. The second point is that voice, in several of its many usages, refers to ideologically uncontroversial concepts: audible voice, dramatic voice, distinctive voice, and authoritative voice. The four dangerous thoughts are as follows: (1) that to empower badly treated people and groups, academics must listen for the link between voice and self; (2) that composition must not privilege the reader's point of view at the expense of the writer's point of view; (3) that when the academic listens for intonation or J. Kristeva's semiotic, he or she is listening for the most "bodily" dimension of language; and (4) that anyone can produce writing that captures the attention and interest of readers, without training, without skill, and from the first day of class. Therefore, terms like romanticism, expressivism, and individualism are not very accurate ways of describing what is entailed in the concept of voice. (Contains 11 references.) (TB)

Intended as a series of hands-on, step-by-step lessons, this book presents instructions, checklists, exercises, and examples to guide people who work in business, industry, science or government through all phases of manual preparation from planning to research to writing, all the way to getting the final piece printed. The first chapter shows how user manuals fit into the business communication system. The second chapter describes the organization of the rest of the book and is in itself a user manual for writers of user manuals. The third through ninth chapters take readers through the step-by-step process of creating a user manual. Chapter 10 offers suggestions and rules of thumb for producing copies of the manual, and chapter 11 offers real-world scenarios for practicing the procedures discussed in the book. (RS)

The Gendered Plagiarist.

Pub Date—15 Jul 95

Note—13p; Paper presented at the Annual Penn State Conference on Rhetoric and Composition (14th, University Park, PA, July 12-15, 1995).

Pub Type—Opinion Papers (120) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Creativity, Females, Feminism, Higher Education, Literary Criticism, Males, Metaphors, *Plagiarism, Self Concept, *Sex Bias, *Writing (Composition)

Identifiers—*Authorship, *Gender Issues

In modern authorship, the writer is believed to be capable of working alone, autonomously, without being influenced by others. If the writer is a "true" author, he or she is also believed to be producing an "original" text and is accorded ownership of the text. These apparently neutral, natural moves actually participate in a hierarchy of authorship. At the one extreme is the true author, recognized by "his" autonomy and originality. At the other extreme is the plagiarist. This hierarchy, furthermore, is implicated in a set of gender-based assumptions that lead to disturbing conclusions about feminine authorship. Harold Bloom's "The Anxiety of Influence" and Thomas Mallon's "Stolen Words: Forays into the Origins and Ravages of Plagiarism," demonstrate the terms of these conclusions. Both Bloom and Mallon assert that all writing is influenced, none autonomous. Both, further, discuss writing with sexual metaphors that indicate a lack of appreciation for collaboration and other female inclinations. Robinson Shipperd was specific in linking originality to the masculine body, plagiarism to the female. Other 20th century writers, like Sigmund Freud, depict women as an obstruction to creativity. Meltzer finds that for Freud, men must acknowledge the feminine as the "passive and unproductive" elements in their work or they themselves will become feminized. Consider, also, William Perry's well-known explanation of exam-taking: rote obedient learning is associated with the female, while a subtle grasp of the abstract is associated with male learning. Descriptors—*Creative Writing, *Figurative Language, *Poetry, *Writing Exercises, Writing for Publication, *Writing Processes

Identifiers—*Author Text Relationship, Poetic Forms, Voice (Rhetoric), *Writing Development
Based on the idea that poetry, like any art, is mastered through practice, this handbook for poets combines poetry-writing exercises with personal essays by each contributing poet. Some of the poets represented in the handbook are: Maxine Kumin, Rita Dove, Roger Mitchell, Carol Muske, Sydney Lea, and J. D. McClatchy. The exercises in the handbook address a broad range of topics: the struggle for inspiration, transforming memory and experience into writing, the process of revision, experimenting with formal structure, as well as many others. The collection of more than 90 tested and proven exercises is designed to stimulate the imagination and increase technical flexibility and control. Two appendixes contain a mail-order

source list of poetry books and a list of published works referred to in the text. (NKA)

Descriptors—Computers, *Documentation, *Expository Writing, Higher Education, *Research Papers (Students), Research Skills, Secondary Education, *Student Research, *Writing Across the Curriculum, Writing Processes, Writing Skills

Identifiers—*Science Writing, Stylistics, *Writing about Literature

Designed to take students on a guided tour of entire research projects, from developing interests and focusing ideas to producing finished papers, through the experiences of five students, this book also provides exhaustive coverage of research mechanics. Checklists throughout the book (and indexed inside the front cover) allow students to review at a glance essential points covered within the text. The book also provides helpful information on the many uses of computers and word processors—from brainstorming to note taking, from sorting notes and outlining to preparing and printing the final paper. A new chapter in this third edition is "Writing about Literature"; it includes two sample papers: a documented close reading of "The Color Purple" and an argumentative paper on the controversies surrounding "Adventures of Huckleberry Finn." A significantly revised science chapter includes extensive information on the widely used Council of Biology Editors (CBE) style, as well as a sample paper on seed dispersal in tropical rain forests. Appendixes contain material on MLA (Modern Language Association) style and an annotated list of selected reference works. (NKA)

Descriptors—*Creative Writing, Elementary Secondary Education, *Fiction, Figurative Language, Higher Education, Rhetoric, *Writing Exercises, *Writing Processes, *Writing Strategies

Identifiers—Authorship, Author Text Relationship, Writing Style

This book is designed to be a how-to-write-fiction guide that is long on specifics and short on theoretical material. Each section of the book deals with a separate element of fiction-characterization, dialogue, point of view, plot, etc. Every exercise in the book is introduced in an opening paragraph, followed by instructions for completing the exercise, the objective of the exercise, and frequently, by a student sample. This revised and expanded edition of the book includes a section each on style and revision; expanded sections on perspective, distance, point of view, and story elements as a given; 30 additional exercises; exercises from 13 first-time contributors to add to those of the original contributors; and an anthology of 24 short stories, with wide-ranging style and subject. The exercises in the book can be used by writers of nearly all ages, in class, in workshops, or at home alone. Using this book, the student learns how to write fiction not by thinking about it but by doing it. (NKA)

Descriptors—*Individual Development, *Memory, *Personal Narratives, Self Concept, *Self Expression, *Writing Exercises, Writing Strategies, Identifiers—*Authorship, *Personal Writing, *Purpose (Composition), Self Definition

This book directs the individual reader to self-expression and discovery through writing techniques. The book presents a series of writing exercises that help a person explore his or her past, present, and future. The exercises in the book are grouped into three stages of the self-discovery process: (1) "Remembering," tapping memories; (2) "Reframing," finding a focus on those memories; and (3) "Reexperiencing," "rewriting" the memories—the process of learning to shape and deal with them. The book can help an individual to grow, challenging him or her to use writing as a "way of both looking inward and reaching out, to help create and serve this new world." A glossary of writing techniques and an annotated bibliography of books for further exploration conclude the book. (NKA)

Descriptors—*Classroom Communication, Communication Research, *Computer Mediated Communication, Discourse Analysis, Higher Education, Social Change, Teacher Behavior, Identifiers—*Communication Behavior, *Turn Taking

A study analyzed the choreography of turn-taking and cohesion in classroom computer-mediated communication (CMC) to assess its efficacy as a linguistic intervention. Of the kinds of discussions made possible by CMC, it is the pseudonymous, synchronous conversation that most attracts those who would aspire to the project of changing linguistic behavior in the classroom. Such a discussion (part of a literature course taught by an adjunct lecturer at a mid-Eastern state university) was chosen as it involved an entire class for a sustained period; it offered a balance of male and female participants from a range of ethnic and social backgrounds; it involved the professor as an anonymous participant; and it was one of many such conversations in the course. Results indicated that pseudonymous, synchronous classroom CMC displays evidence of distinct operations for speaker-selection and turn-taking; of distinct operations for nomination, selection, and pursuit of topics; and of cohesion developed through the use of specific linguistic ties. Furthermore, students carry the bulk of the workload in these discursive operations. A question, however, to be raised in any discussion of linguistic intervention concerns not merely the efficacy of the intervention itself, but the social changes it is thought to facilitate. This particular attempt at linguistic intervention, like most others, is occurring within a context of social change, and as such is neither prerequisite to nor sufficient for social change. Reppert, James E.

The Importance of Minority Role Models in Higher Education Mass Communication Curriculum.

Pub Date—Feb 93

Note—8p; Paper presented at the National Association of African-American Studies Conference (Petersburg, VA, February 9-13, 1993).

Pub Type—Opinion Papers (120)—Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Black Students, Broadcast Journalism, College Curriculum, *Cultural Awareness, Higher Education, *Mass Media, *Multicultural Education, News Reporting, *Racial Bias, Role Models, Student Needs, Identifiers—*African Americans, *Southern Arkansas University

The broadcast journalism sequence at Southern Arkansas University allows African-American students as many opportunities as possible to review role models from different perspectives. The school has an enrollment of 18% Black students. Each area studied in the introduction to mass media course involves sections dealing with multicultural and African-American perspectives on matters relating to broadcasting. In this regard, television is an essential teaching tool because it refracts many societal concerns and effects. Controversial issues of public importance involving the African-American community can be shown and discussed with students, in addition to serving as a jumping-off point for research papers. A number of TV clips can be used to illustrate these points, such as: (1) the death of Arthur Ashe, who was buried in Richmond, Virginia, brings up important reporting ethical questions for students; (2) music performed by some African-American musical groups such as 2 Live Crew raise questions about censorship; (3) coverage of the Los Angeles riots raise critical questions about the media's cultural orientation; and (4) a look at how the media in the 1960s treated a figure like Malcolm X exposes students to a figure they have probably seldom seen. Descriptors—Case Studies, *College School Cooperation, Communication Skills, *Debate, Higher Education, *High Schools, *High School Students, *Outreach Programs, Identifiers—Debate Tournaments, Kentucky, Nevada

The importance of the bond between secondary and higher education forensics programs cannot be overstated. For many high school students, involving themselves in debate and individual events can result in a partial or full college scholarship. Of equal importance is the benefit of participation in an extracurricular activity that enhances writing and speaking skills. Several forensics commentators have assessed the state of high school and university cooperation in various parts of the country. Robert J. Glenn, III, for instance, calls for the need for regional organization and more involvement by the National Forensics League in northwest Kentucky. He also suggests that a new debate style that would focus on the quality and content of argumentation rather than speed of delivery be given serious con-

sideration by small and medium-sized colleges and universities. Minh A. Luong reviews the mutually beneficial relationship between University of California Berkeley and the northern California High School Forensics Community. He explains how college teams can intern as high school coaches, giving novice speakers needed advice from seasoned competitors. He also reviews the success of Berkeley's summer speech institute. Thomas Murphy discusses the obstacles to urban outreach in the University of Nevada Las Vegas (UNLV) and Southern Nevada high schools. He believes that a UNLV-sponsored debate workshop is a realistic, inexpensive form of outreach. (TB)

Multiple Measures of Critical Thinking Skills and Predisposition in Assessment of Critical Thinking.

Pub Date—Nov 95

Note—11p; Paper presented at the Annual Meeting of the Speech Communication Association (81st, San Antonio, TX, November 18-21, 1995).

Pub Type—Information Analyses (070)—Opinion Papers (120)—Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*College Outcomes Assessment, Communication (Thought Transfer), *Critical Thinking, Higher Education, Logical Thinking, Problem Solving, Standardized Tests, *Student Evaluation, *Thinking Skills, Undergraduate Students

Identifiers—Authentic Assessment, *Critical Thinking Skills Performance Assessment, *Multiple Measures Approach, Reflective Thinking

A panel of 46 experts from philosophy and education defines critical thinking as "purposeful, self-regulatory judgment which results in interpretation, analysis, evaluation, and inference, as well as explanation of the evidential, conceptual, methodological, criteriological, or contextual considerations upon which that judgment is based." At present, there are seven standardized critical thinking tests available, and several performance assessment approaches can be used as outcome measures within various subjects in communication. Standardized tests can provide useful information that is diagnostic and may help to guide instruction. However, multiple measures of critical thinking should be used in assessment. Critical thinking is not a general ability but rather a complex set of general and specific factors. Psychologists generally favor multiple measures of critical thinking because no single test covers the dimensions of a good conceptual definition of critical thinking. R. A. Ennis and S. P. Norris suggest that in lieu of appropriate multiple choice tests, open-ended assessment tests are needed; other measures could include interviews. College educators should first decide what students should be able to demonstrate and what they know and can do. Then, they should decide what to teach students. When educators are clear about the intended performance and results, they will have a set of criteria for selection of content. Then in devising their means of assessment, educators should consider guidelines concerning meaningful contexts in exams, novel situations, relevant products and performances, and the various levels of student ability. Beer Advertising to Latino Youth: The Effects of Spanish vs. English Language Targeting.

Pub Date—Aug 95

Note—26p; Paper presented at the Annual Meeting of the Association for Education in Journalism and Mass Communication (78th, Washington, DC, August 9-12, 1995).

Pub Type—Speeches/Meeting Papers (150)—Reports—Research (143)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Acculturation, Adolescents, *Advertising, *Alcoholic Beverages, *Cultural Context, Drinking, Educational Needs, *Hispanic American Culture, *Language Role, Media Research, Mexican Americans, Television

Identifiers—*Latinos, *Message Responses

Although Latino youth have slightly lower rates of alcohol use than Anglo youth, evidence suggests that as Latinos acculturate their rates of use increase to match those of the Anglo adolescent population. In light of these cultural patterns, a study examined the reactions of young adult males of Latino origin to television beer and non-beer commercials in

Spanish and English. Television is an important medium for the transmission of cultural values, while advertisements encourage specific behaviors stemming from the accepted cultural norms. In this study, there was an interaction between advertisement type (beer vs. non-beer) and language presentation (Spanish vs. English). A total of 24 ads were used with 38 subjects, all Latino males between 12 and 18 (most were first or second generation Mexican Americans). Results indicated that Latino males liked the Spanish language non-beer commercials best and Spanish beer commercials the least of all commercials seen. English beer commercials were preferred over English non-beer commercials. Qualitative evidence suggested that these Latino youth responded negatively to advertisers' portrayals of Latina females and Latino alcohol use. The reasons for their negative reactions are probably quite complex, having to do with portrayals inconsistent with traditional gender roles and, more generally, with inaccurate portrayals of the Latino culture. Education efforts that stress Latino cultural identity may, then, strengthen the disinclination of Latino youth to use alcohol. (Contains 1 figure, 1 table, and 21 references.) (Author/TB)

Krueger, Dean

A Global Perspective on Public Relations Ethics: The Middle East.

Pub Date—20 Nov 95

Note—11p; Paper presented at the Annual Meeting of the Speech Communication Association (81st, San Antonio, TX, November 18-21, 1995). Pub Type—Opinion Papers (120) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Cross Cultural Studies, *Cultural Differences, *Ethics, Foreign Countries, Global Approach, Higher Education, *Islamic Culture, Journalism, Models, Moral Values, *Public Relations, Standards

Identifiers—*Middle East, *World Views

Sophisticated public relations is being practiced in the Middle East. However, the models used in that region are not identical to American models, nor are they identical to those in other Western countries usually considered part of the "First World." In particular, Moslem culture heavily influences Middle East practice. Can the ethics of public relations be universal or must they remain culturally specific and ideologically based, suggesting an argument for ethical relativism? It could be argued that definition and articulation of ethics are, in fact, irrelevant in an "excellent" two-way symmetrical model. Because this model is inherently ethical, codified parameters are superfluous. Ethics may be critically important to police the inherently unethical asymmetrical models of public relations because such ethics establish boundaries beyond which the practice of these models should not transcend. While many of the values of the Middle East culture are non-Western—press freedoms are limited, for instance—nothing inherently precludes the practice of a "symmetrical" model of public relations. Further, nothing precludes the Middle East's public relations system from being ethical by "First World" standards. Middle East scholars suggest that public relations ethical standards in their region extend back some 1,200 years in Arab culture, to the time of Mohammed. (Includes 20 notes.) (TB)

Contributions of Jacques Ellul's "Propaganda" to Teaching and Research in Rhetorical Theory.

Pub Date—18 Nov 95

Note—31p; Paper presented at the Annual Meeting of the Speech Communication Association (81st, San Antonio, TX, November 18-21, 1995). Pub Type—Opinion Papers (120) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—*Critical Thinking, Cultural Context, Higher Education, *Mass Media Effects, Mass Media Role, *Persuasive Discourse, *Propaganda, Public Opinion, *Rhetorical Theory, *Technology

Identifiers—*Ellul (Jacques), Technological Demands

Jacques Ellul is widely known among sociologists and philosophers in the West for his analyses of the impact technology has on human society and human beings themselves. Less well known is Ellul's deep interest in human life. Ellul's interest in these areas is evident in "Propaganda: The Formation of Men's

Attitudes" (1965) and "The Humiliation of the Word" (1985). Of interest to students of rhetorical criticism, Ellul does divide propaganda into political and sociological types. Ellul is known for his searing attack on the technological mindset, "la technique," which he argues is a self-directing and self-augmenting entity. It is the technological mindset, he argues, that disrupts human reflectivity and the quality of human life. For Ellul, technology itself is merely an example of the problem rather than the problem itself. According to this theory, "la technique" has invaded the realm of politics and persuasion. Those responsible for public discussion of issues, such as the media systems and the government, now use the techniques of propaganda to override rational discourse and critical thinking. Ellul's contribution to rhetorical theory lies in his understanding that persuasion does not occur in a single isolated instance but in a whole social, cultural, and technological framework of society. Second, Ellul points out that persuasion is based on emotion and irrationality. In a society dominated by propaganda, rationality disappears. (Includes 46 notes.) (TB)

Extending Burke.

Pub Date—Nov 95

Note—22p; Paper presented at the Annual Meeting of the Speech Communication Association (81st, San Antonio, TX, November 18-21, 1995).

Pub Type—Opinion Papers (120) — Information Analyses (070) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Communication (Thought Transfer), Cultural Awareness, *Cultural Differences, *Language Role, Philosophy, *Rhetoric, *Rhetorical Theory, Sex Bias

Identifiers—*Action Theory, *Burke (Kenneth), Dramatic Criticism, Logocentrism, Monocentrism

Over many years, Kenneth Burke developed theoretical, philosophical, and methodological insights about humans and language. The term he gave to entitle this vast body of work is Dramatism. Rather than the spirit-matter dualism, Burke proposes that scholars direct their attention toward action and motion. By holding that there can be "no action without motion," Burke maintains that no matter what humans do (action), there is always a physiological (motion/material) element involved. The implications of action as a privileged term can be seen in discussions of Burkean limits and extensions. James Chesebro argues that Burkean theory has a monocentric bias. However, Burke's statement that "there can be no action without motion" suggests that Dramatism is based on a polarity or continuum rather than a monocentric principle. While Burke certainly did have a strong logocentric bias, texts were not the entire picture for him. In "The Philosophy of Literary Form," he indicates that he engages in three distinct kinds of observation: the intrinsic level of the individual poem; the body of poetry where different works are compared to one another; and the extrinsic level where information about the poet and context is taken into account. Finally, criticism of Burke as ethnocentric or sexist are of considerable importance. Scholars need to develop a better understanding of the impact multiple cultures have on meanings and communication theory. (Includes 23 notes.) (TB)

Descriptors—*Black Teachers, Case Studies, College Faculty, *Credibility, Higher Education, Qualitative Research, *Racial Bias, Self Concept, *Student Attitudes, *Student Evaluation of Teacher Performance, Student Surveys, Undergraduate Students, *Whites

Identifiers—*Student Perceptions of Teacher Education and communication researchers have not explored sufficiently teacher credibility or the classroom communication and experiences of

teachers and professors of color, in particular, teachers and professors belonging to subordinate minority groups. As a result, there are gaps in the literature due to its incomplete status. Qualitative case studies of six professors, three Black and three White, are used to examine the relationship of race and student perceptions of credibility. The findings from interviews with 28 undergraduate students, enrolled in one of 6 courses, indicate that the classroom presents particular challenges for Black professors teaching at a predominantly White post-secondary institution. The findings from these student participants suggest that: (1) the Black professors are held to more stringent credibility standards than White professors; (2) that the challenges to credibility are exacerbated when Black professors teach subject matter that cannot be directly connected with their race; (3) that students possess favorable/fair attitudes toward Black professors once they have successfully established their credibility; and (4) that Black professors are perceived to have worked harder than White professors to earn their educational and professional status. (Contains 3 notes and 35 references; survey forms and questions are attached.) (Author/TB)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Classroom Communication, Higher Education, Inquiry, *Intercultural Communication, *Multicultural Education, *Questioning Techniques, Teacher Student Relationship

Identifiers—*Question Types, Rhetorical Questions

With the instructor switching positions, alternately assuming the role of questioner and answerer, this paper explores the applicability of circular questioning to the types of interactions in which faculty members engage on a regular basis, such as teaching. Focusing on responses to various questions, the paper speculates that for students to see the element of choice in their habitual responses to issues that are brought up in the intercultural communication course, circular questioning could be instrumental in helping them understand their position in the system (often, students place themselves on the "receiver" end of communication and expect the instructor to "provide" the knowledge for which they have paid). Circular questioning can help to undermine these presumptions and is often most effective in the intercultural communication classroom in developing new possibilities for those students most resistant to change. These students may be unaware that their ways of communicating are one among many and may not be the most effective for every situation. To ensure the circularity of the classroom discussion, each comment made by the instructor can be linked to the last comment made by the student, by using the same terms that students use to explore the grammar or usage of terms in the Wittgensteinian sense. The paper concludes by considering the level of difficulty in switching from rhetorical to circular questions in the classroom. (TB)

Descriptors—*Communication Skills, Educational Cooperation, Elementary Secondary Education, Evaluation Methods, *Listening Skills, Program Development, *Public Schools, State Programs, *State Standards, Statewide Planning, *Student Evaluation

Identifiers—Kansas, Kansas Speech Communication Association, Quality Performance Accreditation

The experience of Kansas communication educators in developing speaking and listening assessment has been characterized by unusual cooperation and collaboration among members of the educational community and the professional communication organizations at several different levels. In 1992, the Kansas State Legislature established the Quality Performance Accreditation (QPA) system for all public schools in Kansas. Two of the QPA student outcomes applied directly to speaking and listening. The Kansas State Board of Education requested the Kansas Speech Communication Association (KSCA) help locate or create a speaking/listening assessment program. An ad hoc committee developed an 8-trait rubric, which paralleled a successful 6-trait writing rubric already implemented in Kansas. The program was field tested by 20 speech teachers at the KSCA convention in 1994. The state board of education accepted the program and disseminated it to districts. However, the legislature decided not to fund state-wide assessment. Small grants from the KSCA board have allowed further progress to be made on rater training and field testing. While a great deal of progress has been made, the task of developing a state-wide assessment program is not yet finished. An appendix presents the criteria for speaking and listening assessment, a description of assessment procedures, an explanation of the eight traits, a speaking and listening assessment score sheet, and an oral language assessment score sheet. Smith, B. R.

Communication Turf Wars of the 90s: Are They Necessary?

Pub Date—Nov 95

Note—14p; Paper presented at the Annual Meeting of the Speech Communication Association (81st, San Antonio, TX, November 18-21, 1995). Pub Type—Opinion Papers (120)—Speeches/Meeting Papers (150)

EDRS Price—MF01/PC01 Plus Postage.

Descriptors—*Departments, *Educational Change, Educational Resources, *Higher Education, Intellectual Disciplines, *Mass Media, *Speech Communication

Identifiers—Academic Community, *Turf Wars (Academic Community)

The struggles over "who gets what" in academe have been labeled "turf wars." The quest for resources is directly linked to a department's ability to successfully lay claim to specific academic turf or particular facets of the study of communication, which in turn affects student appeal, and therefore, enrollments. Departments with large numbers of students and their tuition dollars may be viewed favorably by university officials as offering a form of operational efficiency, especially when the students can be handled with few faculty. As the number of communication departments has increased on a

campus, the number of rivals and competitors has also grown. Communication studies which focus on distinct applications or specific professions were the first to find a diverging path. Among the earliest units to peel away from the umbrella departments of speech were theater and speech pathology, followed by mass communication, with programs in broadcasting or radio-television forming departments which may include film. Journalism departments may offer courses in advertising and public relations. However, broad, less specialized programs, where several communication fields coexist within the same unit do seem to provide certain positive features, such as the emphasis of the common theoretical base of communication, increased intellectual stimulation, team teaching, cross-fertilization of ideas, and flexible faculty assignments. Several universities (Ohio State, the University of Arizona, and Northern Illinois) are currently engaged in considering whether to blend some communication programs or to eliminate them altogether. The Children's Television Act of 1990 and Freedom of Speech: A Market Study.

Pub Date—Nov 95

Note—17p; Paper presented at the Annual Meeting of the Speech Communication Association (81st, San Antonio, TX, November 18-21, 1995). Pub Type—Reports—Evaluative (142)—Speeches/Meeting Papers (150)

EDRS Price—MF01/PC01 Plus Postage.

Descriptors—*Audience Awareness, Case Studies, *Children's Television, Commercial Television, *Freedom of Speech, *Government Role, Interviews, *Opinions, *Programming (Broadcast), Scheduling, Television Research

Identifiers—*Children's Television Act 1990, First Amendment, Market Research, Michigan (Bay City), Michigan (Flint), Michigan (Saginaw), Television Stations

A study examined the effects of the Children's Television Act of 1990 on television stations' freedom to schedule programs. Subjects were programming directors responsible for scheduling children's blocks in the Flint-Saginaw-Bay City, Michigan, TV market, the nation's 60th largest. The four program directors, whose stations were major network affiliates, were interviewed in July 1995 and asked what they had done during the past 4 years to address the requirements of the Children's Television Act and whether the 1990 Act had affected their freedom to program the station the way they wanted. Overall, while there were some expressions of concern from the program directors about private marketplace decision making being infringed upon by government pressure for more pro-social children's programming, they seem to view the need for compliance with various federal mandates as nothing new or unexpected. Their primary response is best categorized as a willing and somewhat resigned quest for practical, affordable, and efficient forms of programming to adequately reflect the spirit and intent of the 1990 Act. Of the four program directors, only one felt that the Act had infringed on her First Amendment directors, only one felt that the Act had infringed her First Amendment right to program her station as she wished. Of greater impact is the added paperwork the Act's compliance necessitates. Two of the subjects noted the time, preparation, and energy that goes into producing FCC-friendly programming at the local level, to comply with the requirement of a specific number of hours per week of educational and informational children's programming. Using Conserve in Communication Courses.

Pub Date—21 Apr 95

Note—18p; Paper presented at the Annual Meeting of the Central States Communication Association (Indianapolis, IN, April 19-23, 1995).

Pub Type—Reports—Descriptive (141)—Guides—Classroom—Teacher (052)

EDRS Price—MF01/PC01 Plus Postage.

Descriptors—*Communication Research, Higher Education, *Information Centers, *Internet, *On-line Systems, Scholarly Journals

Identifiers—*Conserve, Gopher

Conserve is an electronic information service comprised of several different components that can be useful to communication teachers and profes-

sionals with access to the Internet. Users can search a large number of files related to communication studies and research, locate those of interest, and have copies sent through e-mail for downloading. Conserve maintains several "hotlines," on-line discussion groups, and bulletin boards on areas of special interest. Currently, 24 hotlines are available for public discussion through e-mail. Conserve also makes available perhaps the most extensive index to articles published in a wide array of communication journals and provides on-line information regarding the annual convention of the Speech Communication Association. People with access to an Internet Gopher client program can use many, though not all, of the Conserve services through that connection. (A description of hotlines and a list of journals indexed is attached.) (RS)

Implicit Language Theories: An Analysis of Student and Instructor Discourse about Nonsexist Language.

Pub Date—Nov 95

Note—31p; Paper presented at the Annual Meeting of the Speech Communication Association (81st, San Antonio, TX, November 18-21, 1995). Pub Type—Speeches/Meeting Papers (150)—Reports—Evaluative (142)

EDRS Price—MF01/PC02 Plus Postage.

Descriptors—*College Faculty, Communication Research, Discourse Analysis, Higher Education, *Language Attitudes, Linguistic Theory, *Sexism in Language, *Student Attitudes, *Teacher Attitudes, *Undergraduate Students

Identifiers—Communication Behavior

Part of a more extended study, a study used discourse analysis to examine how instructors and students talk about sexist language in an attempt to discover their implicit language theories. Subjects, six instructors and six undergraduate students chosen from a convenience sample at a large western university, were interviewed and asked to comment on their own particular view of nonsexist language and the educator's role in the classroom. Interviews were transcribed and analyzed. Results indicated that many respondents provided comments that were consistent with the referential view of language. They stated that language is unimportant, a habit, and a reflection of society. However, some respondents looked at language as more of a system and provided responses consistent with both the objective systemic and subjective systemic view. The two implicit language theories that the student and instructor discourse seemed to center around were language as a system of signs that people create and use, and language as a system of signs, but as a constantly changing and evolving system that has the power to create, shape, or blemish. (Contains 30 references.) (RS)

Grainer, Diane

Using Contemporary Media To Develop Students' Observational Skills of Interpersonal Behavior.

Pub Date—Nov 95

Note—6p; Paper presented at the Annual Meeting of the Speech Communication Association (81st, San Antonio, TX, November 18-21, 1995).

Pub Type—Guides—Classroom—Teacher (052)—Speeches/Meeting Papers (150)

EDRS Price—MF01/PC01 Plus Postage.

Descriptors—*Critical Thinking, *Discussion (Teaching Technique), *Films, Higher Education, *Instructional Effectiveness, *Interpersonal Communication, Mass Media Use, Media Adaptation, *Student Reaction

Identifiers—*Communication Behavior, Video Viewing

To stimulate discussion among students, an instructor introduced interrupted videos in an interpersonal communication class. The videos consisted of brief 2-3 people conversations taken from films such as "Ordinary People," "Volunteers," "Planes, Trains, and Automobiles," and "The Joy Luck Club." Sometimes the class watches the video and comments on it; other times specific questions are asked prior to watching the clip. Comments about a scene in "Kramer vs. Kramer" and other films show how students can examine the verbal and nonverbal behaviors and predict what the characters might do next. Although there are other ways to stimulate critical thinking, using brief video clips is very effective. Some of the topics which lend themselves to examination in specific video clips are: gender, self-disclosure, self-concept, perception, verbal

communication, nonverbal communication, emotions, conversation, intercultural communication, relationships, power, and conflict. (NKA)

Descriptors—Cognitive Style, College Faculty, Educational Change, Educational Trends, Higher Education, *Mass Media Effects, *Mass Media Role, *Student Characteristics, *Teaching Methods

Identifiers—Educational Issues, *Entertainment, Postman (Neil)

In "Amusing Ourselves to Death," Neil Postman's nightmare is that the content of education will come to be determined by what can be turned into entertainment. Where does effective pedagogy end and mere entertainment begin? Currently, education is in a period of transition between dominant media, moving away from print and toward electronic. Generations of television-raised students who do not read for enjoyment, who cannot spell, and who seem to have shorter attention spans, are filling classrooms. The new cognitive style fostered by electronic media could be called "empathy at a distance." People get excited about things that they cannot do anything about. College faculty trained in the ways and skills of print media, are told to teach students something. And with "market forces" affecting colleges more and more, there is pressure on faculty to keep the "customers" happy. For the television generations, school is an experience of sensory deprivation. By the time they become adults, they will be restless and unsatisfied, without quite understanding why. In class, the students' attention can be held for 15 or 20 minutes with a lecture, but then it is time for something new—it can be a hand-out, a video, a student report, or a small group exercise. Several themes can be kept going at once, as in a variety show. However, on the positive side students are found to be still curious and responsive to ideas, abstractions, and issues that they do not see on television. This is perhaps the best hope for educating them. (NKA)

Annarella, Lorie A.
Creative Drama in the Classroom.

Pub Date—[92]

Note—22p.

Pub Type—Opinion Papers (120) — Guides - Classroom - Teacher (052)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Class Activities, Cognitive Processes, Communication Skills, *Creative Development, *Creative Dramatics, Elementary Secondary Education, *Experiential Learning, Higher Education, Holistic Approach, *Sensory Experience, *Student Development

Identifiers—Drama in Education

The use of creative drama in the classroom is a student-focused process where experiential learning can be fostered and developed within any given curriculum. It can help students to develop divergent thinking skills, inventive creativity, and cognitive thinking skills, and it can stimulate the development of oral and written communication skills. Used in a social context, creative drama can show the student the way to be empathetic to the needs of others and consequently the student will be better able to form a value judgment. Fostering intuition, creative drama helps the student to relegate inner strengths of "knowing" into concrete action. Creative drama is a holistic approach to academic learning. Non-threatening classroom exercises can provide a genuine feeling of surprise and fun in the classroom and help students to become aware of the utilization of their imagination. In one exercise, students read parts of Emerson's essay "Fate"; they dressed in black and, turning off all the lights, read the essay aloud with flashlights. Afterwards, students talked about how fate influences lives. It is important, if such activities are to be successful, that the instructor instill students with a sense of trust. Students must not be forced to participate—they should be

asked. In an exercise promoting trust, a student is blindfolded and another student leads him around the room while a poem or passage of prose is read. (Contains 14 references.) (TB)

Descriptors—Classroom Communication, Classroom Environment, Communication Research, Higher Education, Literature Reviews, *Student Participation, Student Surveys, *Teacher Behavior, *Teacher Student Relationship, Undergraduate Students

Identifiers—*Communication Behavior, Gender Issues, Situational Variables, Teacher Immediacy

A literature review reports on three studies concerning the antecedents of student verbal participation in the classroom. In the first study, the following research questions were probed: (1) In what situations are students most willing to communicate in the classroom? (2) What is the relationship between willingness to communicate and a student's self-report of cumulative GPA? and (3) Are there differences in responses to individual willingness to communicate items across academic standings, majors, and genders? Subjects for the study were 111 undergraduate students at a midwestern liberal arts college. Methodology consisted of survey questions. Results showed that students are most likely to talk when they are interested in the topics of the course and discussion, when they are prepared for class, when the class is small, and when they are graded for participation. Statistically significant correlations were not found among the elements examined for the other two questions. The second study (with 111 undergraduates) asked whether teacher verbal immediacy behavior positively related to student willingness to communicate. Methodology was similar to the first study. Results showed that teacher verbal immediacy conceptualized as a global measure correlated positively with overall willingness to communicate. The third study (with 91 undergraduates) examined interaction among teacher immediacy behavior, teacher gender, and student gender. Again, methodology was similar to the first study. Results showed that both verbal and nonverbal immediacy correlated positively with the study's measure of classroom participation. (Contains 20 references.) (TB)

Malone, Martin J.
An Emerging Interactional Theory of Communication.

Pub Date—16 Nov 95

Note—27p.; Paper presented at the Annual Meeting of the Speech Communication Association (81st, San Antonio, TX, November 18-21, 1995).

Pub Type—Speeches/Meeting Papers (150) — Opinion Papers (120) — Reports - Research (143)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Communication Research, *Discourse Analysis, Higher Education, *Interpersonal Communication, *Interpersonal Relationship, Models, Research Needs

Identifiers—*Conversation, Goffman (Erving), *Interactionism

An interactional model of communication can be based on Erving Goffman's concept of the "interaction order" and the conversational analytic focus on meaning. Three sets of related ideas provide the intellectual foundations for this approach: actions are designed for recipients; talk is multi-functional; and self presentation is semiotic. These assumptions lead to a theoretical perspective in which it is understood that social actions are designed to make sense to those who participate in them. An example of discourse, called a perspective display sequence, consists of a query, the recipient's response, and the asker's subsequent report. From the early 1950s to the early 1980s, the work of Erving Goffman explicated that role of a third order in social life, neither institutional nor individual, which he named "the interaction order." Goffman sought to describe how the interactional demands of situations are the primary source of structure for the social self. For A.

Rawls, self and meaning are the parallel accomplishments of the interaction order. Rawls' summary of a theory of the interaction order emphasizes self presentation, the constraints the order places on social structure, involvement obligations, and morality. Scholars can study meaning interaction by studying how second turns follow first turns, and third turns follow second. The meaning of a turn must be interpreted for the next turn to follow successfully. (Contains 4 notes and 36 references.) (RS)

Descriptors—*Communication Research, Models, Research Methodology, *Research Needs, Research Problems, *Social Science Research, *Speech Communication

Identifiers—*Historical Background, *Humanistic Research, Speech Communication Association

A substantial number of published articles in speech communication research today is experimental/social scientific in nature. It is only in the past decade that scholars have begun to put the history of communication under the lens. Early advocates of the adoption of the method of social scientific inquiry were J. A. Winans, J. M. O'Neill, and C. H. Woolbert. Another influential early scholar, Everett Hunt, openly criticized the adoption of the social scientific method and strongly advocated the use of the humanistic model. This disagreement led to the early development of two separated emphases within the discipline still seen today. In addition, a problem exists not in the use of the social scientific method, but its use without the primary development of a body of original theory it could build up and support. Far too little of the experimental social scientific research in communication is linked to some established theoretical body original and exclusive to this field. Too much of communication is borrowed from related disciplines such as psychology, sociology, and philosophy. It is time to rethink the early influences and work toward the adoption of a new research combining social scientific/humanistic research influences, stressing the spirit of inquiry. Descriptors—Adoption (Ideas), Case Studies, *Electronic Mail, Higher Education, *Information Sources, Information Utilization, Innovation, *Resistance to Change, Technological Advancement

Identifiers—Faculty Attitudes, LEXIS System, NEXIS System, *Technology Utilization

A comparative case study investigated the extent of adoption of computer communication in two schools of communication. S. Ram's model of resistance to innovation was used as a theoretical framework. Subjects, 16 faculty at a medium-sized state school in the southern United States and 16 faculty at a large private institution in the Northeast, were interviewed about their use of Mead Data Central's Lexis/Nexis full-text database service and about electronic mail. Results indicated that innovation characteristics are important factors affecting adoption, as are consumer characteristics. Complexity of the Lexis/Nexis service was not a problem for the respondents. Electronic mail adoption was equally low at both schools. A major distinction between the two schools was the difference in the characteristics of sources of information about the innovations—at the state school, respondents said that only informal sources for Lexis/Nexis information were

available. Results also indicated a three-level typology of adopters: (1) advocates on innovation; (2) accommodators of innovation; and (3) avoiders of innovation. Findings provide support for considering resistance as an important concept for the investigation of the adoption process, and that information sources may have significant effects on resistance to the adoption of innovations. (Contains 31 notes and 2 tables of data.) (RS)

Identifiers—*Advertising Agencies, Computer

Managed Information, Computer Users, Online

User Groups, *Technology Utilization

Since little empirical research has been conducted on adoption of currently available information technology by the advertising industry, a study explored the extent of advertising agencies' adoption of selected information technologies such as online database services and electronic mail. The study discussed data from earlier studies and analyzed results of a 1994 mail survey of the top 500 United States advertising agencies consisting of questions designed to elicit information about: (1) adoption of information technologies and services, and (2) beliefs about those technologies and services. A 25% sample was drawn systematically from "Advertising Age's" listing of American advertising agencies and a sampling frame consisting of 125 agencies was developed. Of those, 77 were returned. Results concluded that 54.5% subscribed to at least 1 online database, with 31.2% using 1 service, 19.5% using between 2 and 4, and 3.9% with 5 or 6; 45.5% of the agencies did not subscribe to any database service. Findings suggest that a surprising number of advertising agencies are not fully investing in technology that is currently available and many have yet to take advantage of the information revolution that is already here. They further suggest that failure to adopt new technologies may be a result of resistance to innovation, rather than solely a lack of financial resources. Such information should be of use to students in university advertising departments who are future advertising professionals. (Contains 8 tables and 35 references.) (CR)

Dudczak, Craig A.

Heuristic Elements of Plausible Reasoning.

Pub Date—Nov 95

Note—14p.; Paper presented at the Annual Meeting of the Speech Communication Association (81st, San Antonio, TX, November 18-21, 1995).

Pub Type—Opinion Papers (120) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Beliefs, *Cognitive Processes, Cognitive Style, Decision Making, Epistemology, *Heuristics, Higher Education, *Inferences, Logical Thinking, Persuasive Discourse, *Thinking Skills

Identifiers—*Plausibility Approach

At least some of the reasoning processes involved in argumentation rely on inferences which do not fit within the traditional categories of inductive or deductive reasoning. The reasoning processes involved in plausibility judgments have neither the formal certainty of deduction nor the imputed statistical probability of induction. When utilizing these judgments, persons employ heuristic principles which operate as tacit decision rules. Plausible reasoning is characterized by defeasible premises—assumptions which are capable of being nullified—and abductive reasoning—inferences which best explain a set of data. These anchor how judgments based on plausible reasoning are understood. A defeasible assumption operates as a belief persons accept, but with a qualified commitment. It is proposed that the cognitive principles which inform these judgments rely on the use of heuristic principles.

Four heuristic principles investigated as decisional strategies under conditions of uncertainty were: representativeness, used to decide whether a person or object possesses the characteristics of some class or group; availability, used to evaluate the frequency or likelihood of an event based upon how quickly instances come to mind; simulation, used to estimate the consequences of a series of events by employing construction of hypothetical scenarios; and adjustment and anchoring, used to estimate related events by beginning at a reference point recognized as an accurate anchor. Heuristic principles allow at least a partial explanation of how persons implement certain types of plausible decisions under conditions of uncertainty. (Contains 19 references.) (CR)

Descriptors—*Commercial Television, Discourse Analysis, High Schools, Language Role, *Partnerships in Education, Programming (Broadcast), *Public Education, *School Business Relationship Identifiers—California (San Jose), *Channel One, *Educational Issues

As part of a larger study, this study provided a critical-interpretive perspective of Whittle Communications' Channel One programming, a microcosm of the growing national trend of commercialism in public schools. Several board meetings held at the East Side Union High School District, San Jose, California, generated the discourse for analysis. A critical discourse analysis of this controversy reveals several dominant assumptions about the role of business in education: business and education should be partners; schools should generate their own profits; commercialism should be used pedagogically; students should be viewed as clients; and educators should function as business leaders. A collective examination of six assumptions reveals tensions and contradictions related to the co-opting of the language of business and that of education. (Contains 30 references and 5 notes. An appendix illustrates the underlying tensions between education and business.) (Author/RS)

Identifiers—Flags, *Middle East, *National Anthems, Propaganda Analysis, Visual Imagery

Because of the close proximity of countries in the Middle East, broadcast signals freely cross national boundaries, bringing not always friendly endemic populations into contact with each other through radio and television programming—a fact that has not been lost on the governments which fund broadcasting facilities. National anthems are chauvinistic by design and in the Middle East, the various interpretations aired on national television systems make them become specific carriers of national pride to historically opposing countries. Content analysis was used to explore the broadcast style and design of the national anthems able to be seen in Haifa, Israel, which includes anthems from Israel, Jordan, Lebanon, and Syria, broadcast on six different stations. All stations broadcast some of their programming in English, and all stations ended their broadcast day with a rendition of their national anthem exactly as it is done in the United States. All the anthems showed similar characteristics including the expected display of flags. However, only the Jordanian stations featured singers and lyrics—all other countries' versions of their anthems were orchestral only. The Jordanian stations featured high school students in western dress singing in one version and soldiers singing in another version; the Lebanese featured land settings of peaceful scenery; and the Israelis featured a visual fly-over of Jerusalem. Mass media students, who usually are confined to studying American media, can benefit from examining foreign media approaches. (Contains 10 references.) (NKA)

Descriptors—Communication Research, *Debate, *Debate Format, Higher Education, Judges, *Oral Interpretation, *Student Attitudes, Student Surveys

Identifiers—*Debate Tournaments, *Manuscripts

A study examined the beliefs and attitudes of students, coaches, and judges on the use of manuscripts at the college level in oral interpretation events (prose, drama, program oral interpretation, dramatic duo, and poetry). Survey data were collected from students, coach-judges, and hired judges participating in a Midwestern forensics tournament during the fall 1994-95 season. Results indicated a wide range of beliefs and perspectives concerning the subject—from mandatory use of the manuscript to maintain author integrity to how a manuscript limits and/or detracts from a performance. Results also indicated that the strongest perspective was to maintain the manuscript, and that author intent emerged as the dominant theoretical perspective for the use of a manuscript. Findings suggest that manuscripts will continue to be used in competitive forensics because: (1) judges-coaches and students will continue to incorporate the author intent/objectivist theoretical perspective as a justification for using manuscripts; (2) participants are hesitant to alter long standing traditions in forensics; and (3) participants are concerned how the absence of a manuscript may impact judging decisions. (Contains six notes.) (RS)

California is the only state to require school-violence training as a condition for state certification of teachers, school administrators, and pupil service personnel. This report presents findings of a study conducted by the State of California Commission on Teacher Credentialing's advisory panel on school violence. The study identifies the effects of school violence on students and school effectiveness and describes the preparation of certified personnel to cope with such behavior. Data were derived from focus-group sessions conducted with over 600 participants and from surveys that elicited responses from over 1,000 California educators, 360 educators from colleges and universities in 44 states, almost 100 school board members, and credential coordinators from 49 states. Focus group participants most frequently mentioned ethnic/cultural ignorance and gangs as the causes of school violence. They most frequently suggested implementing a multicultural curriculum and involving community agencies and law enforcement in partnerships as strategies to address school violence. They also reported that staff need training in multicultural sensitivity and conflict management. Of the hundreds of different experiences with violence, no single category was mentioned by more than 10 percent of the focus group. A large percentage of survey respondents said that violence was not a very big problem. Most educators responding to the survey felt unprepared to address school violence, and over 60 percent of all educators said that they wanted school-violence training. Extensive recommendations are made for teachers, administrators, student personnel service providers, other educators, educational system consumers, criminal justice agencies, local communities, and the Legislature. Thirty-two figures are included. (LMI)

Identifiers—California

Government officials, researchers, and especially educators must consider the "big picture" as they develop strategies to address violence in schools. This report presents findings of a study conducted by the Commission on Teacher Credentialing's advisory panel on school violence. The study identifies the effects of school violence on students and school effectiveness and describes the preparation of certified personnel to cope with such behavior. Data were derived from focus-group sessions conducted with over 600 participants and from surveys of over 700 California credential candidates and their professors; 320 recently credentialed teachers, administrators and student personnel service providers; almost 100 school board members; 49 credential coordinators from 49 states; and more than 360 higher-education teacher-training coordinators nationwide. Contrary to popular belief, school violence in the broad context was not seen by educators as a very big problem. Verbal intimidation and bullying occurred frequently on campuses, but only 2 to 3 percent of educators saw these subtler forms of violence. Most educators reported feeling inadequately prepared to address school violence. Fights and gang activities were the most frequently men-

tioned forms of violence by focus group participants overall. Multicultural sensitivity training was the most frequently mentioned strategy to address school violence. Extensive recommendations are made for teachers, administrators, student personnel service providers, other educators, educational system consumers, criminal justice agencies, local communities, and the Legislature. Eight figures are included. (LMI)

Identifiers—Saskatchewan
 This paper summarizes the findings of a doctoral dissertation that examined whether control over educational decision making in Saskatchewan (Canada) school systems was becoming more centralized or decentralized. The study also determined whether critical theory, as defined by Habermas, provided a useful conceptual framework for assessing the research results. Data were obtained from a survey of boards of education, directors of education, district boards, principals, and teachers in each school division; historical analysis; and a modified Delphi technique with 11 prominent individuals in Saskatchewan education. A number of trends were identified that would tend to encourage an increased degree of central control over educational decision making in Saskatchewan school systems. However, the data also revealed trends that would encourage a trend toward increased decentralization, such as the consistent trend toward increased parental involvement in education decision making. Findings also suggest that critical theory provided a relatively flexible conceptual framework for assessing research results. Recommendations are made to involve participants in decision making, explore discrepancies between rural and urban attitudes toward decision-making responsibility, and explore linkages between system morale and control over decision making. Three tables and two figures are included. (Contains 39 references.) (LMI)

The process of implementing change is extremely complicated, particularly when multiple innovations are being introduced simultaneously. Conflicting views exist regarding provincial versus local priorities, and available resources are declining. This report is a summary of a Master's thesis that analyzed the implementation process employed in 13 Saskatchewan School Divisions, with a focus on the perspectives of teachers responsible for implementing provincial Core curriculum initiatives. A total of 392 out of a possible 487 teachers in 23 schools responded to a questionnaire. Recommendations for training and employment include: allow teachers to sample materials prior to implementation; provide equal access to teacher-developed resource materials; adjust timelines for implementation to ensure that adequate and mate-

rial sources are available; and garner the support of personnel at all levels for teacher networks. Administrators should integrate the teacher-supervision process and support for program implementation; facilitate teachers' request for shared planning; support more individualized forms of staff development; and develop, in consultation with teachers, a policy consistent with provincial plans for Core curriculum implementation. Four tables are included. Appendices contain the instrument codebook and statistical data. (Contains 100 references.) (LMI)

Identifiers—Saskatchewan

This document presents findings of a commissioned survey that explored public attitudes toward a number of issues affecting K-12 education in Saskatchewan. Data were derived from telephone interviews with 708 individuals and focus-group interviews. Of the telephone sample, 54 percent had children attending school. Themes that emerged were classified as education today, governance, future directions, time in school, and the CORE curriculum. Thirty-eight percent of the respondents identified lack of funding as the biggest problem facing Saskatchewan schools, followed by discipline problems (21 percent) and student-teacher ratios (15 percent). Fifty-four percent believed that elementary-secondary expenditures were inadequate. Most parents expressed satisfaction with the educational environment of their children's schools and the quality of teaching. Overall, most respondents were satisfied with their school boards, leadership at their children's schools, and opportunities for input. The majority of respondents favored making schools available for community use and giving schools increased flexibility. Fifty-three percent of parents agreed with the changes made by the new CORE curriculum. Forty figures are included. Appendices contain the survey instrument, demographic information on respondents, and survey data. (LMI)

Identifiers—Saskatchewan

This paper summarizes a Master's project designed for principals who are interested in pursuing instructional leadership in their schools. The first part provides the principal with an overall understanding of, and rationale for, the role of the principal as instructional leader. The second part, written in the format of a handbook, describes the knowledge base that principals need to acquire, the tasks that must be accomplished, and the interpersonal and technical skills necessary for carrying out instructional leadership. The handbook was developed to introduce principals to the changes required in becoming effective instructional leaders. Among

the tasks described are instructional evaluation and supervision, peer coaching, staff and group development, action research, and curriculum implementation. Four figures are included. Appendices contain an instructional framework, a supervisory beliefs inventory, an instructional-development plan, the five steps of clinical supervision, information on group roles, and descriptions of interpersonal/supervisory approaches. (Contains 67 references.) (LMI)

School systems face the challenge of meeting high expectations with limited resources. Reductions in operating grants and increasing expenditures have exaggerated the problem. The Innovation Network was established by the Saskatchewan School Trustees Association in 1995 to help boards of education make the best use of available resources. This document contains examples of innovative efforts initiated in several Saskatchewan school systems. Areas of innovation include teaching and learning, governance, administration, resource allocation, and partnerships. Project descriptions and the names of contact persons are included. Teaching-and-learning innovations include school schedules, instructional grouping, school-to-work transitions, standards and student assessment, differentiated staffing, professional development, and educational technology. Governance-related innovations involve parent and community participation, shared decision making, board reorganization, and school division consolidation. Administrative strategies address new roles and responsibilities, employer-management relationships, electronic tools, school policies, and strategic planning. Resource-allocation practices center on staffing, program budgeting, transportation, entrepreneurship, energy conservation, and facility use. Partnerships involve parents, communities, provinces, businesses, shared services, and private contractors. (LMI)

Identifiers—*Canada

In Canada today there is a clear move toward a more outcomes-based education system. This report examines the state of high school student assessment and reviews standards and accountability strategies. It reports on the policies, programs, and initiatives in all provincial ministries or departments of education and a sample of school boards across the country. Data were derived from a telephone survey of departmental/ministerial representatives from all 10 provinces and the 2 territories and from a questionnaire that was mailed to 279 school boards. A total of 140 boards responded, a 50 percent response rate. Data show that both boards and ministries are putting more emphasis on the development of comprehensive policies to cover all as-

pects of student evaluation. There is some movement away from relying on paper-and-pencil testing as the sole means of evaluation; the use of more authentic, performance-based approaches and a greater variety of assessment techniques are being promoted. Some of the best practices in high school evaluation involve use of a broad range of assessment methods; introduction of or improvements to provincial examinations; greater use of summative and formative evaluations; greater emphasis on modifying evaluation for special-needs students; use of performance-based assessment; and more reporting to parents and the public. Thirteen tables are included. Appendices contain copies of the two questionnaires and selected school board material. (Contains 19 references.) (LMI)

This paper presents findings of a study that investigated the factors perceived by teachers as significant to the development of a safer school-work environment. The case study involved a 4-year project to decrease school violence in an urban, elementary, Chapter 1 school. Data were obtained from administration of the School Level Environment Questionnaire (SLEQ) to 39 prekindergarten through fourth-grade teachers and interviews with teachers, students, and administrators. Findings indicate that under heavy work demands, teachers adopted survival strategies of operating without reserves of time and energy, "processing" curriculum, and working in isolation. However, these strategies created problems with students. To counter a lack of resources, teachers often spent their own money on school supplies. Teachers' supply-distribution strategies affected their perceptions of students, which in turn influenced students' behavior. Strategies were implemented to alleviate teacher stress and isolation, improve the distribution of resources, and provide support for students. Two tables and one figure are included. (Contains 29 references.) (LMI)

Quality work teams that are based on W. Edwards Deming's business-management theories have proliferated at the school and district levels to handle problem solving and decision making. Teams are said to build stronger relationships among those involved in education and, ultimately, to benefit students because more people with broader perspectives help to shape a stronger educational

program. This digest explains why schools are using quality teams. It also identifies the most common types of teams, the factors necessary for success, the best strategies for forming a team, and common reasons for their failure. Teams are most likely to be successful when members understand the team's mission, their roles, and the group process, and practice good communication skills. (Contains seven references.) (LMI)

This publication is a revision and restructuring of "Reducing School Violence," published in 1993. This revised edition benefits from the assistance of many of the original reviewers, as well as additional experts and practitioners. The key to school safety is a comprehensive approach. This guidebook was designed to help teachers, school principals, district administrators, resource officers, students, parents, and others create safe environments in which learning is the primary focus. Sections present information on establishing a safe environment, developing prevention strategies, implementing crisis-management and intervention strategies, and identifying risk factors. The handbook also describes national, state, and local school-safety initiatives to reduce school violence and identifies issues such as domestic violence and protection of students' rights. A list of resources in the form of publications, guidebooks, curricula, associations, and institutes is included. Seventeen tables and an index are included. Appendices contain definitions, sample report forms and discipline contracts, and the Gun-Free Schools Act of 1994. (Contains 215 references.) (LMI)

Identifiers—United States (Southeast)

Virtually no school is safe from violence. FBI statistics, which show that juvenile crimes actually peaked during the mid-1970s, are at odds with the public perception that crime rates among young people are at an all-time high. The FBI acknowledges, however, that the crimes committed by young people tend to be more serious than in the past, and that juvenile offenders are being arrested at younger ages. This brief presents statistics on youthful crime and trends in state initiatives to control it. The document outlines the cost for safe schools and describes in detail safe-schools legislation passed in six southeastern states during 1993-95. Florida and North Carolina take a comprehensive approach; Georgia employs school-level, school-based initiatives; and South Carolina, Alabama, and Mississippi focus primarily on criminal and juvenile justice approaches. The document also describes the "zero-tolerance" policy and the issue of "reasonable force" in responding to student

violence. The formation of communitywide planning teams is recommended. Four tables, one figure, and a list of resource organizations are included. (Contains 53 references.) (LMI)

In 1992, the SouthEastern Regional Vision for Education (SERVE) began a 3-year research-and-development effort to support four schools and two school districts in the southeastern United States in their implementation of Total Quality Management (TQM) processes. This document describes the experiences and perceptions of the participating educators. Following the introduction, chapter 2 introduces the main concepts of Total Quality Management. Chapter 3 describes the experiences of each of the pilot sites and offers a framework for systemic reform, although there is no one correct way to implement TQM. The fourth chapter presents findings of an independent evaluation of the pilot sites' implementation of TQM strategies. Data derived from focus-group and individual interviews suggest that the keys to a total-quality school include: (1) a committed and supportive leader; (2) a faculty that is open to change; (3) time for training; (4) the inclusion of all faculty in an orientation; and (5) the recognition that TQM requires a long-term commitment. Other TQM resources and efforts in the Southeast are listed. The appendix contains descriptions of TQM pilot sites. One figure and one table are included. (Contains 15 references.) (LMI)

Descriptors—*Compensation (Remuneration), Elementary Secondary Education, Employment Patterns, Labor Market, Multivariate Analysis, Private Schools, Public Schools, Regression (Statistics), *Salary Wage Differentials, *Teacher Employment Benefits, *Teacher Salaries, *Teacher Supply and Demand

This report presents information regarding the patterns of variation in the salaries paid to public and private school teachers in relation to various personal and job characteristics. Specifically, the analysis examines the relationship between compensation and variables such as public/private schools, gender, race/ethnic background, school level and type, teacher qualifications, and different work environments. The economic conceptual framework of hedonic wage theory, which illuminates the trade-offs between monetary rewards and the various sets of characteristics of employees and jobs, was used to analyze The Schools and Staffing Survey (SASS) database. The national survey was administered by the National Center for Education Statistics during the 1987-88, 1990-91, and 1993-94 school years. Findings indicate that on average, public school teachers earned between about 25 to 119 percent higher salaries than did private school teachers, depending on the private subsector. Be-

tween about 2 and 50 percent of the public-private difference could be accounted for by differences in teacher characteristics, depending on the private subsector. White and Hispanic male public school teachers earned higher salaries than their female counterparts. Hedonic wage theory would predict that teacher salaries would be higher in schools with more challenging, more difficult, and less desirable work environments. Schools with higher levels of student violence, lower levels of administrative support, and large class sizes paid higher salaries to compensate teachers for the additional burdens. However, some of the findings contradict the hypothesis. For example, public school teachers working in schools characterized by fewer family problems, higher levels of teacher influence on policy, and higher job satisfaction also received higher salaries. In conclusion, the results are consistent with the hypothesis that a complex array of factors underlie the processes of teacher supply and demand and hence the determination of salaries. Teachers are not all the same, but are differentiated by their attributes. At the same time, districts and schools are differentiated by virtue of the work environment they offer. Seventeen tables and two figures are included. Appendices contain technical notes, descriptive statistics and parameter estimates for variables, and standard errors for selected tables. (Contains 84 references.) (LMI)

Identifiers—*California

The charter-schools movement provides the opportunity to observe whether granting schools freedom from most state regulations actually produces more freedom for school administrators and teachers, and whether this autonomy produces other distinctive outcomes. This report summarizes findings of Southwest Regional Laboratory's (SWRL's) statewide survey of California charter schools. During 1994-95, 54 administrators and 230 teachers returned questionnaires that had been mailed to the 66 charter schools operating in California at the time. Survey responses were also received from 46 principals of noncharter (comparison) schools in California and 63 charter schools across the United States. Data are presented on school characteristics, institutional autonomy, educational innovation, teacher characteristics and effectiveness, and access to education. High-autonomy schools more often reported greater freedom and less cooperative relationships with unions; fewer purchasing restrictions and more money for instruction; more parent participation; and more at-risk students. Compared to their counterparts in regular schools, charter-school teachers reported that they had more influence but heavier workloads. Teachers in new charters were the least secure about their jobs but were among the most satisfied with their jobs. The most common innovations were related to instructional strategies, site-based governance, and parental participation. The data indicate that, as a group, charter schools do not select the most able, privileged students, nor do they exclude those who have been traditionally underserved. However, some evidence suggests that, in comparison to other schools, charter schools tend to skim students who come from low-income families, have below-average test scores, and qualify for special education, and/or they tend to select students from privileged families. Certain types of charter schools are less accessible than others to underserved, at-risk children. A total of 43 figures

and 15 tables are included. (Contains 45 references.) (LMI)

Descriptors—*Academic Achievement, Academic Standards, Active Learning, Educational Environment, High Schools, *High School Students, Instructional Effectiveness, *Organizational Climate, *School Organization, *School Restructuring

This report expands on earlier research that found evidence of strong links between school restructuring and improved learning among students in the first 2 years of high school. This report, based on 1992 National Education Longitudinal Study (NELS) data, analyzes data collected for most of the same students in their last 2 years of high school. The sample was comprised of 9,570 students enrolled in 787 secondary schools nationwide. Hierarchical Linear Modeling (HLM) was used to analyze student engagement and achievement in mathematics, science, history, and reading. The report speculates that restructured schools based on the "organic" model, in which teachers have much greater authority over instruction and curriculum, affect student learning. The organic model is characterized by a common academic curriculum, academic press, authentic instruction, and a collective sense of responsibility. Findings indicate that the presence of organic school-organization characteristics explained much of the improvement in student learning and that the restructuring effects on learning increased during the later years of high school. The report contends that schools, especially high schools, should move toward smaller, more organic structures. The school-within-a-school model could be a promising strategy. Two figures are included. Three different educators respond to the research findings in subsequent articles. (LMI)

The authors in this book address the issues that relate to the crisis in American education and review some of the proposed solutions. To transform education, schools must be examined as social systems that are interrelated with families, communities, and the world of work. Following the introduction, section 1, "Conditions for Educational Opportunities," is comprised of the following four chapters: (1) "Schooling, Achievement, and Mobility" (Aaron M. Pallas); (2) "Tracking and Detracking Practices: Relevance for Learning" (Maureen T. Hallinan); (3) "Parental Ties to the School and Community and Mathematics Achievement" (Chandra Muller); (4) "Reading Reality More Carefully Than Books: A Structural Approach to Race and Class Differences in Adolescent Educational Performance" (Roslyn Arlin Mickelson, Sumie Okazaki, and Dunchun Zheng); and (5) "Dropouts: Definitions, Causes, Consequences, and Remedies" (Gary Natriello). The second section, "Changing

Definitions of Education," includes the following five chapters: (6) "Mapping Knowledge Perspectives in Studies of Educational Change" (Roland G. Paulston); (7) "Expanding Definitions of Learning and Teaching: Notes from the MI Underground" (Mindy Kornhaber and Mara Krechevsky); (8) "Thinking Like a Fish: The Implications of the Image of School Community for Connections between Parents and Schools" (Mary Erins Driscoll); (9) "Education Reform and Policy Implications" (Kathryn M. Borman, Louis Castenell, Karen Gallagher, Sally B. Kilgore, and Debra A. Martinson); and (10) "Schools Must Do More for Children—Child Advocacy as an Educational Responsibility" (Judith H. Cohen). Section 3, "Learning and Assessment," is comprised of the following four chapters: (11) "The Content of Cultural Inventions: Learning and Curriculum" (Ivor F. Goodson); (12) "The Role of Standards and Assessments in National Reform" (David Lee Stevenson); (13) "The Politics of a National Curriculum" (Michael W. Apple); and (14) "High School Curriculum Differentiation and Postsecondary Outcomes" (Thomas B. Hoffer). The following five chapters are included in the fourth section, "New Strategies for Solving Educational Problems": (15) "Policy, Knowledge, and Power: Some Issues for the Study of Educational Reform" (Thomas S. Popkewitz); (16) "Can the Big-City School System Be Governed?" (Kenneth K. Wong); (17) "Administrative Leadership and the Crisis in the Study of Educational Administration: Technical Rationality and Its Aftermath" (James G. Cibulka and Hanne B. Mawhinney); (18) "Privatization: Integrating Private Services in Public Schools" (Ellen B. Goldring and Anna V. Shaw Sullivan); and (19) "Why School Choice? A Question of Values" (Peter W. Cookson, Jr., and Barbara Schneider). Nine figures, 10 tables, and an index are included. References accompany each chapter. (LMI)

Identifiers—*Brown v Board of Education

On April 10, 1994, The Metropolitan Center for Urban Education at New York University's School of Education sponsored its third conference on the impact of the famous "Brown v. Board of Education of Topeka" decision. Fourteen discussion groups analyzed the following questions: What was the promise of "Brown," and has that promise been fulfilled? Discussion groups explored the most efficacious strategies for achieving the promise of "Brown" in the present context. They also examined the more fundamental question of whether the "Brown" decision had been the giant step forward that most civil rights leaders a generation earlier had assumed it would be. This document summarizes the major points raised by the discussion groups, including those that pertained to other factors of racism: continued segregation, voluntary segregation on the part of blacks, integration versus quality education, the multicultural movement, tracking as the most recent form of segregation, local school financing, and the movement away from commitment to social programs of the 1960s. The issues provoked heated disagreements among participants as well as consensus in some areas. (LMI)

Descriptors—*Activism, Educational History, Educational Philosophy, Elementary Secondary Education, Foreign Countries, Higher Education, Political Power, *Politics of Education, *Social Action, *Social Change, Social Problems, *Teacher Responsibility, Teaching (Occupation)

This book was written to raise educators' consciousness and to encourage their active participation in the politics of everyday life in schools, educational systems, homes, and communities. Authors in nine chapters document and interpret the political action and inaction of educators in various settings. Contents include the following: (1) "Foreword: Recapturing the Political Dimension" (Maxine Greene); (2) "A Personal Introduction to The Politics of Educators' Work and Lives" (Mark B. Ginsburg); (3) "Educators and Politics: Interpretations, Involvement, and Implications" (Mark B. Ginsburg, Sangeeta Kamat, Rajeshwari Raghu, and John Weaver); (4) "At Home and in the Classroom: The False Comfort of False Distinctions" (Madeleine R. Grumet); (5) "The Irony of Gender" (Richard J. Altenburger); (6) "Transformative Labour: Theorizing the Politics of Teachers' Work" (Robert W. Connell); (7) "The Political Nature of Teaching: Arguments Around Schoolwork" (Martin Lawn); (8) "Fictional Dialogues on Teachers, Politics, and Power in Latin America" (Carlos Alberto Torres); (9) "The Work of Schoolteachers as Political Actors in Developing Countries" (Linda A. Dove); (10) "Teachers and Politics in Central Eastern Europe" (Peter Darvas and Maria Nagy); and (11) "Professors and Politics: An International Perspective" (Philip G. Altbach). Subject and author indexes are included. References accompany each chapter. (LMI)

Descriptors—Academic Standards, *Business Responsibility, Communication Skills, *Educational Change, Educational Quality, Elementary Secondary Education, *Futures (of Society), Government Role, *Labor Force Development, Long Range Planning, Parent Participation, *Partnerships in Education, *Role of Education

As the 21st century approaches, many educators are debating the role of education in meeting students' and the economy's needs. This booklet describes the results of a modified Delphi study that asked a panel of 55 experts from education, business, and government how to best prepare students for the 21st century. During the course of three survey rounds, participants agreed that students will need communication skills, increased support for education, ethics and values education, skills in marketplace technologies, clear accountability standards, and social and cultural understanding. Five chapters address the following topics: (1) what students need to know to succeed in the next century; (2) what schools can do to prepare students; (3) parent activities to help prepare students; (4) strategies to promote citizen-government cooperation; and (5) the role of business and professional leaders in preparing students. A list of panel members is included. (Contains 35 references.) (LMI)

*Leadership Qualities, Mentors, Phenomenology, Supervision, *Teacher Supervision, *Theory Practice Relationship, *Women Administrators

Identifiers—*Canada, *Empowerment

This book describes two studies, the first of which is a single case study that interprets the practical knowledge of an exemplary fine arts supervisor. An analysis of ethnographic data portrays the supervisor's practical knowledge as constructed around a dialectical orientation between two constructs or landscapes of imagery: the empowerment and power of teachers, and bureaucratic power and control of administration. The second study describes the supervisor's influence on the practical knowledge of the consultants and specialists with whom she worked. Through in-depth interviews with five women, it became apparent that feminist principles were emerging. The supervisor's transformational and charismatic leadership style was characterized through four dimensions—visionary qualities, the communication of a vision, the creation of trust and commitment, and the empowerment of others. Findings of the two studies suggest that consultants and supervisors develop a unique form of practical knowledge geared to the political context of curriculum reform. Moreover, the practical knowledge of consultants and supervisors may influence the practical knowledge of teachers, specialists, and consultants. It is suggested that the leadership role be dedicated to commitment, caring, and collaboration within the circle of empowerment. An index is included. (Contains 232 references.) (LMI)

Identifiers—*Kentucky

This report contains the findings of two task forces established during 1994 by the Prichard Committee for Academic Excellence: (1) the Task Force on Improving Kentucky Schools; and (2) the Task Force on Restructuring Time and Learning. The task forces, comprised of parents and business members of the Prichard Committee, examined key elements of Kentucky's public education system and offered recommendations for improvement. Following an introduction that reviews education reform in Kentucky, chapters cover the following topics: assessment and accountability, school-based decision making (SBDM), the primary school, teacher education, professional development, and the effective use of time and schools. Appendices contain information on mediation, answers to commonly asked questions about SBDM, recommendations from the report "The Implementation of Kentucky's Primary Program," a report of the governor's task force on teacher education, modified task-force recommendations, case studies, and a review of research on homework. This document, developed by the Organization of Eastern Caribbean States (OECS) working group in 1991, presents recommendations for educational re-

form for OECS region. The plan was derived through analysis of the educational systems of the sub-region, interaction with chief education officers of OECS countries, national and subregional consultations, and a literature review. The first section describes the purpose of the reform effort, process, context of the eight Eastern Caribbean states, the developmental imperatives dictating educational reform, and the characteristics and state of education in the subregion. The second section describes the proposed reform strategies for: (1) harmonizing the education systems of the OECS; (2) reforming early childhood, primary, secondary, tertiary, and adult education; (3) reforming the terms and conditions of service of teachers; (4) reforming the management and administration of the education systems; and (5) reforming educational finance. Appendices contain project area profiles, a list of participants in the national and sub-regional consultations, and regional comparisons of performance in Caribbean Exam Council examinations. (LMI)

In 1991 a working group from the Organisation of

Eastern Caribbean States (OECS) released a report,

the OECS Education Reform Strategy (OERS),

which detailed proposed reform strategies for the

region. This document summarizes the report's nine

recommendations and responses to the report. The

report was distributed to Ministries of Education

and community-based stakeholders and a series of

national consultations were held to prepare a re-

gional action plan. This document outlines a pro-

gram that reflects the elements that received the

fullest support during the consultations. The broad

goals of the proposed reform strategy included: (1)

attainment of a significant measure of harmoniza-

tion and integration of the education systems of the

sub-region; (2) the qualitative development of the

education system at the level of the school and the

classroom; (3) improved management and effi-

ciency of the system at all levels; and (4) improve-

ment in the capability of tertiary education to foster

economic competitiveness. Critical program areas

are identified: management of the reform process;

improvement of teacher skills and conditions of ser-

vice; identification and implementation of innova-

tive teaching and learning strategies; development

of education facilities; and implementation of five

key development initiatives. The preliminary OERS

work plan and initial reactions from donor agencies

are included. Appendices contain the OERS work

program, OERS instruments and process, an indi-

vidual county priority-program matrix, and terms of

reference. (LMI)

ation, *Regional Planning, Standards

Identifiers—*Caribbean

The Caribbean Community (CARICOM) Re-

gional Policy on Education was approved by the

Standing Committee of Ministers with responsibility for Education (SCME) in a special meeting held on September 9, 1993. The policy constitutes a major regional effort to build a strong and dynamic community. An overall theme of the policy is regionalism as an ideal, as a resource, and as a style of operation. This document summarizes policy issues and concerns and identifies policy goals and actions required for various levels of the education system. Section 1 provides an introduction and overview of the work of the Advisory Task Force on Education. Sections 2 through 6 are organized similarly. Each includes sections that describe issues and concerns, future directions, policy goals, and action plans. Section 2 presents objectives for different educational levels, including early childhood, primary, secondary, tertiary, and higher education. The third section highlights the curriculum-reform agenda for the following areas: culture, sports, and the arts; special-needs education; language learning; mathematics and science education; educational technology; work-force preparation; and adult education. Plans for improving teacher education, school administration and management, and educational finance are outlined in sections 4 through 6. The recommendations of the task force would require action at regional, sub-regional, and national levels. Appendices contain lists of task-force members, background papers and reports, and consultations and meetings. (LMI)

The major objective of the Organization of Eastern

Caribbean States (OECS) Education Reform

Strategy is to strengthen the capacity of member

states to work collaboratively in order to improve

equal access to quality and relevant basic education

in an equitable and efficient manner. This document

describes OECS policy recommendations made in

May 1994. Section 1 describes the economic con-

text of the region, and section 2 provides an over-

view of the reform strategy. Proposals for financing

and supporting the regional components of the re-

form strategy are discussed in section 3. The fourth

section describes how the reform will be coordi-

nated and managed, and the fifth section outlines

the action plan for implementation. Specific project

outlines are highlighted in section 6. The seventh

section discusses issues and problems at the follow-

ing levels: basic education; early childhood educa-

tion; and primary, secondary, adult, and higher

education. Important challenges are described in

section 9, and section 10 overviews the structure

and evolution of the OECS. Five tables are in-

cluded. Appendices contain regional statistics,

OECS education indicators, school maps by territory,

and data on live births by territory. (Contains

tion, *Social Systems, Social Theories, *Sociol-

ogy, Systems Approach, *Theory Practice Relationship

Identifiers—Chaos Theory, Luhmann (Niklas),

Quantum Theory

Educational administration, like many other so-

cial sciences, has traditionally followed the rubrics

of classical science with its emphasis on prediction

and control and attempts to understand the whole

by understanding in ever finer detail how the parts

fit together. However, the "new" science (especially

quantum mechanics, complexity, and chaos theory)

has challenged the view that to understand the parts

is to understand the whole. Scientists now take into

account such phenomena as holism and emergence,

self-reference, self-renewal, self-organization, and

autonomy. In recent times social scientists have in-

corporated these understandings from the new sci-

ence into the social sciences. This paper presents

some of the theories of one such social scientist,

Niklas Luhmann. The first part applies Luhmann's

theory to the field of school administration. The

next two parts consider the usefulness of the theory

of schools as self-referential systems, first as a

framework for research, and second, as a basis for

understanding the social reality in which adminis-

trators operate. (Contains 45 references.) (LMI)

Foxsey, Richard

School Dropout Rates: Are We Sure They Are

Going Down?

Pub Date—Jan 96

Note—21p; Paper presented at the Annual Meet-

ing of the Southwest Educational Research Association

(New Orleans, LA, January 25-27, 1996).

Pub Type—Speeches/Meeting Papers (150) —

Opinion Papers (120)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Data Collection, *Dropout Rate,

*Dropout Research, *Dropouts, Graduation,

High School Graduates, High Schools, *Record-

keeping, School Holding Power, *Student Attrition,

Withdrawal (Education)

The U.S. Department of Education and various

education commentators maintain that dropout

rates have been decreasing for African-Americans

and the school population as a whole. This paper

presents evidence that dropout rates may be going

up rather than down and identifies reasons for the

conflicting data. The reasons include varied defini-

tions of "dropping out," inaccurate reporting, and

nonstandardized reporting procedures. Districts do

a poor job of tracking students because of embar-

assment, unrealistic accountability standards, and

tendency to overlook marginal students. Im-

proved data-collection techniques are important be-

cause they help to assess the effect of increased

resources, to compare school districts' performance,

and to identify crisis communities. In addition, Afri-

can-American students are probably most harmed

by inaccurate dropout information. A single, under-

standable, and reliable indicator of student attrition

is needed. A good start, although based on state

self-reporting, is National Center on Educational

Statistics (NCES) dropout data, which could be

supplemented by the Annie E. Casey Foundation's

method for reporting graduation rates by states. The

recommendation is made for annual district reports

on the percentage of ninth-graders who graduate on

time. (Contains 27 references.) (LMI)

Identifiers—*Vermont Interdependent Services

Team Approach

In recognition of the limitations of isolated decision

making, teamwork has emerged as a preferred

approach for educating students both with and without disabilities. The Vermont Interdependent Services Team Approach (VISTA) process described in this manual offers ways to think about and implement many of the tenets of collaborative teamwork to make support-services decisions for students with disabilities. The manual was designed as a self-study process that enables educators, administrators, support services providers, family members, and other team members to work together more efficiently to expand students' educational opportunities. The introduction focuses on the process of developing a shared framework. Section 2 reviews current issues in educational support services and offers a rationale for establishing collaborative services. Initial research shows that use of the VISTA approach improves intrateam agreement about support-services provision, reduces gaps and overlaps among members, and improves satisfaction with team decision making. Section 3 offers 10 detailed guidelines for establishing a team, defining the components of the educational program, determining functions of providers and their interrelatedness, making service recommendations, building consensus, determining location and strategies for service provision, and engaging in ongoing implementation and evaluation. The fourth section provides directions for preparing for and conducting the VISTA meeting. Nine tables and a variety of forms and worksheets are included. Appendices contain a description of support services, a checklist and forms, and examples of VISTA approaches for various special-needs students. (Contains 53 references and 14 recommended readings.) Identifiers—Minnesota, Tennessee, Texas

This document presents findings of a General Accounting Office (GAO) study that reviewed the experiences of three states that had recently reformed their school-finance systems to make them more equitable. Case studies of Tennessee, Texas, and Minnesota were conducted. Methodology included a review of school finance documents and legislative challenges to the states' school-funding plans; analysis of data on state budgets, student demographics, and school-district funding levels; and interviews with 15 to 19 education officials and representatives from statewide education associations in each state. Officials reported that legislative solutions following legal challenges in all three states lessened disparities in terms of access to revenue, per-pupil spending levels, or educational opportunities. Poor districts were helped without harming the education programs in wealthy districts. In response to budgetary and political pressures, legislatures in each state included hold-harmless and win-win provisions. However, the solutions are sensitive to public sentiments about taxes and may be subject to change. Officials advised other states undertaking similar reforms to clearly define the equity goals of the school-finance system in terms of adequate learning resources or student performance standards; link school-finance reform to accountability; and include all stakeholders in the reform process. Three tables are included. Appendices contain methodological notes, a list of officials interviewed for the case studies, findings of each of the case studies, and GAO contacts and acknowledgments. Identifiers—*Wisconsin

This document presents data on Wisconsin school performance for 1993-94. Data were derived from the Wisconsin Department of Public Instruction (DPI), private firms that administer assessments, and Wisconsin's 427 public school districts and the state schools for the deaf and visually handicapped. The report includes introductory material, explanatory text, information tables, and a glossary. Text and tables are divided into two major sections to mirror the emphasis the DPI has placed on accountability—student performance indicators and opportunity-to-learn indicators. Student-performance indicators are based on eight different measures of student achievement. The section on opportunity-to-learn indicators includes profiles of districts, schools, and students. District-profile information includes district staffing ratios, high school graduation requirements, general fund revenues, and general fund expenditures. Student-profile information is comprised of data on enrollment, attendance, out-of-school suspensions, expulsions, retentions, habitual truancy, dropouts, school-sponsored community activities, and extra-curricular activities. Information is also provided about the state's two residential facilities, other special-needs schools, and a few charter schools. Appendices contain student-performance indicators, opportunity-to-learn indicators, finance tables, and a glossary. (LMI)

Descriptors—*Affirmative Action, Civil Rights, College Admission, *Compliance (Legal), *Constitutional Law, Contracts, *Court Litigation, Elementary Secondary Education, Employment Practices, Equal Education, Equal Opportunities (Jobs), Federal Legislation, Federal Regulation, Higher Education, Quotas, *Racial Balance, Racial Composition, Racial Discrimination, State Legislation

Identifiers—*Supreme Court

This paper outlines and explains legal issues related to race-based affirmative action, which is defined as race-conscious action designed to overcome manifest racial imbalance. The paper highlights the history of affirmative action and its following objectives: (1) to overcome the effects of past discrimination; (2) to ensure against future discrimination; (3) to promote diversity; (4) to overcome a two-class society characterized by racial division; and (5) to provide equitable distribution of economic resources. Sections review constitutional law of affirmative action, federal and state laws bearing on school district use of affirmative action, and the status of challenges to affirmative action. The conclusion highlights situations in which affirmative action is required, permitted, and forbidden. (LMI)

Identifiers—*New York

This paper describes efforts to develop indices of student achievement, school district effort, and school district efficiency. The challenge was to develop measures that are simple to understand, yet allow comparison among districts that are not distorted by socioeconomic differences. Measures were developed for average student achievement, average school district effectiveness, and school district efficiency. Data analysis ranked the top 10 and bottom 10 districts in western New York state along each index. Data were obtained from annual State Education Department reports, "The State of Learning" reports, and media rankings of districts. Some of the policy implications suggest better use and coordination of resources already available for educational and social-support services. Other implications point to the need for additional resources for school districts that serve high proportions of students from lower socioeconomic-status families. Values of the Comer School Development Program, Glassner's Quality-School approach, Slavin's Success for All network, the Accelerated Schools network, and Sizer's Coalition of Essential Schools are described. In conclusion, the consideration of more dimensions of school-district performance reveals that many districts, not normally recognized for their effectiveness, are making important contributions to the intellectual growth of their students. Five tables and appendices containing statistical tables are included. (Contains 47 references.) (LMI)

Hungry for Leadership: Educational Leadership Programs in the SREB States.

Southern Regional Education Board, Atlanta, Ga.

Pub Date—95

Note—52p.

Pub Type—Reports - Descriptive (141)

EDRS Price - MF01/PC03 Plus Postage.

Descriptors—Administrator Education, Educational Administration, Elementary Secondary Education, *Leadership, *Leadership Training, *Management Development, *Partnerships in Education, Professional Continuing Education, Professional Development, School Business Relationship, *State Action, State Programs

Identifiers—Southern Regional Education Board, *United States (South)

This report documents the status of leadership training in 15 states in the southern United States. It notes that the public push for increased accountability necessitates the preparation of leaders who can stimulate peak performance. The report offers information on the Southern Regional Education Board's Leadership Academy, which has identified the following components of effective leadership development: goal setting; long-term interactive training; a personal plan of improvement; reflective thinking; coaching and mentoring; partnerships and collaborations; and comprehensive evaluation. The document offers a state-by-state review of educational leadership programs in Alabama, Arkansas, Florida, Georgia, Kentucky, Louisiana, Maryland, Mississippi, North Carolina, Oklahoma, South Carolina, Tennessee, Texas, Virginia, and West Virginia. Leadership-development programs face challenges of building public support for leadership training, developing corporate connections, and committing to long-term investment. A list of state directors of leadership programs is appended. (LMI)

Development planning has recently become a commonly adopted strategy for school improvement in the United Kingdom. Development planning is a description and more formal explication of the process and actions required to plan and manage change with the intention of improving the school. The chapters in this book report on the "state of the art" of development planning. Three related themes of the book that have national and international relevance include the developmental nature of development planning, the importance of internal school organization for sustaining innovation, and the need for an integrative and long-term approach to policy implementation. Following the foreword and introduction by David H. Hargreaves and David Hopkins, the chapters include: (1) "School Development Planning: An International Perspective" (Neil Dempster, Chresten Kruchow, and Grace Distant); (2) "Creating Effective Schools through Site-Level Staff Development, Planning, and Improvement of Organizational Culture" (Daniel U. Levine); (3) "The Contribution of Quality Assurance Reviews to Development in School Systems" (Peter Cuntance); (4) "The Centrality of the Autonomy-Accountability Dilemma in School and Professional Development" (Viviane Robinson); (5) "Written Planning and School Development: Bidding Time or Making Time" (Colin Biot, Patrick Easen, and Madeline Atkins); (6) "Three Arenas of Tension: Teachers' Experience of Participation in School Development Planning" (Hilary Constable); (7) "Observing Primary School Change: Through Conflict to Whole-School Collaboration?" (Elizabeth Newman and Andrew Pollard); (8) "School Development Planning: A Place for Partnership?" (Janet Hodgson, Pat Broadhead, and John Dunford); (9) "School Effectiveness and School Improvement: A Meeting of Two Minds" (Louise Stoll); (10) "Creating Their Own Futures: The Use and Effectiveness of School Development Plans in Australian Schools" (John Braithwaite); (11) "Towards a Contingency Approach to Development Planning in Schools" (Mike Wallace); and (12) "School Development Planning in Primary Schools: Does It Make a Difference?" (Peter Mortimore, Barbara MacGillchrist, Jane Savage, and Charles Beresford). Each chapter contains references. A name and subject index are included. (LMI)

Descriptors—Elementary Secondary Education, Interaction, Interprofessional Relationship, Leadership, *Leadership Styles, Organizational Climate, *Politics of Education, *Power Structure, School Culture, *Teacher Administrator Relationship, *Teacher Influence, Teachers Identifiers—Empowerment

The real world of schools is a political world of power and influence, bargaining and negotiation. Teacher development must therefore take place within the micropolitical realities of schooling. This book describes how the micropolitics of educational leadership affect the working world of teachers and develops four approaches to leadership. Part 1 (chapters 1 through 3) examines closed control-oriented leadership styles and their impacts on teachers, students, and parents. Part 2 (chapters 4 through 7) discusses facilitative and democratic leadership styles and their effects on teachers, students, and parents. Chapter 1 focuses on data that delineate the micropolitics of authoritarian and ad-

versarial principal leadership. In chapter 2 data about micropolitical interactions among teachers, parents, and students are discussed from the standpoint that teacher empowerment cannot and should not occur at the expense of the school's students and their parents. Micropolitics between and among teachers is the subject of chapter 3. The fourth chapter presents data that illustrate the unique ways that teachers respond to open versus closed principals. Ways in which open principals affect the micropolitical world of teachers are examined in chapter 5. Chapter 6 presents case-study data that show how open administrative leadership styles, through the manipulation of cultural, symbolic, and ideological dimensions of school life, may lead to more sophisticated forms of teacher control. The final chapter considers how schools might move to a more democratic form of leadership in which power is shared throughout the school. (Contains 226 references.) (LMI)

This book traces the first year of a magnet school called Mega Center for Learning, established in 1990 in a large midwestern urban school district. It focuses on how the primary metaphors embedded in school documents and in stakeholders' perceptions and practices helped or hindered reform. Data were obtained from classroom observation; informal conversations; observations of assemblies and meetings; interviews with teachers, staff, the principal, and two district-level administrators; observation of the principal; focus-group interviews with parents and students; and document analysis. Following the introductory chapter, chapter 2 describes the research design. The third chapter surveys the history of schooling in the United States since the late 1800s, emphasizing metaphors included in major movements. Chapter 4 examines the power of metaphor, looks at what researchers are suggesting as changing roles and relationships in schools, and links these two ideas to the notion of school culture. Chapters 5 through 8 address Mega Center's four major institutional metaphors—vision, families, teams, and vision-keeper—showing the influence of these metaphors on changing educational practices and on the school's culture. Chapter 9 links the major metaphors operative during Mega Center's first year and the diverse images of schooling found in the history of school reform. Suggestions for forging stronger links between language and practice are offered. Reformers cannot assume that stakeholders share common metaphors. It is important to examine the metaphorical underpinnings of language and the effects of metaphors on change efforts. (Contains 82 references.) (LMI)

Identifiers—England

This book provokes a re-examination of how expert knowledge, not practitioner know-how, has come to dominate how Americans judge and improve schools. It depicts the English tradition of school inspection to provoke the invention of better ways for judging and knowing schools in America. Data were gathered by observation of 39 local and national school inspectors, visits to 14 elementary schools and 5 high schools, and historical document analysis. Part 1, "The English Tradition of School Inspection," contains seven chapters that describe different aspects of inspection—its practice, elements, history, tensions, and contributions. Part 2, "Provocations," contains six chapters that describe ideas in inspection that challenge common American assumptions about knowing and judging schools—"being there," judgment, the practitioner's way of knowing, feedback to schools, standards, and the nature of government accountability. The third part, "New Possibilities," is comprised of three chapters that consider if and how English-school inspection concepts could make a difference to American education. The central premise of inspection is trust in experienced teachers and heads of schools. A reliance upon practitioner knowledge as a basis for school improvement remains foreign to American policy makers and educators. One table, three figures, endnotes, and an index are included. Document Not Available from EDRS.

Descriptors—*Cognitive Development, *Constructivism (Learning), Elementary Secondary Education, Epistemology, Hermeneutics, Language Usage, *Leadership, Leadership Training, Learning Theories, *Professional Development, Reflective Teaching, School Culture

Identifiers—Social Constructivism

This book introduces the concept of leadership as the facilitation of constructivist reciprocal processes among participants in an educational community. Chapter 1, "Learning and Leading Theory: A Century in the Making," (Deborah Walker and Linda Lambert) traces the dynamic history of learning and leading during this century, concluding with an in-depth survey of the constructivist theory of learning. Chapter 2, "Toward a Theory of Constructivist Leadership," (Linda Lambert) constructs a theory of constructivist leadership, building on a new conception of the meaning of leadership that incorporates constructivist human learning, community, patterns of relationships, and diversity. The third chapter, "Constructing School Change," (Linda Lambert) applies this theory of constructivist leadership to emerging themes in a constructivist concept of change. It describes one middle school's 3-year struggle to carry out school-based change. Chapter 4, "Leading the Conversations," (Linda Lambert) describes the role of the constructivist leader as a leader of conversations, which are dialogic, inquiring, sustaining, and partnering. Examples of the role of language in the construction of meaning and knowledge are offered in the fifth chapter entitled "The Linguistics of Leadership" (Diane P. Zimmerman). Chapter 6, "The Role of Narrative and Dialogue in Constructivist Leadership," (Joanne E. Cooper) provides examples of practitioners as they write reflectively about their work and discusses the role of narrative in schools and its relationship to growth. The seventh chapter, "The School District as Interdependent Learning Community," (Morgan Dale Lambert and Mary E. Gardner) describes the role of the school district in creating an environment that supports constructivist leadership. Chapter 8, "Reflections on Community: Understanding the Familiar in the Heart of the Stranger," (P. J. Ford Slack) reflects on the nature of community and constructivist leadership and focuses on re-storying three "communities of difference"—a Native-American reservation school, an

African-American charter school, and a teaching community in China. Chapter 9, "The Preparation of Constructivist Leaders," (Deborah Walker) suggests innovative approaches to preparing constructivist leaders. The final chapter, "Constructing the Future of Schooling," (Linda Lambert) looks at the potential of constructivist leadership for creating new root metaphors for leading, learning, community, and democracy. Descriptors—*Budgeting, Budgets, Cost Effectiveness, *Educational Economics, *Educational Finance, Elementary Secondary Education, *Expenditures, Information Management, Models, Records Management, Reports, Resource Allocation, *School Based Management, School District Spending

This bulletin describes how Coopers & Lybrand and the United States Department of Commerce's Center for Workforce Preparation joined efforts to create a model for school-finance and management reporting. The Finance Analysis Model provides a new reporting system for districts that have implemented school-based management. The model is a technology-based information tool that operates on a standard personal computer, designed to analyze 100 percent of a school district's general ledger. It collects and analyzes information at both the district and school levels. The model is comprised of a series of multidimensional spreadsheets that compile information on district and school expenditures. There are three basic dimensions: include functional, program, and grade-level. The functional dimension places expenditures and budgets in one of five categories—instruction, instructional support, operations, other commitments, and leadership. The program dimension provides community leaders with accurate information on the costs of educational programs. The grade-level dimension allows districts to determine the costs of functions and programs in elementary, middle, high, alternative, and all other schools. The model presents expenditures in five functions to help communities find the proper balance between instructional spending and other costs, to help communities allocate resources in order to enhance student performance. Three figures are included. (LMI)

Subject departments form the primary organizational unit of the high school. The chapters in this book illuminate the ways in which departments shape the views and practice of individual teachers, serve as a locus of professional community, and express institutional and social values. The book examines the implications of subject affiliation and department membership for teachers' work and for students' experience of schooling. The 5-year project of the Center for Research on the Context

of Secondary School Teaching (CRC) provides the impetus for exploring issues related to subject departments. Following the introduction entitled "The Subject Department: Continuities and Critiques," by Leslie Santee Siskin and Judith Warren Little, the chapters include the following: (1) "Subject Divisions" (Leslie Santee Siskin); (2) "Work Units in Organizations: Ransacking the Literature" (W. Richard Scott and Randi C. Cohen); (3) "Boundaries of Teachers' Professional Communities in U.S. High Schools: Power and Precariousness of the Subject Department" (Joan E. Talbert); (4) "Revisiting Subject Disciplines as the Opportunity for Group Action: A Measured Critique of Subject Subcultures" (Stephen J. Ball and Colin Lacey); (5) "The Strong Department: Building the Department as Learning Community" (Don Hill); (6) "The Balkanization of Secondary School Teaching" (Andy Hargreaves and Robert Macmillan); and (7) "Subject Affiliation in High Schools That Restructure" (Judith Warren Little). Contains an index and references for individual chapters. (LMI)

Descriptors—Bus Transportation, *Contracts, *Cost Effectiveness, Educational Economics, *Educational Finance, *Efficiency, Elementary Secondary Education, Expenditure per Student, Food Service, Free Enterprise System, Labor Relations, *Privatization, Resource Allocation, School Maintenance

To cut costs, some administrators are contracting with the private sector for such services as pupil transportation, facilities maintenance, and cafeteria operations. Proponents of competitive contracting assert that it can provide public schools with the kind of expertise, flexibility, and cost efficiencies not always available with inhouse service provision. This document offers reasons for private-sector contracting and describes the scope of current service-provision practices in the areas of food service, busing, and maintenance. It describes four steps in deciding whether to opt for alternative methods of service provision, discusses five stages in the bidding process, and describes pitfalls to avoid. Case studies highlight the experiences of several school districts. Two tables and two figures are included. Appendices contain suggested performance measures, suggestions for overcoming employee opposition, principles of successful contracting, information on charter schools, five sources for recommended reading, and a list of contact organizations. This monograph explores the notion of viewing leadership as a single, interconnecting system at work in the internal and external school environment, rather than as a collection of individual roles. The document explores what the new leadership paradigm—a decentralized, collaborative model—means to schools. Leadership is viewed as an interrelated system joined at all levels, with common purpose and exercised according to organizational

and community culture. Section 1 considers the idea that, if educators had understood that the restructuring movement was a democratic experiment, the results might have been far different. The section weighs the value of continuing the restructuring experiment and recommends a new role for school leaders to understand their role to help the experiment succeed. Section 2 explores the school leader's role in striking several balances central to a democracy, and section 3 offers some practical suggestions for exercising democratic leadership at the classroom, school, and community levels. Systemic leadership assumes that this conflict can be resolved through proactive interventions that have the following goals: to articulate school purpose; to strike balances between forces inherent in democratic schools; and to socialize students and adults for democracy. A conclusion is that when leadership becomes systemic, it will fulfill its role of helping people to grow individually and collectively. It will be educating democracy. (Contains 12 references.) Descriptors—Busing, Cultural Pluralism, *Educational Environment, Elementary Education, English (Second Language), Instructional Effectiveness, *Limited English Speaking, *Parent School Relationship, *Racial Balance, Racially Balanced Schools, *School District Reorganization, Spanish Speaking

This paper describes how a predominantly white elementary school responded to a school-district reorganization effort to promote ethnic balance among the schools. The redistricting plan reassigned some former students to other schools and bused in many Spanish-speaking students. The school staff encountered language problems with the new students and their families. The school acquired an English-as-a-Second-Language (ESL) teacher, included parents on the school-based management team, recognized multicultural role models and volunteers, sponsored parent-orientation and welcoming programs, and promoted parent-school conferences. Teachers enrolled in a community-education Spanish class. Limited-English-speaking students were not penalized for not being able to perform in a language unfamiliar to them. Staff emphasized areas in which students were successful and marked report cards with the statement, "Grades adjusted due to language development." Other strategies to help the new students achieve included home visits, group sessions, cooperative assessment, whole-language strategies, peer tutoring, and portfolio assessment. The key factor of success was a focus on school attitude rather than on instruction. An endnote states that the 1995 results of the Texas Assessment of Academic Skills designated the school as a "recognized campus" for student success in all demographic and cultural subgroups. (LMI)

This paper examines both the emerging consensus among Pacific Rim countries, especially East and

Southeast Asian countries, as to current and future directions of special education and the many differences among these countries in economics, cultural perspectives on disability, concepts of education, and administrative structures. The paper provides demographic data and a description of the status of special education for each of the following countries: Japan, New Zealand, Republic of Korea (South Korea), Malaysia, Thailand, Indonesia, China, and Vietnam. Data are provided on population, percent of the population under 15 years old, number of students, per capita income, rate of special education placement, types of special education programs, educational policy, and future plans for special education provisions. Another section summarizes recommendations from recent international conferences and seminars including the World Conference on Education for All (1990); seminars held under the auspices of the Asia Pacific Programme of Educational Innovation for Development; and the United Nations Educational, Scientific, and Cultural Organization (UNESCO) Regional Seminar on Policy, Planning and Organization of Education for Children and Young People with Special Needs (1993). Recommendations from the UNESCO seminar are listed. A concluding section notes the gap between educational policies committed to inclusion and actual practices in schools and classrooms. (Contains 23 references.) (DB)

Descriptors—Compliance (Legal), *Disabilities, *Educational Policy, Elementary Secondary Education, *Eligibility, Foreign Countries, Models, *Resource Allocation, Special Needs Students, Standards, Student Needs, *Student Placement Identifiers—*New Zealand

This report examines results of a review commissioned by the New Zealand Ministry of Education of criteria for determining special education placements. It proposes a model which focuses on eligibility standards for five levels of educational support for New Zealand students with special educational needs arising from their special physical, sensory, learning, or behavioral characteristics. The term "students with education support needs" is defined and quality of life is asserted to be the appropriate goal in allocating resources. Types of educational support are listed along with factors to be considered in determining education supports. The development of Individualized Education Plans (IEPs) and Needs Assessment Agreements (NAAs) is addressed, including principles to follow and important differences between NAAs and IEPs. Distinctions among the five broad levels of education support needs are explained. These range from Level 1 needs, which the classroom teacher should normally be able to accommodate, to Level 5 needs, which require extensive modification to regular curriculum content, teaching methods, and placement. A matrix displays the five levels in 10 behavioral domains. Examples of students with Level 5 needs arising from learning difficulties, physical disabilities, or behavior difficulties are given. views, *Knowledge Level, Qualitative Research, Self Evaluation (Individuals), Special Education, *Special Education Teachers, *Teacher Attitudes, *Teacher Background, *Teacher Competencies, *Teacher Role, Teaching Skills Identifiers—*Sweden

This thesis reports on a study in which 10 Swedish special education teachers were interviewed concerning the following six topics: (1) personal background and choice of a career; (2) professional knowledge; (3) the role of a special education teacher; (4) educational goals and methods; (5) cooperation; and (6) thoughts about the future. Interviewees' ideas about what is important knowledge in special education fell into two main categories: professional knowledge and skills, and social competence. Teaching goals tended to show either a short-term or a long-term perspective. Teachers defined their primary short-term goal as making pupils feel happy in school. Long-term goals included fostering pupils' sense of responsibility and increasing their ability to meet life outside of school. Cooperation with parents and colleagues was considered either from an active or a passive point of view. An active view was held by teachers who saw their role as that of a change agent. A passive view was expressed by teachers who saw their role as relatively unobtrusive and concerned with the mediation of knowledge. Analysis of individual profiles of the interviewed teachers led to identification of two teacher types: the mediator and the interactor. The mediator uses his/her knowledge and competence primarily to bring knowledge to students. The interactor has a holistic view and regards the goal of special education in a whole-life perspective. Descriptors—Administrator Attitudes, *Blacks, *Career Choice, *Change Strategies, Counselor Attitudes, Counselors, Decision Making, Employment Opportunities, *Employment Patterns, Social Services, State Surveys, *Visual Impairments, *Vocational Rehabilitation Identifiers—*African Americans, Alabama, Mississippi

This study investigated possible reasons for the observed imbalance in the level of employment of African Americans in vocational rehabilitation (VR) services for persons with visual impairments in Alabama and Mississippi. A survey instrument was developed and administered to 126 administrators, professional service providers, and secretaries employed in Alabama and Mississippi VR agencies for persons with visual impairments. In addition, in-depth interviews were conducted with all 21 black employees in both states. Possible reasons identified included low salaries, lack of jobs, unawareness of the blindness profession, lack of training and education programs, low accessibility of such programs to black students, and negative views and attitudes toward social service occupations by black students and others. Questionnaire and interview responses converged on the following recommendations: (1) increase awareness by strategic publicity and dissemination of information on careers, training programs in blindness services, and blindness as a disability; (2) increase attractiveness by increasing salaries, benefits, and financial assistance for education/training; (3) increase the number and preparedness of potential employees by developing more and different training programs, especially at historically Black institutions; and (4) enhance recruiting, hiring, and job opportunities by strategic recruiting, advocacy of preparedness, employer flexibility, and a commitment to eliminate discrimination. The survey instrument is appended. (Contains 27 references.) (Author/DB)

Descriptors—*Cognitive Development, *Concept Formation, *Deafness, Educationally Disadvantaged, Elementary Secondary Education, *Enrichment, Foreign Countries, Generalization, Immigrants, Instructional Effectiveness, Intervention, Metacognition, Program Effectiveness, *Teaching Methods Identifiers—Ethiopia, *Instrumental Enrichment, *Israel

R. Feuerstein's Instrumental Enrichment (IE) Program was used as a tool of cognitive educational intervention with 10 deaf children (ages 7 to 15), all recent immigrants from Ethiopia to Israel. The group's special education needs resulted from their deafness, lack of formal educational experience, lack of previous exposure to sign language or finger spelling, and limited information about and experience with a modern technological society. Instrumental enrichment was focused on formation of elementary learning processes and cognitive functions. Special didactics used with this group included simultaneous mediation in four dimensions: (1) the graphic image of an object, (2) the written name of the object, (3) the sign designating the object, and (4) a motor response. Generalization was taught using a sequence from the IE material to the embedded principle, to an example, then back to the principle, and finally, to a second example. Students demonstrated significant improvement in their cognitive and metacognitive skills. An example of a student's progress is attached. (Contains 10 references.) (DB)

This final report describes activities and accomplishments of the Pacific Basin Deaf-Blind Project, a 3-year federally funded project to provide technical assistance to public and private agencies, institutions, and organizations providing early intervention, educational, transitional, vocational, early identification, and related services to children and youth with deaf-blindness in American Samoa, the Commonwealth of the Northern Mariana Islands, the Federated States of Micronesia, Guam, the Republic of Palau, and the Republic of the Marshall Islands. The report is organized around the project's six technical assistance objectives which stressed: provision of technical services to Departments of Education/Special Education services; the University of Guam and community colleges; service providers; specific assistance to promote the integration of children with deaf-blindness; specific assistance to refine and expand the annual census of students with deaf-blindness; and ongoing collaboration with other related technical assistance projects. Accomplishments for years 1992-93, 1993-94, 1994-95 are listed with project objectives and activities. (DB)

This final report describes activities and accomplishments of the Colorado Services to Children with Deafblindness program, a 3-year federally funded technical assistance project concerned with early childhood education, training of personnel and families, transition services from school to adult services, parent support, and dissemination of information. The project provided three summer training sessions serving approximately 53 professionals, provided training during the school year to over 200 professionals and parents, and collaborated with a variety of related agencies and organizations. Project newsletters, brochures, and inservice training materials were also developed. Individual sections of the report address the project's purpose, goals, and objectives; conceptual framework; accomplishments; problems; evaluation findings; and impact. (DB)

Identifiers—*Florida

This report describes activities and accomplishments of the Dual Sensory Impairments Program in Florida, a 3-year federally supported program, housed at Florida State University, to provide technical assistance and other services to students, ages 0 to 21, with deaf-blindness. A change in priorities concerning infants (ages 0 to 2) is noted as the state took on the responsibility for direct services to this age group over the 3 years of the project. The new priority de-emphasized direct service responsibilities and emphasized technical assistance services for all ages (0 to 21). Specific project activities were developed to achieve the following goals: (1) identifying and reporting students (an overall increase of 149 students was reported); (2) increased technical assistance services (including student-specific on-site visits, inservices, workshops, presentations at conferences, other training activities, development of multidisciplinary assessment teams, initiation of a toll-free telephone line for parents, and dissemination of a variety of project-developed materials); and (3) coordination with other agencies and interested groups. Identifiers—Individuals with Disabilities Education Act

This policy brief examines the relationship between fiscal policies in special education and the requirement under the Individuals with Disabilities Education Act that students with disabilities be educated in the least restrictive environment appropriate to their needs. It discusses the effects of state fiscal policy on the provision of special education programs, focusing in particular on fiscal incentives related to the identification and placement of students with disabilities. The brief emphasizes that changes in fiscal policy alone are unlikely to effect reform. State fiscal policies affecting the placement of students with disabilities include aid differentials related to placement, separate funding mechanisms for separate placements, and separate funding for transportation. States reporting success with fiscal reform stress the need not only to remove disincentives for restricted placements, but to provide a comprehensive system of professional development and support related to the desired program reform. Identifiers—Individuals with Disabilities Education Act

This newsletter theme issue presents two separate articles: (1) "Toward More Integrated Special Education Funding and Services: A Federal Perspective" (Deborah A. Verstegen) and (2) "Toward More Integrated Special Education Funding and Services: A Local Perspective" (Margaret J. McLaughlin). The first article discusses results of a study of the fiscal requirements of federal special education policy. The study identified options for reform and attempted to cross-validate information from interviews with approximately three dozen policymakers, scholars, and federal and state officials. Sixteen specific recommendations for fine-tuning the Individuals with Disabilities Education Act are listed. The second article focuses on the lack of coordination across integrated programs at the classroom level; identifies three collaborative models; describes various administrative mechanisms to promote flexibility and consolidation; and considers challenges to greater program consolidation such as a shortage of bilingual teachers, requirements of categorical programs, and human factors. The importance of local efforts as well as federal and state policy changes in fostering program consolidation is stressed. (DB)

Identifiers—*Funding Formulas

This study addressed the relationship between alternative types of state funding formulas and the use of separate placements for students with disabilities, and identified other characteristics of states that might be associated with the degree to which they use separate placements for the delivery of special services. Three research questions are addressed: (1) identification of states which are high or low users of separate placements for students with disabilities; (2) identification of any relationships existing between use of separate placements and a state's type of funding mechanism; and (3) other factors associated with a state's high or low use of separate placements. First, states were ranked on their use of separate placements based on federally reported data for the 1991-92 school year. Second, components of state funding systems were reviewed to identify patterns or likely relationships. Third, state administrators in states identified as high or low users of separate placements were interviewed to discuss possible relationships. Finally, when interviews revealed that demographic characteristics might play an important role in the use of separate placements, geographic and regional relationships were investigated. States that are low users of separate placements tended to use a funding formula not explicitly linked to student placement. No single type of funding formula was found for states that ranked high in their use of separate placements. Administrators did not feel that state funding formula alone was a strong influence on student placement policy. Other factors, such as geographic features, history, and educational tradition, were identified as possible contributors to the extent of separate placements. (Contains 14 references.) (DB)

Identifiers—*Funding Formulas, Kentucky, *Kentucky Education Reform Act 1990

This paper describes the views of special education directors in 17 Kentucky school districts concerning effects of a 1990 law, the Kentucky Education Reform Act (KERA), which called for systemwide change in education and instituted a finance system, Support Education Excellence in Kentucky (SEEEK), which uses a pupil weighting system. The study addressed cost questions comparing statewide expenditures with revenues generated for special education services, analyzing special education expenditures and revenues by types of school district, and comparing the three pupil weights used under KERA with actual costs of serving various categories of students. Overall, interviewees viewed the SEEEK funding system as an improvement over the previous funding mechanism and approved the greater flexibility resulting from

the blending of special and regular education funds. Directors also identified concerns with the new system, including insufficient state and federal funds to support appropriate placements, related services, staff development, materials, transportation, and facility modifications. Continuing issues of concern also included the burden of paperwork, mandated caps on class size, regulations governing the use of technology funds, and reimbursement for transportation. Policies encouraging inclusion were seen as having contributed to better use of special education resources and personnel but also have resulted in increased needs for instructional support and related service personnel, staff development, building modifications, and materials, equipment, and transportation funds. An appendix explains the SEEK formula. (DB)

dent Placement, Trend Analysis

Identifiers—*Scotland

This paper reports on a comparative study of mainstream and special school services for pupils with special educational needs in Scotland. The study examined trends in the placement of pupils with Records of Need, considered implications for special schools of serving a changing population, and investigated the capacity of mainstream schools to meet the needs of pupils with significant difficulties. The study involved analysis of integration policy at national and regional levels and case studies of 32 pupils, half of whom were placed in mainstream settings and half in special schools in two regions with contrasting special education policies. Results are reported in terms of service patterns and trends, mainstream services, special school services, teachers and training, and costs. Implications are drawn which suggest that the trend toward increased integration will likely continue, along with: (1) increasing reliance on special units within mainstream schools; (2) continuing support for some special schools; and (3) increasing numbers of children with Records of Needs. Other relevant trends identified include more single tier authorities and devolved school management. (DB)

Identifiers—*New York

This report describes activities and accomplishments of the New York Partnership for Statewide Systems Change Project, a 5-year project to increase and improve inclusive educational services to New York State students with severe disabilities. The project provided inservice training, technical assistance, and model demonstration and evaluation activities. Unique features of the project included a partnership model of collaboration between: (1) agencies responsible for the delivery of educational services and (2) institutions of higher education involved in teacher education and applied research. A needs assessment and action planning process was implemented to ensure locally relevant planning and coordination of service delivery. Intensive professional development and technical assistance activities were carried out to support local school districts, organizations and agencies, and parents of students with disabilities. Materials were developed to provide information on effective systems change strategies and delivery of quality inclusive schooling for students with severe disabilities in their neighborhood schools. The project directly benefited approximately 10 percent of New York students with severe disabilities, including students with deaf-blindness. Many other students in the state benefited indirectly from the project. Individual sections of this report describe the project's goals and objectives, major accomplishments, accomplishments by specific goals, problems encountered, technical changes, and impact. An appendix contains an annotated list of approximately 50 related publications. (DB)

Identifiers—*Alabama

This report describes activities and accomplishments of a 3-year federally supported project to improve services to children (ages 0-21) with deaf-blindness in Alabama. The project utilized a service delivery model based on provision of state, regional, local, and individual technical assistance to service providers and families through three strands: infant and toddler services, ages 0 through 2; school age services, ages 3 through 21; and transition services, ages 14 through 21. Activities were designed to assure that public and private agencies, institutions, and organizations provide more effective early intervention, educational, transitional, vocational, early identification, and related services to children with deaf-blindness. The project provided preservice and inservice training activities, individual and group consultation services, and statewide workshops and conferences where exemplary and effective strategies to work with the targeted population in the home environment, center-based settings, and the community were demonstrated. The project also provided technical assistance to families and service providers. Individual sections of the report provide information on the project's purpose, goals, and objectives; conceptual framework; accomplishments, outcomes, and contributions; problems and their resolutions; evaluation findings; and impact. An appendix provides supporting information on the project's summer learning institute, the registry data report, the interagency agreement, and coalition/advisory board members. (DB)

Identifiers—*Europe

This paper summarizes the contributions of Jewish professional and lay people to the education of children with hearing impairments over the past 250 years throughout Europe. It begins with the contributions of Jacob Rodriguez Pereira in the 18th century in France, an oral teacher of the deaf and the inventor of a phoneme-transmitting manual alphabet. It also reviews the history of six former European schools for Jewish deaf children in Vienna, London, Lemberg, Berlin, Budapest, and Minsk. In addition, it mentions four smaller Jewish schools situated in Poland and two schools founded by German speaking Jews in the United States. Methods of teaching language at these schools, including oral, constructive, and natural approaches, are briefly discussed. (DB)

Identifiers—*Intensive Care Units

This final report describes activities and accomplishments of the NICU Follow-Through Project, a 3-year project designed to help hospital neonatal intensive care units (NICUs) and community developmental centers serving infants with disabilities or very low birth weights (VLBW) replicate the project's innovative and successful training components. The model provided training to medical and

early intervention professionals in 18 outreach communities within 10 states. Program accomplishments included: (1) assisted medical and early intervention professionals to train and facilitate parents in supporting their VLBW infants with severe disabilities while engaging them in caregiving activities and social interactions; (2) assisted medical and intervention professionals to interpret the neurobehavioral cues expressed by these infants and to respond in an appropriate contingent manner during caregiving, assessment, or intervention sessions; (3) assisted medical and early intervention professionals to implement a comprehensive interagency coordinated service plan for VLBW/severely disabled infants and their families; and (4) trained medical/educational professionals to become trainers of a neurobehavioral assessment. Individual sections of this report describe the project's goal and objectives, outreach training communities, implementation of objectives, evaluation of training programs, and products. Eight appendices provide additional information and materials such as training materials for team building, naturalistic observation of newborn behavior, infant behavioral assessment, and examples of action plans. (Contains 73 references.) (DB)

Identifiers—*Illinois

This final report describes activities and accomplishments of the Illinois state project on services for children with deaf-blindness, a 3-year federally supported project to address the needs of children (ages birth to 21) who are deaf-blind. Project activities included inservice training and technical assistance, development of a comprehensive resource library, the maintenance of a statewide census of students with deaf-blindness, and assistance in assuring appropriate educational services to these children. Project staff were involved in Child Find activities, individual program development, family consultation, program consultation, and inservice trainings. An overall intent of the project was to integrate infants and toddlers with deaf-blindness into the existing early intervention service delivery system. Approximately 340 diagnostic assessments for children with dual sensory impairments were conducted. Other accomplishments included the expansion of a Toy Lending Library for families and sponsoring of an annual Family Training Weekend. An Interagency Agreement Committee met regularly to assist school graduates in the transition to adult service programs. Annual needs assessments were also conducted. Individual sections of the report describe the project's goals and objectives, conceptual framework, activities and accomplishments, project changes, evaluation findings, and impact. (DB)

*Teaching Methods

This paper describes a method of language intervention, Structured Methods in Language Education (SMILE), used with students having severe language disabilities due to such factors as autistic disorder, central auditory dysfunction, impaired hearing, or mental handicap. SMILE develops a hierarchy of skills leading from phonology to morphology to syntax. It starts with the smallest unit of language, the phoneme, which is immediately associated with its written representation, the grapheme. As soon as the sound system and a number of words have been learned, syntax is taught through linguistic string formulas and sentence patterns. The teaching progresses from simple to complex at each level of the curriculum. The SMILE approach also incorporates development of attention, specific and consistent teaching methodology, use of structure and routine, immediate reinforcement, successive approximations leading to exact repetition, pattern practice and substitution/transformation drills, and ongoing attention to generalization. Student learning and progress is shared with parents by means of individualized "books" showing new skills. (DB)

Identifiers—*Wyoming

This final report describes activities and accomplishments of the Wyoming Deaf-Blind Grant, a 3-year federally supported project to identify children who have deaf-blindness and to provide technical assistance in the development of educational services for these children. Major accomplishments of the project included: identification of more children with deaf-blindness (from a total of 23 in 1992 to 36 in 1995); conducting biannual clinics for deaf/blind/multi-impaired children; dissemination of information about the needs of children with dual sensory impairments; and technical assistance to families and service providers. Extensive appendices include a listing of the technical assistance training sessions provided, and various letters, forms, and reports of the project. These latter include the following: a sample student assessment; sample consultation reports; "Developing Preliminary Communication in the Severely Handicapped: An Interpretation of the Van Dijk Method" (Robert D. Sullman and Christy W. Battle); "Overview of the Van Dijk Curricular Approach" (Stephanie Z. C. MacFarland); a description of the Pediatric Epilepsy Inpatient Program; General Guidelines for Vision Stimulation; and photographs of guided movement. (DB)

Identifiers—*Vermont

This final report describes activities and accomplishments of the Vermont State Project for Children and Youth with Deaf-Blindness, a 3-year federally supported project to provide statewide services, training, and technical assistance to Vermont children (birth to age 21) with deaf-blindness, their

families, and service providers. Throughout the project there were 35 to 38 children with deaf-blindness receiving services in a variety of settings. The project included five components: (1) on-going coordination with educational and other agencies responsible for providing services to this population in order to build local capacity and share skills and resources; (2) provision of on-site technical assistance, special education, and related services for family support and involvement, curriculum development and adaptations, diagnosis and educational evaluation, and a coordinated plan of services; (3) provision of on-site technical assistance consultation to families, professionals, paraprofessionals, and related services personnel concerning family support and development, curriculum development and adaptations, collaboration of related services, replication of exemplary practices, and inclusionary education; (4) provision of procedures to evaluate service effectiveness; and (5) maintenance of the state census for students with deaf-blindness. Individual sections of this report provide information on the project's purpose, goals, and objectives; conceptual framework and project description; major tasks and timelines; accomplishments/outcomes; challenges and resolutions; evaluation findings; and impact. Appendices provide details on project milestones, training activities, and products. (DB)

This paper was developed to help counselors of students with learning disabilities plan for college, by answering common student questions and providing sources of additional information. Sections of the paper discuss: (1) developing self knowledge (using compensatory learning strategies, knowing one's own strengths and weaknesses, and practicing self-advocacy); (2) understanding legal rights and responsibilities (especially relevant federal legislation, changing levels of responsibility, and privacy rights); (3) transition planning for college (evaluating college options, documenting the learning disability, and course selection/accommodative services); (4) the college application process (creating a short list, caution about course waivers and substitutions, admissions tests and accommodations, application and disclosure, and making a college choice); and (5) selected organizational and print resources for additional information. Identifiers—Regional Resource Centers

This text is designed to assist state, regional, and

local education agencies and other collaborating agencies to improve interdisciplinary and interagency service coordination for children, youth, and adults with disabilities in accordance with the Individuals with Disabilities Education Act (IDEA) and other related statutes. The training guide supports the mission of Regional Resource Centers by providing technical assistance and training to improve the quality of service coordination. Chapter 1 offers a philosophy for interdisciplinary, interagency service coordination. It explores the emergence of interagency coordination within several human service sectors and examines services as an integrated system to address the needs of individuals and their families. This chapter also includes a summary of provisions for interagency coordination in recent laws. Chapter 2 outlines eight essential functions of interdisciplinary and interagency service coordination and examines the roles of the service coordinator. The third chapter focuses on the practical aspects of developing and managing interagency service coordination and presents a 10-step strategic plan for implementation. Chapter 4 offers examples of service coordination in operation for infants and young children; pre-adolescents, teens, and their families; and young adults. Discussion questions accompany each of the 11 case examples. The final chapter reviews basic evaluation principles and reinforces the concept of evaluation for improvement and renewal. The focus is on assessing service outcomes, systems change, and improvement at local and state levels. (Contains 40 references.) (DB)

This training manual is designed for use with groups of individuals involved in initiating or improving interagency, interdisciplinary service coordination and is especially suitable for teams training together to provide better services for children, youth, and adults with disabilities. The training program consists of six modules requiring an estimated time of about 18 hours. An introduction outlines the program's objectives, intended audience, facilitator qualifications, and requirements for success. A section for facilitators summarizes module format, details facilitator responsibilities, and highlights facilitator choices. Each module includes a cover sheet listing needed materials and equipment, training time, an outline of the instructional sequence including suggested script, and a materials section of transparency masters and handouts. Module 1 sets the philosophical frame, explores belief systems, and defines interagency interdisciplinary service coordination. Module 2 introduces scenarios as a basis for practice applications, examines why change agents fail, and identifies challenges to successful interagency service coordination. Module 3 leads participant teams through processes of identifying partner membership, initial member assessments, identifying priority service needs, and developing mission statements and cooperative agreements. Module 4 introduces models of interagency service coordination, describes essential management tasks, and examines the role of service coordinator. Module 5 examines the essentials of sound program evaluation as it relates to interagency service coordination efforts. Module 6 offers practical techniques for persuading families, consumers, other agencies, and superiors to support interagency service coordination efforts. (DB)

This resource book lists approximately 1,500 products designed specifically for the needs of people with disabilities. Typically, each product is pictured; basic information is provided including manufacturer name, product cost, size, and weight; and the product is briefly described. The book's four sections each describe products designed for certain purposes. Part 1 covers communication aids, including speech aids, pointing and typing aids, training and communication initiation aids, non-electronic communication aids, electronic communication and writing aids, mounting systems, and telecommunication devices for the deaf. Part 2 covers switches and environmental controls. Part 3 focuses on computer adaptations, including modifications for standard keyboards and mice, alternate inputs, input adapters for computers, voice-output screen readers and reading machines, magnification products for computer displays, braille and tactile output systems, speech synthesizers, and other software and hardware adaptations. Part 4 describes application software for special education and rehabilitation, including training and therapy software, adaptive educational software, and personal tool and aid software. Six indexes list products by their functions, by their input and output features, by computer, by manufacturer, and by name. A listing of manufacturer addresses is also provided. Appendices provide lists of other resources such as books and pamphlets, disability resources on the Internet, software resources, computer assessment and training programs, organizations and self-help groups, and service centers for augmentative communication and computer access. A glossary is also appended. (DB)

Asthma & Physical Activity in the School: Making a Difference.

National Heart, Lung, and Blood Inst. (DHHS/NIH), Bethesda, MD.

Report No.—NIH-95-3651

Pub Date—Sep 95

Note—25p; A publication of the National Asthma Education and Prevention Program (NAEPP) School Asthma Education Subcommittee.

Pub Type—Guides - Non-Classroom (055)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Asthma, Drug Therapy, Elementary Secondary Education, Health Needs, Inclusive Schools, Intervention, *Physical Activities, *Physical Education, *Student Participation, Symptoms (Individual Disorders)

This booklet on asthma for physical education teachers and other school personnel offers guidelines for the maximum inclusion of students with asthma in regular physical education activities. It stresses that today's treatments can successfully control asthma so that students can participate fully in physical activities most of the time. First asthma is explained. Then guidelines for helping students control their asthma are offered. They include: recognizing asthma triggers; avoiding or controlling asthma triggers; following an asthma management plan; ensuring that students with asthma have convenient access to their medications; and modifying physical activities to match the student's current asthma status. A third section focuses on recognizing symptoms and taking appropriate action. It identifies symptoms that require prompt action,

signs that may indicate poorly controlled asthma, and confusing signs that may or may not be an asthma episode. Appendices include a sample Student Asthma Action Card, information on peak flow monitoring and use of a metered dose inhaler, and a listing of resource organizations. (DB)

Descriptors—Child Care Occupations, Community Based Instruction (Disabilities), Day Care, Definitions, *Disabilities, Early Childhood Education, *Early Intervention, Individualized Family Service Plans, Inservice Education, *Paraprofessional School Personnel, *Special Education, Special Education Teachers, Staff Development, *State Standards, Teacher Certification, Teacher Qualifications

Identifiers—*Maryland

This report describes deliberations and recommendations of a Maryland task force to examine issues and develop policy recommendations related to "special instruction" as an early intervention service. It specifically concerns the relationship between special instruction and specialized child care; personnel qualifications; and provision of early intervention services in natural environments. The federal definition of "special instruction" as an early intervention service is presented and discussed, as is Maryland's use of "specialized child care." Personnel standards required of early intervention personnel and the role of the special educator when other personnel provide direct instructional services are considered. The importance of providing services in natural environments in family-centered and community-based early intervention services is stressed. The following recommendations are made: (1) special instruction should be designed as part of the Individualized Family Service Plan process and implemented by a certified special educator or other appropriately qualified personnel; (2) special instruction should be provided in natural environments and settings including child care settings; (3) personnel who carry out special instruction strategies under the supervision of a special educator in excess of 15 percent of their employment hours should meet suitable qualifications; and (4) the Comprehensive System of Personnel Development should address the training needs of personnel who carry out special instruction under the supervision of a special educator, including educational assistants, child care professionals, early childhood teachers, and other relevant personnel. The federal definition of early intervention services and Maryland's personnel standards for early intervention service providers are appended. (DB)

Descriptors—*Delayed Speech, Developmental Stages, *Language Impairments, *Motor Development, Norm Referenced Tests, *Perceptual Motor Coordination, Preschool Children, Preschool Education, *Psychomotor Skills

Identifiers—Peabody Developmental Motor Scales

This study compared the skills performance of 60 children, ages 3 to 5, with speech and language delays on the Peabody Developmental Motor Scales (PDMS) with that of national norms on the PDMS. It found that the children with speech and language delays performed the PDMS gross motor skills significantly lower than the norm at each age level. The PDMS fine motor skill performance of the 3- and 4-year-old children with speech and language delays

was also significantly lower than the mean performance of the PDMS norming sample. The fine motor performance of the 5-year-old children with speech and language delays did not differ from the norming sample. Findings support the importance of using an assessment tool that will provide accurate information about the gross and fine motor performance of young children and support provision of appropriate intervention to children performing significantly lower than the norm. (Contains 46 references.) (DB)

Identifiers—*Carroll (John B), *National Technical Institute for the Deaf, Rochester Institute of Technology NY

This paper applies John Carroll's model of school learning (which emphasizes the crucial role of time) to analyze the success of college students with deafness in mainstreamed settings. It relates especially to services provided by the National Technical Institute for the Deaf to deaf students in mainstreamed courses at the Rochester (New York) Institute of Technology (RIT). The model defines the five crucial factors required for success in an educational setting in terms of time: (1) aptitude (time required to learn); (2) ability to understand instruction (time required to learn); (3) perseverance (willingness to spend time in learning); (4) opportunity to learn (time on task); and (5) quality of instruction (which influences the use of time). Each of these five factors is discussed in terms of how they are applied in the case of successful deaf students. The effective management and use of time are felt to contribute to the graduation rate of about 60 percent among RIT deaf students. (DB)

Descriptors—*Access to Education, Ancillary School Services, College Students, *Deaf Interpreting, *Deafness, Foreign Countries, Higher Education, *Interpreters, Needs Assessment, Student Needs, *Student Personnel Services

Identifiers—*United Kingdom

This paper discusses issues related to the training and provision of interpreters for deaf students at institutions of higher education in the United Kingdom. Background information provided notes the increasing numbers of deaf and partially hearing students, the existence of funding to pay for interpreters, and trends in the availability of interpreters. Financial support through the Disabled Students Allowance is discussed as are concerns about this allowance including eligibility, means-testing, special problems of students with multiple disabilities, and payment methods. Establishment by some universities of special support services for deaf students is noted. A survey of 46 deaf students at the University of Bristol (England) is summarized for type of secondary school attended, communication mode preferred, communication mode in their previous school, and support needs. The survey found that none of the students had used interpreters in elementary/secondary education settings. A final section reviews trends in training and qualifying interpreters for the deaf. Other issues considered include social implications of interpreter use, the university experience, and alternatives to interpreting in the higher education setting. (DB)

Identifiers—*Indiana

This final report describes activities and accomplishments of the Indiana Deaf-Blind Services Project, a 3-year federally funded project to enhance and further develop coordinated direct services to children and youth, birth through age 2 and ages 18 through 21. It also was designed to provide technical assistance to public and private agencies serving children with deaf blindness and their families. The study identified and tracked 205 children and youth with deaf-blindness through community agency and public school programs. Inservice training workshops on such topics as communication, functional curriculum, integration, and challenging behaviors were conducted. Over 1,000 items were entered into a materials resource center for distribution statewide. An existing mentor teacher training project was expanded. Parent support weekends were conducted for families of children with deaf-blindness. A 2-day statewide workshop on assessment and evaluation of infants and toddlers with deaf-blindness was conducted. Additional workshops provided transition plan training. The project also coordinated information and training regarding technology with the state's technology project. Various brochures and newsletters were developed and distributed. Individual sections of this report describe the project's purpose, goals and objectives, accomplishments, outcomes, problems, and impact. Appendices provide a detailed sample consultation report and two case studies. (DB)

Identifiers—Idaho

This report describes activities and accomplishments of the Idaho Project for Children and Youth with Deaf-Blindness, a 3-year federally supported project which provided training, technical assistance, and resources to families, educators, and other service providers working with infants, toddlers, children, and youth with deaf-blindness. An emphasis of the program was to increase the active participation of individuals with deaf-blindness in their home, school, and community. The project resulted in a dramatic increase in the number of individuals who were identified as having deaf-blindness. Among the information sources developed for both families and professionals were an annual summer institute and inservice sessions (serving approximately 1,500 people), quarterly newsletters, a film series, informational fact sheets, biweekly computer bulletins on the Idaho Special Net board, on-site training and technical assistance visits, and collaborative activities with various agencies across the state. Individual sections of the report describe the project's goals, objectives, accomplishments, issues, impact, and development of information sources. Appendices include sample transdisciplinary reports on specific children, assessment forms for training programs, a listing of materials in the project's resource lending library, and a flyer in both English and Spanish versions. Identifiers—Oregon

This report describes activities and accomplishments of the Oregon Project for Services to Children and Youth with Deaf-Blindness, a 3-year federally supported project to ensure effective educational services for this population and provide support for families and service providers. The project focused on: (1) identifying additional children with deaf-blindness and providing support, counseling, and training to families of all children who are deaf-blind; (2) providing technical assistance and training for the service providers involved in the education of these children; (3) coordinating the activities of regional consulting teachers who provide consultation and inservice training to families and teachers; (4) coordinating and collaborating with other agencies; and (5) maintaining the state count of children and youth who are deaf-blind. The project served an average of 90 to 110 families and 300 professionals per project year. Individual sections of the report describe the project's purpose, goals, objectives, accomplishments, problems and resolutions, and products developed. Appendices include samples of products developed (project brochures in both English and Spanish versions, and a pamphlet about Usher Syndrome), advisory committee meeting agendas, training agendas, and publicity materials. Identifiers—Michigan

This final report describes the Michigan Inclusive Education Initiative, a 5-year federally supported project designed to provide statewide training and technical assistance to schools, policy analysis and development, leadership development, and related activities to facilitate integration of students with disabilities into regular education classes. During the project, 3,722 students with disabilities, ages 3-26, were moved into regular education full-time with support at 20 implementation sites. All these students had not previously had access to regular education classrooms or curriculum. There was a 70 percent decrease in segregated program placements for students with severe disabilities statewide and a 90 percent decrease in segregated class placement for all students with disabilities, statewide. Approximately 15,000 professionals, paraprofessionals, parents, and students participated in the 175 training activities offered. Other accomplishments included development and dissemination of the "Facilitator's Guide to Inclusive Education," publication of articles on inclusive education, addition of inclusive education curricula in 12 university training programs, district level finance reform to support inclusive education, and establishment of a mechanism for on-going parent support. Individual sections of the report address the management of the Initiative and each of the eight major Initiative objectives. (DB)

Descriptors—*Autism, *Cognitive Processes, *Etymology, Logic, *Neurology, Neuropsychology, *Semantics, Severity (of Disability), Symptoms (Individual Disorders), *Theories

Identifiers—Aspergers Syndrome, Infantile Autism, *Peirce (Charles S), Williams Syndrome

This paper reviews the existing empirical research on autism in the context of the semiotic theories of Charles S. Peirce. His ideas of the generalized logic of relations are seen as explaining the unusual associations (or lack thereof) in autism. Concepts of "indices" or signs singling out distinct objects, and "adinity" or the number of distinct logical objects that must be kept track of, are first explained. These concepts are then applied to three kinds of disorders: (1) severe autism, which is also called Kanner-type autism (recognizable in early infancy); (2) Asperger syndrome, a milder and sometimes undetected variety of autism; and (3) Williams syndrome (not generally associated with autism at all). Analysis shows certain commonalities and also marked differences in each of the three disorder types. Peirce's semiotic theory (concerning linguistic, gestural, and sensory systems) is coupled with a review of relevant medical research and both observational and experimental approaches to the discourse analysis of affected individuals. Whereas Williams syndrome is thought to be due to a metabolic dysfunction which disrupts coordination of sensory-motor information with abstract reasoning, infantile autism and Asperger syndrome are seen as being due to damage to the limbic system affecting the ability to link deictic markers of various sorts with their logical objects in representational sys-

tems. (Contains 51 references.) (Author/DB)

This monograph is intended to help in the creation of effective programs for adolescents with emotional/behavioral disorders (E/BD). Discussion covers techniques for dealing with students placed in special education programs within public school settings and those placed in specialized settings (e.g., day treatment centers). After an introductory chapter, the guide addresses: (1) issues of student placement and least restrictive environment; (2) conditions of learning, curriculum, and consequences that work for adolescents with E/BD; (3) best practices and legal guidelines concerning the use of timeout; (4) best practices for developing level systems to manage students with E/BD, including individualized level systems that meet the mandates of the law; (5) the Garrison Model, a therapeutic program emphasizing a student's responsibility for his/her choices, a whole school approach, direct social skills training, positive involvement in the community, application of logical and natural consequences for inappropriate behavior, violence intervention, and parent involvement. Descriptors—*Agency Cooperation, *Behavior Disorders, *Delivery Systems, Demonstration Programs, Elementary Secondary Education, *Emotional Disturbances, Family Programs, Individualized Programs, *Integrated Services, Intervention, Models, *Program Development, Program Effectiveness, Social Services, Systems Approach, Therapeutic Environment

This monograph offers an introduction to providing an interagency "system of care" for meeting the needs of children and youth with emotional/behavioral disorders (E/BD). This approach focuses on meeting the individual needs of children with E/BD in their home communities and supporting family members as allies in the treatment process. Strategies such as wrap-around services, intensive family intervention, crisis intervention, day treatment programs, therapeutic foster care, respite care, and coordinated planning are often included in a system of care. After an introductory chapter, the guide: (1) provides a rationale for a system of care based on E/BD individuals' complexity of needs, current

poor outcomes, and high costs and failure of current services; (2) traces the development of three models of service delivery: the system-of-care approach, the evolution of that approach into individualized strategies, and application of system-of-care principles to school-based services; (3) explores important components in providing individualized services including interagency collaboration, goals and commitment, case management, flexible funding, family-based planning, and evaluation; and (4) describes key strategies and considerations for developing a system of care in a local district, suggesting that barriers to interagency collaboration can be overcome by a strong child services coordinator and an interagency planning process that focuses on the needs of children and families. (Contains 88 references.) (DB)

This monograph is intended to encourage policy formation and appropriate interventions for young children with emotional/behavioral disorders (E/BD). After an introductory chapter, the second chapter analyzes policy within the areas of both behavioral disorders and early intervention, including existing labels and eligibility criteria, reluctance to deal with the category of "serious emotional disturbance," the movement toward increased inclusion and diversity, the status of the medical model, and curriculum advancements. The third chapter discusses current assessment and intervention strategies and trends, including prevention and early intervention, family-centered practices, specialized personnel, and differentiated interventions. The fourth chapter presents a model technical assistance program which stresses the importance of home-school-community collaborative planning efforts. It also identifies trends in intervention approaches including classroom-based intervention, parent training and family-based programs, technical assistance teams, and the design of proactive interventions. A concluding chapter stresses the importance of expanding and developing research and model programs which are effective in identifying young children with E/BD and preventing and/or ameliorating further behavioral disabilities. This monograph provides a structured planning process and information on best educational practices for serving students with emotional/behavior disorders (E/BD) placed in general education classrooms. After an introductory chapter, the guide: (1) addresses the controversy concerning inclusion for students with emotional/behavioral disorders; (2) considers the challenges involved in inclusion of these students and attempts to reframe the challenges as indicators of some of the problems present in the current educational system; (3) introduces a planning process for preparing schools and students for inclusion; (4) explains the four phases of the planning process (gain school and community support and commitment for inclusion, develop school-wide organizational structures that support inclusion, design and deliver classroom-based instruction to support inclusion, and evaluate program effectiveness); (5) offers two case studies to illustrate application of the planning process; and (6) notes both the difficulties in providing services to students with E/BD and the growing knowledge about how to plan and implement effective programs for students with E/BD in inclusive schools. (Contains 128 references.) (DB)

Identifiers—*Behavior Management

This monograph provides a variety of positively focused techniques for effectively managing behaviors of students with emotional/behavioral disorders in the classroom. Each section focuses on a specific behavior management technique and includes a brief description of the technique, an explanation of why the particular technique works, conditions or circumstances influencing the effectiveness of the technique, and guidelines for implementing the technique. The techniques covered include: (1) social reinforcement; (2) token reinforcement; (3) modeling; and (4) behavioral contracting. A concluding chapter points out that teachers who use positive behavior management strategies create a classroom environment that is conducive to academic learning and social acceptance of students and that involves both the managing of student problem behaviors and the teaching of desired alternative behaviors. (Contains 58 references.) (DB)

Descriptors—*Aggression, *Behavior Disorders, Elementary Secondary Education, Emotional Development, Etiology, Incidence, *Intervention, *Prevention, Psychopathology, Risk, *Student Behavior, Student Characteristics, *Violence

This monograph explores the nature and development of aggression and violence in children and youth, especially as manifested within the school setting. It examines the extent of the problem, typical reactions to aggression and violence within the school, and the impact of these reactions on the behavior of students with emotional/behavior disorders. The development of such behavior in children is attributed to such conditions as observation of aggression, victimization, few positive affective social bonds, and reinforcement of the child's own aggressive behavior. Factors possibly explaining the disappointing results of previous prevention and treatment efforts are also discussed. Four types of violent behavior are identified: (1) situational violence (may be exhibited by approximately 40 percent of the population); (2) relationship violence (25 percent of the population); (3) predatory violence (8 percent); and (4) psychopathological violence (0.5 percent). Guidelines for the prevention and treatment of each of these types of violence is offered, suggesting that interventions that are effective with one type of violence may not be effective with other types. Schools are urged to adopt approaches to deal with the various risk factors related to the different types of violence. (Contains 115 references.) (DB)

Identifiers—Early Identification, *New Jersey

This final report describes activities and accomplishments of the New Jersey Technical Assistance Project, a project to improve educational resources and support services for students with multiple sensory impairment (deaf-blindness). Activities and accomplishments are presented in a tabular format for each project goal and objective. The project addressed seven major goals: (1) improved early identification of infants, children, and youth with multiple sensory impairment; (2) improved provision of an appropriate intervention system for all infants (0-2 years) and their families identified with or at risk for multiple sensory impairment; (3) expansion of opportunities for these children to be educated within their home schools and community environments and/or least segregated/restrictive environment; (4) coordination of educational programs, associated community services, and adult service systems toward providing a smooth transition from school to adulthood for youth with deaf-blindness; (5) provision of services to families to make them more active participants in the education and habilitation of their child; (6) improvement of the existing statewide service systems to better address the needs of this population; and (7) effective and efficient project management. A sample project brochure is attached. (DB)

Identifiers—*Teacher Collaboration

This workbook provides practical information for developing and implementing inclusive school programs through understanding the educator role, using effective problem-solving strategies, and developing a support network to meet the challenges of inclusion. Ten chapters cover the following topics: (1) effective inclusion (an analysis of the trend toward inclusion of students with disabilities); (2) roles in inclusive schools (the classroom teacher, the teacher assistant, the student support services staff, the school-based team, and administrators); (3) dealing with resistance, at both the organizational and individual level; (4) motivation, self-esteem, and behavior; (5) steps in redesigning curriculum to meet diverse needs; (6) developing systems of support (centralized and decentralized support, assessment, collaborative planning, and individualized educational plans); (7) collaborative consultation (reasons for collaboration, the process, key principles, and skills); (8) the emerging role of school-based teams; (9) leadership (directive versus facilitative leadership, the collaborative ethic, and the leader's role); and (10) developing an inclusive culture (strategic planning, strategies for change, and developing an action plan). This first serial issue addresses topics and issues impacting educational services for culturally and linguistically diverse (CLD) learners. The issue contains three research-into-practice articles, an interview section called "In the Oral Tradition," and three teacher-generated articles which delineate learner-enhancing practices for special educators. Articles include: "Learning and Cultural Diversities in General and Special Education Classes: Frameworks for Success" (Deborah L. Voltz); "Issues in the Implementation of Innovative Instructional Strategies" (Robert Rueda and others); "Controllable Factors in Recruitment of Minority and Non-minority Individuals for Doctoral Study in Special Education" (Rosalee S. Boone and Kathy L. Ruhl); "Issues Regarding the Education of African American Exceptional Learners" (Helen Besant Byrd); "Using Bilingual Literature with Students Who Have Severe Disabilities" (Candace Clark and Katie St. John); "Through Navajo Eyes: Curriculum Guidelines from a Teacher's Perspective" (Lucretia Holiday and others); and "Using Instructional Games for Cultural Exploration: Exploring African Cultures" (Marcella Bell). Individual articles contain references. (DB)

This manual presents the trainee's workbook and the trainer's guidelines for the first of six modules in a teacher inservice series developed to promote the unified effort of both regular and special education personnel in understanding and applying nationally recognized practices to implement fully inclusive education for students with diverse learning abilities and disabilities. Module 1 is on collaborative teaming and skills for communication in small planning groups. The trainee workbook is in the form of: (1) 38 transparency masters which address building collaborative teams, leadership and trust building, communication skills, a seven-step program for problem solving and decision making, and a seven-step approach to conflict resolution; and (2) nine activity sheets which apply the problem solving and conflict resolution techniques. Appendices to the trainee workbook provide the basic information in more compact form and offer a detailed case study. The trainer guidelines offer learner objectives and suggested comments keyed to each of the transparencies. A pre/post test is also provided. (Contains 22 references.) (DB)

This manual presents the trainee's workbook and the trainer's guidelines for the fifth of six modules in a teacher inservice series developed to promote the unified effort of both regular and special education personnel in understanding and applying nationally recognized practices to implement fully inclusive education for students with diverse learning abilities and disabilities. Module 5 is on skills for involving nondisabled peers in the inclusive education setting. The trainee workbook is in the form of 24 transparency masters and 3 activities which provide information and practice on peer involvement objectives, informal assessment procedures, direct observation, event and duration recording, peer tu-

toring arrangements and guidelines, a peer tutor training model, designing cooperative learning groups, and lesson plans for cooperative learning groups. Appendices offer questionnaires and a sample peer tutor script. The manual for trainers offers specific objectives and suggested comments keyed to each of the transparencies, addressing the topics of planning for peer involvement, peer tutors, and cooperative learning. A pre/posttest is also included. (DB)

This set of four short videocassettes promotes the use of promising practices advocating fully inclusive education for students with diverse learning abilities in their neighborhood schools. The first video, titled "Seven Steps to Problem Solving," presents a problem-solving process that empowers teams to work together to meet diverse students' needs. The process involves defining the problem, rewriting the

problem as a question, exploring alternatives through brainstorming, determining a strategy through analysis of critical conditions of appropriate strategies, clarifying the strategy, implementing the strategy, and evaluating outcomes. The second video, "Team Environmental Assessment Mapping System," offers an overview of a system to determine the interdependent learning needs of each student by viewing the student in relation to his or her surroundings. Use of the system results in a one-page snapshot of the student's environmental interactions, which is used as a visual reference to analyze instructional needs. The third video, titled "Inclusion Dreams," is a motivational introduction to the concept of inclusion. It features a 1950's-style musical performance of song and dance by faculty and staff of Quail Run Elementary School in Lawrence, Kansas. The final video, titled "Video Vignettes," offers interviews with administrators and educators at Quail Run. The educators describe their experiences and feelings about changes in their roles, changes in their students, and collaborative efforts to become a fully inclusive school. (JDD)

Identifiers—Physical Awkwardness

This document is composed of 10 manuals which provide both general and specific guidelines to facilitate the inclusion of Canadian students with disabilities in physical education programs. An introductory manual identifies general concepts, strategies, and practical approaches that can be used in an inclusive physical education program. It discusses the benefits of inclusive physical education, the importance of using appropriate terminology, the value of a team approach, safety considerations, assessment, the Individual Education Plan, and principles of program modification and evaluation. Some assessment measures are appended. Eight other manuals each focus on a specific disability and have sections on the following topics: the values of an inclusive physical education program, planning an inclusive program, program modifications, technical aids, instructional strategies, a glossary, checklists, and suggested resources. The manuals address the following types of students: (1) students who use a wheelchair; (2) students who are deaf or hard of hearing; (3) students with an intellectual disability; (4) students with cerebral palsy; (5) students with multiple disabilities; (6) students with amputations; (7) students with a visual impairment; and (8) students who are physically awkward. A supplementary manual offers suggestions for maximizing opportunities for students with disabilities in the sport of skiing. (DB)

Descriptors—*Accessibility (for Disabled), Adults, College Graduates, Disclosure, *Education Work Relationship, *Employee Attitudes, *Employer Attitudes, Employment Practices, Equal Opportunities (Jobs), Graduate Surveys, Interviews, Job Applicants, *Visual Impairments, *Vocational Adjustment

This report describes the experiences of successfully employed workers with visual impairments as they made the transition from college to work. It is based on interviews with 45 employees and 27 of their employers. The first chapter provides a literature review covering the importance of college, employer concerns, concerns of job applicants, the employment interview, and disclosing the visual impairment. The methodology of the study is then described. Direct quotations from the interviews are interspersed throughout the report. Employee interviews revealed that employees took an average of 7 months to obtain their job. Employees identified problems in the areas of transportation, money, accessing written materials, discrimination because of the visual impairment, accessing computers, managing time, and being lonely. Interviews with employers revealed that employers wanted to be informed about the visual impairment before or during the interview by the employee; the most frequent accommodations provided were travel instruction, computer access devices, alternative print media, flex-time scheduling, and removal of architectural barriers; and most employers were aware of the legal protections available to applicants and employees with disabilities. A checklist for employment was developed from the literature review and interviews. Appendices include letters and questionnaires used in the study. (Contains 31 references.) (DB)

Descriptors—Adults, Age Differences, *Blindness, Case Studies, Data Analysis, Educational Background, Employees, Employment Level, *Employment Patterns, Job Performance, *Labor Turnover, Partial Vision, *Performance Factors, Profiles, Referral, Severity (of Disability), Success, *Visual Impairments, *Vocational Adjustment, Vocational Rehabilitation

This study compared characteristics of adults with visual impairments who were either successful or unsuccessful in retaining jobs in competitive employment settings. Data were obtained from a database of vocational rehabilitation (VR) client cases collected from 1978 to 1986. The final sample included three groups: (1) a noncompetitive group of clients (N = 506) unable to retain competitive occupations upon case closure; (2) a competitive group which closed in competitive employment but with a different job title (N = 197); and (3) a perfect retention group who retained the same occupation and job title upon case closure (N = 84). One hundred thirty-six variables were obtained from case file reviews and grouped into three categories: demographic variables, variables associated with the client's visual status, and variables associated with case expenditures. Results are reported in detail for

such variables as: gender, race, age at referral, marital status, number of dependents, educational level, age at onset of blindness, public assistance dependency, and amount of rehabilitation training. Profiles were then developed of typical individuals in each of these three categories. The greatest distinctions between groups were found in the areas of: age at time of referral; level of education prior to entry into VR; education and training during VR; and level of visual impairment at the time of referral. An appendix lists all the variables. (Contains 22 references.) (DB)

Identifiers—Goals 2000, *Performance Indicators

This pamphlet describes the bases of the educational outcomes and indicators for students (including students with disabilities) developed by the National Center on Educational Outcomes. The importance of developing an outcomes and indicators model with a rationale, wording, and appearance that support a philosophy in which educational outcomes are equally relevant to all students is stressed. Application of the principles of access and equity in development of the outcomes and indicators is explained in the context of standards based on the Goals 2000: Educate America Act. The resulting model is illustrated and briefly described, noting the following eight domains: (1) presence and participation; (2) accommodation and adaptation or family involvement/accommodation and adaptation; (3) physical health; (4) responsibility and independence; (5) contribution and citizenship; (6) academic and functional literacy; (7) personal and social adjustment; and (8) satisfaction. Information on more detailed reports developed by the Center is also given. (DB)

Identifiers—*South Dakota

This final report describes activities and accomplishments of the South Dakota Statewide Systems Change Project, a 5-year federally supported project to establish a system of educational services to support children with severe disabilities within general education settings. The project provided extensive training, information, and technical assistance to educators, families, students, and administrators. Over the last 2 years of the project, 8,257 individuals received training, consultation, or technical assistance. Typical topics covered in the training included creative problem solving, effective team meetings, modifications and adaptations, team building, time management, and involving families. The project's fifth year was focused on encouraging previously trained teams to become more self-directed. Other project activities addressed the need

for changes in laws, regulations, and policy; development of local interagency networks; and dissemination of information materials developed by the project. Three products are attached: (1) "The Systems Change Primer: A Closer Look at Inclusion," a guide for educators and school systems developing full inclusion programs; (2) "Welcoming Parents as Partners," a guide to help educators encourage parent participation on the team serving the child; and (3) "Welcoming All Children: A Closer Look at Inclusive Child Care," a guide for child care service providers. Identifiers—Illinois, Indiana, Kansas

This final report describes activities and accomplishments of the FACTS/LRE (Family and Child Transitions into Least Restrictive Environments) project, a 2-year project to promote best practices in the transition process of 3-year-olds with disabilities from early intervention to preschool programs. The project delivered technical assistance to agencies in three states (Illinois, Kansas, and Indiana) and 50 local communities. Technical assistance focused on five components of the transition process: (1) interagency agreements; (2) family involvement; (3) time lines; (4) least restrictive environments; and (5) evaluation. The project resulted in training 39 teams and developing 28 interagency agreements on transition, of which 10 have been signed. Other project accomplishments included development and dissemination of five manuals for family members and practitioners and presentations at conferences. Individual sections of the report describe the project's goals and objectives, conceptual framework, outreach and dissemination activities, logistical problems and their resolution, evaluation findings, impact, and future activities. Appendices provide additional documentation of technical assistance to outreach sites, outcomes of technical assistance in

writing interagency agreements, and dissemination and public awareness activities. (DB)

This manual is intended to assist families of young children with disabilities in their child's transition from early intervention services to preschool or other educational services at age 3. It provides information about the transition process, federal and state laws that apply to transition, and options for services and program placements. The manual suggests strategies to help families prepare for transition and participate in the transition process. Two case studies introduce the manual and contrast positive and negative transition processes. Individual sections of the manual cover the following topics: (1) learning about transition; (2) family involvement in transition planning; (3) preparing for transition; (4) participating as a member of the transition team; (5) parent rights and laws concerning transition; (6) gathering information and making decisions; and (7) sharing information in the new program. Worksheets and checklists provided throughout the manual and in an appendix are designed to facilitate the manual's usefulness to parents. (DB)

Descriptors—*Agency Cooperation, *Cooperative Planning, Cooperative Programs, Disabilities, *Early Intervention, *Educational Planning, Interdisciplinary Approach, Preschool Children, *Preschool Education, School Community Relationship, Teamwork, *Transitional Programs, Young Children

This manual provides detailed, step-by-step information on developing and writing an interagency agreement to facilitate the transition of young (age 3) children with disabilities from early intervention programs into preschool educational services under Part B of the Individuals with Disabilities Education Act. Worksheets are provided throughout the manual to assist in the process of writing the agreement. An introductory section considers preliminary aspects such as forming a team to write the agreement and the overall process of writing an agreement. The next section considers seven aspects of the agreement: (1) the purpose statement; (2) transmitting information; (3) discussing transition issues with families; (4) determining eligibility; (5) and (7) monitoring the agreement. The two remaining sections offer guidelines for developing a collection of best practices and getting the interagency agreement signed. Appendices include a glossary of terms and the worksheets used in writing the agreement as well as a sample transition timeline and sample interagency agreements. (DB)

Document Not Available from EDRS.

Descriptors—Assertiveness, Body Image, *Child Abuse, *Curriculum, *Disabilities, Disclosure, Elementary Education, Emotional Development, *Prevention, *Safety Education, Self Care Skills, Self Esteem, *Sexual Abuse, Teaching Methods

This guide provides general background information and practical curriculum ideas for teaching children with disabilities personal safety skills in the area of child sexual abuse. Part 1 covers education for child protection (its history, the need addressed, and effective programs); reasons why children with disabilities especially need personal safety skills (such as their greater risk of sexual abuse); parent participation in personal safety programs (including strategies for maximizing parent participation and answers to common parental questions); curriculum development (including adaptations for children with specific disabilities and underlying principles of any personal safety curriculum); and responding to actual or suspected sexual abuse of children (including managing a child's disclosure of abuse and providing therapy for the victims). Part 2 presents suggested activities, work sheets, and teaching methods for the seven curriculum modules which address development of: (1) self-esteem; (2) assertiveness skills; (3) coping with potential hazards; (4) body image and body awareness; (5) understanding that some body parts are private; (6) awareness of feelings; and (7) talking about these things. Two appendices present suggestions for integrating personal safety into the curriculum and additional reasons for the protection of children with disabilities. (Contains 115 references.) (DB)

Problems of Identity Development of Deaf Children.

Pub Date—Jul 95

Note—10p.; Paper presented at the International Congress on Education of the Deaf (18th, Tel Aviv, Israel, July 16-20, 1995).

Pub Type—Opinion Papers (120)—Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Child Development, *Deafness, Educational Methods, Elementary Secondary Education, *Interpersonal Communication, *Self Concept, *Sign Language, Theories, Total Communication

This paper considers theory and research on identity development in deaf children and concludes that the exclusively oral method of instruction is not conducive to healthy identity development. The importance of interpersonal communication in identity development from the viewpoints of both sociological and psychoanalytical theories of identity is considered in discussion of the theories of G. H. Mead, L. Krappmann, and E. H. Erikson. The implication is drawn that most deaf people will not be able to achieve successful identity development during their adolescence if they have to depend on spoken language communication in essential areas of their lives. Educators are urged to provide sign language communication for deaf children at early ages. (Contains 11 references.) (DB)

EC 304 578

Education, *Inclusive Schools, Interpersonal Relationship, Mainstreaming, Outcomes of Education, *Peer Relationship, Qualitative Research, Research Needs, Social Development, Social Integration, Values Education

This paper summarizes findings of a 3-year study assessing outcomes for 35 children (preschool to high school aged) with mild to severe disabilities in inclusive educational settings. Additionally, the study looked at "connected" pairs of children—each pair including a child with and a child without a disability. It identified three main areas of friendship outcomes for children with and without disabilities: warm and caring companions; growth in social cognition and self-concept; and development of personal principles. Teachers who wish to facilitate friendships in inclusive settings are encouraged to: (1) recognize and value the importance of social context for all learners; (2) structure learning opportunities that not only teach values, but allow children to experience such values everyday; and (3) provide classroom and instructional structures that foster peer relationships in caring community schools. Researchers are urged to investigate such questions as how schooling experiences affect children's ideas about who they are and how they fit into the community. (DB)

Identifiers—*South Dakota

This report describes activities and accomplishments of the 3-year project, "Expanding the Circle of Services for Children and Youth Who Are Deaf Blind," a South Dakota project to improve services to this population through improved interagency cooperation and technical assistance. A highlight of the third year was the formation of the Great Plains Regional Alliance which addresses the needs of children who are deaf blind and their families who reside on American Indian reservation lands. The project resulted in improved identification of children who are deaf blind, provision of training and technical assistance on inclusion strategies for almost 4,000 individuals, and provision of training concerning deaf blind children for 573 individuals. Development of several publications and a video in collaboration with other agencies and programs is also noted. Specific activities and their status at the project's completion are listed for several objectives within the project's two major goals, which focused on: (1) early identification and intervention; and (2) service provision in integrated educational settings and successful transition to adult settings. EC 304 581

Four papers originating from the Kasher project, a project in Israel involving the construction, implementation, and scientific evaluation of an original Hebrew language intervention program for preschool (ages 0 to 6) children with hearing impairments, are presented. The four papers included are: (1) "Language Intervention in Prelinguistic and One-Word Stage Hearing-Impaired Children" by Dalia Ringwald-Frimerman and Esther Dromi which presents the theoretical framework and main goals for assessment and intervention in the Kasher program; (2) "The Implementation of 'Kasher' in the Micha Centers in Israel" by Sara Zadunaisky and Hagit Bar-Lev which discusses key issues in the implementation of Kasher, notes inservice training, and describes Kasher materials; (3) "Parents' Expectations from Intervention with Preschool Hearing Impaired Children" by Esther Dromi and Sara Ingber which reports on a study of 50 parents of children participating in Kasher; and (4) "Utilizing a Parent Questionnaire for the Assessment of Prelinguistic Communication in Hearing Impaired Children" by Esther Dromi and others which reports on a study testing such a questionnaire with Kasher parents. Figures and tables are appended. (Individual papers contain references.) (DB)

This report describes the development of integrated community services for people with severe disabilities by Job Path, a New York City agency which currently provides services to approximately 250 people. A current emphasis of the agency is increased consideration of the individual's life outside of the work setting. Critical factors in the agency's success are explained, including: (1) establishing a clear direction; (2) defining staff responsibility; (3) developing shared leadership; (4) adopting flexible approaches; and (5) collaborating with policy makers, other service providers, and families. Three case studies illustrate the agency's attention to individual needs in the areas of independent living, personal interests, and recreational activities. (DB)

This guide (with audiotape) offers information on helping students with disabilities become involved in developing their own Individualized Education Programs (IEP). The guide is organized into lesson plans which can be adapted to individual situations. Individual lessons focus on the following topics: (1) introductory work with students (such as talking

about disabilities, relevant laws, and transition; (2) introducing the IEP (helping students look at and understand their own IEPs); (3) writing the IEP (focusing on students' present levels of functioning and goals); (4) getting ready for the IEP meeting; (5) participating in the IEP meeting; and (6) following up after the meeting. Appendices provide additional information on relevant laws, answers to a disability pre-test, and an outline of a presentation on the laws. A glossary and a list of 18 resources are also provided. The accompanying audiocassette presents teachers and parents discussing how they have helped students become active participants in the IEP process. (DB)

Descriptors—"Disabilities," "Individualized Education Programs, Meetings, Personal Autonomy, Secondary Education, Student Educational Objectives," "Student Participation"

This guide and accompanying audiocassette are intended to be used as part of a series of lessons to involve students in participating in the development of their own Individualized Education Programs (IEPs). The guide begins with answers to nine basic questions which address the IEP's purpose, the IEP meeting, and reasons for student participation. Next, suggestions for preparing for the IEP meeting are offered. These include reading their existing IEP, following an 11-step procedure to help identify individual strengths, needs, goals, and objectives; inviting the appropriate people; and practicing what to say. Suggestions are also offered for actual participation in the meeting and for following up after the meeting. A list of note-taking, test-taking, and additional accommodations during the IEP meeting is provided. The audiocassette presents students with disabilities, including learning disability, emotional disturbance, and traumatic brain injury, explaining their role in IEP development and how it enhanced their self-esteem and improved their relationships with teachers. This monograph presents papers and dialogue group highlights from a symposium on the growing challenge of school aggression and violence, strategies to combat this aggression and violence, and ways to make schools safe again. An introductory paper by Cynthia L. Warger is titled "Responding to School Violence within an Educational Framework." Presentations by keynote speakers include: (1) "Aggression and Violence in the Schools: What Do We Know About It?" (Eleanor Guetzloe); (2) "School-Based Programs for the Prevention and Treatment of Aggression and Violence: Why Aren't They More Effective?" (Richard Van Acker); and (3) "Programs That Work in Reducing Aggression and Violence: Emerging Best Practices in Homes, Schools, and Communities" (Mary Lynn Cantrell and Robert P. Cantrell). Papers summarizing dialogue groups include: "School Aggression and Violence: Reactions from Practitioners in the Field" (Maureen A. Conroy and Dana Harader); "An Education Imperiled: The Challenge of Aggressive and Violent Behavior in the Schools" (Robert A. Gable and Nancy L. Arlien); "Voices on Violence: Concern and First Consensus" (Michael M. Gerber and Ann Fitzsimons); "Strategies To Reduce School Aggression and Violence" (Thomas R. Kelchner); "Teacher-Mediated Interventions for Reducing Classroom Aggression" (Robert B. Rutherford, Jr.); and "Creating Community: A Promising Concept for Preventing and Eliminating Aggressive and Violent Behaviors" (Jo M. Hendrickson and others). (Individual papers contain references.) Descriptors—"Compliance (Legal), Data Collection," "Disabilities," "Educational Assessment," "Educational Legislation, Educational Objectives, Federal Legislation, Federal Regulation, Legal Responsibility, Program Evaluation, Special Education," "Standards, Trend Analysis"

Identifiers—Department of Education, "Individuals with Disabilities Education Act Part B," "Performance Indicators"

This report presents recommendations for performance indicators for Part B of the Individuals with Disabilities Education Act (IDEA), with emphasis on indicators reflecting the needs of the Education Department. Themes of the indicators include more attention given to "context variables" such as low birth-weight infants and drug abuse among women; high priority given to performance indicators highlighting results of state compliance monitoring; and development of arrays to display data on key indicators for periods of 5 to 10 years. After an introductory section, individual sections of the report provide information on the background of IDEA development, implementation, and monitoring by the Office of Special Education Programs; issues affecting special education program performance indicators, especially legislative goals and requirements; processes of developing indicators for special education programs under IDEA, Part B; suggested performance indicators for special education programs (organized into context variables, input indicators, process indicators, and outcome indicators); and uses of performance indicators. An appendix lists all the recommended indicators and includes a brief discussion of each one and suggested data sources. A second appendix does the same for context variables. A third appendix lists literature reviews, data sources, individuals interviewed, and participants in a stakeholders' meeting. (Contains an annotated bibliography of 26 items and a listing of 16 data sources.) (DB)

Identifiers—Idaho

This guide is an introduction to head injury and to educational resources in the field. An introductory section describes traumatic brain injury (TBI) as a federally recognized disability category and provides its federal and Idaho definitions. The following section introduces the unique characteristics of students with brain injuries. A section on "re-entry" discusses the student's transition from a rehabilitation setting to the home school and the comprehensive planning efforts needed to coordinate this process. A section on interventions describes specific strategies for addressing cognitive and behavioral needs of students with TBI and gives suggestions for creating a physical, social, and psychological environment conducive to optimal learning for these students. The final sections consider ideas to promote awareness and understanding of TBI among students and staff members and describe Internet resources. Appended are reprints that include the following articles or measures: "Planning for Traumatic Brain Injury (TBI): A New Challenge for Special Education" (Ellie Kazuk and Denise Stewart); "General Information about Traumatic Brain Injury" (also in Spanish); "Traumatic Brain Injury: What the Teacher Needs to Know" (B. Pieper, Ed.); "Physical Facilities and Planning Checklist for Schools"; "Checklist for School Reentry"; "Welcome to a New World: A Presentation by the Traumatic Brain Injury Re-Entry Team, Tacoma Public Schools"; "Neuropsychological Assessment Test Battery"; "Traumatic Brain Injury Checklist"; "Related Services for School-Aged Children with Disabilities"; "Health Care Plan"; "Modifying the Elementary Classroom"; "Modifying the Secondary Classroom"; "Serving the Student with TBI"; "Observable Behaviors and Strategies"; "Compensatory Strategies"; and "Developing an Educational Program." This report presents the 1994 update for a 5-year plan developed in 1992 which emphasizes changes resulting from restructuring Colorado state government and its departments. The first section presents the mission statement of the Division for Developmental Disabilities, a statement of the Division's operating principles, and a statement of desired outcomes. The next section describes the basic service and supports offered by the Division and current and future directions for the following areas: (1) family support; (2) early intervention services and supports; (3) case management/service and support coordination; (4) residential services and supports; (5) day program services and supports; and (6) system infrastructure and administrative services. Critical issues facing the Colorado developmental disabilities system are identified and discussed. These include: continued implementation and expansion of supports to families; community waiting lists; restructuring of health and human services; life transitions and continuity of services and supports; and downsizing of regional residential centers. Five year objectives for goals in the following areas are then presented: supporting families and children; home, work, and social life; community infrastructure; transitions; and system evolution and improvement. Appendices provide additional information on the Division for Developmental Disabilities planning process, the Colorado Developmental Disabilities System, and major services and supports most frequently utilized and funded by the Division. Identifiers—*Colorado

This report describes achievements of Colorado's Division for Developmental Disabilities' Community Integrated Employment (CIE) Program for the 1990-91 period. The report begins with a definition of "community integrated employment." Text and graphical data on characteristics of persons in community integrated employment, including age distribution, gender distribution, ethnicity distribution, functioning level, and funding sources are presented. Employment outcomes are then reported, including numbers of individuals receiving job services, average hourly wages, relationship between wage level and functioning level and between wage level and service strategy, hours worked, integration areas, and integration by service strategy. The final section looks at satisfaction and decision-making power in CIE services, analyzes activity levels by day service setting and functioning level, and compares decision-making for persons in community integrated employment programs and segregated day programs. Identifiers—*Colorado

This report presents outcome information concerning programs of the Colorado Division for Developmental Disabilities. Preliminary information outlines the legislative goals and the program evaluation process, which involves a longitudinal evaluation of service outcomes for a sample of adults receiving services, using the COPAR (Colorado Progress Assessment Review) instrument. In the summer of 1992, a stratified random sample of 781 adults receiving services were surveyed; due to sample attrition, 743 adults were surveyed in 1993. Findings are reported in detail for each question on the COPAR instrument and usually include overall results, comparison by service approach, comparison with the general population, and demographic data, as well as specifics. Findings concerning employment, day program, school, and other services are organized by the following categories: (1) satisfaction with services (in residential and supported living settings and in both integrated and segregated day services); (2) decision-making opportunities; (3) community inclusion; (4) community integrated employment (growth in the program, comparison of wages to minimum wage, and growth in average weekly hours of employment; growth in total earnings; and changes in community integration); (5) talents and personal goals; (6) relationships and a sense of belonging; (7) personal security; and (8) self respect. Also included are data on Colorado citizens' agreement with the Division's service values and their interactions with people having developmental disabilities. (Contains 31 references.) (DB)

Descriptors—*Academically Gifted, *Delivery Systems, Educational Change, Educational Needs, *Educational Practices, Educational Quality, Elementary Secondary Education, Follow-up Studies, Independent Study, Itinerant Teachers, Mentors, Resource Room Programs, Science Education, *Special Classes, Special Programs, State Surveys

Identifiers—*Iowa, *Richardson Study

This study was a follow-up to a 1993 study which surveyed Iowa school districts to compare types of programs for gifted students in Iowa with the 16 types found in a 1985 national survey (the Richardson study). The present study examined the five program types which the 1993 study identified as having a large number of characteristics significantly different from expectation, given the proportion of results. Significant characteristics of the following five program types are identified: (1) part-time special program; (2) independent study gifted program; (3) itinerant teacher gifted program; (4) mentorship gifted program; and (5) full-time special class gifted program. Characteristics that the programs shared are identified and recommendations offered. The paper concludes that: these five program types as used by Iowa schools fall short of principles of excellence; the part-time special class (pull-out program) should be replaced with the full-time special class; a version of the full-time special class should be provided for intellectually above-average students; and modular programs and supplementary materials should be used in teaching science to K-8 gifted students. The survey questionnaire is appended. (DB)

Bernal, Ernesto M.

Finding and Cultivating Minority Gifted/Talented Students.

Pub Date—Apr 94

Note—9p.; Paper presented at the National Conference on Alternative Teacher Certification (Washington, DC, April 1994).

Pub Type—Opinion Papers (120) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Ability Identification, Cultural Differences, *Curriculum Development, *Educational Practices, Educational Principles, Elementary Secondary Education, Ethnic Groups, *Gifted, Minority Groups, Program Development, Selection, Student Characteristics, *Student Development, *Talent, Talent Development, Talent Identification, Teacher Characteristics

This paper focuses on selection of students and curricular programming in gifted education. A current emphasis on selection rather than identification of able learners, including culturally diverse able learners, is noted, as are new understandings of the nature of giftedness, including: giftedness is more than high intelligence; giftedness is largely developmental; there is no one psychological test that measures giftedness; giftedness needs special attention to be developed; and one does not need to speak English to be intelligent. Selection is best done when observation, authentic assessments, and actual tryouts in programs are used as well as traditional standardized tests. Principles of good gifted education programs are listed, including: (1) use of a variety of acceleration options; (2) use of a variety of enrichment options; (3) homogeneous grouping; (4) regular opportunities for creative expression; and (5) teaching that is cross-disciplinary, integrated, and reality-based. Characteristics of a good teacher of the gifted/talented are also briefly considered. (DB)

Stange, Terrence V. Carier, Ellen J. Gifted Middle Grade Readers: Attitudes and Interests in the 90's.

Pub Date—May 95

Note—20p.; Paper presented at the Annual Convention of the International Reading Association (40th, Anaheim, CA, May 2, 1995).

Pub Type—Reports - Research (143) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Adolescent Development, Age Differences, *Gifted, Intermediate Grades, Junior High Schools, *Literary Genres, Middle Schools, *Reading Attitudes, *Reading Interests, *Sex Differences, Student Attitudes, Student Interests

Identifiers—*Middle School Students

This qualitative study examined the attitudes and interests of 284 gifted readers in grades 6, 7, and 8. Students were from a high socioeconomic status, suburban school district in the midwestern United States and were either identified as gifted or had a history of involvement in a program for the gifted. Data collection instruments included a three-part Likert rating of interest for 34 reading genre and the Mikulecky Behavioral Reading Attitude Measure (MBRAM). The following conclusions were drawn: readers displayed a high interest in mystery, humor, fiction, and magazines. They showed a low interest for reference, health, westerns, religion, geography, math, computer science, and how-to books. When the five stages of attitude internalization were evaluated from the MBRAM, it was found that females dominated the representation across grade levels and stages of attitude internalization with only slight differences evident in grade 7 for attending stage. Females also dominated at the higher levels of attitude internalization such as valuing, organization, and characterization. Declining interest in reading and in number of genres with age was also found. Results suggest a need for curriculum to incorporate genres of high interest while working to expand the number of genres of interest to middle school students. (Contains 11 references.) (DB)

Identifiers—*Louisiana
This final report describes activities and accomplishments of the Services for Children with Deaf-Blindness project, a 1-year federally supported project in Louisiana to improve identification and curriculum for these children by providing technical assistance and training to parents, school systems, and agency personnel. Project activities focused on five areas: (1) student identification and project management; (2) family training; (3) technical assistance; (4) transition planning services; and (5) systems change. Major accomplishments included: provision of more direct services via telephone or visitation, development of needs assessment information from a variety of sources, relocating the Technical Assistance Center to the Louisiana State University Medical Center Human Development Center, and continued training focusing on Usher's Syndrome. Individual sections of the report describe the project's goals and objectives, accomplishments, findings, problems solved, recommendations, and products developed. (Contains 11 references.) (DB)

Identifiers—*Massachusetts

This manual was developed as part of the New England Center Pilot Project (NECPP), a 3-year federally funded program focusing on the inclusion of young children with deaf-blindness within regular educational programs in Massachusetts. The NECPP provides consultation during transition to inclusive programs and offers technical assistance, staff training, and recommendations for promoting the child's participation within regular classroom curricula and play activities. This manual focuses on the four major procedural steps performed by Project personnel: (1) introduction-in which Project personnel provide information to the child's educational team, interagency agreements are established, and roles and responsibilities are clarified; (2) assessment-involving collaborative assessment of family needs, staff training requirements, and environmental factors; (3) technical assistance-provision of inservice training and on-going consultation services and family training in order to promote inclusion of the child; and (4) follow-up-development of a child profile that documents effective teaching strategies, materials, and activities in facilitating inclusion of the child into the classroom milieu. Most of the manual consists of appendices, which include: an outline of an interagency agreement; a list of program quality indicators; a form for developing a family wish list; a classroom personnel information form; a communication profile; a classroom environmental assessment form; sample curriculum grids; observation feedback procedures and forms; and a list of strategies for promoting social interaction. Identifiers—Connecticut, Maine, Massachusetts, *New England, New Hampshire

This final report describes activities and accomplishments of a 2-year federal project to provide support services for deaf-blind children and youth in Connecticut, Maine, Massachusetts, and New Hampshire. Objectives and their accomplishments are divided into two major sections: activities of the New England Center (NEC) for Deaf-Blind Services and activities of the NEC Pilot Project. For the NEC center, objectives and accomplishments of the Center which apply to all four states are presented first followed by a listing of activities and accomplishments for each state. Objectives include identification of young children with deaf-blindness, technical assistance, implementation of exemplary practices, personnel development, inclusion of underrepresented populations, and project administration and evaluation. Extensive appendices document consultation activities, workshops, advisory/planning meetings, agencies serving deaf-blind children, programs, advisory committee, brochures, newsletters, and forms. For the NEC Pilot Project, which focused on facilitating the educational inclusion of young children with deaf-blindness in Massachusetts, accomplishments are reported by objective, including development of assessment instruments, establishing parents as central figures in development of individual educational plans (IEP), assisting local education providers in assessment, and encouraging team involvement in IEP planning and assessment. Appendices provide additional information on consultation services, classroom environment assessment, forms, meetings, workshops, Advisory Committee activities, case studies, and an article by T. Evans Luiselli and others titled "Inclusive Education of Young Children with Deaf-Blindness: A Technical Assistance Model." (DB)

Descriptors—*Consultation Programs, Curriculum Development, *Deaf Blind, Disability Identification, Early Intervention, Educational Practices, Elementary Secondary Education, *Inservice Education, *Parent Education, Parent Rights, *State Programs, *Technical Assistance, Transitional Programs

Identifiers—*Arkansas

This final report describes activities and accomplishments of the Arkansas Project for Children and Youth with Deaf/Blindness, a 3-year federally supported project to provide support services to children and youth in Arkansas who are deaf-blind. The project provided technical assistance in the following areas: early identification, incidence and characteristics of individuals with deaf-blindness, early intervention, transition, best educational practices including inclusion, functional curriculum including modifications and adaptations, and parental rights and responsibilities. The project focused on two key approaches—first, provision of information to parents and families by a full-time family consultant, and second, education of key personnel who serve children and youth with deaf/blindness by a full-time education consultant. The project's effectiveness was evaluated by: the number of children identified with deaf/blindness; consumer satisfaction surveys completed by parents; number of professionals, paraprofessionals, and parents who

received information and training; and improved skills and knowledge of professionals serving these children as measured by evaluation data and pre- and post-tests. Individual sections of the report provide specific information on the project's purpose, goals, objectives, conceptual framework, accomplishments and outcomes, problems and how they were resolved, research and evaluation findings, impact, and products and publications. Implementing a Collaborative Team Model in the Delivery of Transition Services.

Pub Date—2 Dec 95

Note—86p. Paper presented at the Annual Conference of the Association for Persons with Severe Handicaps (San Francisco, CA, November 30-December 2, 1995).

Pub Type—Speeches/Meeting Papers (150) — Guides - Non-Classroom (055)

EDRS Price - MF01/PC04 Plus Postage. PC Not Available from EDRS.

Descriptors—*Agency Cooperation, *Cooperative Programs, Delivery Systems, *Disabilities, Education Work Relationship, Models, Program Development, Secondary Education, *Teamwork, *Transitional Programs

These materials present information on implementing a collaborative team model in the delivery of transition services to students with disabilities. The materials provide charts and forms outlining strategies to be used by a local interagency transition team to assess its existing level of collaboration, to conceptualize its jointly endorsed long-term vision, and to define several levels of outcome measures. This self-study covers the following areas: organizational structure; operating procedures; collaborative process; transition planning process; student instruction and consumer support; family outreach and support; self-determination and advocacy; negotiation of adult outcomes; and evaluation of transition services. The materials also review the process to be used by a local interagency transition team to develop action plans around multiple outcome levels—interagency, agency, and students. The collaborative model presented is intended to equip collaborative transition teams to address two levels of service delivery: (1) student and consumer outcomes, and (2) system development and support. Descriptions of local examples of collaborative programs are attached, as is a summary of the presentation. (DB)

EDRS Price - MF01/PC04 Plus Postage.

Descriptors—Accessibility (for Disabled), Assistive Devices (for Disabled), College Admission, College Programs, *College Students, Deaf Interpreting, *Disabilities, Educational Legislation, Federal Legislation, Hearing Impairments, Higher Education, Learning Disabilities, Special Needs Students, *Student Personnel Services, *Student Rights

Identifiers—*Saint Philips College TX

This handbook was developed for students with disabilities applying to or attending St. Philip's College (Texas) and provides information about admission, how to register for classes, what kind of special services are available for students with disabilities, how to obtain services, and how to maintain services. First, summaries are provided of Section 504 of the Rehabilitation Act of 1973 and the Americans with Disabilities Act. Next, the mission statement of the College's Department of Educational Support Services (ESS) is presented. A question and answer format addresses common concerns about support services and about auxiliary aids and special equipment. Briefly described are other ESS services and the student grievance procedure. The next section focuses on the learning disabilities and psychological disabilities program and includes information on applying for admission and registering for classes, establishing services, the definition of learning disabilities (LD), common characteristics of college students with LD, and other ESS services for LD students. A section on interpreter services has similar information for students who

are deaf or hard-of-hearing as well as guidelines for using an interpreter. The last section covers special needs services for students with physical, visual, and health impairments. Appended are samples of documents and forms used by ESS and campus maps. (DB)

Descriptors—*Academic Achievement, *Bilingual Education, *Educational Objectives, *Educational Policy, Instructional Effectiveness, *Language of Instruction, *Limited English Speaking, Mainstreaming, Program Design, Program Effectiveness, Program Evaluation, Public Policy, Theory Practice Relationship

Identifiers—California, New York, New York (New York)

This article by Patricia Whitlaw-Hill, Executive Director of READ, addresses the issue of the education of limited-English students in public education. New York has joined California in concluding that bilingual education programs are not working as well as English-as-a-Second-Language (ESL) programs in helping language minority students become mainstreamed. Support for bilingual education has been based largely on untested and unsubstantiated academic theories that emphasize instruction in the student's native language. Rapid learning of English for school purposes and the early integration of limited-English-proficient (LEP) students into regular classrooms with English-speaking peers is preferable. These programs are in place in many areas but have not been adequately acknowledged. A large part of the problem has been confusion between program goals and objectives. Bilingual education's objectives of maintaining and increasing native language skills have conflicted with their goals of teaching English. A number of current strategies are appropriate for developing English language skills, including sheltered English instruction, cooperative learning, grouping, project work, and learning centers; all can be used to facilitate both English language learning and academic content mastery. An essential ingredient is for schools to have the flexibility to respond to students' needs and to design appropriate programs, particularly as immigrant populations increase. (MSE)

Language Policy Issues in South Africa.

Pub Date—Mar 94

Note—13p.; Paper presented at a Sociolinguistics Symposium (Lancaster, England, United Kingdom, March 1994).

Pub Type—Speeches/Meeting Papers (150) — Opinion Papers (120)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Foreign Countries, *Language Attitudes, *Language of Instruction, *Language Planning, *Language Role, *Official Languages, Policy Formation, Political Influences, *Public Policy, Social Change

Identifiers—*South Africa

A discussion of new language policy in South Africa, creating 11 official languages and terminating the privileged status of English as sole or co-official language, looks at a number of issues in language policy creation. The framework for this analysis is that language may be viewed from four perspectives: as a problem, a right, a resource, or a symbol. It is argued that the first, second, and fourth perspectives have dominated South African language policy, and that the third is attempting to break that tradition. A brief overview is given of the language patterns of the country. Two distinct areas of language policy are identified: official languages and languages in education. Central themes in the debate concerning official languages are then discussed: the place of Afrikaans; the place of other

African languages; and the place of English. One issue concerning languages in education is discussed here, that of medium of instruction. Each issue is examined in its historical and current social context in South Africa. Contains 22 references and a map of South Africa depicting dominant home languages in 1980. (MSE)

Variation in Conversational Discourse: Spanish

"Pragmatic Expressions."

Pub Date—Mar 93

Note—11p.; Paper presented at the Georgetown University Round Table on Languages and Linguistics (March 1993).

Pub Type—Speeches/Meeting Papers (150) — Reports - Descriptive (141)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Discourse Analysis, Foreign Countries, *Idioms, Language Research, Language Variation, *Oral Language, *Pragmatics, Regional Dialects, *Social Differences, *Spanish Identifiers—Argentina

This study reports on preliminary findings of two research projects conducted during the 1988-89 and 1990-91 in Cordoba, Argentina, that examined fixed, idiomatic, Spanish-language expressions that are very common, but often ignored, in oral Spanish discourse. Study 1 subjects were 13 university-educated, adults, born in the city; study 2 subjects were from 3 different social sectors: a housing project, an old large lower middle-class neighborhood, and a golf country club. Twenty-five expressions were identified as pragmatic expressions and analyzed according to their ideational content, sequence structure, and speech acts and orientation towards the Gricean Conversational Maxims. Findings on "Bueno" and "Mira" are detailed. Contrary to expectations, results suggest that the highest usage is in the upper class social group. The research is ongoing with a comparison of the choice, use, and frequency with which these expressions are used in daily life. (Contains seven references.) (NAV)

Identifiers—Center for Applied Linguistics DC, *National K 12 Foreign Language Resource Center

This report evaluates the activities from February 1, 1994 to May 31, 1995 of the National K-12 Foreign Language Resource Center at Iowa State University. The center's purpose is to support training of elementary and secondary school foreign language teachers. Initiatives of the center focus on professional development in three areas: use of effective teaching strategies; development and interpretation of foreign language assessment; and use of new technologies. The evaluation is based on stated objectives in each of these areas. Specific activities included 4 summer institutes with 86 foreign language educators from around the United States, a project involving 20 teachers and researchers in a collaborative effort with the Center for Applied Linguistics in researching classroom foreign language assessment practices and techniques, continuation of contact with institute and workshop participants through collaborative projects, completion of an extensive annotated bibliography of foreign language assessment instruments, and teacher training in the use of electronic mail as an effective communication tool. Stated goals in each area were met. (MSE)

Specialty Designed Academic Instruction in English.

Pub Date—Jul 95

Note—14p.

Pub Type—Reports - Descriptive (141) — Guides - Classroom - Teacher (052)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Cooperative Learning, *English (Second Language), *Limited English Speaking, Teacher Role, *Teaching Methods

Identifiers—California, *Content Area Teaching, *Sheltered English

This paper describes the Specially Designed Academic Instruction in English (SDAIE) methodology used in the California school system to teach academic content to intermediate, threshold level limited-English-proficient (LEP) students and to counteract the limitations of sheltered content programs. SDAIE teaches grade-level subject matter in English and is specifically designed for speakers of other languages. It consists of a rigorous academic core at the student's grade level. Clients for SDAIE have intermediate proficiencies in English and cognitive skills in their primary language. SDAIE is based on Vygotsky's fundamental notion that learning is social in nature, thus, it must involve collaborative and cooperative learning as well as scaffolding. Expressive writing is used in the SDAIE method to encourage students to make connections with content through journal entries, quick writes, and graphic organizer entries. The role of the primary language is strategic as primary language literacy is a link to the rigorous content instruction. SDAIE teachers have expertise in language development and in the academic content area as well as providing opportunities for students to take responsibility for their own learning. Descriptors—*Ambiguity, College Students, *English (Second Language), Foreign Countries, Higher Education, Language Research, Learning Strategies, *Likert Scales, Questionnaires, Rating Scales, Second Language Learning, *Statistical Analysis, Test Format

Identifiers—China

Based on personal experience, this paper examines the ambiguities of the Likert-type 3-point scale in learning strategy elicitation. Four parallel questionnaires consisting of the same batch of 20 items taken from the Oxford scale (1990) were administered among a group of 120 tertiary level, non-English majors in China. Questionnaire 1 used the Oxford scale without specifying dimensions of reference. Questionnaire 2 told the respondents to choose their answers by comparing with their peers in the same grade. Questionnaire 3 asked them to select their present behavioral frequency as compared with their own past learning experience in secondary schools. In questionnaire 4, subjects were told to check off the relevant frequency of a behavior by comparing its frequency of occurrence with that of other language skills. Results showed that out of the 20 items used, 13 were significantly different among the four questionnaires. Methodological implications for questionnaire research are discussed, and suggestions for future research are proposed. (Contains 25 references.) (Author/NAV)

Comparative Intergroup Relations and Social Incorporation in Two Multilingual Societies: Canada and Switzerland. Occasional Paper No. 95-03.1.

Duke Univ., Durham, N.C. Center for International Studies.

Pub Date—Oct 95

Note—48p.; This paper is the eighth in a series on Nationalism, National Identity, and Interethnic Relations.

Pub Type—Reports - Research (143)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Contrastive Linguistics, Cultural Context, *Ethnicity, Foreign Countries, *Intercultural Communication, Language Attitudes, Language Research, *Minority Groups, *Multilingualism, Nationalism, *Social Integration, Social Values

Identifiers—*Canada, *Switzerland

A study of national identity and social integration in two multilingual societies, Canada and Switzerland, examines the relations between Quebec and anglophone Canada and between French and German Switzerland. First, the historical setting for the emergence of multilingualism is outlined for both countries, and the demography of the major language groups is summarized. Then the role of group attitudes in preserving ethnic and national identity, and the degree to which majority and minority language groups adhere to the same core values, are analyzed. Finally, the relative social and political stability in Switzerland and the more tenuous linguistic equilibrium in Canada are reviewed. It is concluded that attitudinal differences between language groups do not disappear, even in contexts with low intergroup tension, but that mediating factors such as the unity of common political and civic culture in Switzerland affect social integration. Survey data on multiple loyalties, divergence/consensus on political issues and core values, and attitudes toward diversity and multilingualism in each country are appended. Contains 59 references. To Improve English Skills and a Knowledge of American Culture in the Adult E.S.O.L. Learner.

Pub Date—May 94

Note—126p.; Master's Thesis, NOVA University. Pub Type—Dissertations/Theses - Practicum Papers (043)

EDRS Price - MF01/PC06 Plus Postage.

Descriptors—Adult Education, Anatomy, Class Activities, Clothing, *Cultural Education, Curriculum Design, Daily Living Skills, Employment, *English (Second Language), Food, Geography, Grammar, *Humor, Instructional Effectiveness, Instructional Materials, *Language Skills, Language Tests, Material Development, Monetary Systems, Newspapers, *North American Culture, *Relevance (Education), Second Language Instruction, Skill Development, Telephone Usage Instruction, Textbooks, Time, Weather

The practicum reported here was developed to provide a curriculum to improve the English skills and a knowledge of American culture in the adult English speaker of other languages (ESOL). A 12-week curriculum was devised to teach grammar and language skills within the context of humorous stories about daily living and by using weekly themes that are meaningful and relevant to adult students' immediate needs. Topics included: exchanging personal information; calendar/time/money/weather; parts of the body; food; clothing; telephone usage; the community; employment; the newspaper; and the United States. Subjects were 19 students regularly attending an adult ESOL class. The effectiveness of the curriculum was evaluated with pre- and post-tests. Results indicated increased achievement levels in both language skills and knowledge of American culture. Appended materials include a curriculum planning letter and questionnaire, list of weekly themes, unit tests, and a student data form used by the teacher. Contains 10 references. (MSE)

Identifiers—*Content Area Teaching, *Foresee Approach

This manual presents the Foresee Approach for teaching English-as-a-Second-Language (ESL) at the secondary school level in Manitoba, Canada. The name refers to four C's: Communication; Cognitive-academic language development; and Content instruction in the Classroom. An introductory chapter offers background information on purpose and rationale of the guide, discusses the foundations of the approach in language acquisition, psychological, and educational theory, and explains the theoretical model for the Foresee Approach and some elements of its implementation. The second chapter addresses the selection of instructional materials, and the third discusses the development of lessons and units, with some attention given to classroom presentation techniques. Chapter 4 contains a sample 16-lesson unit on weather. The fifth chapter suggests general procedures and specific activities for implementing the approach in the secondary school regular classroom. Cognitive Processes, *Cognitive Style, Communication Problems, *Deafness, Educational Research, Foreign Countries, French, *Language Research, *Learning Problems, *Multicultural Education, Reading Skills, Reading Strategies, Secondary Education, Secondary School Students, Sign Language

Identifiers—Quebec, *Spontaneous Speech

This study, reported entirely in French, investigated reasons for deaf secondary students' delay in acquisition of reading skills. The study examined relationships between the students' individual cognitive styles, use of Quebec Sign Language, reading in French, and reading strategies. Subjects were 24 students enrolled in one school, paired in a treatment group of 12 and a control group of 12. An analysis of pretests in the four areas of concern (cognitive style, sign language, reading skills, reading strategies) suggests that deaf students have a common cognitive style characterized by thought that is simultaneously non-verbal, global, intuitive, emotional, concrete, and analogical. Based on these findings, interventions were used in the treatment group to develop skills in each area. Results are presented for the two groups, and three case studies are elaborated; the latter are found to provide additional insight into the learning difficulties of deaf students, particularly difficulty in focusing on meaning when communicating and under-developed spontaneous language and cognitive skills. Testing materials, and student evaluation data are appended. Contains an extensive bibliography. (MSE)

Awad, Maher

Commitment and Evidence in Arabic Complementization.

Pub Date—95

Note—14p.; Paper presented at the Annual Conference on African Linguistics (26th, Los Angeles, CA, March 24-26, 1995).

Pub Type—Reports - Evaluative (142) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Arabic, Discourse Analysis, *Grammar, *Language Patterns, Language Research, Linguistic Theory, Morphology (Languages), Regional Dialects, Semantics, Syntax, Uncommonly Taught Languages, *Verbs

Identifiers—*Arabic (Palestinian), *Clauses

The study examines one component of the system of complementation in Palestinian Arabic. It is argued that the complementizer in question has an inherent semantics capable of influencing the meaning of sentences in which it is embedded. Specifically, its presence in a complex sentence communicates modal meanings distinct from those communicated by analogous sentences lacking it. This analysis challenges traditional assumptions about the functional importance of complementizers. It is hypothesized that the function of this complementizer is to lessen the degree of the matrix subject's commitment to the proposition embodied in the complement clause and to weaken the semantic and syntactic dependence of the clause. Examples are drawn from a number of complement clause types: with subjunctive and indicative complements, after perception verbs, and before direct quotations. Contains 10 references. (MSE)

Analysing Argumentative Strategies: A Reply to a Complaint.

Pub Date—95

Note—11p.; In: Warvik, B., Ed., Organization in Discourse: Proceedings from the Turku Conference, 1995.

Pub Type—Reports - Evaluative (142) — Opinion Papers (120) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Business Communication, Discourse Analysis, English, Foreign Countries, Language Patterns, Language Research, *Letters (Correspondence), Linguistic Theory, *Persuasive Discourse, *Writing (Composition)

An analysis of discourse focuses on argumentative strategies used in reply to a complaint. The complaint was in the form of a letter, in English, written to a breakfast cereal company, expressing concern about a stone found in the product. The response, also in letter form, is examined for its text strategy. These elements are discussed: the letter's interactive framework using first- and second-person references, which signals involvement; increasing text complexity within the main body of the letter; ex-

pository text suggesting careful thought; use of text patterns signaling concession; a conclusion with a false suggestion of coherence; and patterns corresponding to rhetorical structure theory. It is noted that when the text was presented to 6 national speakers of English and 18 students of English as a Second Language, who were then asked to point out the portion they thought represented the essence of the text as a whole, the two groups selected different paragraphs. Contains 20 references. (MSE)

Descriptors—Classroom Techniques, Educational Strategies, Elementary Education, Federal Aid, Financial Support, FLES, *Immersion Programs, Inservice Teacher Education, *Instructional Innovation, Parent Participation, Program Descriptions, Program Design, Program Development, Program Effectiveness, Program Evaluation, Reading Instruction, *Second Language Programs, *Spanish, Writing Instruction
Identifiers—*Arlington Public Schools VA

The partial immersion program at Key Elementary School (Arlington, Virginia), where half the day is taught in English and half in Spanish, continued to be successful in its eighth year. Reasons for success include: dedication and in-depth understanding of immersion philosophy among principal, coordinator, teachers, and staff; innovations in both English and Spanish portions of the day, especially in approaches to reading and writing; active parent involvement; supplemental federal funding; and continued central office support. Tests indicate participating students have progressed in academic areas as well as or better than other students at their grade level, both within the school and in comparison with state and national norms. Recommendations for the next year include: improved articulation with middle and high school programs for continued integrated content area and language instruction; continued expansion of teaching strategies; involvement of immersion teachers in the planning of in-service training; and continued classes for parents, including English for Spanish parents and Spanish for English parents. (MSE)

Descriptors—Classroom Techniques, Educational Strategies, Elementary Education, Federal Aid, Financial Support, FLES, *Immersion Programs, Inservice Teacher Education, *Instructional Innovation, Mentors, Parent Participation, Program Descriptions, Program Design, Program Development, Program Effectiveness, Program Evaluation, Reading Instruction, *Second Language Programs, *Spanish, Writing Instruction

The partial immersion program at Key Elementary School (Arlington, Virginia), where half the day is taught in English and half in Spanish, continued to be successful in its ninth year. Reasons for success include: dedication and in-depth understanding of immersion philosophy among principal, coordinator, teachers, and staff; innovations in both English and Spanish portions of the day, especially in approaches to reading and writing; active parent involvement; supplemental federal funding; and continued central office support. Tests indicate participating students have progressed in academic areas as well as or better than other students at their grade level, both within the school and in comparison with state and national norms. Four years of federal funding have enabled the immersion program to improve, enrich, and expand its established program, including addition of a kindergarten program, curriculum development, development and revision of portfolio assessment procedures, in-service training for immersion teachers, English and Spanish language classes for parents, and staff development.

Recommendations for the following year include: initiation of a yearly evaluation of the entire Arlington immersion program; establishment of a teacher mentoring program; kindergarten day expansion; continuation of the staff position of immersion program coordinator; and continued increase in student ethnic diversity. Descriptors—*American Indian Languages, Bias, Diachronic Linguistics, Ethnic Groups, Grammar, Indigenous Populations, Language Maintenance, Language Skill Attrition, *Native Speakers, Sex Differences, Uncommonly Taught Languages, *Unwritten Languages, Vocabulary
Identifiers—*California

This comprehensive text examines various aspects of the Native American languages of California, including historical perspectives, daily usage, language domains, language maintenance, men's and women's language, and counting systems. Chapter 1 surveys the Indian languages spoken in California and shows how many people speak each one. Part 2 is a series of essays on what languages tell us about the history of their speakers. Part 3 explores aspects of the vocabulary and grammar of California Indian languages. Part 4 examines ways in which prejudice and oppression have led to the decline and death of Indian languages in California, and Part 5 is a set of chapters on how the people who speak and study California Indian languages are struggling to keep them alive. The book concludes with an examination on how linguistics can and should relate to the needs of the communities being studied. (VWL)

Identifiers—*Abenaki
This is a dictionary of Western Abenaki as it is spoken in the last half of the 20th century. A member of the Algonquin family of languages, Western Abenaki is so named to distinguish it from Penobscot and the extinct Eastern Abenaki dialects of what is now the state of Maine. The Western Abenakis, whose homes are Odanak, Quebec, and the Missisquoi Bay region of Lake Champlain, have been known to English writers as the Saint Francis Indians because of their location on the Saint Francis River and the name of a mission on the Chaudière River, Saint-François-de-Sales. In addition to the Abenaki-English/English-Abenaki word lists, the book provides information on the Western Abenaki language, variation, loan words, pronunciation, spelling, and a guide to the entries, an explanation of grammatical terms and abbreviations, and a list of roots. Olade, Afolabi
Stylistic Embedding in Yoruba Literature.
Pub Date—Mar 95
Note—21p.; Paper presented at the Annual Conference on African Linguistics (26th, Los Angeles, CA, March 24-26, 1995).
Pub Type—Reports - Evaluative (142) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.
Descriptors—African Languages, Discourse Analysis, Fiction, Foreign Countries, *Language Patterns, Language Research, Linguistic Theory, *Literature, Literature Appreciation, Novels, Poetry, *Sentence Structure, Transformational Generative Grammar, Uncommonly Taught Languages, *Yoruba

The process of embedding, a term used in generative grammar to refer to a construction in which a sentence is included within another sentence, is examined as it occurs in Yoruba literature. Examples are drawn from Yoruba praise poetry, in both written and oral form and within Yoruba novels. Forms of embedding identified include those to draw attention to the subject of a poem, to digress from the main topic and provide brief relief from it, bring humor into a tense circumstance, and make direct or indirect comment on the situation or character. Two additional forms of embedding are noted: the embedding of minor stories within the main story, sometimes using incantation or proverb, and that of poetry. Implications of the analysis for creative writing and for evaluation of an author's work and style are discussed briefly. (MSE)

Identifiers—*Japan
An analysis of the trend in teaching African languages as a second or foreign language (AFL2) looks at patterns in the objectives of AFL2, teachers and learners, and instructional environments. Three basic program objectives in AFL2 are distinguished: language proficiency (basic conversation); language competence (close to native skills); and knowledge for linguistic analysis. Four types of language teacher-learner combinations are identified: native-speaking teachers qualified in language teaching who have a common language with the learners, adequate for teaching and learning; native-speaking qualified teachers with a common language not adequate for teaching and learning; unqualified, non-native-speaking teachers who have a common language with learners, adequate for teaching and learning; and unqualified, native-speaking teachers without training in the language or linguistics, and learners. Four locations of instruction are noted: in the learner's home country; and three areas outside the learner's home country (Europe; America; and Asia). Implications for AFL2 of these variations are discussed. An ongoing project in Japan in which Yoruba is taught as a second language by two different methods (bilingual and direct/monolingual) is described, and issues arising within this context are examined. Suggestions are made for advancing AFL2. Contains 13 references. (MSE)

Farrell, Donna M. And Others
Confronting Unalterable Variables: Non-English Language Background Students and Schooling Achievement.

Pub Date—Feb 95
Note—84p.; Paper presented at the Annual Meeting of the American Association of Colleges for Teacher Education (Chicago, IL, February 21-24, 1995).

Pub Type—Reports - Research (143) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC04 Plus Postage.
Descriptors—*Academic Achievement, *Educational Attainment, Educational Background, *Educationally Disadvantaged, Elementary Education, *English (Second Language), Followup Studies, High Schools, *High School Seniors, Kindergarten, *Reading Instruction

Two related studies of the relationship between non-English language background (NELB) and the academic achievement of high school seniors are reported. The first is a kindergarten reading follow-up study ($n=3,959$) examining the long-term effects on high school seniors of learning to read or not learning to read in kindergarten. Results of this study indicate clear and consistent support for reading instruction in kindergarten. The second study, the analysis reported here, investigated whether (1) these results would generalize to NELB students ($n=496$) within this population, and (2) NELB background is a necessary impediment to overall school achievement. Results of this study suggest that NELB students are not generally at a disadvantage in standard educational measures taken in high school after controlling for social class and family size. The positive effects of early reading instruction also generalize to NELB students. It is suggested that these findings challenge common assumptions about disadvantage among bilingual children. Data from the study are appended. Contains 40 references. (MSE)

Chinese Language Learning Motivation.

Pub Date—[95]

Note—29p.

Pub Type—Reports - Research (143) - Tests/Questionnaires (160)

EDRS Price - MF01/PC04 Plus Postage. PC Not Available from EDRS.

Descriptors—Asian Americans, *Chinese, College Students, Higher Education, *Learning Motivation, Second Language Learning, *Second Languages, *Student Motivation, Surveys

Identifiers—*Asians

A survey of 77 Asian and Asian-American university students enrolled in first- and second-year Chinese language courses investigated the students' motivations for studying the language and their expectations of what they will gain from studying it. Results indicate two factors accounting for beginning Chinese language study: interest in cultural heritage, and perceptions that the study is less demanding than other five-unit courses. Motivation to continue Chinese language study was found most closely related to student expectations of the learning strategies and effort required of them, and not to intrinsic value of the heritage language. It is concluded that specification of hours of credit may promote passivity in student motivation, whereas requiring a specific proficiency level might not. In addition, appropriate and realistic expectations of the learning task and of one's own ability play an important role in starting and continuing Chinese language study, and creating an environment in which students can meet their own expectations can develop a strong sense of student self-efficacy. The questionnaire used in the study is appended. Contains 31 references. (MSE)

Identifiers—Pienemann (Manfred)

A study investigated the applicability of the theory of tentative developmental stages in English-as-a-Second-Language (ESL) development (TDS), which posits specific sequences for specific language features and hypothesizes developmental stages that cut across those sequences. The six stages are defined by specified combinations of three speech processing strategies. The case study involved a native Korean-speaking student enrolled in an intermediate-level ESL course at an American college. Data were drawn from nine transcripts of the subject involved in information-gap tasks with different native-English-speaking and non-native English-speaking interlocutors. Independent clauses were analyzed and grammatical features used were identified according to developmental stage. It was found that while the subject's speech contained features from each of the six stages, 96

percent of stage 1-3 features were present but only 41 percent of stage 4-6 features were found. Because the theory proposes that the developmental stages are "implicational" (i.e., that features from all previous stages have been acquired), the findings do not support the theory. Contains 16 references. (MSE)

Descriptors—Classroom Communication, Classroom Research, Comparative Analysis, *English (Second Language), *English for Academic Purposes, Language Research, *Language Tests, Second Language Learning, Surveys, Teacher Attitudes, Teacher Made Tests, *Test Format, *Testing

A project to identify alternative strategies for assessing the academic language of English language learners is reported. First, literature on the concept of academic language is reviewed, and then findings from classroom research are used to propose an alternative conceptualization of academic language, one which focuses on the role of stylistic register in communicating about academic tasks. Next, results of a survey of 157 English-as-a-Second-Language (ESL) educators concerning academic language and assessment are presented. Responses to five of the most salient questions are analyzed in detail; others are appended. A number of alternative assessment strategies are considered: physical demonstrations; pictorial products; K-W-L (Know-Want-Learn) charts; oral performances; portfolios; oral and written products; and teacher-made measures that complement alternative assessment. Implications of the project's findings for educators, educational practice, reform, and policy are discussed. Appendices which make up over 50% of the document contain the survey instruments, classroom data sheet, and the compiled data from all questionnaires. Contains 43 references. (MSE)

Identifiers—Content Area Teaching

This curriculum offers lesson plans for 5 hours of Acquired Immune Deficiency Syndrome (AIDS) education instruction for high school and young adult students of English-as-a-Second Language (ESL). It helps students develop English language skills while it helps them understand the AIDS risk factors. The curriculum is designed to help cope with the social pressures that might lead to behaviors that could put them at risk for HIV infection. Each lesson incorporates specific AIDS education and ESL objectives and develops the critical thinking, reading, writing, listening, and speaking skills at the core of every sound ESL program. Copy-ready background materials, exercises, and activities are provided for each lesson. Appendices include supplementary exercises and handouts, a copy of the

Teachers of English to Speakers of Other Languages (TESOL) resolution on AIDS, and an international AIDS resource list with addresses and telephone numbers. (Author/NAV)

Identifiers—England

Data from a larger ethnolinguistic study are presented to demonstrate patterns of pupil-teacher exchanges between bilingual children and monolingual teachers in an urban nursery school in England. Children were aged 3-4 years. Naturally-occurring discourse data were audiotaped and substantial contextual data was gathered. Analysis of patterns in child-adult interactions, and comparison of interactions between (1) monolingual teachers and bilingual pupils and (2) bilingual adults and the same bilingual pupils, suggest that the power relationship inherent in patterns of monolingual teacher-pupil interactions (and established in previous research) assume greater significance in interactions between monolingual teachers and bilingual pupils. A generic pattern of adjacency pairs of bilingual interactions and one-language interactions is outlined. Examples are drawn from discourse. (MSE)

Identifiers—Content Area Teaching, *Language Minorities

This book, devoted to issues in science instruction for limited-English-proficient (LEP) college students, examines their specific instructional needs and perspective and suggests alternative teaching strategies. An introductory chapter looks at the changing demographics of American higher education, LEP students' unique academic problems, and some myths and misconceptions held by mainstream faculty. Chapter 2 gives an overview of second language acquisition theory, and chapter 3 examines the facets of culture that interact in the science classroom. In chapter 4, learning styles, their influences on classroom performance in tradi-

tional science instruction, and the influence of culture and ethnicity on learning style are discussed. Chapter 5 is designed to help teachers discover what techniques they are currently using that assist LEP students, and select modifications and strategies that suit both their teaching style and student needs. The sixth chapter focuses on issues that relate to writing and reading in English. Six case studies illustrating how faculty and programs are addressing LEP students' needs are reported in chapter 7. In chapter 8, two different linguistically-based approaches for LEP science instruction are described, and the subsequent chapter offers case studies of pioneering courses and programs in non-traditional science instruction for this population. A bibliography is included. (MSE)

Metapragmatic Judgment on Refusals: Its Reliability and Consistency.

Pub Date—Nov 95

Note—43p; Paper presented at the Annual Meeting of the American Council on the Teaching of Foreign Languages (29th, Anaheim, CA, November 1995).

Pub Type—Reports - Evaluative (142) — Speeches/Meeting Papers (150) — Tests/Questionnaires (160)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Attitudes, Comparative Analysis, *English (Second Language), *Interrater Reliability, *Language Patterns, Language Research, Language Usage, *Native Speakers, *Pragmatics, Questionnaires, Written Language

Identifiers—Refusals

A study investigated 42 native English-speakers' (NSs) perceptions of the pragmatic appropriateness of refusal statements. The NSs rated the appropriateness of 24 written statements in 4 different refusal scenarios, which were collected from both native speakers and non-native speakers. Four weeks later, as a reliability check, the subjects rated the same statements again. Results indicate that what one subject considered pragmatically appropriate tended to be considered the same by other speakers of the same language. Also, the stronger the pragmatic impression, the more extreme the ratings, and the higher the level of rating consistency for a statement. In addition, subjects' pragmatic judgments tended to be consistent over time, and statements made by native speakers of English were considered pragmatically more appropriate than statements made by non-native speakers as judged by native raters. Appended materials include the questionnaire used and data charts and summaries. Contains 24 references. (MSE)

DEUTSCHE WELLE in the Classroom.

Pub Date—Aug 95

Note—10p.

Language—German

Pub Type—Guides - Classroom - Teacher (052) — Opinion Papers (120)

EDRS Price - MF01 Plus Postage. PC Not Available from EDRS.

Descriptors—*Classroom Techniques, Foreign Countries, *German, Listening Comprehension, Secondary Education, Second Language Instruction, *Television, *Television Viewing

Identifiers—*Authentic Materials, *Deutsche Welle, Germany

This paper addresses how German-language teachers in the United States can use broadcasts of the German language television, "Deutsche Welle," in their classrooms. Emphasis is placed on the knowledge gained about Germany and the opportunity to not only hear, but also see, German as it is really spoken in everyday life. Care must be taken to select programs where the student must understand the German, not just see the picture, to understand what is happening, and programs must be selected that are not too out of date or boring to students. Once programs have been selected, a sequence of program presentation for maximum student effectiveness is suggested. The greatest value of the Deutsche Welle programs is the challenge that they offer the teacher for classroom use. (NAV)

Descriptors—*College Second Language Programs, Curriculum Design, *Curriculum Development, Educational Needs, Foreign Countries, *French, *German, Higher Education, Program Descriptions, Program Development, Program Evaluation, Undergraduate Study

Identifiers—*University of Dublin (Ireland)

A University of Dublin (Ireland) curriculum restructuring project in the undergraduate second language program is chronicled, and ongoing curriculum development efforts are described. As a result of curriculum research, the university offered a series of freshman French and German courses in 1994-95 and a series of second-year courses to students having completed the previous year's new freshman courses. Separate courses were designed for students who were beginners and non-beginners in the language, and for students in different academic fields: arts; sciences; and health sciences. The report describes the 1994-95 program's structure, recruitment efforts, enrollments, course design, student evaluation provisions and results, and research and development in these areas: student interest in other language offerings; course content; foreign language testing; development of computer-based learning materials; self-access learning resources; interactive video; language learning by electronic mail; and a package of materials for development of similar programs at other institutions. Planned course offerings for 1995-96, a three-year research and development program, and the future of funding are also discussed briefly. The report concludes with the findings of an external program assessment. (MSE)

Identifiers—*Australia (South Australia)

The report details the results of a 2-year followup study of immigrant students in South Australia high schools. The students (n=91) had all been participants in a New Arrivals transitional program, then scattered in different high schools. The study focused on the status, 2 years later, of students leaving the New Arrivals program in the second half of 1983, factors affecting students' decisions to be where they were, problems and concerns of the students after entering high school, the workforce, or non-employment, their perceptions of their progress in high school or the workforce, student aspirations, and academic performance in comparison to the average. The report details the study's methodology and summarizes findings in these areas: secondary school retention rate; age-related issues; student movement between high schools; financial support; use of school counseling services; use of bilingual school assistants to serve this population; student peer and teacher peer relationships; students choice of courses, including first-language study; student aspirations; aspects of English-as-a-Second-Language instruction; implications for the New Arrivals program; and issues related to the education of girls. The student and teacher questionnaires used in the study are appended, and an 18-item annotated bibliography is included. (MSE)

Recent Developments in Australian Immersion Language Education.

Pub Date—Mar 95

Note—32p.; Paper presented at the Annual Meeting of the American Association for Applied Linguistics (17th, Long Beach, CA, March 25-28, 1995).

Pub Type—Reports - Descriptive (141) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Comparative Analysis, Educational Change, Educational History, *Educational Innovation, Educational Trends, Elementary Secondary Education, Foreign Countries, Higher Education, *Immersion Programs, Instructional Effectiveness, Intensive Language Courses, Language Teachers, Professional Associations, Scholarly Journals, Second Language Instruction, *Second Language Programs, *Teacher Education, Trend Analysis

Identifiers—*Australia, Canada, Content Area Teaching

The report provides an overview of recent developments in immersion second language education in Australia, contrasting the Australian experience with the Canadian one. Particular attention is paid to some developments that may have significance for the future of foreign language teaching, such as "cold-start" late immersion programs in secondary schools; teacher training for immersion language instruction; in-country intensive/immersion language programs; a study comparing the effectiveness of intensive and immersion approaches; the emergence of the Australian Association of Language Immersion Teachers; and publication of the association's journal as a forum for discussion. It is concluded that there is a danger that the lack of monitoring of the effectiveness of immersion experiments at primary and secondary levels could lead to waning interest of funding authorities. The most promising developments seen at the higher education level are the development of teacher training programs with content-based instruction in the target language and an emerging focus on combining intensive and immersion instruction at this level. School Ties: A Social Network Analysis of Friendships in a Multilingual Kindergarten.

Pub Date—[96]

Note—37p.

Pub Type—Reports - Research (143)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Case Studies, *Cultural Pluralism, Ethnology, Foreign Countries, *Friendship, Group Membership, *Intercultural Communication, *Interpersonal Communication, Language Patterns, *Preschool Children, Preschool Education, *Social Networks

Identifiers—England, Ethnolinguistics, Pakistanis

An ethnographic study of eight children (four girls, four boys) in an English nursery school is presented. The study examined the language and social behavior of the 3-year-old children during their initial adjustment to a school environment. All were third-generation British born to families of Pakistani origin, and spoke Mirpuri, vernacular Urdu-Punjabi, and English. They were observed on their first day in school and again 3 months later. Data were drawn from recordings of naturally-occurring language and contextual information on behavior. Case studies of one girl and one boy are presented here. Using social network analysis, the ways in which these linguistic minority students established contact with each other and other children are demonstrated. Two network types emerged: loose pupil networks and dense friendship networks. The former are characterized by the presence of teachers, playing an influential role in the composition of the cluster and the activities and behaviors of participants. As the term progressed, key individuals emerged from the pupil network and moved to form dense friendship networks. The groups' memberships influenced the bilingual children's social and language behavior in this setting, suggesting that children at this age can recognize markers of ethnicity. (MSE)

The Changing Social Content of ESL Textbooks in the USA.

Pub Date—[96]

Note—16p.

Pub Type—Reports - Research (143)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Educational History, Educational Trends, *English (Second Language), Minority Groups, Racial Bias, Second Language Instruction, Sex Role, *Sex Stereotypes, Social Class, *Social Influences, *Social Values, *Sociocultural Patterns, *Textbook Content, Trend Analysis

An analysis of English-as-a-Second-Language (ESL) textbooks published in the United States from the 1950s through the 1980s focuses on incidental but pervasive social messages contained in their content, including restriction to middle class populations and values, stereotyped sex roles, lack of visibility of minorities, negative messages about minority groups, and treatment of some socially sensitive topics such as divorce. Substantial changes, most of them positive, are found in the content of ESL textbooks over this period. Social and political factors influencing this change are examined, and additional goals held by some for these materials are discussed. It is concluded that, judged by today's standards, ESL textbooks of the 1950s can be faulted on grounds of both accuracy and fairness. However, some tension exists between accuracy and fairness in portrayal of members of society; when accuracy and fairness come into conflict, the tendency is often for accuracy to yield to fairness. Current textbooks portray U.S. society more accurately than in the past by including much greater social diversity. Contains 30 references. (MSE)

Angelini, Eileen M.

Taking the Foreign Out of Foreign Languages for Pre-Professional Students.

Pub Date—95

Note—18p.; Paper presented at the Annual Meeting of the Modern Language Association (Chicago, IL, 1995).

Pub Type—Reports - Descriptive (141) — Opinion Papers (120) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Education Work Relationship, French, Higher Education, *Language Teachers, Personal Narratives, *Professional Education, Second Language Instruction, *Second Languages, Student Experience, *Teaching Experience, *Vocational Adjustment

One college language teacher recounts her personal experience of the transition from graduate student in French studies to the only full-time language faculty member at a small pre-professional college, focusing on the ways in which she was underprepared for the work expected of her. Despite substantial language teacher training and experience abroad, her qualifications did not match the needs of professionally-oriented students. Difficulties encountered in meeting those needs and expectations included: lack of student motivation to study beyond the language requirement; having to develop a foreign language program from the ground up in an organization unfamiliar with language education; and the time taken from progress toward personal professional goals to meet immediate curriculum development needs. Factors supporting success in this endeavor include: administration acknowledgment of the need for professional support; the assistance of mentors in the language teaching profession; scheduling designed to promote communication among faculty; availability of professional resources for curriculum development; and innovative teaching techniques. Ongoing improvements include further development of college instructional resources and extension of program offerings to include a foreign language minor. (MSE)

What Makes Materials Authentic.

Pub Date—[95]

Note—8p.

Pub Type—Reports - Evaluative (142) — Opinion Papers (120)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Comparative Analysis, *Comprehension, *English (Second Language), *Instructional Materials, *Media Selection, Second Language Instruction, *Second Languages, Textbooks

Identifiers—*Authentic Materials

A discussion of authentic materials for English-as-a-Second-Language (ESL) instruction focuses on the necessary balance between authenticity

and comprehensibility. A variety of definitions of authentic materials offered in the literature are considered, and then compared with published ESL materials that are claimed to be authentic. A new definition is proposed: materials are authentic if they are unaltered language data and are produced by and for native speakers of a common language and not for second language learners of that language. The assumption that all authentic materials are acquisition-rich input, either immediately comprehensible or comprehensible after a process of negotiation of meaning, is then examined. It is argued that while comprehension is a necessary and customary requisite to acquisition, it does not necessarily lead to comprehension, and it is the responsibility of the classroom teacher to make language samples useful. Teachers are invited to consider their motivations for using authentic language, and whether "contrived" language samples can be at least as valid and useful learning materials as those drawn directly from authentic sources. A brief bibliography is included. (MSE)

Teaching Math and Science to Language Minority Children: Implications for Teachers.

Pub Date—96

Note—20p.; Paper presented at the Annual Meeting of the Kansas Association of Teachers of Mathematics (Hays, KS, October 1995).

Pub Type—Information Analyses (070) — Guides - Classroom - Teacher (052) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Classroom Techniques, Cultural Pluralism, Educational Strategies, Elementary Secondary Education, *English (Second Language), *Language Role, *Limited English Speaking, *Mathematics Instruction, *Multicultural Education, Science Instruction

Identifiers—Content Area Teaching, *Language Minorities

Factors influencing the learning of mathematics in the linguistically diverse classroom are examined, drawing on the literature of mathematics and science instruction and of multicultural education. Teachers are encouraged to be aware that several linguistic, cultural, and cognitive factors affect the learner's academic performance, and to use linguistically and culturally sensitive instructional methods and activities to ensure success in math. First, a rationale for multicultural math instruction is presented, and then the relationship between language and math is examined in terms of the specific needs of limited-English-proficient students. Finally, some pedagogical implications and recommendations for classroom activities are offered. The latter include word problems that encourage repetitive language use, concrete and sensory experiences, cooperative activities that encourage interpersonal contact and problem-solving, writing and rewriting math problems, and songs and rhymes. Redesigning High School Schedules. A Report of the Task Force on Block Scheduling by the Wisconsin Association of Foreign Language Teachers.

Wisconsin Association of Foreign Language Teachers, Whitewater.

Pub Date—Nov 95

Note—24p.

Pub Type—Reports - Evaluative (142) — Opinion Papers (120)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Access to Education, Administrative Policy, Annotated Bibliographies, Class Size, Educational Strategies, Faculty Workload, High Schools, Homework, *Instructional Effectiveness, Instructional Improvement, Intellectual Disciplines, *Scheduling, School Districts, *School Schedules, Second Language Instruction, Teaching Methods, *Time Blocks, *Time Factors (Learning)

Identifiers—Wisconsin

The report examines issues in block scheduling as it affects foreign language teaching and learning. First, key questions related to block scheduling are discussed from the perspective of student learning, access, and workload. These include questions concerning the potential of block learning to improve achievement and rate of learning, to benefit all students equally, to improve student ability to compete nationally and internationally on standardized tests, to provide access to more courses, to accelerate

progress to graduation, and to change homework requirements. Questions from the perspective of teachers are also addressed, including whether block scheduling can decrease teacher workload, would require teachers to change their teaching methods, or would require teachers to modify student assessment methods. Finally, issues affecting school organization are examined, including the potential effects of block scheduling on class size, students' class selection, different disciplines, sequential courses such as foreign languages, and interdisciplinary teaching. The block schedules used by 11 schools or districts around the country are listed, and the block schedules of 11 Wisconsin schools are detailed. For the latter group, contact persons are named. A 17-item annotated bibliography is also included. (MSE)

Kim, Anna Charr
Composing in a Second Language: A Case Study of a Russian College Student.

Pub Date—Dec 95
Note—424p.; Doctoral Dissertation, National-Louis University, Illinois.

Pub Type—Dissertations/Theses - Doctoral Dissertations (041)

EDRS Price - MF01/PC17 Plus Postage.

Descriptors—Acculturation, Case Studies, College Students, Comparative Analysis, Discourse Analysis, *English (Second Language), Error Analysis (Language), *Error Patterns, *Foreign Students, Higher Education, Oral Language, Russian, Second Language Learning, *Second Languages, Student Attitudes, Syntax, *Writing (Composition), Writing Apprehension, *Writing Processes, Written Language

The case study examined the development of English writing skills in a native Russian-speaking college student with no previous instruction in English as a Second Language. It drew on writing samples from 2 years of English language instruction. Theories of first and second language acquisition, especially in written expression, are analyzed in relation to observations of the writing process, interviews with the subject and his instructors, and analysis of written products. Analysis of errors and syntactic maturity of the compositions found that errors decreased and syntactic maturity increased over the 2-year period. No correlation was found between number of errors and syntactic maturity. Information from formal oral interviews conducted with the subject, when compared with his writing development, indicated greater syntactic maturity but also more errors in writing than in speech. The subject had considerable writing anxiety. A questionnaire concerning his attitude, beliefs, and strategies, administered to the entire class, revealed that the subject was not typical in many ways, such as in his perception of his own second language abilities. In addition, his compositions reflected some classic stages of acculturation, including culture shock, anomie, and eventual assimilation. (MSE)

The English translation of a round-table discussion concerning literacy among Canadian francophones in non-francophone areas is presented. The panel includes a moderator, officials involved in literacy education in three provinces (Nova Scotia, Saskatchewan, Ontario), and a specialist in literacy among Canadian francophone women. After a brief overview of literacy efforts in each of the three provinces, the discussion moves to the literacy rate for Canadian francophones in comparison with that of anglophones. Difficulties of measuring literacy rate and of providing access to French-language education in a predominantly anglophone context are highlighted. A tendency for francophones in such situations is to adopt English, making French literacy education less of a priority among both population and policymakers. It is stressed that both the francophone community and the provincial and federal policymakers must be supportive of efforts to provide French-language instruction. Lack of coherent provincial policies on francophone literacy is noted. A distinction is made between French language literacy education and "refrancization," an interest in reintegration of French culture into daily life. Each panelist offers suggestions for future directions in these areas. (MSE) (Adjunct ERIC Clearinghouse on Literacy Education)

The transcript (translated into English) of a roundtable discussion of literacy among francophone women in Canada begins with the personal narrative of one woman who gained literacy skills as an adult. The panel of three specialists in francophone women's literacy in Canada then look at the literacy rate among Canadian women, and the demand for and objectives of literacy education for this group. Three disadvantages of Canadian francophone women are noted: a high rate of illiteracy; minority language; and gender discrimination. An additional problem is seen in the fact that literacy education programs further the inequities by creating low-paying jobs for women. Difficulties in promoting literacy instruction also include geographic distances, lack of child care facilities, and scheduling for literacy students and for literacy teacher trainees. Panelists make recommendations and offer directions for future literacy training efforts for francophone women in Canada. (MSE) (Adjunct ERIC Clearinghouse on Literacy Education)

Identifiers—Canada, *Francophone Education (Canada), New Brunswick, Ontario, Quebec

Presented is the transcript (translated into English) of a round-table discussion on student assessment and program evaluation in French-language literacy education in Canada. Panelists are government officials and specialists in Canadian francophone literacy education from several provinces

(Quebec, Ontario, New Brunswick). Each briefly outlines the current situation of student assessment in his province, and offers perspectives on what should be evaluated and how the assessment reflects the learner's intentions in gaining literacy, whether for occupational or personal reasons. The role of francophone community colleges in francophone education in New Brunswick is noted. It is also suggested that funding cuts may threaten literacy education for personal satisfaction by limiting services to only those needing training for occupational purposes. Concern is expressed that student and program evaluation may tend to affect funding, with the effect of limiting access to instruction. Several related issues are touched upon, including the role of public schools in adult literacy education, the role of volunteer and community literacy programs, and accreditation of literacy teacher training. Implications for public educational policy concerning literacy and literacy education are discussed. (MSE) (Adjunct ERIC Clearinghouse on Literacy Education)

Descriptors—Access to Education, *Adult Basic Education, Cooperative Programs, Curriculum Development, Fashion Industry, High School Equivalency Programs, *Inplant Programs, Job Skills, Labor Force Development, *Literacy Education, Mathematics Instruction, Native Language Instruction, Program Descriptions, Program Effectiveness, School Business Relationship, Second Language Programs, Spanish, Unions, Vocational Education, *Vocational English (Second Language)

The evaluation report details the structure and outcomes of a workplace education program for members of the Amalgamated Clothing and Textile Workers' Union from May 1993 through March 1995, and assesses the program's design as a model for similar programs elsewhere. The program was designed to enhance workers' skills and meet personal educational needs through adult basic education, English-as-a-Second-Language instruction, Spanish literacy instruction, high school equivalency, mathematics, and vocational courses. In addition, the program promoted adult educator training and workplace curriculum development. An introductory section gives an overview of the program. Two subsequent sections provide assessments of the efficacy of the program structures and of the program's process and outcome results. The next section examines five aspects of the program model: the comprehensiveness of its framework; collaborative planning mechanisms; its worker-centered curriculum and instructional techniques; formative program evaluation; and the extent to which it broadens the concept of workplace education. In all of these areas, the program was found to be effective and promising as a model for other, similar programs. (MSE) (Adjunct ERIC Clearinghouse on Literacy Education)

velopment, Student Characteristics, Student Recruitment, Teacher Evaluation, Teacher Selection, Teaching Methods, Unions, *Vocational Education

Identifiers—Amalgamated Clothing and Textile Workers Union, Northeastern Illinois University

The report describes the design and outcomes of a workplace education program undertaken cooperatively by Northeastern Illinois University, the Amalgamated Clothing and Textile Workers' Union, and a number of local businesses to provide adult basic education, English-as-a-Second-Language, and job skills instruction in the workplace. The report covers the period of May 1993 through March 1995. The first section offers an overview of the program and report. The second gives highlights of program outcomes for the participants, companies, union, and university. Section 3 details four specific program objectives and their accomplishment. A fourth section contains data on program participants, and a fifth describes program activities and features: classes; recruitment; a profile of participants; partner companies; program staff; instructional methodology; teacher selection; staff development efforts; teacher evaluation; instructional materials; and a resource center. In the sixth section, the aspects of the program's implementation model and dissemination activities are outlined, including planning meetings, task analysis, curriculum development, participant recognition, dissemination of promising practices, conference presentations, and media coverage. External and formative program evaluation activities are described in the sixth section. (MSE) (Adjunct ERIC Clearinghouse on Literacy Education)

The curriculum guide is designed for a program of English-as-a-Second-Language literacy instruction for textile workers' union members at the Phoenix Closures company. It consists of five themed units, each teaching work-related skills and knowledge. The themes are: health and safety; workplace communication; quality control; work forms; and company rules and procedures. Each unit contains a list of eight or nine instructional objectives, ideas for related lessons and class activities, and cross-references to specific texts and instructional materials. Appended materials include a list of additional suggested texts and an 11-page pre- and post-test of reading and writing skills. (MSE) (Adjunct ERIC Clearinghouse on Literacy Education)

Identifiers—*ASHE Annual Meeting, *Harvard University MA, Institutional History

This paper examines the changing role of tutors at Harvard University in the 17th and 18th centuries, and how this changing role led to the professionalization of college instruction and a separation of the teaching profession from that of the ministry. Over the course of this period tutors taught the entire basic curriculum (with the handful of professors responsible for discipline-specific advanced courses),

began to take more responsibility for the governance of the institution, received higher pay, and remained in their positions for longer intervals of time, many for 15 years or more. By the 18th century the position of tutor was no longer considered a short-term appointment for those awaiting calls to the pulpit, but a permanent, career-oriented position in itself, or as preparation for a professorship or school headship. The careers of a number of 17th and 18th century tutors are reviewed or cited as examples of these changes. The paper concludes that given the changes in the professoriate during the last 25 years, the increased professionalization of the tutors during the colonial period can provide important insights for colleges today. Just as the interests of teaching and research-oriented faculty can clash today, the professional standards and models of the tutors and professors clashed in the 18th century. Identifiers—*ASHE Annual Meeting, National Study of Postsecondary Faculty

This study examined the status and conditions of salaries, tenure, rank attainment, and productivity of men and women college faculty and faculty of each of five racial groups. It is based on a subset of data on 8,114 faculty members drawn from the 1992-93 National Study of Postsecondary Faculty. The results, based on descriptive and multivariate analyses, indicate that, even after controlling for experience, education, productivity, and institutional characteristics, women received 11.3 percent lower salaries than men, had lower probabilities than men of being tenured, and were less likely than men to be full professors. While Hispanic and Black faculty received salaries comparable to those of Whites, Hispanic and Black faculty were less likely than other faculty to be tenured. The study also found that, after controlling for race, education, experience, instructional and research activities, and institutional type, women faculty had 16.7 percent higher levels of career productivity standardized by teaching field than men. Hispanic faculty were found to be 17.1 percent more productive than faculty of other race groups. The implications of these and other findings for higher education are discussed. Four appendices provide multivariate analysis data. (Contains 38 references.) (MDM)

This paper proposes a model for graduate student success and reports the results of a study of factors affecting the success of 40 first-year graduate students. Based on a review of the literature, a four-element

ment model for graduate success was devised that focused on: (1) immersion in research activities; (2) academic regimen and planning; (3) social management; and (4) self-management. Based on interviews with 40 first-year graduate students from various departments in a research university, along with graduate directors and several advanced graduate students, the study found that departmental climate had a significant impact on the success of graduates students. It found that while most departments in the study sponsored one or two informal social events for incoming graduate students and faculty, the most successful department in the study sponsored 42, including a weekly dinner hosted by each faculty member. This department also helped foster interactions among the students, encouraged students to complete program requirements in a timely manner, and immersed students in research projects. Suggestions for helping departments improve the success rates of their graduate students are included. (Contains 28 references.) (MDM)

Identifiers—*ASHE Annual Meeting, Carnegie Foundation for Advancement of Teaching, *Faculty Attitudes

This study examined the role of female/male wage differentials in a model of job satisfaction. It is based on data from 3,021 respondents to the 1989 Carnegie Foundation for the Advancement of Teaching national faculty survey. The model considers the interrelated effects of the calculated wage differential, stress, social perceptions of students, academic perceptions of students, perceptions of the administration, perceptions of the institution, global job satisfaction, perceptions of influence and participation, tenure, rank, perceptions of collegiality, and intent to remain in academia. The study hypothesized that the magnitude of the gender-based wage differential not only affected global job satisfaction but also intentions to remain in academia, perceived stress level, perceptions of collegiality, and perception of the institution among female faculty. The findings indicated that, as gender-based wage differentials increased, global job satisfaction of female faculty decreased. (Contains 94 references.) (MDM)

Identifiers—*ASHE Annual Meeting, Heidegger (Martin)

This paper discusses the importance of pilot studies in the development and implementation of a research project, focusing on the use of a pilot study to revise conceptual and methodological issues in dissertation research on higher education leadership. It examines the hermeneutic circle, as described by M. Heidegger, that stresses the importance of involvement and participation in practical activity as necessary to the development of

understanding. The paper then describes the conceptual framework, research focus and goals, and methodology of a pilot study on inclusive higher education leadership models. Finally, it discusses how the pilot study helped to identify methodological changes in the dissertation research project, including the unit of analysis, data collection, the interview process, analysis, and interpretations. The paper illustrates the importance of grounding the research process in practical activity, highlights how reflection can help improve research practice, suggests the value of day-to-day experiences in shaping research, and emphasizes the importance of re-iterative studies and emergent research. Identifiers—*ASHE Annual Meeting, *Performance Funding

This paper reviews the concept of performance funding (PF) in governmental and higher education budgeting at the state level, reports the results of a recent national study of state-level PF for higher education, and assesses the likelihood that PF will become a permanent fixture in most states' approaches to budgeting for higher education. The study is based on a mail survey of 40 state higher education finance officers, which sought information on the status of PF in the respondents' states, the breadth of PF programs, program objectives, program history, program mechanics, performance measures and evaluation, and the respondents' observations on the effectiveness and future outlook for PF. It found that, despite the rhetoric from governors and state legislatures about the need for increased accountability for higher education, only eight of the states surveyed (20 percent) had PF in place, and that the majority had no current plans to implement PF for higher education. The survey did find that policy-makers were generally perceived by the respondents as viewing PF as an effective management tool. A copy of the survey form is included. (Contains 12 references.) Clott, Christopher B.

The Effects of Environment, Strategy, Culture, and Resource Dependency on Perceptions of Organizational Effectiveness of Schools of Business. ASHE Annual Meeting Paper.

Pub Date—Nov 95

Note—32p.; Paper presented at the Annual Meeting of the Association for the Study of Higher Education (20th, Orlando, FL, November 2-5, 1995).

Pub Type—Reports - Research (143) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—*Business Education, Environmental Influences, Higher Education, Models, *Organizational Effectiveness, *Predictor Variables, Resource Allocation, Strategic Planning. Identifiers—*ASHE Annual Meeting, *Cameron Model of Organizational Effectiveness, Organizational Culture

This study utilized Cameron's (1978) construct of organizational effectiveness to identify the relationship between the predictor variables of: (1) managerial strategy; (2) organizational culture; (3) change in the external environment; and (4) resource dependency, using causal modeling procedures. This construct is a theoretical framework that incorporates the use of multiple perspectives that can be recorded in relationship to one another. The study is based on a survey of 304 academic deans of American Assembly of Collegiate Schools of Business member programs for the United States and Canada. The findings suggest that internal organiza-

tional culture has the most important influence on organizational effectiveness, with some support for managerial strategy as a key indicator of effectiveness. (Contains 74 references.) (Author/MDM)

The Accentuation Effect of Academic Majors on Undergraduate Work Values and Holland's Theory. ASHE Annual Meeting Paper.

Pub Date—Nov 95

Note—28p.; Paper presented at the Annual Meeting of the Association for the Study of Higher Education (20th, Orlando, FL, November 2-5, 1995).

Pub Type—Reports - Research (143) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Altruism, Creativity, Higher Education, *Influences, *Majors (Students), Student Attitudes, Success, *Talent, *Undergraduate Students, *Values, *Work Attitudes

Identifiers—*ASHE Annual Meeting, Cooperative Institutional Research Program, *Hollands Theory of Occupational Choice

This study examined the accentuation effects of academic majors on the work values of undergraduates at four-year colleges and universities, focusing on five variables: (1) career eminence; (2) financial success; (3) administrative leadership; (4) expression of artistic creativity; and (5) altruism. It is based on Holland's theory of career choice as a conceptual framework, in which most individuals can be categorized as one of six types based on their vocational interests: Realistic, Investigative, Artistic, Social, Enterprising, or Conventional (RIASEC). Using student data (n=3,000 students) from the Cooperative Institutional Research Program 1985-89 database, sponsored by the Graduate School of Education at the University of California, Los Angeles and the American Council on Education, the study classified student majors using the RIASEC typology and examined their effects on the five variables. It found that the six types of majors differed significantly in all of the work values except career eminence. For financial success and administrative leadership, the Enterprising, Conventional, and Realistic types had higher mean scores than the Social, Investigative, and Artistic types. Regarding expression of artistic creativity, the Artistic type had significantly higher scores than the other types, while on altruism, the Social and Artistic types scored highest. Descriptors—*Attitude Change, College Freshmen, *College Students, Cross Cultural Training, *Cultural Awareness, Higher Education, Human Relations Programs, Majors (Students), *Racial Attitudes, Socioeconomic Influences, Student Experience, Whites, *Workshops

Identifiers—*ASHE Annual Meeting, *Diversity (Student), National Study of Student Learning

This study examined the effectiveness of racial and cultural awareness programs on the attitudes of white college students toward diversity on campus. It is based on a subset of students included in the National Study of Student Learning, specifically 1,061 white first-year undergraduates at 17 institutions, who answered questionnaires immediately before starting college, at the end of their first year, and at the end of their second year. The study found that, after controlling for family income, father's education, and degree aspirations, both sex and major field were significantly related to students' pre-collegiate attitudes toward diversity on campus. Students who stayed in conservative majors during their first two years in college were significantly less likely to participate in a racial or cultural awareness

workshop during their first year in college than students who stayed in liberal majors. Finally, the study found that students who participated in racial or cultural awareness workshops developed more favorable attitudes toward diversity on campus. This finding is of particular importance because students in conservative majors (especially male students) start college with significantly less favorable attitudes toward diversity on campus. Responsive Work: Student Impact on the Construction of Feminist Teaching. ASHE Annual Meeting Paper.

Pub Date—30 Sep 95

Note—26p; Paper presented at the Annual Meeting of the Association for the Study of Higher Education (20th, Orlando, FL, November 2-5, 1995).

Pub Type—Reports - Research (143) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Classroom Techniques, *College Instruction, *Feminism, Higher Education, *Influences, Interviews, Observation, Power Structure, Self Evaluation (Individuals), Student Experience, *Teacher Student Relationship, Teaching Methods, *Women Faculty

Identifiers—*ASHE Annual Meeting, Faculty Attitudes, *Poststructuralism

This study used feminist poststructuralist analysis to examine ways in which the relationships between college students and faculty influenced the enactment of feminist teaching. It used open-ended interviews with 22 faculty, the majority of whom were either affiliated with the women's studies program or were in a department in the School of Education, all of whom were employed at a large midwestern university, as well as observations of the teaching strategies and philosophies of two of the participants. Using the interview and observation data, the study examined how feminist teachers incorporated student experience into their teaching, identity construction in feminist teaching, political identity, and identity as a teaching tool. Descriptors—Age Differences, Assistantships, Citizenship, Doctoral Degrees, Fellowships, Graduate Students, *Graduate Study, Higher Education, Influences, *Majors (Students), *Minority Groups, *Racial Differences, Sex Differences, *Student Financial Aid, Student Loan Programs

Identifiers—*ASHE Annual Meeting, National Postsecondary Student Aid Study

This paper provides an overview of graduate education financial aid statistics and the results of a study designed to compare minority and white graduate students' chances of receiving various forms of financial aid by virtue of a range of background characteristics. The study, which sought to replicate earlier research by Malaney (1987), is based on a subset of data from the 1989-90 National Postsecondary Student Aid Study, namely 7,318 masters and doctoral students. It sought to test the hypothesis that on the basis of citizenship, degree level, sex, ethnicity, age, cumulative grade point average, and area of study (pure, applied, hard, soft, life, or nonlife), minorities involved in doctoral study would have an equal probability with non-minorities in receiving fellowships, grants, assistantships, or taking out loans. The study found that while minorities were more likely to receive fellowships than nonminorities, minorities were less likely than nonminorities to receive administrative assistantships. Students in pure fields were found to be more likely to receive financial aid than students in applied fields. An appendix contains the classification scheme for pure, applied, hard, soft, life, and nonlife fields. (Contains 18 references.) (MDM)

Descriptors—Academic Achievement, Activism, *Blacks, *College Students, Group Dynamics, Higher Education, *Influences, *Peer Groups, *Peer Relationship, Self Esteem, Stress Variables

Identifiers—African Americans, *ASHE Annual Meeting, Cooperative Institutional Research Program

This study examined the influence of the African American college student peer group on its members, focusing on the extent to which the peer group impacts the education of its members, and how the process of peer influence occurs within the group. Using social comparison theory, the study drew on a subset of data from a national study sponsored by the Cooperative Institutional Research Program database, conducted by the Higher Education Research Institute at the University of California, Los Angeles (UCLA), namely 425 African American first-year college students at predominantly white institutions. The results of factor analyses indicated that the types of characteristics that describe the makeup of campus peer groups are very similar among African American and white students. The results also indicated that although entering characteristics of students were the most instrumental in affecting self-concept and political orientation, peer groups influence was also evident in these areas. The relative influence of white peer groups, however, appears to be stronger and more prevalent. Two appendixes provide information on variable blocks and peer factors. (Contains 30 references.) Governing Boards in Canadian Universities: Characteristics, Role, Function, Accountability, and Representativeness. ASHE Annual Meeting Paper.

Pub Date—Nov 95

Note—30p; Paper presented at the Annual Meeting of the Association for the Study of Higher Education (20th, Orlando, FL, November 2-5, 1995).

Pub Type—Reports - Research (143) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Accountability, Administrative Organization, College Administration, Cross Cultural Studies, Foreign Countries, *Governing Boards, Higher Education, *Institutional Characteristics, National Surveys, Role, *Universities

Identifiers—*ASHE Annual Meeting, *Canada

This paper presents the highlights of a national survey of governing boards and board members of Canadian universities. A total of 45 of the country's 59 provincially-supported university boards responded to the survey, which was followed up by a survey of the individual board members of the 45 responding institutions, which received 583 responses (49% response rate). The survey found that 39 of the responding institutions possessed a bicameral governance structure, with a governing board and a faculty senate. Various demographic characteristics of board members are reported. Board members reported, on average, that they worked on board matters 10.3 hours per month. Compared to governing boards at state-supported universities in the United States, the boards of provincially-supported Canadian universities included more student and faculty members and more females. While 77 percent of American boards were appointed by the state government, Canadian boards were appointed by a variety of methods, with the three most common, each accounting for about a quarter of the total, being appointment by provincial governments, by the board itself, and by constituency groups. Identifiers—*ASHE Annual Meeting, Cooperative Institutional Research Program, *Date Rape

This study examined freshman college students' attitudes about date rape and how such attitudes changed over the course of their college experience. It is based on a subset of data from the 1990 annual national survey of freshmen and a follow-up study in 1994 collected by the Cooperative Institutional Research Program (CIRP) survey, namely 10,155 students attending 76 colleges and universities, as well as data from previous CIRP surveys. The study found that 87 percent of incoming students in 1989 reported being intolerant of date rape, while 90 percent of incoming students in 1994 reported being intolerant of date rape. It also found that while 75 percent of incoming students in 1990 reported being strongly intolerant of date rape, 84 percent of fourth-year students in 1994 reported being strongly intolerant of date rape. Female students were found to be more intolerant of date rape than male students, while Native-American freshmen were most strongly intolerant of date rape, followed in descending order by Puerto Ricans, Caucasians, Asian-Americans, Chicano/a, and African-American freshmen. Other racial, religious, political, and institutional influences on attitudes about date rape are also considered. (Contains 48 references.) (MDM)

Descriptors—*College Choice, *College Students, Educational Attainment, Grants, Higher Education, Influences, *Low Income Groups, Parent Student Relationship, *Paying for College, Peer Influence, *Private Colleges, Student Loan Programs

Identifiers—*ASHE Annual Meeting

This paper examines some of the factors that affect the college choice of students from low-income families, specifically as it relates to college costs, and presents the results of a qualitative study on the factors that motivated the college attendance and choice of eight students from low-income families enrolled at a small, moderately selective Christian liberal arts college. In-depth interviews with the eight students revealed that there was a predisposition to attend college through either being told from an early age that they would go or experiencing a critical incident which crystallized the importance of college attendance. Students tended to choose the institution they attended due to its small size and friendly, home-like atmosphere. The majority of the students interviewed did not rely on their parents for any significant financial support, and were worried about the costs involved in attending a private college where tuition approached \$13,000 per year. All of the students relied on grants, loans, and/or part-time employment to cover their educational expenses. Other factors affecting college choice, such as peer and parent influence and prior knowledge of the college, were also explored. (Contains 25 references.) (MDM)

Reexamination of the Model Minority Stereotype:

An Analysis of Factors Affecting Higher Education Aspirations of Asian American Students. ASHE Annual Meeting Paper.

Pub Date—Nov 95

Note—35p.; Paper presented at the Annual Meeting of the Association for the Study of Higher Education (20th, Orlando, FL, November 2-5, 1995).

Pub Type—Reports - Research (143) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC03 Plus Postage.

Descriptors—*Academic Achievement, *Academic Aspiration, *Asian Americans, College Bound Students, Cultural Influences, Employment Level, *Ethnic Stereotypes, Higher Education, High Schools, *High School Students, Institutional Characteristics, Parent Student Relationship, Racial Differences, Self Concept, Socioeconomic Influences, Student Attitudes

Identifiers—*ASHE Annual Meeting, *Asian American Students, Model Minority Thesis, National Education Longitudinal Study 1988

This study explored the model minority stereotype by examining the differences between Asian American students and other racial groups in terms of higher education aspirations, academic achievement, and socioeconomic characteristics. It is based on subset of data from the 1988 National Education Longitudinal Study, namely 973 Asian American, 939 African American, 934 Latino, and 974 white 10th graders. The study compared student socioeconomic influences and numerous variables affecting academic aspiration and achievement. It concluded that unlike the generally-held perception, the achievement of Asian American students as a group is not shared by all Asian American students. Although Asian Americans as a group excel over white, African American, and Latino students, higher educational level does not appear to lead to higher occupational status for Asian Americans, as it does for white Americans. The study also found that South Asians tended to have the highest academic achievement of all Asian American groups, followed by Chinese, Southeast Asians, Koreans, Filipinos, and Japanese. Parental expectations, self-concept, and vision appeared to be the most important factors affecting higher education aspiration, regardless of the racial background of the students. An appendix provides frequency distributions, regression models, and

other statistical data. (Contains 39 references.) (MDM)

Identifiers—*ASHE Annual Meeting, National Education Longitudinal Study 1988

This study examined variables related to college predisposition among students of different ethnic groups who attended schools enrolling high percentages of minority students and high percentages of students participating in free or subsidized school lunch programs. It is based on a subset of data from the 1988 National Education Longitudinal Study, namely 739 African American, 727 Hispanic, 329 Anglo American, 120 Asian/Pacific Islander, and 62 Native American eighth graders. In the analysis of the overall eighth grade model, participation in school activities was significantly associated with background variables such as high family socioeconomic status, for example, and was itself a significant variable in modeling predisposition to attend college. However, in the aggregate model of eighth graders at high minority enrollment, high school lunch program participation schools, ethnicity was the only background variable significantly associated with school activities participation, and such participation proved to be insignificant in modeling college predisposition. Explained variance in college predisposition was highest for the model using data from eighth graders in general (50 percent) and lowest in the model using African American student data (21 percent). An appendix contains a list of variables and other statistical data. (Contains 16 references.) (MDM)

Descriptors—*Classroom Communication, *College Instruction, *Discourse Analysis, Epistemology, Ethical Instruction, Higher Education, Humanities Instruction, Mathematics Instruction, *Moral Values, Science Instruction, Social Sciences, *Student Evaluation, Teacher Attitudes, Teacher Student Relationship, Values Education

Identifiers—*ASHE Annual Meeting, Faculty Attitudes, Rokeach Value Survey

This study examined the moral values embedded in the instruction and practice of higher education, focusing on instruction within three disciplines at a mid-sized residential university in the Pacific Northwest over the course of three semesters. Through classroom observations and transcriptions of tapes of classroom interaction in 46 undergraduate classes, the study examined faculty discussions of student evaluation and grading, using Rokeach's (1973) typology of values. Three vignettes from the classroom transcriptions are provided to show that the relationship between the faculty and students is less important than their respective relationships to the content. These models attempt to show that according to the realist discourse, knowledge/power originates from the discipline's content and acts on both the faculty and the student. The script employed by faculty in the hard sciences and math-

ematics conveyed a message that affirmed obedience to the knowledge paradigm of the discipline, while the script employed by faculty in the social sciences and humanities emphasized the interpretation of knowledge as a human responsibility. (Contains 63 references.) (MDM)

Reasons for and Products of Faculty Sabbatical Leaves. ASHE Annual Meeting Paper.

Pub Date—Nov 95

Note—23p.; Paper presented at the Annual Meeting of the Association for the Study of Higher Education (20th, Orlando, FL, November 2-5, 1995).

Pub Type—Reports - Research (143) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC03 Plus Postage.

Descriptors—*College Faculty, Faculty Development, Faculty Publishing, Higher Education, *Productivity, Research, *Sabbatical Leaves

Identifiers—*ASHE Annual Meeting

This study examined the reasons for and products of faculty sabbatical leaves, using data from 193 approved sabbatical applications and 125 sabbatical reports submitted between 1991 and 1993 at a public research university in the midwest. It found that of the 193 successful applicants, 164 actually completed the sabbatical, and that approximately 3.8 percent of the institution's faculty were on sabbatical at any one time. Most of the faculty indicated in their application that they intended to use the sabbatical primarily to conduct research (49 percent) or to write (21 percent). In aggregate, the 125 faculty who submitted post-sabbatical reports indicated that the following products were directly attributed to the sabbatical: (1) 42 books or manuscripts; (2) 26 book chapters; (3) 4 monographs; (4) 91 published articles; (5) 65 papers submitted for publication; (6) over \$1.3 million in secured research grants; (7) 36 grant proposals submitted; (8) 94 talks, presentations, or invited lectures; (9) 13 new or revised courses developed; (10) 2 music compositions; (11) 1 conference; and (12) 1 analytical report. The results of the study are discussed in light of recent criticisms of faculty productivity and the value of sabbaticals. (MDM)

Descriptors—*Colleges, *Court Litigation, Court Role, Higher Education, Local Government, Nonprofit Organizations, *Property Taxes, *School Community Relationship, *Universities

Identifiers—*ASHE Annual Meeting, Tax Exemptions

This paper examines the current trends in local property tax assessment on institutions of higher education and extrapolates the possible effects these trends may have on colleges and universities in the future. It discusses the exemption from local property taxes that most higher education institutions traditionally have had, as well as recent efforts by localities to review these exemptions, especially in times of fiscal distress. The paper reviews specific cases in which local governments have challenged the tax exempt status of specific institutions. It then examines specific strategies that local governments have used to challenge the tax exempt status of specific properties owned by colleges and universities, including properties used for residential purposes, leased facilities, and properties used for noneducational purposes. The paper also reviews cases in which local authorities have requested payments in lieu of taxes. Two appendices provide summaries of selected cases. A total of 31 cases are cited. This study examined faculty attitudes toward doctoral persistence, using open-ended interviews with 40 faculty in 6 disciplines at a Carnegie Classification Research I university. It found that the overriding theme that emerged from the interviews was the investment of time and energy with doctoral students. The majority of faculty reported that they had no regular or formal communication with their doctoral students, while many felt that students were not assertive enough and not committed enough to completing their degree. Faculty also discussed their role as advocate for their students, the preparation of students, and the state of the academic job market. The study concludes that faculty perspectives and expectations of students reflect internal contradictions, in that faculty expect students to be assertive and independent without realizing the highly unequal power relationship between doctoral students and faculty. Faculty themselves also take little responsibility for the progress of their students, the study noted. It also asserts that faculty perspectives were contradictory to recommendations of national policymakers for improving doctoral degree completion. (Contains 20 references.) (MDM)

Descriptors—*Academic Aspiration, College Faculty, *College Students, *Graduate Study, Higher Education, *Predictor Variables, Research, Student Attitudes, *Teacher Student Relationship Identifiers—*ASHE Annual Meeting, Cooperative Institutional Research Program, Faculty Attitudes

This study examined the effect that faculty-student interaction had on the degree aspirations of students, focusing on specific types of interactions that were important in predicting higher degree aspirations. It is based on a subset of student and faculty data from the 1985 freshman survey and 1989 follow-up survey, 1989 faculty survey collected by the Cooperative Institutional Research Program survey. The study focused on student background variables and degree aspirations as entering freshmen and as fourth-year students, as well as faculty and institutional characteristics and Scholastic Aptitude Test (SAT) scores. The findings indicated that as the amount of contact with faculty increased, so did student degree aspirations. Students who spent more hours with faculty, who were invited to professors' homes, or who worked on a professor's research project were more likely to aspire to graduate study than those students who did not. demology, Health Promotion, Higher Education, Knowledge Level, *Sexuality, Socioeconomic Influences, *Student Attitudes, *Student Behavior Identifiers—*ASHE Annual Meeting, *Condoms

This study examined condom use by college students and factors associated with consistent condom use. It is based on a survey of 212 sexually active residential students at a major eastern doctoral granting institution conducted in the spring of 1994. The survey found that a substantial number of sexually active students were engaging in behaviors that put them at high risk for human immunodeficiency virus (HIV) infection. It found that nearly two-thirds did not consistently use condoms during sex, and that an equivalent percentage reported consuming alcohol or using drugs in situations potentially leading to sexual intercourse. These results were considered surprising in view of the high knowledge level the students displayed in regard to the causes of HIV. Students also reported low self-perceptions of risk for contracting HIV. The study also found that race, gender, parental education level, and family income were not related to condom usage. It concludes that while college students have a high awareness level of the causes of HIV infection and acquired immune deficiency syndrome (AIDS), they are not likely to adopt HIV-safe behaviors. The implications for HIV/AIDS education programs are discussed. (Contains 39 references.) (MDM)

This study sought to ascertain how the press covers higher education and how public research universities work with the press to advance their agendas. It examined the coverage that eight newspapers devoted to six public research universities, namely the Universities of Pittsburgh, Colorado (Boulder), Minnesota, California (Berkeley), and California (San Diego), as well as Ohio State University and the University of California System Office. The study also interviewed newspaper and university officials regarding press coverage of higher education and specific institutions. The results indicated the differing roles that the newspapers had in regard to their coverage of the local university, focusing on reportage in regard to consumer advising, policing the university, window on the university, higher education politics, higher education trends, and social trends. The results compared the differing editorial policies of the newspapers in regard to news balance, thresholds of evidence for claims of wrongdoing, community expectations, use of informants, and "puff" pieces. ship, *Student Organizations, Student Participation

Identifiers—*ASHE Annual Meeting, *Asian American Students

In order to examine the gap between Asian American over-representation in higher education and their under-representation in leadership positions in United States society, this study examined leadership in a Japanese American college student organization, the "Tomo No Kai (Tomo)." In particular it examined the role of personal qualities, cultural values, and generational status in students' conceptions and practice of leadership. The study used a qualitative approach with data collected primarily through naturalistic observation techniques and interviews. The study included observation of various meetings and activities of the group and surveys of and semi-structured interviews with a selected sub-set of nine participants. Data analysis revealed that the organizational context of Tomo was bounded by students' reasons for joining the club, which was often to establish their own ethnic identity. According to participants, effective leadership was caring and nurturing, yet also hierarchical, a model with strong roots in Japanese-American culture. Interestingly, few Tomo members were involved in activities aimed at the student population as a whole, raising the question of whether these ethnic organizations hamper students' progress in the wider social context. Includes a copy of the survey. (Contains 23 references.) (JB)

This ethnographic study of the creation of a new public university, California State University, Monterey Bay (CSUMB), highlighted the struggle of the founders to build a collective identity based on a distinctive vision for the 21st century. The original plan envisioned a model pluralistic academic community with a culture of innovation that included a mission to serve historically under-educated and low income populations, a commitment to multi-lingual and multi-cultural values, instructional innovation, and collaborative administration. Using participant observation, formal and informal interviewing, and content analysis, the study began with systematic collection of documents related to the founding of CSUMB in March of 1993, attendance at meetings at the planning office in 1993 and 1994, and appointment of the researcher to a post at CSUMB as visiting scholar. The focus of data collection and analysis was on how people transformed values into organizational realities. Analysis of the process unfolding at CSUMB found that the process resembled a dramatic play: first a period devoted to setting the stage, next a prologue, then Act 1 as key players and the growing cast of characters share the excitement of coming together for opening in the fall of 1995, followed by Act 2 and a sense of fragmentation as traditional patterns confront the CSUMB vision of non-hierarchical organization. The process of culture formation at CSUMB appeared to be a dynamic and fluid struggle to identify, acknowledge, define, and solve problems. An appendix contains a copy of the CSUMB vision statement. (Contains 65 references.) (JB)

Descriptors—Adult Development, Adult Students, Age, Age Differences, Aging (Individuals), Educational Gerontology, *Graduate Study, Grief, Higher Education, *Individual Development, *Nontraditional Students, *Older Adults, Qualitative Research, Retirement, Self Esteem, *Undergraduate Study

Identifiers—*ASHE Annual Meeting

In seeking to explore theorists' claims that learning, education, and development in old age are linked, this qualitative study investigated how seeking a graduate or undergraduate degree functions in late-life development. Sixteen participants, ages 70 to 84, enrolled in higher education, were interviewed with a view to exploring their major developmental issues and how motivation, choice of degree, college environment, and social environment contributed to late-life development. Interviews were semi-structured, using an open-response interview guide. Data were analyzed using the constant comparative method of analysis described by Glaser and Strauss (1967) and Costas (1992). Findings indicated four developmental functions that seeking the degree met for the participants: (1) repairing or enhancing self-esteem; (2) keeping old age at a distance by staying mentally active and associating with younger generations; (3) developing a mature sense of caring both for self and for others; and (4) handling loss and the grieving process due to either retirement from work or death of a spouse. Descriptors—*Academic Aspiration, College Students, *Diversity (Institutional), *Educational Environment, Females, *Feminism, Graduate Study, Higher Education, Individual Differences, Minority Groups, *Multicultural Education, National Surveys, Racial Relations, Student Characteristics, *Student Development, Whites, Womens Studies

Identifiers—*ASHE Annual Meeting, Cooperative Institutional Research Program, Diversity (Student), Higher Education General Information Survey

In seeking to expand research on the actual effects of diversity on college students, this study investigated whether various multi-cultural and feminism-related variables at the individual, peer, and institutional levels significantly influenced educational degree ambitions among women. The study used data from the Cooperative Institutional Research Program 1985 Freshman Survey and 1989 Follow-up Survey as well as data gathered through a national 1989-90 Higher Education Research Institute (HERI) Faculty Survey, 1989 HERI Survey of Registrars, and the Higher Education General Information Survey (HEGIS) of Opening Fall Enrollments. The national survey reached 15,050 students attending 392 four-year colleges and universities. The study used the "Input-Environment-Outcome" methodological framework which controls for students' background characteristics in order to examine the effects of college environmental variables on a particular outcome. This study's dependent variable was a student's graduate degree aspirations. The study found that certain forms of diversity promote increased degree aspirations for white and minority women. It found that, though diversity variables at the institutional or peer level were less important, those that occurred at the individual level were important. These included a sense of feminism, the acts of socializing with someone of a different ethnic group, discussing racial/ethnic is-

suess, and taking a course in women and gender studies. The appendix contains a list of regression variables. (Contains 10 references.) (JB)

Identifiers—*ASHE Annual Meeting

With the current pressures for increased accountability and improved productivity, financial management in the study of higher education has become increasingly important. This study examined whether the "how" or the "why" of management were more important to prospective budget administrators. The study hypothesized that an emphasis on the "why" of budget management would better prepare administrators for the increasingly dynamic world of higher education finance. The study used a review of the literature related to teaching budget management and a survey of faculty teaching financial management in 76 higher education programs. Participants were also asked to share copies of their course syllabi with the study. A total of 56 responses were received along with 42 course syllabi. Some findings included the following: (1) only 24 programs required students to take budget management; (2) the top rated subject within courses was the role of the state in financing higher education followed by financial planning; (3) fully two-thirds of the courses had content that balanced the philosophical underpinnings of finance of higher education and the budget planning and management function; and (4) the subject of budget management and finance appeared to be more topical than conceptual and required a wide cross-section of articles and texts. The paper concludes with a discussion of and recommendations regarding instruction in higher education financial management. (Contains 20 references.) (JB)

Identifiers—*ASHE Annual Meeting, Communist Party, *Czech Republic, Soviet Education, Soviet Pedagogy, USSR

This paper describes some aspects of the transition taking place in Czech educational efforts since the "Velvet Revolution" of 1989, particularly changes in the teaching of civic education in the schools. The paper takes the position that governments find it important to mold new generations in areas of civic responsibility, whatever the nature of those governments, however controlling or free they may be. The paper is based on exploratory interviews with students, faculty, and administrators at the University of South Bohemia and at the Ministry of Education in 1992-94, as well as a limited review of the literature. A section on education under Communism describes the 40 year effort to remold Czechoslovak education in the image and likeness of the Soviet Union's education system and

following the principles of international communism. The next several sections describe the transitions to a post-communist educational system in basic education, secondary education, higher education and civic education. A section devoted to the transition period following the revolution goes into greater detail on the content of a new civic education which is seen as having the goal of providing students with the skills for individual responsibility and social participation, with ethical values, and with the ability to think critically. A final section offers recommendations for planning civic education curricula. (Contains 15 references.) (JB)

Identifiers—*ASHE Annual Meeting, City Colleges of Chicago IL Wright College, Community College of Philadelphia PA, Palo Alto College TX, Seattle Central Community College WA

As part of a larger exploration of the role of community colleges in bringing the poor, working class, and ethnic minorities into higher education, this study looked at how students and institutional cultures at four urban community colleges interacted to achieve unusually high transfer rates to four-year colleges and universities. In the 1994-95 academic year the study examined the Community College of Philadelphia (Pennsylvania), Wilbur Wright College in Chicago (Illinois), Palo Alto College in San Antonio (Texas), and Seattle Central Community College in Washington. Ethnographic researchers gathered 450 data elements from interviews with and observation of students, faculty, staff and administrators; attendance at institution-wide events; and collection of historical and archival documents. Though a single, consistent pattern of interaction between institutional and student cultures did not emerge from the analysis and individual portraits of the colleges revealed distinctly different institutions, each had an institutional culture that seemed to mesh with the unique attitudes, needs, and aspirations of their student bodies. The analysis also suggests that the ways this confluence occurred is situation specific. Whether students willingly adapt to the institutional culture or the culture adapts to the student, the ability of either culture to be adaptive appeared to be a key ingredient in the culture of these colleges. Includes a matrix comparing the four institutions. (Contains 47 references.) (JB)

Descriptors—Church Related Colleges, *Educational Economics, *Enrollment Management, Enrollment Trends, *Expenditures, Higher Education, National Surveys, Organizational Objectives, *Resource Allocation

Identifiers—*ASHE Annual Meeting, Association of Presbyterian Colleges and Univ

This study attempted to: (1) explore the enrollment patterns, enrollment goals, and expenditure demand ratios among Presbyterian-related colleges and universities; (2) determine the relationships between resource allocations in the form of expenditure demand ratios and enrollment goals; and (3)

determine relationships between expenditure demand ratios and the enrollment patterns at those institutions. The following data were collected from 65 member institutions of the Association of Presbyterian Colleges and Universities: selected institutional characteristics and enrollment goals; total student fall enrollment and enrollment by race for 5 years (1982, 1986, 1988, 1990, 1991); allocation figures for instruction, academic support, student services, and scholarships and fellowships; and total educational and general revenues for those same years. Findings included the following: expenditures on instruction tended to be 30 percent or higher at large institutions (with enrollments over 1,000 students) and less than 30 percent at smaller institutions; decreases in levels of spending on instruction were observed over the 10-year period; and levels of academic support expenditure demand ratios remained stable. Among conclusions are that institutions are focusing their resource allocations less on instruction of students and more on academic support to students, not including instruction; on student services, including student recruitment and retention programs; and on financial assistance in the form of institutional aid to students. Tables detailing the study's findings and the survey questionnaire are attached. (Contains 110 references.) (DB)

Identifiers—American College Testing Program, *ASHE Annual Meeting, *College Outcomes Survey

In response to the growing public interest in seeing that higher education institutions address the personal development needs of students, this study evaluated the personal and social growth of college students and introduced an index of personal and social growth of college students. The study used the new American College Testing Program's College Outcomes Survey (COS) with a national sample of 9,400 undergraduate students to evaluate the effects of college on the personal and social self-concept of students. Indexes of personal growth were developed for each of 36 items from Section 2, Part D of the COS, as an indicator of "college effect" which considers the interaction of student growth and the college role in that development. Application of these indexes indicated that colleges had substantial impact on 28 of the 36 items. A factor analysis was conducted that identified four general factors: intra-personal development, personal valuing and moral development, social leadership and development, and civic involvement and awareness. Examining the broad categories of college impact on student development showed that the highest index value was in the area of intra-personal development. Includes three tables. (Contains 30 references.) (JB)

Attitudes, Student Personnel Services, Teacher Student Relationship

Identifiers—*ASHE Annual Meeting, Tinto Theory, *University of Maryland Baltimore County

This study examined the academic and social integration of black students, all of whom were recipients of scholarships in a science and math scholarship program for black students at the University of Maryland (Baltimore County). The Meyerhoff program provides a range of support in addition to the scholarship support including study groups and personal and academic advising. This study compared 15 Meyerhoff scholars and 15 non-Meyerhoff white students with similar academic credentials. Qualitative data were collected from interviews (sophomore and senior years) with the Meyerhoff students and were organized around the six principles in Tinto's theory of student departure. Results pointed to a theme of black achiever isolation. Academically talented black students entered college with few, if any, academic relationships with other achieving black students. Meeting and studying with other talented black students was highly valued by the Meyerhoff participants. The study's conclusions also underscored the importance of strong relationships between faculty and students even when those faculty are predominantly white. The study's overall conclusion is that being in a "race-specific" program at a predominantly white institution contributed to the success of the students. The senior year interview form is appended. Identifiers—*ASHE Annual Meeting, *Diversity (Faculty), Minority Scholarships, Podberesky v Kirwan, United States v Fordice

This paper examines the link between the limited numbers of minority faculty in higher education and the availability of minority targeted scholarship programs. Two court cases are focused on: (1) U.S. & Ayers v. Fordice, a Mississippi higher education desegregation case, decided and remanded by the U.S. Supreme Court in 1992; and (2) Podberesky v. Kirwan, a Maryland desegregation case involving a successful challenge to a scholarship program for African Americans at the University of Maryland. After an introductory section, section 2 presents an overview of the legal and policy context in which the Fordice and Podberesky cases are embedded. Other related cases concerning affirmative action in Mississippi and Maryland are reviewed. Section 3 provides a detailed examination of the faculty "remnant" issue in Fordice, explaining how all parties in the case framed the issues and analyzed the data. The role of the Department of Education and the Government Accounting Office as related to minority targeted scholarships is directly addressed. Section 4 considers issues concerning the use of minority fellowship support programs to increase the numbers of qualified potential faculty members, whether they are mechanisms for ethnocentric separatism that segregate higher education further or are effective means for recruiting and involving talented minorities in the higher education enterprise. Section 5 addresses issues in the Fordice case as framed by the Supreme Court, the defense, and the government including fault, traceability, affirmative action, tenure, and desegregation and desegregation. (Contains 275 reference footnotes.) (DB)

Identifiers—*Upward Bound

This survey gathered information on programs at institutions of higher education that are designed to increase the access of educationally or economically disadvantaged elementary and secondary students to higher education. In addition the study aimed to compare Upward Bound, one prominent federally funded program, with others around the nation. Only the largest programs (based on funding) at each institution were included in the survey. Data were collected from two-year and four-year institutions in the fall of 1994. Of the 850 institutions surveyed, 813 responded. Highlights of the findings included: (1) 32 percent of all institutions offered at least one program for precollege students, and programs were especially common at large institutions and public institutions; (2) the largest programs served 317,400 students and involved 9,600 faculty and staff; (3) of the students in the largest programs, 68 percent were from low-income families, 59 percent were female, 39 percent were black, and 29 percent were Hispanic; (4) Upward Bound programs were more likely to have their students start in the freshman or sophomore years, were more intensive than other programs (with students spending a mean of 433 hours over the full year compared with 166 hours for other programs), and made greater use of reduced-price college courses. Appendixes contain tables of standard error and the survey questionnaire. (Author/JB)

This annotated bibliography lists books, papers, manuscripts and articles on higher education curricula for integrated service providers in the fields of health education and social service for at risk children, youth, and their families. The original project that produced the bibliography aimed to prepare professionals to understand the need to coordinate services for at risk populations at the local level and to have the knowledge and skills to develop locally integrated services for families. The bibliography is organized in sections with a brief description of content at the beginning of each section. Section 1, on descriptions and evaluations of integrated services

programs contains 65 entries. Section 2 contains 47 entries concerned with the policies, practices, procedures, theories, speculation, assumptions, and concepts of integrated services programs. Section 3 contains 25 entries on technical assistance and resources for modeling, questions and answers, and problem solving. Section 4 contains 35 entries on interprofessional education and training programs at the college and inservice levels, on the need for such training, and on suggested courses. Section 5 lists 8 resource directories and bibliographies. Section 6 lists 17 publications of general interest in understanding challenges facing children and their families. Publications dates range from 1981 to items "in press" at the time when the bibliography was published. (JB)

Student Aid in New Jersey: A Successful Past, An Uncertain Future.
Institute for Higher Education Policy, Washington, DC.

Spons Agency—New Jersey State Coll. Governing Boards Association, Inc., Trenton.

Pub Date—Dec 95

Note—66p.

Pub Type—Reports - Evaluative (142)

EDRS Price - MF01/PC03 Plus Postage.

Descriptors—College Applicants, Educational Finance, Federal Programs, Financial Aid Applicants, Grants, Higher Education, Paying for College, Program Evaluation, State Aid, State Colleges, *State Programs, *Student Financial Aid, Student Loan Programs

Identifiers—*New Jersey

In light of significant restructuring in New Jersey higher education and shrinking public funds, this project comprehensively examined New Jersey's system of financial aid. It was conducted through the compilation and assessment of program data as well as through interviews with several individuals in the New Jersey higher education community. The project looked at the system as it is currently functioning, at state appropriations, and at the population served. Some key findings include: (1) New Jersey concentrates most of its financial assistance in the form of grants with 75 percent appropriated to the Tuition Aid Grant program (TAG); (2) at the state's commitment to grant aid has placed it at the top of national rankings for aid awarded to undergraduates; (3) for needy students, TAG awards have significantly reduced the cost of attendance at New Jersey colleges and universities; and (4) TAG grants have softened the impact of recent years' tuition hikes at state colleges and universities. A final section presents policy options including establishing clear and definitive priorities for state student aid programs, consolidating and streamlining the "merit-based" programs, establishing mechanisms for measuring and demonstrating the success of aid programs, improving student aid funding and delivery stability, and continuing to assess the purpose and need for a state supplemental loan program. Spring 1995 Enrollment. South Dakota Public and Private Colleges and Universities.

South Dakota Board of Regents, Pierre.

Pub Date—Jul 95

Note—133p.; Portions printed on colored paper.

Pub Type—Numerical/Quantitative Data (110)

EDRS Price - MF01/PC06 Plus Postage.

Descriptors—Academic Aspiration, Age, College Credits, College Students, *Enrollment, Enrollment Data, Enrollment Trends, Ethnic Origins, Full Time, Equivalency, Graduate Students, In State Education, High School Graduates, In State Students, Out of State Students, *Private Colleges, State Aid, *State Colleges, Student Financial Aid, Technical Institutes

Identifiers—*South Dakota

This report details enrollment in South Dakota colleges and universities as of the close of the second week of the 1995 Spring term. The tables present data by headcount and full-time equivalent enrollment. Opening tables show headcount enrollment for public and private institutions and public full time equivalent and headcount historical enrollment for spring 1973 through 1995. Thirty-two tables show enrollment for 1994 and 1995 supported by state funds at public and private colleges for special and terminal students, for graduate students, for degree-credit undergraduates, for special and terminal and graduate students, for resident and non-resi-

dent comparison, for resident students (a summary, degree-credit undergraduate students, special and terminal students, graduate students), for non-resident students (summary, degree-credit undergraduates students, special and terminal students, graduate students, special and terminal and graduate students), for distribution by undergraduate and graduate categories, for new registrants, for student age distribution, for student ethnic origin, for post-secondary enrollment in technical institutes, for trends in plans among the state's high school graduates, and for spring/fall comparison. Twenty-nine self-support public university enrollment tables show data for the same categories as for the state support and private institutions. Another 29 tables show the same types of data for unduplicated total public university enrollment. (JB)

College and University Waste Reduction and Recycled Product Procurement Activities, Barriers, and Assistance Strategies: Status Report.

California Integrated Waste Management Board, Sacramento.

Pub Date—Feb 95

Note—45p.

Pub Type—Reports - Descriptive (141) — Reports

- Evaluative (142)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—College Administration, Higher Education, Program Implementation, *Public Colleges, Public Policy, Purchasing, Recycling, School Policy, *Solid Wastes, State Legislation, *Waste Disposal

Identifiers—*California

In response to an official request for information and evaluation of solid waste production and management at California's public colleges and universities, this study examined existing conditions and barriers to solid waste reduction and recycled product procurement, and suggested assistance strategies. The examination found that these institutions are the largest generators of solid waste among state facilities, generating over 400,000 tons per year: 51 percent of the waste generated by all state facilities. Barriers to the implementation and reporting of diversion activities identified include insufficient administrative support, policies, mandates, and funding; insufficient knowledge of waste reduction methods and benefits; and lack of full-time coordinators. Recommended strategies to reduce waste include informing administrators of the economic benefits of waste reduction, providing information in the form of guides and videos, promoting networking through the campus recycler's e-mail network, and stimulating competition between campuses. Barriers to recycled product procurement identified include insufficient knowledge of sources, prices, and quality; insufficient mandates, policies, and administrative support; decentralized purchasing; and large workload of purchasing officers. Assistance strategies in this area recommended include encouraging participation in the State Agency Buy Recycled Campaign; and promoting the use of "Buy Recycled" guidance documents. Appendixes contain data on waste generation at specific institutions, relevant state legislation, and executive orders. (JB)

Identifiers—Direct Lending, Family Education Loan Program, Free Application for Federal Student Aid, *Oregon, Paul Douglas Teacher Scholarship Program, Robert C. Byrd Honors Scholarship Program, Stafford Student Loan Program

This publication is intended as a reference tool for secondary school counselors to help prospective postsecondary students with their financial aid application process. A section on student financial aid discusses how to apply for aid, when to apply, and

how the process proceeds. This section covers the federal government application form, Free Application for Federal Student Aid (FAFSA), as well as information specific to Oregon. The next section describes scholarships and grants administered by the Oregon State Scholarship Commission (OSSC) including four state-funded Oregon grants (Oregon Need Grant program, State Grant Supplemental Award, the Barber & Hairdresser Grant Program, and a program for disabled peace officers), two selected federal grant programs—the Paul Douglas Teacher Scholarship program and the Robert Byrd Honors Scholarship (though there is no funding for the first and uncertain funding for the second), and 125 privately funded scholarships. The next section describes federal student loan programs including the Federal Family Education Loan program, the Federal Stafford Loans, Federal PLUS Loans, and Federal Direct Loans. Appendixes contain a copy of the FAFSA, Title IV codes for all Oregon colleges, further application information, a list of financial aid offices, a list of reference books and pamphlets, and the OSSC's World Wide Web page address. (Contains 21 references.) (JB)

Identifiers—Direct Lending, Family Education Loan Program, Free Application for Federal Student Aid, *Oregon, *Oregon State Scholarship Commission, Stafford Student Loan Program

This publication reports on the activities of the Oregon State Scholarship Commission (OSSC) and the status of the programs it oversees during the two-year period from July 1, 1993 through June 30, 1995. A brief report from the executive director reviews the period's substantial reductions in state funds and rapid growth in private award programs. A financial statement for the period is provided as well as a discussion of reduction in the Scholarship Commission Budget, creation of a Community Service Volunteer program, changes in federal loan programs, and the start of 35 new private award programs. A discussion of state loans and grants reports on the status, number of participants, and funds used for the Need Grant program, the Barber and Hairdresser Grant, the Oregon Nursing Loan Program, the Oregon Rural Health Services Program, the Higher Education Community Service Voucher program, and Volunteers in Service to Oregon. Similar data are offered for two federal programs, the Paul Douglas Teacher Scholarship, and the Robert C. Byrd Honor Scholarship program. A further section lists privately funded award programs placed with the OSSC during the biennium. A final section reports on participants and funds for OSSC-Guaranteed Federal Family Education Loans (FFEL). Appendixes contain data on distribution of Need Grants, private awards, and OSSC-Guaranteed FFEL loans. (JB)

This almanac contains 20 tables on Oregon higher education financial aid developed with data that the Oregon State Scholarship Commission collected when it surveyed 71 institutions in the state in October, 1993. Other sources of information include files of the Oregon Federal Family Education Loan program, Federal Department of Education summaries of Pell Grant disbursements, reports completed by institutions, and telephone conversations with college financial aid office personnel. The bulk of the document consists of the tables displaying data. Two opening summary tables provide data on programs, amounts, and types of assistance; and sources of assistance and basis of awards. Two graphs show reported disbursements by segment and type of program and state-wide disbursements by type of program. The following tables show program disbursements by institution and segment for major sources of aid (need-based programs, no-need programs, military programs, state need-based programs), major self-help programs (federal and state loans, students employment, and long-term institutional loans), and other sources of aid (miscellaneous aid, grants, programs, and programs external to institutions). Other information is on staffing of financial aid offices, proportions of undergraduates assisted, total enrollment/proportion aided, total aid awarded, and aid dollars per student. A glossary is included. (JB)

Identifiers—State Legislators, *State Legislatures

In the context of the increasing transfer of power from the federal government to state governments, this report analyzes existing data and offers critical information about state legislative higher education policy and insights into the values and attitudes legislators hold about higher education. The report's conclusions are based on a study that involved in-depth telephone interviews conducted in 1995 with 58 house and senate education committee chairs in 49 states. Section 1 describes the legislative and higher education environments which provide a context for legislative policy making. Sections 2 through 5 are organized around four general policy questions that emerged from the broad range of higher education issues and concerns addressed by state legislatures in 1995. These addressed: (1) new expectations and roles for higher education given its changing 'clientele' and emerging state priorities; (2) the organization and governance of higher education; (3) accommodating access to higher education with limited state resources; and (4) funding and accountability in higher education. Section 6, the conclusion, summarizes the findings on each of these issues and their implications. Appendixes contain a copy of the survey, information on the methodology, and a state data table. Descriptors—*Access to Education, Educational Finance, Educational History, *Educational Quality, *Federal Programs, Federal Regulation, *Government Role, Grants, Higher Education, Paying for College, Policy Formation, State Aid, State Federal Aid, State Programs, *Student Financial Aid, Student Loan Programs

This volume analyzes government policies for helping students pay for education beyond high school and was developed as a result of an October 1994 gathering of policymakers, analysts, and practitioners convened to review federal student assistance and to consider policy alternatives for the Clinton Administration. Chapter 1, "A Fifty-Year Retrospective on Federal Student Aid Policy," traces the evolution of federal postsecondary aid policies over the past 50 years and then reviews the themes and performance of the federal assistance programs. Chapter 2, "Toward the Next Century: Focusing the Debate," identifies a series of key policy questions on the structure and direction of the federal student assistance effort and then reports the main lines of debate when these questions were posed at the October 1994 conference. Chapter 3, "Conclusions: Seeking Guideposts for Reform," concludes by capturing salient points of divergence (in particular the relative importance of restructuring the aid system versus providing more funding for existing programs) and agreement (the need for policies that emphasize student retention and persistence as much as access, for programs that rely more on incentive than regulation, and for policies that distinguish between postsecondary sectors and types of institutions). Includes eight figures, seven tables, and a list of conference panelists and speakers and other participants. (Contains 19 references.) (JB)

Identifiers—*Agricultural Policy, Agricultural Sciences

This volume compiles and reprints the responses of 37 organizations to a series of questions issued by the House Committee on Agriculture in anticipation of debates concerning the Research Title of the 1995 Farm Bill due for updating and revision. The questions address some of the following topics: the role of the federal government in agricultural research, coordination and relations with other federal agencies, the suitability of various regulations and procedures, setting research priorities, integrating federal-state-industry research pools, effectiveness of coordinating and advisory boards, efficiency and accountability in administration of these federal funds, partnerships with other types of organizations, guidelines for use of federal funds, land grant universities' roles, fund allocation formulas, and regional research and extension cooperation. The organizations that responded to these questions include the Department of Agriculture, the Coalition on Funding Agricultural Research Mission, professional societies such as the Phytopathological Society and the Entomological Society of America, individual higher education institutions like the Universities of Minnesota and Arkansas and Ohio State University, international organizations such as

the World Bank and the International Food Policy Research Institute, and Associations such as the American Feed Industry Association and the Association of American Veterinary Medical Colleges. (JB)

Identifiers—Direct Lending, Elementary Secondary Education Act Title I, Loan Forgiveness, *Loan Forgiveness, Perkins Loan Program

This directory contains a list of public and other nonprofit private elementary and secondary schools designated as having a high concentration of students from low-income families and thus qualifying as teaching sites for teachers with Federal Perkins Loans and National Direct Student Loans who may be eligible to have their payments canceled or postponed while they teach in such schools. These are schools in which more than 30 percent of students qualify as low-income under Title I of the Elementary and Secondary Education Act funding formula. The Directory lists those schools in which a borrower may have a portion of his or her loan payments postponed and canceled if the borrower teaches full-time for a complete academic year in a selected elementary or secondary school during the 1995-96 school year. The Directory opens with a list of 1995-96 state designees with their addresses and telephone numbers. The bulk of the document is made up of lists of eligible schools and their grade levels organized alphabetically by state. (JB)

This historical analysis of American Protestant university-related divinity schools from the 1880s to the present focuses on powerful social and cultural ideas that decisively influenced American education in general and Protestant theological education in particular. The study argues that, in the service of ideas of specialization, professionalization, social reform, and pluralism, leaders of divinity schools willingly embraced and perpetuated the forces of change, joining the purposes of their institutions with those of the American university. The book draws most of its data from the records of 11 institutions—five non- or interdenominational divinity schools (the University of Chicago, Harvard University, Vanderbilt University, Yale University, and Union Theological Seminary)—and 6 Methodist schools (Boston University School of Theology, Claremont School of Theology at Emory University, Claremont School of Theology, Drew Theological School, Duke Divinity School, and Perkins School

of Theology at Southern Methodist University. In Part 1 three chapters address specialization. In Part 2 two chapters look at professionalization. In Part 3 three chapters examine formation and reform. In Part 4 two chapters look at pluralism. The final chapter looks at the ambiguities of this higher education heritage. Includes an index. (Contains 830 references.) (JB)

Identifiers—Malcolm Baldrige National Quality Award, *Twenty First Century, United Kingdom, *University of Michigan

This volume contains six essays on higher education which provide lessons and successful techniques for meeting the challenges of the future. The first essay, "Academic Renewal at Michigan" (James Duderstadt), describes the modern research university as a complex corporate conglomerate in danger of diluting its core business. The successful university, it argues, will maintain the centrality of student learning and faculty scholarship while focusing on transforming these core functions to take advantage of new technologies and respond to changing societal needs. The second essay, "The Future of Academic Tenure" (Richard P. Chait), explains that academic tenure stands on two legs: economic security and academic freedom and both of these are unstable in the current climate. Third, "Today in Higher Education" (Richard Lester) examines the implications of the wave of industrial restructuring for the academic world. The fourth essay, "Restructuring British Higher Education" (Graeme Davies), examines one country's approach to an important new development on governmental

funding for higher education—performance-based resource allocation. Next, "Applying Contribution Margin Analysis in a Research University" (Daniel J. Rodas, and others) describes an internally developed financial statement—the Stanford Cost Model—that summarizes cost and revenue data in a format highly useful for understanding and analyzing academic programs. In contrast to other cost analyses models, this one focuses on academic activity—the primary "business" of the institution. "Going for the Baldrige: Restructuring Academic Programs" (Dean Hubbard) discusses the Baldrige Criteria, and how Hubbard's institution began the process of incorporating the concepts and criteria into its planning process. Information on the authors is also provided. (JB)

Descriptors—Community Colleges, Educational Policy, Enrollment, Enrollment Influences, *Enrollment Projections, Enrollment Trends, Higher Education, Long Range Planning, Public Policy, State Universities, *Statewide Planning

Identifiers—*California, California Community Colleges, California State University, National Center for Higher Education Management, Rand Corporation, University of California, Western Interstate Commission for Higher Education

In light of various signs indicating significant enrollment growth in California higher education, this study reviewed nine available projections of undergraduate enrollment for California public higher education. The study reviewed enrollment forecasts from the California Department of Finance, the California Postsecondary Education Commission, the University of California (UC), an independent projection prepared for the UC campuses, California State University, California Community Colleges, the RAND Corporation, the National Center for Higher Education Management Systems, and the Western Interstate Commission on Higher Education. The study concluded that California should plan for a total undergraduate enrollment increase of about 488,000 students in the next decade, an increase from a total of 1.7 to 2.2 million students. This includes growth of about 29,000 students at the University of California, 74,000 students at the California State University, and 385,000 at the California Community Colleges. Forecasts were made in light of California's historical policy of assuring higher education opportunity for those who are motivated and qualified. The study also noted that this policy significantly drives enrollment projections, that there was significant agreement among the different projections, that segmental policies impact other segments, and that segmental policies affect "demand" for educational services. An appendix lists panel-members who conducted the review. (JB)

Descriptors—Accountability, College Students, Curriculum Design, *Developmental Studies Programs, Economically Disadvantaged, Educationally Disadvantaged, Females, Goal Orientation, Higher Education, *High Risk Students, Learning Disabilities, Nontraditional Students, Outreach Programs, Peer Teaching, Reentry Students, Research Papers (Students), Special Needs Students, *Student Development, Student Motivation, Student Placement, Summer Programs, Tutoring, Writing Instruction

Identifiers—Conation, Empowerment, Pennsylvania

This publication contains 11 conference papers on topics in developmental education. "The Conation Cycle: From Goal to Finished Product" (Joanne Cree Burger) is on motivation and a learning skills class. "Student Empowerment and Awakening Through Effective Placement Exams" (Robert Holderer) introduces the Modified Primary Trait Scoring System. "Summer Start: A Program to Equalize Accessibility and Responsibility for 'At Risk' Students Pursuing Higher Education" (Lou Tripodi, and others) describes a program at Clarion University in Pennsylvania. "Before Action, Thought: Basis Premises That Inspire Summer Programs" (Robert Miedel) describes a traditional introductory English course that added components to teach writing, critical thinking, and study skills. "Finally, A Way In: Case Writing and Educational Accountability" (Joan Mims) explores how teachers can share pedagogical responsibility through case writing. "Empowering Students with Learning Disabilities: A Partnership Between Students, Faculty, Counselors, and Disabled Student Services Providers" (Joan Sasala) describes the roles and aims that should be assigned to faculty and counselors helping the learning disabled. "Undergraduate Reentry Women's Perceptions of the Classroom Environment" (Caroline Wilkie and Sandra Dean) describes a study which found that reentry women faced negative feelings about themselves much more than reentry men did. "Six Steps to Writing a Research Paper From Beginning to End" (Karen O'Donnell and Mary Lou Palumbo) describes a teacher-developed approach. "New Thoughts on Outreach" (Joe Reilly) describes an outreach program aimed at educationally and economically disadvantaged students involving professional and paraprofessional tutoring and counseling. "Functional Curricula in the Workplace" (Elaine Weinberg) describes a program to develop and teach industry-focused, job-functional curricula for workers. "Training Writing Students Formally" (James Boswell) describes the development of a course to train undergraduate writing tutors. Most papers contain extensive references. (JB)

Inman, Marianne E.
Linking Planning and Budgeting through Business Process Redesign.

Pub Date—Mar 95
Note—8p; Paper presented at the Annual Meeting of the North Central Association of Colleges and Schools (Chicago, IL, March 1995).

Pub Type—Reports—Descriptive (141)—Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Budgeting, College Faculty, College Planning, Educational Finance, Higher Education, Institutional Mission, Organizational Effectiveness, *Participative Decision Making, *Private Colleges, Retrenchment, Staff Role, Strategic Planning, Total Quality Management, Identifiers—*Continuous Quality Improvement, Northland College WI. *Process Improvement

In the wake of an extensive strategic planning process that refocused institutional values at Northland College, Wisconsin, the administration undertook linking the budget with the newly articulated plan. Incremental budgeting was no longer feasible, and the new budget would have to reflect streamlining and new ways of functioning. Consequently Business Process Redesign and Continuous Quality Improvement processes were selected as guides. In the summer the president invited all faculty and staff to participate in upcoming deliberations. Following preliminary summer work, 14 cross-functional teams were formed to review in greater depth key processes and functions that might improve the budget and the overall quality of students' Northland experience. Throughout the fall work of teams proceeded quickly. About 90 percent of faculty and staff members were on one team or another. The most important changes emerged from the Program Review team which recommended dropping several concentrations within academic programs along with several courses. Other recommendations from other groups emerged and are being considered including a first year extended academic orientation course taught by faculty advisors. In the end a list of 14 mandates emerged from team and review committee work. Overall, the process increased understanding of all college systems, increased personal investment in coming change, and created a stronger and better institutional focus. (JB)

Descriptors—College Students, Employment Potential, Financial Aid Applicants, Grants, Higher Education, National Surveys, *Paying for College, *Postsecondary Education, Private Colleges, Professional Education, Proprietary Schools, Public Colleges, Student Attitudes, Student Characteristics, *Student Financial Aid, Student Loan Programs, Tables (Data), Two Year Colleges

Identifiers—Beginning Postsecondary Students Long Study, *National Postsecondary Student Aid Study

This CD-ROM presents data from the National Postsecondary Student Aid Studies (NPSAS) conducted in 1992-93, 1989-90, and 1986-87. Students who began their postsecondary education in 1989-90 were also surveyed in 1992 as part of the Beginning Postsecondary Students Longitudinal Study First Followup. The NPSAS is a comprehensive study that is examining how students and their families pay for postsecondary education. It includes nationally representative samples of undergraduates, graduates, and first-professional students, students attending less-than-two-year, two-year, four-year, and doctoral granting institutions. As a part of the 1993 NPSAS, information on more than 78,000 undergraduate and graduate students enrolled at any time during the 1992-93 school year was collected at about 1,100 postsecondary institutions. The sample represents students enrolled at any time between July 1, 1992-June 30, 1993. Major educational policy issues to be addressed by information collected during the study include: (1) how and why students continue their enrollment in postsecondary education; (2) how postsecondary education is financed; (3) what courses are taken and what grades and credits are earned; (4) fields of study pursued; (5) patterns of student transfers between colleges; (6) extent and timing of program completion; (7) attainment of degrees, licenses, or certificates; and (8) impact of postsecondary education on subsequent life experiences. An introductory file explains how to install the CD-ROM, limitations of the study, cautions about comparing data from the different years of the study, and additional information and restrictions on using and analyzing the data. A sampling of the variables included are: parents' contribution; parents' assets; parents' income; student's income; student's assets; student's marital status; place of residence; grade point average; Social Security Benefits; medical and dental expenses; existing student loans; room and board; transportation; citizenship; degree expectations; expected date of degree; student attitude toward institution; student employment plans. FREQUENCY: Biennial. TYPE OF SURVEY: Longitudinal. POPULATION: College Students. SAMPLE: 70,000 students from 1100 postsecondary institutions. YEAR OF LATEST DATA: 1993. YEAR OF EARLIEST DATA: 1986. (DB)

Student Exposure to Faculty at Institutions of Higher Education. Indicator of the Month.

National Center for Education Statistics (ED), Washington, DC.

Report No.—NCES-96-790

Pub Date—Oct 95

Note—4p.

Pub Type—Numerical/Quantitative Data (110)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*College Faculty, College Instruction, *College Students, Comparative Analysis, Educational Trends, Graduate Study, Higher Education, Institutional Characteristics, Instructional Program Divisions, Research Universities, *Teacher Student Relationship, Undergraduate Study, Universities

Identifiers—Comprehensive Universities, *Contact Hours, Liberal Arts Colleges

This bulletin presents national data on college student exposure to senior faculty at institutions of

higher education measured as the percentage of a student's classroom time spent with full or associate professors. Highlights of the data are: (1) at research, doctoral, and comprehensive institutions in both 1987 and 1992, the majority of upper division and graduate students' classroom exposure to faculty was with senior faculty (full or associate professors); (2) at comprehensive institutions in 1992, undergraduate students in lower division courses had less classroom exposure to senior faculty than did students in upper division courses; and (3) students in undergraduate courses at research institutions had about the same classroom exposure to senior-level faculty as did students in undergraduate courses at comprehensive and liberal arts institutions. The bulletin includes a table and a graph showing the percentage of classroom hours during which 4-year college and university students are exposed to faculty of different ranks, by type of institution, level of class, and course division in the fall of 1987 and 1992. (JB)

Cost Analysis of the Department's Initiative To Consolidate Debt Collection Service Loans into the Direct Loan Program. Audit Report.

Office of Inspector General (ED), Washington, DC. Report No.—ACN-11-50002

Pub Date—Jan 96

Note—22p.

Pub Type—Reports—Evaluative (142)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Cost Effectiveness, Cost Estimates, *Federal Programs, Financial Audits, Government Role, Higher Education, Loan Default, Loan Repayment, Policy Formation, Program Evaluation, *Student Loan Programs

Identifiers—*Debt Collection, Department of Education, *Direct Lending

An assessment of the cost-effectiveness of an initiative to target 823,278 defaulted student loans in the Debt Collection Service (DCS) for consolidation into the Direct Loan Program concluded that it was not cost-effective. The study found that the Department of Education's cost to consolidate about 80,000 DCS borrowers into the program would be about \$38 million due in large part to collection agency fees and service fees. Although the majority of the cost would be added to the borrower's principal loan balance, Income Contingent Repayment (ICR) collections would probably still not be sufficient to cover the cost of consolidation. In addition, while the borrower's loan was in the Direct Loan program the Department would lose revenue from involuntary collections. Based on the fact that DCS borrowers have a poor payment history, there is a strong possibility that these borrowers would default again or be allowed to make zero or minimal payments. DCS currently can accept payments based on the borrower's ability to pay and analysis of current collections indicates that the Department's expectations for the Direct Loans ICR plan may be overly optimistic. Also, DCS will soon have an ICR plan. The document includes information on the audit and its methodology, and Department of Education comments. (JB)

Identifiers—Canada, Connectivity, *Saskatchewan (Regina)

The Distance Education Network of the Sas-

katchewan School Trustees Association (SSTA) was established to provide leadership in exploring enhanced program delivery through distance education and information technology. This report, a product of three meetings of the Distance Education Network in 1995, begins the process of suggesting directions and identifying issues regarding the implementation of information technologies. Sections include the following: (1) "Assumptions..." assembles quotes concerning the irreversible impact of emerging technologies on society and education and describes a resource network called SchoolNet which aims to have all of Canada's schools and public libraries connected to the Internet by 1998; (2) "How Will Information Technologies Be Used?" offers questions to consider in clarifying the purpose of implementing technologies; (3) "Leadership and Coordination" discusses the importance of a vision for such implementation in Saskatchewan, evidenced by the development of necessary skills, incentives, online resources, and an action plan; (4) "Developing Partnerships" raises the possibility of a broad coalition of school boards and a working partnership with Saskatchewan long distance phone services; (5) "Planned Implementation" lists possible models or approaches for implementation; (6) "Directions and Promising Practice" highlights interactive televised instruction already offered in some parts of Saskatchewan and the possibility of learning from other provinces perceived to be more cutting-edge in this regard; and (7) "Research for Informed Decision Making" suggests topics for future inquiry. Appendices include acceptable use policies for information technology and reports the results of the 1995 Educational Technology and Distance Education Survey. (BEW)

Organizational and End-User Information Systems Model Curriculum.

Office Systems Research Association, Springfield, MO.

Pub Date—96

Note—39p; Cover title is "Organizational & End-User Information Systems: Curriculum Model for Undergraduate Education in Information Technology."

Pub Type—Guides—Classroom—Teacher (052)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—"Course Descriptions, Course Objectives, *Curriculum Design, Curriculum Development, *Information Systems, *Job Development, Learning Theories, Microcomputers, Models, Needs Assessment, Organizational Change, Performance Technology, Postsecondary Education, Users (Information), Work Environment

Identifiers—Curriculum Councils, *Multimedia Information Systems

One of the goals of the Office Systems Research Association (OSRA) is to ascertain the competencies needed by an information systems professional charged with organizational and personal performance technologies. This model curriculum, a major update of OSRA's 1986 Model Curriculum, emphasizes the technical aspects of multimedia desktop information systems. Crossing into behavioral science domains like job redesign, planned organizational change, and adult learning theory, the model also examines organizational and individual factors that are vital to the success of any new system. The curriculum is particularly geared for the end-user, or the person who actually uses these systems in daily work activities, who is increasingly playing a variety of roles in needs assessment, design, implementation, and evaluation. The model presents suggested designs for 11 separate courses, and each outline contains: (1) a course description; (2) a list of course outcomes, or abilities that a graduate of the course should be expected to have; (3) a course approach, or what kinds of class presentations or assignments might best accomplish course objectives; (4) course content, including a recommended percentage of the entire course that each topic should take up and a skill level that learners will need to undertake each topic; and (5) resources, often books, but also including journals and even agencies. (BEW)

Descriptors—"Collegiality, *Community, Computer Mediated Communication, *Electronic Mail, Elementary Secondary Education, Information Dissemination, Online Systems, *Teachers, *Teleconferencing

Identifiers—*Listservs, North Carolina Center for

Advancement of Teaching, Teacher Awareness, Teacher Cooperation, *Teacher Development

A number of present-day authors have noted factors that can work against or pose a threat to a sense of community, including the American propensity for individualism, industrialization, and the growth of mass communication and information technology. Some scholars have begun to suggest that schools, in particular, should get beyond mere contractual relations of barter to a relationship characterized by commitment and mutual obligations. This paper describes how a program at the North Carolina Center for the Advancement of Teaching (NCCAT) actually sought to use information technology in the form of computer conferencing to construct a community of teachers. The NCCAT program, called "Connected to the World," featured a 3-day residential seminar with attendees taking part in interactive electronic mail discussions both 2 months before and up to 1 month after. The program exemplified NCCAT's history of aiming to foster collegiality, inquiry, lifelong learning, and critical thinking among K-12 teachers. Only about half of the seminar attendees were able to participate in the online portion, but the other half were mailed printouts of comments from the listserv and had their own comments posted to the list. Three main topics emerged on the list, including how to deal with a student who tampered with a classmate's computer files and plagiarized her work, how the Internet will change how students and teachers work, and who should make decisions about age-appropriateness of information and library materials. The discussions that unfolded revealed that although computer conferencing is not a panacea for teacher development, it can foster awareness of wider issues in information technology, bring to attention multiple avenues for effectiveness in teaching many kinds of students, and aid reasoned, dialogic consideration of issues that are often given superficial treatment in the popular press. (Contains 23 references.) (BEW)

The Effect of Computer-Assisted Instruction on the Science Process Skills of Community College Students.

Pub Date—9 Nov 95

Note—39p; Paper presented at the Annual Meeting of the Mid-South Educational Research Association (November 9, 1995).

Pub Type—Reports—Research (143)—Speeches/Meeting Papers (150)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Autoinstructional Aids, Community Colleges, *Computer Assisted Instruction, Computer Software Evaluation, Courseware, *Instructional Effectiveness, Microcomputers, Postsecondary Education, Science Education, Science Instruction, *Science Process Skills, Two Year Colleges, *Two Year College Students

Identifiers—Integrated Skill Development, Science Majors

Science process skills include basic skills like observing, inferring, measuring, communicating, classifying, and predicting, as well as integrated skills like controlling variables, defining operationally, formulating hypotheses, interpreting data, experimenting, and formulating models. Recognition of the value of science process skills has resulted in the development of new instructional techniques and strategies. Some research suggests that computer-assisted instruction (CAI), in the form of self-instructional programs written for microcomputers, may be effective in teaching these skills. This study sought to develop a CAI module designed to improve the integrated science process skills of community college students, as measured by students' pre- and post-CAI scores on the Test of Integrated Process Skills (TIPS). Their scores on the Enhanced American College Testing Assessment (Enhanced ACT) were used as a balancing measure of academic aptitude. The CAI module, which during its development was also subject to formal evaluation by an expert review panel, included two tutorial programs and two laboratory simulations, and was examined in the study for ways in which it presented information, guided students through assimilation of new information, and provided practice to enhance understanding. The student sample consisted of 92 students enrolled in General Biology I for Science Majors (at a small, rural community college located in the southeastern United States), equally divided into a control group and an experimental group. The control group had the opportunity to use commer-

cially produced tutorials designed only to improve knowledge of biology content, while the experimental group used the CAI module for improving integrated process skills. The study revealed no significant difference between the mean gains of the control group and the experimental group (0.05 to 0.07), although the experimental group did show a more marked improvement on the individual subtest involving graphing and data interpretation. Nor did the effectiveness of CAI seem to be influenced by a student's academic aptitude or gender. The study's results suggest that instructors should not expect noticeable improvement in students' integrated science process skills. Due to the small scale and time constraints of this study, findings should be considered with some caution. Seven tables illustrate the data. (Contains 41 references.) (BEW)

Educational Telecommunication: Does It Work?

(An Attitude Study).

Pub Date—95

Note—16p.

Pub Type—Reports - Research (143)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Class Activities, Curriculum Development, *Educational Television, Instructional Effectiveness, Instructional Materials, Integrated Activities, Junior High Schools, *Science Curriculum, *Student Attitudes, *Student Surveys, Telecommunications

Identifiers—Instructional Variables, *Video Telecommunications

This study was planned to develop and evaluate an assessment component to measure student attitudes on science as influenced by subject matter presented via telecommunication. Use of technology to introduce varying, exciting, and effective education is becoming commonplace, and assessment of student attitudes is essential to evaluating, updating, and refining curriculum. This research examined the "Integrated Science" teaching process, involving known teaching techniques integrated with a video lesson. A questionnaire was developed, analyzed, tested, revised, and then given to 299 sixth-, seventh- and eighth-grade students in 14 Integrated Science classes at 3 schools which received the video lessons via telecast from a major southern U.S. university. The questionnaires established a means for evaluating the Integrated Science program as determined by attitude toward science monitoring. Variables affecting the study might include positive or negative feelings toward a teacher, subject matter, classroom environment, or classroom activities. The study results are being used to revise the Integrated Science curriculum. (Contains 23 references.) (BEW)

Descriptors—Qualitative Research, Research

Needs, Research Reports, Science and Society,

*Technological Literacy

Identifiers—Instructional Variables, Technology

Utilization

Technological efficiency is the knowledge, ability, and desire to create, select, apply, monitor, evaluate, communicate, and otherwise bring to fruition desired technology in a given context. This document is a qualitative synthesis of research related to technological efficacy, including exploration of its definition, psychometric properties of instruments, and studies of structures and correlates. Didactic, descriptive, and causal-comparative research efforts are summarized. Variables correlated to technological efficacy include: (1) affective factors; (2) gender; (3) age; (4) teaching method and curricula; and (5) other exposure to technology, like media consumption, work experience, hobbies, family environment, and college major. Recommendations for future research involve studying all demographic groups, employing case studies, building empirical models and standardized instruments, and investigating technological efficacy curriculum. Descriptors—Access to Information, College Students, *Computer Mediated Communication, Computer Uses in Education, *Distance Education, Electronic Mail, Higher Education, Modems, *Student Attitudes, Student Surveys

Identifiers—Instructional Format, Listservs,

*Teleclasses

Offering participation in courses via modem can benefit both colleges, which are often coping with downsizing or insufficient classroom space, and students, who may face prohibitive work schedules, a need to remain at home, physical handicaps, or incarceration. This study assembles demographic information on higher education students who participate in computer/modem instruction: their age range, gender, employment status, part-time or full-time enrollment status, and final grades achieved compared to "traditional" students. The inquiries also provided a forum for these distance education students to express reasons why they chose to take a course via modem, disadvantages they might feel in the lack of face-to-face interaction with the instructor, or suggestions they might offer for instructional improvements. A survey was sent to 217 computer/modem students and 263 students enrolled in traditional on-campus versions of the same classes. Ten randomly selected computer/modem students were also interviewed. Findings in this case indicated that the typical computer/modem student was part-time (64%), female (71%), older than the traditional student (26-35 years old), white (76%), and employed full-time (49%). Traditional students tended to be younger and unemployed. More computer/modem students (63%) achieved a grade of 8 or better than traditional students (27%). Large groups of respondents (54%) saw no difference in the difficulty of computer/modem classes versus traditional ones and 56% claimed not to miss the social aspects of classroom interaction. In addition, 79% of respondents felt their basic educational needs were met by the format. Most cited the convenience and self-paced nature of the format as assets, and online time limitations and delays in instructor feedback as chief barriers to success. The prevailing suggestion for improvement was to offer classes in more subject areas. Questions used in both the survey and the interviews are provided along with summaries of comments. Six figures illustrate the data. (Contains 74 references.) (BEW)

Descriptors—Computer Simulation, *Educational Technology, *Evaluation Methods, Improvement Programs, *Institutes (Training Programs), Instructional Effectiveness, *Military Training, Professional Training, *Research Methodology, Skill Development

Identifiers—*Army National Guard, *Multiple Data Gathering Methods

This investigation examined the value of using a multimethod-multisource approach to assess high-technology training systems. The research strategy was utilized to provide empirical information on the instructional effectiveness of the Reserve Component Virtual Training Program (RCVTP), which was developed to improve the training of Army National Guard units. Data was collected from nine units; 14 RCVTP instructors completed standard rating forms regarding the performance of 38 armored force units and 280 training participants completed Likert-scale items regarding their training experience. Data from the different methods indicated that the units further developed their collective tactical skills across the training period. The use of multiple methods and sources was found to provide a better understanding of the RCVTP's effectiveness than could be provided by

any single method and source. In addition, this research strategy is a viable approach to evaluating a high-technology based training system in a non-controlled context without the possibility of obtaining either baseline or transfer measures of performance. (Contains 36 references.) (Author/AEF)

Note—35p.; Paper presented at the Mid-South Educational Research Association Annual Conference (Biloxi, MS, November 8, 1995). Appendix A is missing.

Pub Type—Reports - Research (143) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Computer Assisted Instruction, Cooperative Learning, *Distance Education, *Educational Assessment, Educational Development, Experiential Learning, Graduate Study, Higher Education, Information Literacy, Internet, *Learning Processes, *Professional Development, Public School Teachers, Skill Development, *Telecommunications

Identifiers—Authentic Assessment, Virtual Classrooms

A classroom/lab-based graduate telecommunication course was studied to discover implications for online instruction of related topics and skills. The analysis focused on: (1) examining the potential for teaching telecommunications via an Internet-mediated virtual classroom to public school personnel situated at their home districts; and (2) considering methods for using student learning assessment information gathered online in evaluating and adjusting the learning process. The proposed model emphasizes experiential learning, supportive collegial interaction, and meaningful and useful learning assessment. Learning Process Control (LPC), an adaptation for education of TQM's Statistical Process Control (SPC), is introduced as a visual-analytical method for evaluating the learning progress of large numbers of distant students and for using online information to continuously improve the learning process. Appendices provide the telecommunication course schedule and a chronological topic sequence. (Contains 24 references.) (Author/AEF)

Identifiers—*Singapore, Support Systems

The purpose of this study was to identify and prioritize the factors influencing the university faculty's use of computer-assisted instruction (CAI). A survey questionnaire was constructed and administered to faculty members of a leading university in Singapore. The subjects were 62 respondents representing two groups: 26 from education and 36 from business (36 male and 26 female). The results indicated that the two most important inhibitors were: lack of teachers' time, and lack of technical support. The results may be attributed to Singapore's favorable climate for the instructional use of computers. (Contains 14 references.) (Author)

Descriptors—Comparative Analysis, *Computer Assisted Testing, Computer Uses in Education, Courses, Educational Technology, Higher Educa-

tion, Pilot Projects, *Student Attitudes, Student Surveys, Tables (Data), *Test Format, Undergraduate Students

Identifiers—Paper and Pencil Tests

Two types of computerized testing have been defined: (1) computer-based testing, using a computer to administer conventional tests in which all examinees take the same set of items; and (2) adaptive tests, in which items are selected for administration by the computer, based on examinee's previous responses. This paper discusses an option for classroom teachers that is easier to develop than a computerized adaptive test, but more secure and sophisticated than a computer-based test. The process of developing and pilot testing the computer-administered test and the results of a survey of student reactions are described. Subjects for the study consisted of 108 undergraduates taking summer educational technology courses in computer applications at a Southern university. Identical items were used for paper-and-pencil and computerized tests. No significant differences were found for either administration. Student responses indicated that: all of the students had familiarity with computers; 94% had no problems understanding the test directions; 53% initially experienced anxiety about taking the test on a computer; 89% indicated that the computer test was as fair as a paper test; and 61% indicated a preference for the computer test, while 19% indicated that both methods worked equally well. Four tables depict results for computerized tests versus paper-and-pencil tests; descriptive data for both kinds of tests; students' yes/no responses to the attitude survey; and examinee's comments regarding computerized testing. Descriptors—Electronic Equipment, *Equipment Standards, *Futures (of Society), Information Dissemination, Information Technology, Investment, Models, *Telecommunications, *User Friendly Interface

Identifiers—Business Literature, Design Methodology, *Standardization

The future of telecommunications is at a very uncertain stage: how will information be delivered, with what hardware, and who will manage delivery and content? One thing is certain: the survival of new communication technologies will depend in part on user-friendly interfaces. In whatever form services arrive at the house, their interfaces will need to be uniform and easy to use. The first part of the paper chronicles cases of corporate investment in user-friendly design and summarizes arguments in the popular and academic literature about good interface design. The question of whether an interface is "standardizable" is addressed in part 2, including discussions of the possibility of standardizing at the point of delivery for a system that might be pluralistic or multipatform, and of possible guidelines for standardizing an interface. Part 3 puts forward several models for creating such a standardized interface—a government model, a private industry/free market model, and a professional association model—and arrives at qualities needed in an optimal model. Research Methodology, Technology Education, Undergraduate Students

With the advent of the microcomputer has come an increase in the use of educational simulations. Distinct from software used for drill and practice, tutorials, or problem-solving, simulation software recreates events, devices, or phenomena and can provide the student with a scientific experience which might otherwise be too expensive, dangerous, or time-consuming. This paper reports the results of an experimental study ($n=28$) designed to measure the effectiveness of computer simulations in a solid state electronics circuitry course in an industrial technology program. The study treated age and college grade point average (GPA) as independent variables and learning outcome, based on posttest scores, as the dependent variable. Findings revealed that neither age nor GPA had a significant impact on learning via simulation technology, although the researcher recommends replicating the study with a larger sample size over a longer duration. Three tables offer a glimpse of the data. (Contains 17 references.) (Author/BEW)

Identifiers—Information Infrastructure

The Educational Media and Technology Yearbook (EMTY) is designed to provide media and instructional technology professionals with an up-to-date, single-source overview and assessment of the field of educational technology. The 1995/96 EMTY is divided into eight parts. Part 1 focuses on trends and issues and includes articles on reforming educational technology, the state of the profession, and perceptions among K-12 teachers. Part 2 covers developments and specific topics in the profession. Part 3 addresses current developments and instructional innovation; highlights include the information infrastructure, the Internet, interactive video, staff development, K-12 curriculum planning, telephone lines in the classroom, and copyrights. Part 4 presents leadership profiles of a psychologist and a historian who have contributed to the field. Part 5 provides reports from 6 professional organizations, part 6 lists organizations and associations in North America, and part 7 covers graduate programs, scholarships, fellowships, and awards. Part 8 contains a list of media-related print and nonprint resources. An index is also provided. (AEF)

sual Literacy

Identifiers—*Cemeteries, *Iconic Representation, Religious Art, Symbolism

Many historical and traditional symbols are recorded in cemeteries. The symbols and motifs on tombstones profile individual lives, but they also convey information regarding a society's order, values, religious practices, and realities at the time of the individual's death. The primary goals of this research effort were to identify a variety of visuals found on tombstones, to look for patterns and categories of use, and to attempt to ascertain societal meanings of the these icons. Data collection entailed visiting 26 cemeteries in England, Scotland, and within the United States: Colorado, New Mexico, New York, Oklahoma, and Wyoming. Symbols were grouped into several major classifications: (1) shapes and symbols, like various types of crosses; (2) fauna, such as doves; (3) humanoid forms, like representations of hands; (4) flora, like roses; (5) tools and implements, or anything that depicts life interests of the deceased, from golf clubs and automobiles to the cartoon dinosaur Barney; (6) scenes and landscapes; and (7) organizational insignias. Photographs of 24 headstones are included, with accompanying details about the location and date of the headstone, description of symbols and their history, and assessment of the symbols' cultural significance. Identifiers—*Entertainment, Film History, *Film Viewing, Limits to Growth, Market Forecasts, Multimedia Performances, Technological Forecasting

This paper synthesizes speculation in the professional literature about the future impact of multimedia. Many experts believe that multimedia will soon become the major focus of entertainment dollars and time because its versatility gives it the potential to be a very powerful way to communicate ideas and search for information. In its current state multimedia's quality cannot always measure up to individual media at their best, but it does allow information to be experienced with the senses and emotions as well as the intellect. Multimedia is causing a revolution in instructional methods by making learning interactive and self-paced. The video game and entertainment industry is being changed by multimedia, too, albeit more slowly. Film history stretches back for a century, but only recently have there appeared a variety of ways to access films: in the cinema, on videotapes, on premium cable, or on broadcast television. Even though the financial market for multimedia seems poised to explode, this paper suggests that computer multimedia may not emerge as another significant choice in visual entertainment because the computer screen is not large enough to captivate large groups or offer social events in the same way that television and movie screens do. Identifiers—Accuracy, Computer Art, *Digital Imagery, Historical Background, Perceived Reality, Pictures, Technological Methods, Truth

The speech contained in this document originally accompanied a slide presentation on the altered photographic image. The discussion examines the links between photographic tradition and contemporary visual imaging, the current transformation of visual imaging by the computer, and the effects of digital imaging on visual arts. Photography has a long tradition as a purveyor of "reliable" visual information and as a medium of truth, but the ability of the computer to manipulate images has generated concern about pictorial verity. Creating altered images has been possible since the beginning of photography, because among other things artists could combine and superimpose images or add color, but new technologies and electronic tools continue to blur distinctions between actual and represented reality. Emerging visual art techniques create new ways of influencing perception and new modes of presentation. Artists of future generations must consider the question of whether the computer will eventually be able to generate its own art rather than simply mimic style. Even though the gap between the artist and the technology is narrowing, it seems evident that human input and the creative process will remain important. (BEW)

Identifiers—Beginning Competence, Client Server Computing Systems, Connectivity, Global Awareness, Information Infrastructure, *Telecommunications Infrastructure

Beginning users often exhibit confusion about what it means to be "on" the Internet, and they would likely benefit from a discussion of the scope and structure of Internet connectivity. The problem lies in creating a meaningful visual which would accompany the verbal information. This document discusses an exercise whereby graduate students who had completed 5 weeks of an Internet-related course were asked to draw a diagram of the Internet as they understood it. Thirty-four drawings ranged from very simplistic to very technical, but several patterns emerged, with the Internet variously represented as a client-server scenario, a giant loop, a spoke and hub configuration, or a container. The client-server depiction had already been presented in the class by the instructor, and it ended up appearing most often in the exercise. Only three drawings focused on the global nature of the Internet. When the same exercise was administered to non-users, 31 drawings more frequently included some visual reference to the world, perhaps because the notion of global connectivity is one that the media likes to hype. Visual aids may help beginning users sort through confusing terminology and misleading metaphors, although many participants in the first exercise whose drawings did not appear to represent the Internet in any reasonable way still retained accurate verbal knowledge of the Internet's character. Further study is recommended. Six student illustrations are included in a total of eight figures. (BEW)

Descriptors—Computer Graphics, *Computer Interfaces, Cultural Awareness, *Hypermedia, Information Retrieval, Information Sources, Internet, Library Services, Multimedia Materials, Online Searching, *Screen Design (Computers), *Semiotics, *Visual Aids, Visual Literacy

Identifiers—Cultural Content, Home Pages, *Iconicity, *World Wide Web

The World Wide Web allows users to interact with a graphic interface to search information in a hypermedia and multimedia environment. Graphics serve as reference points on the World Wide Web for searching and retrieving information. This study analyzed the culturally constructed syntax patterns, or codes, embedded in the icons of library homepages on the Web. For example, most hypertext words are highlighted in blue and underlined, while most hypertext graphics are framed in blue borders. Quantitative analysis was conducted on the segments of icons, ascertaining how often a particular icon is used to index the same type of resource, or how many different types of icons are used to index the same type of resource. Subsequent qualitative analysis studied the meanings and connotations of the icons. Research focused on those icons which point to the catalog, to references services, or to collections. Recurring icons included the book, the person-at-desk, the word "new" to indicate recently added services or details, the highway, or the magnifying glass. Their frequent use indicates the emergence of a unique Internet culture. Illustrations of two library home pages are included, along with the appropriate World Wide Web addresses, or uniform resource locators (URLs). (Contains 23 references.) (BEW)

Descriptors—*Computer Interfaces, *Computer Literacy, *Computer Software Development, Instructional Effectiveness, Multimedia Materials, User Needs (Information), *Visual Aids

Identifiers—*Anthropomorphism, Beginning Competence, Clip Art, Iconic Representation, *Navigation (Information Systems)

Anthropomorphism can be defined as the attribution of human characteristics or behavior to inanimate objects. People give names to their automobiles and computers as a way to relate to complicated pieces of technology that they use regularly, but do not fully understand. Software designers may claim that their interfaces are intuitive, but in fact, software is too contrived to be intuitive. If navigating the program seems easier it is largely because the user has become more accustomed to programs of that type. Users have difficulty arriving at that point, however, without some built-in help, like interface guides. Interface guides, or agents, are navigational devices in the user interface which take action on behalf of the user. Some agents have been named and anthropomorphized into figures like a butler, a miner, or a wizard, and they can set forth the user's schedule, guide him through a program or online information resource, and offer feedback and encouragement. Interface guides can personalize and customize the interface, add structure to the software by organizing content around a specific guide, and integrate motivation and navigation. With video clips and snippets of audio, they do require a lot of "zorch," or processing power, as well as a lot of disk space, but many users already have both of these things in abundance. The major problems lie in the fact that more research on their effectiveness is needed and in the fact that much of the clip art that some designers depend on is rife with gender and racial stereotypes. Four reproductions of computer screens illustrate the discussion. (Con-

tains 13 references.) (BEW)

Identifiers—*Graphic Organizers, Reading Theories, Schema Theory

There is a significant mismatch of student preparation for college-level reading tasks and literacy demands placed on our liberal arts college students today. Widely accepted schema theory suggests that teaching metacognition, or consciously thinking about how one thinks, is helpful. Once thinking processes are made transparent to the learner, he can monitor when thinking has broken down and know when and why to activate literacy strategies. Instructors may also help at-risk students by focusing on the concepts that underlie content and the interrelationships between and among ideas. This document describes the creation of a college course that aimed to provide authentic literacy experiences and explicitly teach literacy strategies. Graphic organizers were designed to represent the thinking processes that typify interactive reading. Top-down visuals—chains, planning charts or flow charts, scales for weighing arguments, and concept maps, for example—can anchor abstract concepts and help with problem solving. Bottom-up visuals like pie charts, grids, and graphs can help students scan, sort, and organize information. Both can be instrumental in facilitating learning strategies in the at-risk student. Seven figures show examples of the graphic organizers. (BEW)

Identifiers—Department of Agriculture, Food Labels, Food Preparation, *Graphic Organizers, *Health Hazards, Iconic Representation

Consumer education has always been a primary consideration in the prevention of food-borne illness. Using nutrition education and the new food guide as a model, this paper develops suggestions for a framework of microbiological food safety principles and a compatible visual model for communicating key concepts. Historically, visual food guides in the United States have concentrated on dietary recommendations, including the well-known pyramid of food classification and the mandatory nutritional labeling. Guides are now emerging for food safety education and public health. For example, the United States Department of Agriculture (USDA) recently made safe handling labels required on all raw and partially cooked meat and poultry products. The Hazard Analysis Critical Control Point (HACCP) is a procedure that identifies ways to prevent food-borne illness by monitoring critical control points in the processing of foods. In other words, the consumer should take certain precautions at each culinary step, including when food is purchased, stored, prepared, cooked, and when the preparer cleans up. These consumer tools need

more systematic presentation, however. Dietary recommendations can be grouped under the three points of variety, proportionality, and moderation; food safety principles are also governed by three—the three variables of time, temperature, and cleanliness and three categories of food which represent different degrees of bacterial risk. Any accompanying visual model should use familiar but strong symbols (a clock, a thermometer, hands under a faucet) and careful manipulation of design variables like shape and line. Seven figures accompany the text. (Contains 11 references.) (BEW)

Identifiers—*Design Research, Health Hazards, Legibility, Multicultural Materials

Growing populations of older adults, ethnic minorities, and the low-literate create unique concerns for the design of visual information. Those for whom text presents a barrier will respond most to legibility, use of familiar formats and symbols, and simplification. Guidelines for those processes are needed, and this paper, in particular, identifies principles for designing and evaluating visual components of educational materials for ethnic populations in the United States. Educational print materials for ethnic populations on food safety were solicited from over 50 organizations. Guidelines that emerged from that study include, but are not limited to: (1) use pastels and very true-to-life skin tones when possible; (2) avoid using randomly decorative symbols; (3) be aware that symbols like the skull and crossbones, which Americans consider universally recognizable, sometimes fail to communicate to other cultures; (4) use appealing typeset; (5) reflect cultural norms in the design, like including a wedding ring on the finger of a pregnant Hispanic woman; (6) be alert to cultural differences in gestures and facial expressions; (7) stick to everyday situations when attempting to depict lifestyles; (8) keep silhouettes to a minimum, since they may suggest concealment or evil; and (9) arrange the message in logical sequence and proportional scale. Descriptors—*Academic Achievement, Accountability, *Critical Viewing, Cultural Awareness, Data Analysis, *Educational Assessment, Educational Objectives, Elementary Secondary Education, *Formative Evaluation, *Measurement Objectives, Models, Outcomes of Education, Visual Literacy

Identifiers—*Authentic Assessment, Goal Clarity

As the general public demands to know what and how students are learning, schools face some unprecedented issues of accountability regarding student performance. In order to acquire data which is accurate and useful, teachers are turning to more formative assessment methods. These methods convey the ideas that assessment should engage students in applying "real world" knowledge and skills, and should differ from the traditional one-shot, timed, multiple choice approaches. The three-dimensional view of this type of assessment considers

the questions of what is to be assessed, how it is to be measured, and how the data is to be interpreted. In the first dimension, a teacher must decide if he is trying to describe the extent of competence or to diagnose strengths and weaknesses of unique learners. The second dimension involves determining appropriate learning outcomes. Filtering and decoding of verbal and non-verbal messages is the focus of the third dimension. To be successful in this model teachers must become skilled critical viewers, or interpreters of visual messages; they must be alert to possibilities of goal attainment, unbiased and culturally aware, and visually literate. Cover art has long been used as a marketing device for books, particularly with books aimed at young adults (YAs) aged 12 to 18. An examination of some of the teen thrillers published by novelist Lois Duncan since the 1970s yields several discoveries about changes in cover art that come with various editions. Many covers have been resigned to capitalize on the current teenage taste for blood, gore, and nasty stuff even if the cover implies more terror than actually exists in the story. Current covers also sometimes are devoid of people, so that clothes and hairstyles do not become dated quickly. The conventional wisdom of previous decades was to show adolescents on covers to foster personal identification with the characters. Another trend is to populate cover art with girls or couples regardless of content, in view of the fact that more girls purchase books than boys. Differences are compounded even further in overseas editions. Despite the apparent drawing power of book cover art, publishers seem to have done little or no scientific research on it, preferring to rely on impressions rather than data. They also tend to consult first-level buyers, like booksellers, librarians, and teachers, rather than the teenagers themselves. It is suggested that unknown factors may change too quickly to make research viable, and that adolescents might well be unwilling to open up about their tastes even if they were asked. (BEW)

Over the years, situated and observational learning has given way to mass teaching and theoretical learning based on prose information. Even though schools have produced many successful professionals, they often fail to address individual differences in learners and encourage competition rather than cooperation between learners. As a result, many students, particularly those of low ability, have built

negative attitudes toward learning and even dropped out of school. Instructional technologies may help make learning more enjoyable for all students. The multimedia-based computer, which combines many of the capabilities of projectors and videocassette players, can deliver information in varying forms and accommodate a diversity of learning styles. In addition to earlier studies that have been done on the characteristics of the motivated student and the differences between extrinsic and intrinsic motivation, studies are now appearing on the influences of computerized presentations on the learning process. One study of 70 fourth-graders being taught a lesson on Newton's laws of motion found that computer animated visuals hold intrinsically motivating appeal for learners. Given a choice, most students chose to return to animated graphics rather than static graphics. Another study revealed that the use of audiographics, or instructional images accessible on computers at various remote sites, significantly improves motivational and attitudinal levels. The results of a third study suggest that humor in computer visuals can also be valuable. Among other things, features designed to enhance the appeal of computer visuals should always support the learning content and the nature of the task, increase motivation, trigger imagination and inquiry, relate to attainable goals, and demonstrate real-world applications of knowledge. Identifiers—*Virtual Reality, *Visual Design

Virtual reality is an immersive, interactive medium that manipulates the senses in order provide users with simulated experiences in computer-generated worlds. The visual design of virtual reality is an important issue, but literature has tended to stress the medium's instructional potential rather than setting forth a protocol for designing virtual environments. Furthermore, virtual reality is often considered a solution in search of a problem instead of a viable instructional tool. To counteract this notion, a study of technology designers, media experts, and instructional designers was conducted to share ideas and generate data regarding what constitutes an Instructional Virtual Environment (IVE), when one should be used, how best to design one, who should be involved in the design process, and how to evaluate one. Three rounds of Delphi surveys were administered by electronic mail, resulting in expert consensus on several points. Virtual reality (VR) is defined by the computer-mediated experiences it provides, and while it must be interactive, it does not require full immersion. VR should be used in educational situations requiring experience in particular settings, especially to present spatial or abstract information because of the advantages of sensorial feedback. The design of IVEs should consider constructivist learning principles, require a high level of user interaction, and support mastery learning. The design process should involve multi-disciplinary teams, including instructional designers, subject matter experts, end users, computer experts, ergonomic specialists, and artists. Finally, evaluators should study IVEs very thoroughly, examining all aspects of the environment and using many different methods. Qualitative data, focus groups, and comparative analysis are recommended directions for future study. (Contains 29 references.) (BEW)

Identifiers—Aesthetic Response, Manipulable Influences, *Visual Imagery

Within the scholarly debate about the value of visual literacy is the belief that visual literacy bestows the skill of critical viewing, or conscious appreciation of artistry along with the ability to see through manipulative uses and ideological implications of visual images. Critical thinking is commonly viewed as argument skills, cognitive processes, intellectual development, or a combination thereof. Consideration of the emotional response to the visual image is often absent from these perspectives. The structural theory of emotions considers emotions the internalized relation to the world, a kind of transaction between the individual and his environment. Those relations to people, nature, and art are transformed as emotions move individuals to action. This theory also postulates that the aesthetic experience resides in the interrelation between the mind of the viewer and the image or object being viewed; beauty is not objectively or discretely present in either one. The advertising industry uses the emotionality of the artistic tradition to exploit the consumer. In addition to objective skills of rhetoric and argumentation, therefore, critical viewers may need knowledge of persuasive communication techniques. (Contains 22 references.) (BEW)

Identifiers—*Creative Problem Solving, Design (Engineering), Design Technology, Linear Models, *Visual Design

The new medium of computer-aided design requires changes to the creative problem-solving methodologies typically employed in the development of new visual designs. Most theoretical models of creative problem-solving suggest a linear progression from preparation and incubation to some type of evaluative study of the "inspiration." These models give a communicable structure to infinitely variable creative experiences, but that perspective may need to be altered in the integration of computer applications into design education. In its infancy, computer-aided design merely saved engineering students the tedium of computation. Later on, computers were used to assist in drafting. Currently the computer can help with many aspects of visual design, including allowing for three-dimensional study models and providing access to helpful newsgroups and remote resources through the Internet. As long as students have the advantages of some previous knowledge of the programs and of appropriate hardware, computer applications can help them represent their ideas graphically. The computer-aided design environment is characterized by several qualities that require a move away from the linear problem-solving paradigm: (1) interactivity with programs, or even with the Internet, provides a cycle of immediate feedback which does not lend itself to assembly-line design or learning; (2) the visually

mediated form of thinking is more holistic than linear; (3) the open-ended, discovery-oriented dynamic seems to operate without strict rules of causation; and (4) its ability to empower individual designers to make decisions conflicts with older views of the designer as a detached observer. The new model for creative problem solving is a feedback loop, an ongoing cyclical process of discovery and evaluation. Three separate studies of computer-aided design studios from fall 1993 to summer 1995 found these qualities at work with varying degrees of success; in some cases, interactivity was slow to develop, while in others, lack of personal empowerment or too much concentration on product over process was a problem. In some situations, moreover, the technology was not being used to its full potential. Future research is recommended. (Contains 13 figures and 19 references.) (BEW)

Identifiers—*Clip Art, Iconic Representation, Visual Imagery

Most children's books are filled with pictures, yet when schools design curricula to teach writing, they often ignore the role of visual images in the writing process. Historically, methods for teaching writing have focused on text. Even relatively recent techniques like brainstorming and story webbing still focus on verbal information. In some cases, however, visuals have been used as a story stimulus to generate writing ideas or evoke emotional expression. This paper describes a study which sought to measure the effects of the introduction of computer clip art and graphical presentation software on the writing process. In particular, researchers wondered if the use of these visuals would affect length and quality of compositions, student motivation and esteem, student ability to organize thoughts into paragraphs, and student reaction to sharing compositions. The study examined 25 second-graders engaged in a daily writer's workshop that included brainstorming, story webbing, drafting, editing, publishing, and presenting. Data was collected via observation, a final group debriefing, interviews with both teachers and students, and analysis of the final creative papers themselves. Children used clip art as icons as aids for mapping sequences and chronologies, and as trial-and-error aids in story planning. Many students had difficulty applying themselves to the writing process once they learned that a computer would assist them at the editing stage, but the computer's presence also lent fun to preparing the final draft, which can become mundane or frustrating. Graphical presentation software also took some of the anxiety out of sharing papers with the whole class; attention was drawn away from the child to the onscreen graphics. There was ample evidence to support the conclusion that these computer applications enhanced length and quality of compositions; increased student self-esteem; enhanced, helped students organize their thoughts via storyboarding; and got good overall reaction from the students. Although the early settlements in cyberspace have tended to be male-dominated, diversity does exist on the Internet. In fact, a 1994-95 study revealed that women comprise 34% of Internet users. Feminism, as it came of age in the 1960s, often equated technoscience with the Vietnam War and with forces in opposition to nature and life. Post-modern feminist theory of the 1980s, on the other hand, can be called technomania rather than technophobia because it extolled the notion that technology was creating a race of cyborgs. More recent schools of thought have encouraged a reconciliation of those two views and remembrance of how technology has been used in the past to oppress those who had no access to it. Feminist scholarship should heed emerging literature which emphasizes the benefits of actual reality over virtual reality and cautions against the loss of intimacy in electronic culture, but at the same time, it should devote time to assembling a profile of the diverse female representation in cyberspace and uncovering the wealth of World Wide Web resources of interest to women. These resources include women's resource pages, feminist activism resources, organizational and professional homepages, events calendars, networked support groups and research projects, online newsletters and magazines, listservs, interactive forums, individual home pages, and virtual clubs. The World Wide Web is conducive to the easy formation of associations and has spawned some that might otherwise not exist. Individuals who might never have had opportunity to share "minority" feelings or hobbies with other like-minded people suddenly have a global culture pool to draw from. An appendix offers uniform resource locators (URLs) for 11 relevant world wide web sites. (Contains 15 references.) (BEW)

Identifiers—Precision Optics, *Technological Methods, Visual Imagery

The potential of holograms has been left virtually untapped in the field of education. A hologram can be described as a three-dimensional photographic record of the interference pattern of two superimposed beams of coherent light. Holography requires: (1) high-resolution film; (2) a laser, often a red-beamed helium neon laser; (3) optical components, including positive and negative lenses, mirrors which redirect light, beamsplitters which create the two superimposed beams, and the film plate holder; and (4) the isolation table, which stabilizes the other components and saves them from vibration. Setups vary according to whether the recording process involves a one-beam transmission or a two-beam transmission. Film processing is very similar to photography but requires pyrogallol acid, sodium carbonate, potassium dichromate, and concentrated sulfuric acid. After the film is developed, it is imperative that the film plate be correctly illuminated to produce a three-dimensional image. Holography has helped advance the arts through the production of popular commercial and fine art images and the study of visual design. It has also made a difference in how scientists and manufacturers gather information about changes in materials and products by allowing them to make extremely precise measurements not possible by any other means. Some museums can even offer three-dimensional replicas of priceless antiques too fragile for public display by using holograms. Holography has even

moved into more commercial and educational areas like supermarket bar code scanners, computer data storage, X-rays, microscopy, television, and medicine. For example, medical students can have the opportunity to work on holographic organs before cutting into an actual body. Someday holographic television may implement artificial intelligence in education, by staging recreations of important events, for example. Holograms often depend on the aid of other technologies to accomplish their purpose, and scientists have had trouble increasing the hologram's size while still maintaining a quality image, but even so, the potential of this technology looks enormous. Identifiers—Iconic Representation, Links (Indexing), Visual Design, Visual Displays, *World Wide Web

As information delivery systems on the Internet increasingly evolve into World Wide Web browsers, understanding key graphical elements of the browser interface is critical to the design of effective information display and access tools. Image maps are one such element, and this document describes a pilot study that collected, reviewed, and evaluated image maps from homepages of educational institutions. World Wide Web browsers offer a high level of interaction through hyperlinks, most of which involve text or a simple image. Image maps, on the other hand, are complex visuals that contain multiple hyperlinks to a number of information resources. Effective image maps offer clearly defined multiple links or "hot spots," present visual content that supports the theme or purpose of the site, permit backtracking and bookmarking, help the user build mental models of the interrelationships of information resources, do not take too long to load, and do not clutter the display. Researchers developed a survey form, for use by nine independent viewers, that sought to evaluate sites by those visual, navigational, and practical criteria. Fifty-five surveys on institutional homepages were collected from the nine viewers, and they revealed primarily that viewers placed a higher premium on simplicity than on pure visual appeal. Artistically captivating image maps often violated rules of simplicity; individual hot spots were hard to distinguish, choices were too multilayered to allow for a quick return to the starting point, and loading was slow. Reproductions of 11 institutional homepages accompany the text. Two other figures include a bar graph comparing average viewer ratings by site and a list of tips for image map design. Identifiers—Cyprus, *Multicultural Materials
This document chronicles the development of a hypermedia CD-ROM product that offered information on the island of Cyprus. The hypermedia

environment was designed for use by students and educators in eleventh grade up to the college level, and it was intended to fill gaps in multicultural knowledge by enabling individualized, self-paced instruction in engaging multiple formats. The development process was divided into several stages: (1) deciding on the degree of interactivity, or number of hyperlinks and layers of choices; (2) designing the main interface; (3) creating flowcharts to depict and plan for possible user paths; (4) storyboarding; (5) collection of informational material such as photographs, maps, drawings, sounds, music, and bits of animation; and (6) the actual authoring of the CD-ROM. The prototype was reviewed by instructional designers, multimedia developers, graphic artists, and content experts, while students offered feedback on the revised final version. Design lessons learned include the need for keeping the interface simple and navigable, using color meaningfully and consistently, taking extra time for selection of software tools and for content analysis, and working with a team of experts. (Contains 15 references.) (BEW)

Identifiers—Perception Research, Pictures
This paper describes a study in which a Picture Readability Index (PRI) was used to investigate initial and extended perceptions of photographs. Readability criteria for evaluating instructional text seems to have been in place for a long time, yet instructional visuals like photographs and illustrations have typically been subject to no such criteria. The PRI, developed from research in the areas of semiotics, linguistics, perception, visual literacy, and cognitive psychology, seeks to apply measurable readability criteria to these visuals. It considers first impressions gained from brief exposure, and also examines how a picture and caption are processed together during prolonged exposure. Data is coded and entered onto a nomograph for comparison between affective and cognitive domain classifications. The paper-and-pencil version of the PRI test, that was administered to a small group of students, however, is somewhat limited by its length and complexity, which may cause fatigue to have an influence on responses. Thus researchers set out to adapt the PRI test for the computer; besides eliminating the fatigue factor, the computer-assisted version would also organize data and simplify the process of projecting the image for viewing by the respondent. Adapting the PRI test into a computer-administered format involved selecting an authoring tool, flowcharting to modularize the instrument, storyboarding, scanning in photographs and drawings, creating test questions, and constructing and revising the multimedia prototype. Future study may include a computerized-adaptive version of the PRI, in which the progression of questions on the monitor will depend on prior responses. (Contains 27 references.) (BEW)

Identifiers—Computer Art, *Digital Imagery, Perceived Reality

Today the chemical processing of film is being replaced by a virtual digital darkroom. Digital image storage makes new levels of consistency possible because its nature is less volatile and more mutable than traditional photography. The potential of digital imaging is great, but issues of disk storage, computer speed, camera sensor resolution, projection, and hard copy output continue to make the necessary hardware expensive. In the case of digital movies for the personal computer, random accessibility advantages are being offset by low resolution. Both digitized stills and digitized movie clips are now typical components of presentations in electronic classrooms and other distance learning situations because many of these images can be compressed to reduce transmission costs. Digital imaging can also be easily manipulated, creating new flexibility in advertising and the fine arts and giving rise to the view of the photographer not as the deliverer of a final product but as the producer of raw products that can be altered later. Composite images in photography have always been possible, but now there are fewer restraints than ever. The mutability of digital imaging also serves to depict photography as increasingly subjective, rather than undistorted expression of optical reality. Understandably, many imaging education programs are finding niches in both fine arts departments and technical departments. (BEW)

Identifiers—Focus Groups, Multidisciplinary Teams, Performance Levels, *Performance Support Systems, Technology Plans

An electronic performance support system (EPSS) is a computerized system designed to increase productivity by supporting the performance of the worker on demand at the time of need. This way, workers are allowed to perform with a minimum of intervention from others. Popular examples of performance support tools, or partially implemented EPSSs, include the personal computer "wizards" whose assistance in creating a database, spreadsheet, document, or presentation results in a finished product rather than simply a user tutorial. An integrated performance support system, or a fully implemented EPSS, can provide even more: expert knowledge, searchable references and data, granular training like cue cards, and automated tools. A EPSS project begins with commitment to needs assessment and project support, cooperation between subject experts and designers, the skills of a multidisciplinary team, and a well-considered plan as to whether the system will be built from scratch or wrapped around an existing application. When marketing an EPSS, one must convince the organization that it will solve current performance problems, and that the level of support and the timing are optimal. Planning stages involve establishing project scope, reviewing organizational goals and needs, making sure the project team fully understands the reason for the EPSS, and creating mechanisms for reporting on progress. The next step is specification analysis, which involves feasibility studies, focus groups, task analysis, developing functional specifications, and choices of hardware and software. The results of the analyses are presented to the client, and if he or she decides to proceed with an EPSS, then the team can develop a maintenance strategy, prepare a development plan, and then actually build the system. Building includes developing the

interface, the metaphor for the desktop, and data structure; it also comprises design and prototype, and procurement and integration of content into the system. Then the EPSS must be installed and systematically evaluated, with the team all the while alert to bio-factors in the work environment, like any dehumanizing effects of the system. (BEW)

Identifiers—Pennsylvania State University

This paper discusses the role of media in presenting information to society and emphasizes the need for English teachers to incorporate critical media awareness into education. Four postulations are identified that are at the core of teaching media as a form of textual construction: (1) all media are a construction, which represents conscious and unconscious decisions about what knowledge is valid and valued; (2) audiences negotiate meaning; (3) the curriculum represents ideology and values and has social and political implications; and (4) the nature of media messages can affect social attitudes and behavior. A group of 20 teachers attending a media literacy workshop at Pennsylvania State University in the summer of 1994 were asked to rate the frequency with which they undertook certain core critical media literacy activities; results revealed that teachers were not aware of what they could do about media in their language arts classrooms and that nonprint media are still an isolated phenomena in schools. The workshop encouraged teachers to work towards integrating forms of media literacy into their teaching and covered analysis of codes and conventions, personal experience, cultural and ideological meanings, and commercial overtones and economic strategies. A table depicts the teachers' ratings on media practice in the classroom. (Contains 12 references.) (AEF)

Descriptors—Bias, Children, *Critical Viewing, Headlines, *Mass Media Effects, News Media, Press Opinion, *Television Viewing, *Visual Literacy

The purpose of this paper is to express the importance of visual/media literacy and the teaching of critical television viewing. An awareness of the properties and characteristics of television—including camera angles and placement, editing, and emotionally involving subject matter—helps viewers in the critical viewing process. The knowledge of how television works can be used to help teachers, parents, and students understand the potential of media to manipulate. Parents and teachers can support critical viewing by asking children to control their viewing time, analyze what they see and hear, and share their judgements with other children and adults. Bias in newspapers and television news can be detected through selection and omission of details; headlines; photos, captions and camera angles; use of names and titles; and choice of words. (AEF)

Descriptors—*Authoring Aids (Programming), *Computer Assisted Instruction, Computer Graphics, Educational Technology, Individualized Instruction, *Multimedia Materials, *Screen Design (Computers), Teaching Methods, *Tutoring, Visual Learning

Digital Chisel is a user-friendly multimedia authoring tool for helping students and teachers to tutor/teach the computer. It can be used as a visual presentation tool, as a tool to provide individualized instruction and as a tool to help students learn using a variety of visual and auditory modes. Interactive presentations can be designed without any knowledge of programming or scripting; the presentations, called projects, consist of a collection of screens, which contain a combination of text, graphics, sounds, animations, and movies. The projects are designed so that clicking on objects on the screen performs a variety of Digital Chisel events; every object in a project can perform 1 or as many as 24 separate actions. Text can be typed or text files can be imported from any word processing program. Graphics may be imported or created using the drawing and painting tools. Sounds can be used from sound-clip files or recorded directly; movies can be imported from video-clip files. All these multimedia objects can be stored in a media file called a library. In addition to presentations, screens can be designed to be visual, interactive quizzes or test questions; the quiz screens have the ability to record users' responses into a database and to calculate the percentage of correct answers. Four figures illustrate the discussion. (AEF)

Descriptors—Computer Graphics, Freehand Drawing, *Games, *Metaphors, *Visual Learning, Workshops

Identifiers—*Bisociation, Physiognomic Perception, *Visual Communication

This paper presents an approach to understanding visual metaphor which uses metaphoric analysis and comprehension by graphic and pictorial means. The perceptible qualities of shape, line, form, color, and texture, that make up the visual structure characteristic of any particular shape, configuration, or scene, are called physiognomic properties; the mixing of these properties in different categorical matrices is called bisociation. Combined, physiognomic perception and boundary breaking, through bisociation, form the basis for visual metaphoric communication. Sixteen adults (13 female and 3 male) participated in a workshop which focused on playing a visual game, "Bisociative Pictionary," based on the current commercial game, "Pictionary." A self-portrait pencil drawing was selected as the visual metaphor for analysis. Participants were divided into teams and encouraged to find as many bisociations as possible within a 30-minute game period; only graphic, drawn responses were allowed for communication. A bisociation could only be confirmed when another member of a team guessed the name of the object or activity being drawn; successful matches were totaled at the conclusion of the game. Participants then analyzed the drawn responses for categorical patterns. Participants discovered three of the artist's six predetermined levels of meaning. The patterns of visual matches indicated that such a purely visual game can help individuals discover multiple levels of shared visual meaning. Selected participant drawings are shown, matched to the levels of meaning predetermined by the artist. Forty-seven photographs, drawings, and charts illustrate the discussion. Identifiers—*Analogies, Science Education Research, *Scientific Thinking

It is important to incorporate visual thinking into science instruction. Imagination and perception play vital roles in scientific inquiry. Metaphors, like perceptions, are drawn from common experiences and are a means to anchor scientists' thought processes in generating a pattern that bridges the gap between the seen and the unseen. Metaphors (visual and verbal) that relate to the emotional, aesthetic, and social forces of scientific inquiry are instrumental for teaching the epistemology of science. While metaphors compare implicitly, analogies compare explicitly the structure of two domains. Analogies can aid students in constructing new conscious models. A qualitative study in which 12 different analogies were used by six teachers engaged in teaching high school science, shows considerable success in learning by analogy. Instructional implications from one recent study on the use of analogies in high school chemistry include the need to develop a personal repertoire of useful analogies; the necessity of using analogies that students relate to; and the importance of explicitly mapping the attributes between the source and the target. Research has shown that without direction and training, students are not likely to use any of the general methods of visualization. (AEF)

Identifiers—Help Systems, *World Wide Web

This paper discusses a formative evaluation method by which to assess World-Wide-Web (WWW) documents. Also presented are the results from a pilot evaluation which examined users' interactions with Web documents and the effects of providing "document maps" to guide users to specific information. A video-split screen technique was used to record users interacting with the WWW and to assess the design of associated documents. Three female and two male subjects participated in the study; four were undergraduate students and one was a graduate student. Subjects were given two tasks: (1) to browse through the WWW and locate specific information/documents; and (2) to use and assess Eastern Illinois University's Department of Media Services Web site. At the completion of the session, subjects filled out a survey which collected information on their reactions toward the usefulness of the "document maps" and data related to their computer experience and knowledge of the WWW. Results indicated that the video-split screen method can be an effective means to assess WWW documents. Subjects need to be shown that a "document map" exists for their use and they must be explicitly informed as to its purpose and function. As WWW is used for the delivery of instruction, it is important to provide learners with a means of instructional support. Three figures present sample transcripts from the evaluation sessions and depict the time spent searching (by trials) and the number of times maps were used (by trial). (Contains 18 references.) Identifiers—*Test Analysis

TestMaker is a project in which computer-based programs are being developed to help educators create tests. The program was designed as an instructional and developmental tool for teacher-education students. TestMaker consists of four modules: Advisement; Test Creation; Student Test; and Presentation Analysis. The Advisement module runs concurrently with the Test Creation module and provides users with system-generated advice and user-selected advice related to effective test construction. All question items, correct answers, alternatives, and feedback created in the Test Creation module are presented in the Student Test module; during testing, student responses, elaboration and instructional time are recorded in a file which can later be reviewed by the instructor. The Presentation Analysis module was designed as a presentation tool for distance learning; it assists in the analysis of questions by allowing the instructor to log the number of students agreeing and disagreeing with each question alternative. Future developments with the TestMaker project will investigate the possibility of testing students at remote distance learning sites. (Contains 11 references.) (AEF)

A slide-lecture, "The Elements of Visual Organization," was developed and presented at four weekend workshops for faculty from all areas of the University of Cincinnati's campus. Twenty-nine computer-generated slides were designed to illustrate the role of visuals as a medium of communication. Some were black and white and others were color; all were based on a single, non-objective composition. The slide presentation was accompanied by oral commentary. Twelve of the images created for the presentation are provided, along with a brief approximation of the spoken commentary which accompanied them. These images include types of lines, shapes, forms, patterns, scale, balance, and movement. (AEF)

Descriptors—Art Education, Art History, Cognitive Style, Community Colleges, Learning Modalities, *Memorization, *Pictorial Stimuli, Reading Assignments, Textbooks, Two Year Colleges, Two Year College Students, *Visualization, *Visual Learning

A simulated art history textbook reading assignment was designed to examine the effects of visual information on student learning and understanding. A sample of 234 students was taken from a population of freshman/sophomore English students in a large metropolitan community college district. In phase one of the study, students took the Group Embedded Figures Test (GEFT), which contained geometric figures embedded in a background. During phase two, students were randomly assigned to one of two different groups in which the treatments were two 1500-word expository prose passages. The difference between the two treatments was in the number of pictures; although the picture subject matter was identical, one treatment included additional close-up photographs and illustrations. Students were asked to visualize the pictures of vases that they had read about, then to draw each vase and write down every word recalled from the reading. Results suggest that when subjects are asked to recall pictures of single objects, most subjects can successfully execute in drawings a reasonable likeness of what they have seen and that subjects' performance is differentially reflected on the basis of both cognitive style and picture design factors. Eight figures depict study results. (Contains 27 references.) (AEF)

IR 017 661

literature. This paper explores the appearance of gender in Caldecott Award winning children's books. Picture books, trade books, content books and basal readers were inspected in the 1970s for the appearance of sexism; researchers found ample evidence of sexual bias in these materials. Male characters were depicted more often than female characters and both genders were shown in traditional, stereotyped roles. In the 1980s several studies examined children's books which were published since the original research to determine whether any changes had taken place in the number of female characters or in the manner in which they were represented. A higher percentage of female images was found in the 1980s than in the 1970s; however, the gender roles still reflected stereotypes. The books published between 1980 and 1995 share some traits of their earlier counterparts; male main characters still outnumber female main characters, but only slightly. Most of the female main characters in recent literature are portrayed in a non stereotyped fashion. Another difference is the deviation from stereotyped character portrayals in folktales. Criteria for parents/educators to evaluate children's books and a list of the Caldecott Award winning books and honor books for 1981-95 are included. (Contains 16 references.) (AEF)

EDRS Price—MF01/PC01 Plus Postage.

Descriptors—Diagrams, Higher Education, *Instructional Design, Introductory Courses, Models, *Preservice Teacher Education, *Student Reaction, Undergraduate Students, Use Studies, *Visual Perception, Visual Stimuli

Identifiers—Curves, Line Drawings

This study investigated the influence of the visual display of an instructional design (ID) model on preservice teachers' perceptions of the ID process. Forty-six undergraduate education majors (29 females and 17 males) enrolled in an introductory education class during the spring of 1995 at an institution in the United States' Rocky Mountain west participated in this study. The students were assessed on their initial knowledge and perceptions of the ID process. Students were then given a three hour introduction to ID; after instruction, students' perceptions of the ID process again were assessed. After this posttest, students were given first one and then the second of two visual depictions of the ID process; responses were assessed after each. One model was drawn with curved lines and ovals and the other original model was formed with straight lines and rectangles. Half of the students were given the curved/oval model first and the remaining half were presented with the visual models in reverse order. Preliminary data analysis suggested that the visual display of the ID model influenced student perceptions of the ID process. Overall, students used the same words with similar meanings to describe both the positive and negative aspects of the ID process regardless of whether curved or straight lines were used to visually depict the model. Ten figures depict information on ID models and assessment results. (AEF)

Descriptors—Attention, *Audience Response, Cognitive Processes, Comparative Analysis, Critical Thinking, *Films, Production Techniques, *Sensory Experience, *Visual Perception

Identifiers—Classical Hollywood Films, MTV, *Paradigm Shifts, Reflective Thinking, Visual Im-

agery

This paper contrasts classical Aristotelian narrative, which encouraged intellectual reflection and came to dominate Hollywood film by the 1930s, with the pulsating images which began to appear in the 1980 as a result of MTV's influence on films. The discussion focuses on two major Hollywood films: "Grapes of Wrath" (1940) and "Top Gun" (1986). The classical Hollywood style film represented in "Grapes of Wrath" uses sequential narrative, shot framing and a natural editing pace; it demands sustained attention, intellectual reflection, and emotional empathy. The ultimate effect of "Top Gun," which uses minimal dialogue and sharp cuts between disconnected images that pulse on and off the screen in a rock and roll beat, is the reverse of the classic Hollywood style: devoid of complexity, almost non-existent in linear plot, one- or two-dimensional in character, and pleasurable without having any intellectually reflective opportunity. Sensual images are absorbed instantaneously, and the viewer has time only to feel their immediate and momentary impact. While the ability to process the visual image and absorb its meaning emotionally and tonally has increased, there is no comparable time for reflection. What is happening in film is part of a larger paradigmatic shift in perceptual process in which sensory stimulation alone has become the meaning. (Contains 11 references.) (AEF)

Descriptors—*Communication (Thought Transfer), *Curriculum Design, Educational Development, *Information Technology, Propaganda, *Technical Education, Technical Writing, *Visual Literacy

Identifiers—*Technical Communication, *Visual Communication

The purpose of this paper is to explore another facet of visual literacy—technical visual communication (TVC)—and to discuss how this new perspective can further strengthen visual literacy as a discipline. Unlike visual literacy, which looks to a desirable state of affairs, TVC addresses the nature of actual visual communication. Both visual literacy and TVC seek to empower individuals to interpret images and form opinions concerning the images' origins, construction, meaning, and intent, but TVC goes beyond this to examine how visual communication can be used to manipulate and propagandize. Another difference between the two is visual literacy examines technology as a subset, while technology is more central to TVC. Visual literacy practitioners can benefit from a continuous source of information concerning old and new technologies, while TVC can benefit from a substantial visual literacy research base. Technical communication programs are making visual literacy a more fundamental part of the curriculum. The program at Lawrence Technological University (Southfield, Michigan), for example, has three main components: (1) technical writing; (2) oral communication; and (3) technical visual communication. Visual communication is being emphasized by such programs in order to make technical communication students more visually literate. Two figures depict the directionality of visual literacy components and the three components of Lawrence Tech's program. (AEF)

Development, *Visual Perception

Identifiers—Arnheim (Rudolf), Cartesian Coordinates, Centering, *Childrens Drawings

Rudolf Arnheim, former Harvard Professor of the Psychology of Art, developed a theory that the perception of the structure of things in the world is based on simultaneous use of two primary systems: (1) the cosmic system of concentricity and (2) the parochial system of the Cartesian grid. The Cartesian grid imposes order, while the concentric system provides a midpoint or balancing center for everything that is seen. This paper provides experimental evidence in support of Arnheim's theory by demonstrating that a drawing's balancing center is measurable and that the measurement can be reliable and valid when compared with human judgment. The measure is then applied to test the hypothesis that the child's placement of a balancing center changes predictably with age. Thirty drawings, each representing one of 13 hypothesized balancing center locations, were collected from students in grades K-6; location of the balancing center was determined by computer and teacher judgments using (x,y) coordinates on a grid. Computer generated estimates of balancing point position on the vertical and horizontal axis of picture space displayed a very strong relationship to subjective teacher judgments of balancing centers. A set of 140 drawings from students in grades K-6 was also examined to determine whether the balancing centers changed predictably with age. Results suggest that children in grades K-6 show a strong bias for balancing centers situated near the geometric center of picture space. Five figures depict study results. An appendix shows the 30 drawings used in the balancing center analyses. (Contains 14 references.) (AEF)

Descriptors—Access to Information, Cognitive Style, *Guidelines, Information Sources, *Internet, Online Searching, *Professional Training, Program Development, Program Implementation, *Teachers, User Needs (Information), Workshops

Because many schools face the difficult task of training teachers to use the Internet, this paper provides guidelines for planning and implementing an Internet training program for teachers. The first issue that must be addressed is defining goals and objectives by assessing the needs of the network users. Next, the various methods of Internet access must be defined and advantages and disadvantages of all the access options should be considered. Identifying who should be trained and defining the spectrum of proficiency to which they should be trained is the next step. Personnel, ideally teachers, must be designated to do the training and should make use of the wide array of resources available to them; these include print and online resources, workshops, conferences, and local users' groups. The three basic methods of organizing the training session content are: (1) show the entire spectrum of network tools; (2) focus on a single network tool; and (3) focus on a set of subject related resources valuable to the participants. The training program should take the form of a half day to 3 day workshops. Trainers should be prepared for the various learning styles of participants and they should also have some knowledge of adult learning theory. During the session itself, there should be a minimal amount of lecture, allowing for maximum hands-on opportunities. Trainers should provide participants with support materials at the conclusion of the training as well as the name of someone to contact for further help. Evaluation of the program by participants and instructors should take place at the end of the session on an individual basis. All those involved in the program should be recognized by the school's administration. (AEF)

Descriptors—Cartoons, Communication (Thought Transfer), *Design, *Graphic Arts, *Illustrations, *Signs, Surveys, Technical Illustration, Use Studies, *Visual Aids

Identifiers—Arrows (Graphic Communication), *Graphic Communication, Visual Communication

The purpose of this paper is to examine arrow design in relation to the type of pointing, connecting, or processing involved. Three possible approaches to the investigation of arrows as graphic communication include research: by arrow function, relating message structure to arrow design, and linking user expectations to arrow design. The following functions emerge following a subjective survey of existing arrows: identify (one-point functions); connect or link (two-point functions), and direct (imperatives directing action and describing processes). Content, context and style are message-related variables that arrow design should serve to interpret. Research design must consider reader expectations of arrow types. Three categories of arrow rules exist: (1) technical rules governing arrow usage appear in such fields as mechanical engineering, traffic management and international signage; (2) formal rules in disciplines where arrows serve in flow charts and mind mapping activities; and (3) informal rules in general sign situations, cartooning, and other areas. Nine figures present examples of various arrow types; an arrow clarity survey form is also provided. (AEF)

Descriptors—*Advertising, *Art Criticism, Audience Response, *Commercial Art, *Content Analysis, *Critical Viewing, Design, Illustrations, Learning Theories, Visual Arts

Identifiers—Visual Imagery

A method of pedagogical art criticism can be used to examine meaning in one of today's most pervasive forms of visual imagery: the advertising image. It was necessary for the art critical method to accommodate the following components of advertising imagery: (1) history; (2) purpose in a capitalist society; (3) function in society; (4) effects on society and consumers; (5) form (elements of layout design, visual tools); (6) content (picture/illustration and text); (7) strategy and message (psychological appeals, emotional and basic needs, perceptual devices, audience targeting) and (8) gestalt. In selecting and/or developing the critical method it was important to consider developmental and learning skills gleaned from teaching and learning theory. Six pedagogical methods of art criticism were examined and analyzed for the potential to serve as part of the final framework. A model of art criticism for examining the advertising image was developed which included the following stages: receptiveness; reaction; description; formal analysis; characterization; interpretation; synthesis; and contextual information. This method of art criticism allows viewers to cognitively combine both intuitive perception and intellectual analysis. (Contains 10 references.) (AEF)

Identifiers—*Computer Animation, *Learning Environments

Computer animation can be effectively incorporated into computer based instruction programs for English as a Foreign Language (EFL) learning environments. Computer animation is defined as computer-generated animated graphics that function as visual aids to instruction. The applications of instructional graphics fall into two categories: (1) affective functions, which are designed to improve a student's attitude toward learning or to increase the incentive of a student to participate in a lesson, and (2) cognitive functions, which are designed to directly enhance the ability of students to learn from instructional materials. According to design method, computer animation may be classified into fixed-path animation, which is pre-programmed or designed by the software developer, and data-driven animation, which is controlled by the constantly changing data based on user input. The most promising areas of using computer animation for EFL include the teaching and learning of beginning English phonetics, action verbs, and certain cultural elements. Developmental considerations include whether or not to use animation, the choice of programming language or an authoring tool, cultural considerations of target users, operating environment, hardware requirements, and what other resources to use. Descriptors—Active Learning, Cooperative Learning, Educational Research, Interactive Video, *Reading Comprehension, Reading Skills, *Teaching Methods, *Visual Aids, *Visual Learning, Visual Perception, *Vocabulary Development, *Vocabulary Skills

Identifiers—Graphic Organizers

This paper discusses research findings regarding vocabulary instruction and reading comprehension and suggests methods to develop vocabulary using visual aids. As indicated by the research, vocabulary instruction is necessary and can lead to improved comprehension; there also appears to be a strong need to relate concrete visual experiences to vocabulary development, providing active, meaningful, and repeated word use. Visual methods for developing vocabulary that involve students actively taking part in their reading vocabulary development include using: interactive video; student illustration of vocabulary; computer software packages designed to develop reading skills; activities that involve visual perception; and graphic organizers, including story maps, collaborative rehearsal of new vocabulary, and student-made flash cards. The use of visuals, combined with cooperative learning groups, provides an effective environment for the development of vocabulary and reading comprehension. (Contains 14 references.) (AEF)

Descriptors—*Bibliometrics, *Citation Analysis, *Classification, Cluster Grouping, Intellectual

Disciplines, *Literature Reviews, Scholarly Journals

Identifiers—*Visual Communication

This paper discusses visual communication theory. After an examination of the literature, this study built a more extensive bibliography of visual communication in general-theory, research, teaching—as well as a taxonomy that was better grounded. A 95-page bibliography was developed for works from a number of scholarly journals dealing with visual communication. Approximately 1,617 entries were organized into 13 major categories and 90 sub-categories that represented the focal point of the work; a number of sources were also cross-referenced. The original 15 most popular (written about) areas and the 15 most popular cross-referenced areas were combined to provide a picture of the areas which are receiving the most attention in the literature. One observation that could be made was that at the top of the combined list was dominated by foundation theoretical areas from psychology (memory, cognition/information processing, and perception) as well as visual communication (mental imagery and visual/verbal interaction). Three of the professional areas also ranked in the top 10 with photography at number 2 and advertising and television/video at numbers 6 and 7. Only one education topic area appeared in the top 10: development/children's studies. The list demonstrates that visual communication has its own areas of theory and scholarly attention and that this literature base is nearly as extensive as the psychology base. The original, cross-referenced, and combined classification lists are included, in addition to the top 10 areas of focus. (Contains 22 references.) (AEF)

Descriptors—Building Plans, Cognitive Mapping, *Design Requirements, *Environment, Facilities, *Interior Design, Maps, *Orientation, *Visual Aids

Identifiers—Visual Communication, *Wayfinding

This paper, a summary of a document created for a Master of Arts degree in Interior Design at Northern Illinois University, DeKalb, Illinois, discusses research on "wayfinding" and the need for designers and planners to recognize its importance in order to provide more user-friendly environments. Orientation is the first step in successful wayfinding. Through images, names and meanings, the concept of a sense of place can be grasped. Cognitive mapping is the process that enables individuals to mentally organize or comprehend stimuli; cognitive maps are formed by information from the environment which is obtained from the five senses. Research in urban planning, environmental psychology, sociology, architecture, interior design, and environmental graphic design has proven that wayfinding is not only a complex process, but a critical design issue involving several disciplines. Designers must be able to communicate different types of information to different types of users. Elements of an effective wayfinding system include: (1) spaces that are visually distinctive; (2) points of reference; (3) a building layout that is easy to understand and remember; (4) memorable landmarks; (5) signs, symbols, directories, and maps; (6) staff who are well-trained in giving instructions. A description of the presentation of the one-person show done to fulfill requirements of the Master of Arts degree concludes the paper. (Contains 21 references.) (AEF)

Descriptors—*Attention, Audience Response, *Cognitive Processes, *Information Processing, *Learning Processes, Long Term Memory, Models, Short Term Memory, *Visual Perception, Visual Stimuli

This paper discusses a mental model of learning based on the processes of attention, perception, processing, and application. The learning process starts with attention, such as curiosity, excitement, expectation, or fear; in pedagogy this is called motivation. New impressions are dependent on and interpreted against the background of previous experience and learning, or "frame of reference." One of the main reasons for using pictures in magazines, newspapers, and books is to draw attention to the material; in the case of moving images, the visual material and presentation must constantly redraw the attention to hold the viewer's interest. The concept "perception" is a collective designation for the processes in which an individual obtains information on the outside world. The "laws" of perception include: figure/ground contrast; similarity; proximity; continuity; closure; common fate; objective set; contrast; and previous experience. Information processing and storage is referred to as memory. Memory functions include sensory memory, short-term memory, and long-term memory; forgetting is the process through which information in memory becomes inaccessible. Results from several experiments show that when contents are the same in visual, audio, and print channels, learning is maximized. After the attention, perception, and processing of information, new knowledge can be applied and tested in different applications. Four figures depict these processes, including the combination of all processes in the learning helix model. (Contains 51 references.) (AEF)

Descriptors—*Business Communication, *Computer Graphics, Computer Software, Overhead Projectors, *Projection Equipment, Questionnaires, Slides, Transparencies, *Visual Aids

Identifiers—*Presentation Mode, *Visual Communication

This study measured the impact of electronic presentations on the business presenter. An electronic presentation was defined as a presentation which made use of a computer, presentation graphics software, and a projection device. A questionnaire was sent to 560 subjects (40% returned) randomly selected from a training and development consortium located in State College, Pennsylvania that provides guidance to businesses in the Central Pennsylvania region. The results from the study fall into two major categories: those derived from all of the respondents and those derived from the sub group of respondents that were engaged in making electronic presentations. An examination of all the respondents yielded that 27% reported giving at least one electronic presentation; preferred presentation devices in rank order included overhead projector, flip chart, electronic presentation, and slide projector. Respondents that had reported experience in giving electronic presentations (27%) were then classified into three categories: presenter-oriented, hardware/software-oriented, or audience-oriented responses. Five implications were derived from this study: (1) respondents that used electronic presentations felt they were very effective for delivering a message to an audience; (2) overhead transparencies continue to be judged the most effective medium, but electronic presentations are growing in favor; (3) video projection is not heavily used; (4) the biggest weakness of electronic presentations is that you cannot depend on the power electrical components; and (5) Microsoft's PowerPoint software dominates the electronic presentation medium. Eight figures provide information on study results. (AEF)

Identifiers—*Access to Computers, *Computer Use, Home Computers

Exposure to computers in school may help young people gain the computer literacy they will need to function effectively in society. The amount of access to computers at home is often directly related to socioeconomic factors. Examining the extent to which students have access to computers either at school or at home may help predict how prepared they will be to enter an automated work force. The demographics of student computer use are outlined: (1) more than two-thirds of all students in grades 1-12 used a computer at home or at school in 1993, with 59% using a computer at school; (2) percentages of students using a computer at school and at home have more than doubled from 1984 to 1993. School use increased from 29% to 59%, while home use went up from 12% to 28%; (3) Whites were more likely than Blacks or Hispanics to use a computer at home or at school. Approximately 40% of blacks and Hispanics did not use computers at all in 1993, compared to 20% of their white counterparts; (4) between 1984 and 1993 the proportions of students in grades 7-12 who used a computer at home or at school increased at similar levels across family income. Two tables are provided, both entitled "Percentage of students who used a computer at school or at home, by selected characteristics: October 1984, 1989, and 1993." Each table groups students by ethnicity and family income level and presents separate data for grades 1-6 and 7-12. The first table offers numerical percentages, while the second illustrates the data with bar graphs. (BEW)

Descriptors—Academic Libraries, *Behavior Problems, Crime, Guidelines, Higher Education, Homeless People, Legal Responsibility, *Library Planning, *Library Policy, Mental Disorders, Older Adults, Public Libraries, Sexual Harassment, Sexuality, *Users (Information), Young Adults

This book provides strategies for dealing with negative patron behavior in the library and presents guidelines for identifying and effectively responding to, as well as preventing a variety of behavior problems. Fifteen librarians wrote the thirteen chapters, which are divided into three sections. Part 1 deals with patrons who pose the most challenges and why, part 2 discusses legal and social issues, and part 3 focuses on the solutions. The chapters are: (1) "Down and Out in the Reading Room: The Homeless in the Public Library" (Bruce A. Shuman); (2) "Mentally Ill Patrons" (Charles A. Salter and Jeffrey L. Salter); (3) "Opposites Attract: Young Adults and Libraries" (Patrick Jones); (4) "Older Adults: Problems and Needs" (Linda Marie Golan and Linda Lou Wiler); (5) "Deinstitutionalized and Disabled Patrons: Opportunities and Solutions" (Fay Zippowitz); (6) "Problems with Patrons in the Academic Library" (Emerita M. Cuesta); (7) "Crime in Academic Libraries" (Mary M. Harrison, Alison Armstrong, and David Hollenbeck); (8) "Legal Issues regarding Library Patrons" (Katherine Malmquist); (9) "Sexual Harassment in the Library" (Denise J. Johnson); (10) "Sexual Behavior in Libraries" (Denise J. Johnson); (11) "Active Listening: Alleviating Patron Problems through Com-

munication" (Nathan M. Smith); (12) "Developing and Implementing a Patron Behavior Policy" (Linda A. Morrisett); and (13) "Literature on Library Patrons: An Annotated Guide" (Beth McNeil). A biographical sketch on each of the contributors and an index are also included. (AEF)

Identifiers—American Library Association, Buckley Amendment, Hazelwood School District v. Kuhlmeier, Library Bill of Rights, Multicultural Materials

This manual is designed to help librarians anticipate and resist censorship of library materials, how to handle complaints, and how to write legislators effectively. Part I, "Library Bill of Rights," and Part II, "Protecting the Freedom to Read," present the text and historical development of the American Library Association's (ALA) intellectual freedom policies, including interpretative discussions of: barriers to information access based on age, gender, sexual orientation, physical disability, or economic disadvantage; diversity in the library collection; patron confidentiality, and developing guidelines for user behavior. Advance preparations for censorship resistance, like developing policy and procedures and raising public awareness of intellectual freedom, are covered in the third section. Part III also features the articles "Public Relations: Crisis Communications" (Jeanne Thorsen) and "Pressure Groups: Politics, Religion, and Censorship in Libraries" (Carol Neilsen). Part IV, "Intellectual Freedom: An All Embracing Concept," assembles essays discussing intellectual freedom issues in various settings, including: public libraries (Gordon M. Conable); school library media centers (Dianne McAfee Hopkins); academic libraries (Paul B. Cors); federal libraries (Bernadine Abbott Hoduski); and state library agencies (Diana Young). The section entitled "Intellectual Freedom and the Law" includes: (1) "School Library Censorship and the Courts: Before Hazelwood" (William D. North); (2) "School Library Censorship and the Courts: After Hazelwood" (Robert S. Peck); (3) "The Buckley Amendment: Student Privacy versus Parents' Right to Know" (Anne Levinson Penway); and "Public Libraries as Limited Public Fora for Access to Information" (Anne Levinson Penway). The types of censorship-fighting assistance that are provided by ALA and state intellectual freedom committees are offered in Part VI, along with the essay "Lobbying for Intellectual Freedom" (Carol C. Henderson). A selected bibliography contains 23 recommended readings. (BEW)

Document Not Available from EDRS.

Descriptors—Access to Information, Computer Networks, Decision Making, *Disk Drives, *Information Technology, *Library Automation, Library Services, *Local Area Networks, Microcomputers, Models, Nonprint Media, *Optical Data Disks, Vendors, Workstations

Identifiers—Network Architecture, Network Man-

agement, *Network Models, Technology Plans, UNIX Operating System, VAX Computers

In an era when patrons want access to CD-ROM resources but few libraries can afford to buy multiple copies, CD-ROM local area networks (LANs) are emerging as a cost-effective way to provide shared access. To help librarians make informed decisions, this manual offers information on: (1) the basics of LANs, a "local area network primer"; (2) the basics of CD-ROMs and the technology needed to run them; (3) CD-ROM networking; (4) sharing CD-ROM drives on peer-to-peer LANs; (5) sharing CD-ROM drives on Novell NetWare Networks; (6) sharing CD-ROM drives on UNIX, VINES, VAX, Mac, and other networks; (7) planning a CD-ROM network; (8) networking issues and concerns; (9) servers and workstations; (10) memory management; and (11) network standards and specifications. Appendices discuss installation of SCSI host adapters, offer illustrated examples of CD-ROM networking solutions, and contain a directory of 250 product vendors with addresses and phone numbers. A glossary is provided, and a selected bibliography contains 85 recommended readings and the titles of 25 relevant periodicals. (BEW)

Descriptors—Access to Information, Information Sources, Instructional Innovation, *Internet, *Library Instruction, *Library Services, Public Relations, Screen Design (Computers), Technological Advancement, Users (Information)

Identifiers—*Home Pages, Links (Indexing), Technology Plans, *World Wide Web

The World Wide Web, with its captivating multimedia features and hypertext capabilities, has brought millions of new users to the Internet. Library staff who could create a home page on the Web could present basic information about the library and its services, showcase its resources, create links to quality material inside and outside the library, and interact with browsers. Chapters include: (1) "The Home Page Advantage," which presents an overview of the World Wide Web and its ramifications for libraries; (2) "Start with a Plan," explains how to decide on an approach, a project timeline, and Web-related policy; (3) "Everybody's Web Site: Consensus and Collaboration," focuses on presenting the plan to staff and educating them; (4) "Content Search and Selection," which features directions for including remote content, or outside hyperlinks, as well as a list of subject directories and search engines; (5) "Presentation: Style and Structure," concentrating on design issues; and (6) "The Dynamic Web Site: Promotion Evaluation, and Maintenance." Throughout the book, screen captures of actual library home pages are provided, along with their Internet addresses; example of things other libraries have put on their home pages include maps, policy statements, hours of operation, directories, guides to the online catalog, interlibrary loan request forms, and even short video clips "starring" the library staff. Appendices offer online resources, special considerations depending on whether the setting is an academic library, school media center, or public library, and home page templates with sample hypertext markup language (HTML). Internet, Library Materials, *Library Policy, *Library Role, Public Libraries, School Libraries, Trend Analysis

Identifiers—First Amendment, Library Bill of Rights, *Right to Read

This manual discusses the issue of intellectual freedom as it pertains to library policy and practice and offers guidelines for ensuring the right to read. It is intended for the public librarian or school library media specialist who needs to develop new policies or update existing policies. The book is divided into 10 chapters. Chapter 1 looks at the role that libraries play in helping to ensure the First Amendment's guarantee of freedom of speech. Chapter 2 examines the kinds of policies libraries normally adopt and explores the relationship between policy and procedure. Chapters 3 and 4 discuss considerations specific to public libraries and school libraries. Chapter 5 focuses on Internet access and protecting intellectual freedom. Chapter 6 describes the reconsideration process and policy and chapter 7 presents a case study of a reconsideration situation involving the book, "Daddy's Roommate," in a Juneau (Alaska) School District. Chapter 8 discusses how to approach censorship challenges and chapter 9 focuses on trends and issues in intellectual freedom. Chapter 10 takes all the individual issues that must be assembled in protecting the right to read and highlights two specific library settings. Appendices provide interpretations of the Library Bill of Rights and Associated Guidelines, documents from the case study involving "Daddy's Roommate," and sample policies and statements from other organizations. (Contains 106 references and 11 figures.) (AEF)

Descriptors—*Art Education, *Art History, Art Products, *Computer Graphics, Higher Education, *Research Needs, Scholarship

Identifiers—*Digital Imagery

The future of digital imagery has emerged as one of the central concerns of professionals in many fields, yet only a handful of art historians have taken advantage of the profession's unique expertise in the reading and interpretation of images. Art historians need to participate in scholarship defining the roles and uses of digital imagery, rather than leaving the discussions to computer specialists and information managers. The potential values of computer images for the fields of art education and art history are discussed, including: (1) public availability of massive numbers of images; (2) greater quality and fidelity; (3) easier and faster access; and (4) permanence. All of these assets are explored in terms of new opportunities they present for art history students and the burdens they may ease for art history teachers. (Contains 17 references.) (BEW)

Identifiers—*Central Missouri State University
Academic libraries have traditionally provided some kind of term paper assistance to patrons. Central Missouri State University's Ward Edwards Library designed a two-pronged approach to a term

paper clinic (TPC), using traditional group instruction and one-on-one walk-in assistance. The primary goals of the TPC are to teach the student to: (1) select an appropriate topic; (2) locate reference materials; (3) utilize both print and electronic periodical indexes; (4) use a systematic approach to conducting research, keeping bibliographic cards, taking notes, and organizing a final draft; and (5) learn evaluative skills needed to select appropriate sources. A second research assistance event is "Research Rescue," an individualized approach to providing assistance to students doing library research. Research Rescue services include providing individual assistance at a point of need; offering walk-in help during an entire week; locating and using appropriate library resources; and involving the bibliographers for specialized individual research. (AEF)

This document is a library instruction manual for an introductory course on library research at the University of Nebraska-Lincoln. The assignments provided are intended for independent study; a syllabus is included for the 7-week course. The manual is divided into seven sections. Chapter 1 provides an overview of the library system, services, and collections; floor maps of the library are included. Chapter 2 introduces the Libraries Catalog on the Innovative Research Information System (IRIS) and describes search options. Chapter 3 focuses on finding materials in the University Libraries. Chapter 4 discusses other information systems on IRIS, including the Expanded Academic Index and the Access to the Internet and Library and Information Suggestions components. Chapter 5 reviews the Specialized Databases Network and Chapter 6 discusses printed indexes and abstracts. Chapter 7 is a tutorial for developing a search strategy. Worksheets for the five assignments are presented after the chapters they cover. (AEF)

Most libraries involved to any extent with total quality management (TQM) realize that successfully gathering information from their customers is the key to improving services. To do this libraries must employ a variety of methodologies, both quantitative and qualitative research. Quantitative primary data is usually collected in libraries by survey or by observation. Types of surveys include on-the-spot questionnaires, mail surveys, phone surveys, or in-person interviews, and the advantages and disadvantages of each are listed. Survey researchers must consider: (1) what they want to know; (2) whom they need to interview; (3) how they are going to select people to interview; (4) how many people they need to interview; (5) what questions will be asked; (6) how to administer the questionnaire; (7) how to analyze the data; and (8) how to glean meaning from the results. Qualitative research often involves focus groups, which can be used to determine how well existing services meet clients' needs; help design quantitative studies; supplement data collected through a user survey; provide insight into non-use; plan for a new facility; and solicit input on electronic resources. To be successful, focus group discussions must have established research goals; an identifiable target audience; an objective, enthusiastic, and knowledgeable moderator; a carefully planned discussion; a record of session; and a comfortable facility. Identifiers—Continuous Improvement, Departmental Politics, Job Restructuring, *Pennsylvania State University, Process Improvement

This paper chronicles ongoing alterations to the organizational structure of the acquisitions department at Pennsylvania State University using the tenets of total quality management (TQM). The movement toward reorganizing for process improvement began in late 1992 when the associate dean of libraries called the acquisitions department together to discuss filling a vacant position. Proposals were made suggesting changes in the department's leadership and supervision hierarchies. A management team and a steering committee were established to begin the process of moving toward self-directed work teams. The first stage of reorganization involved administering a department survey which assessed the culture of the department, staff feelings and emotions, levels of employee involvement, and opinions on various issues key to reorganization process. Stage 2 was the assembling of the design team, who reviewed survey data, developed a project plan and time frames for accomplishing each task, and determined what activities would be necessary to maintain good communication, to solidify team structures, and to ensure everyone had proper training. Other preliminary activities have included site visits to other organizations that have reorganized into teams. Throughout the planning process several informal approaches have been taken to encourage department members to become "team players," including coaching supervisors to become leaders rather than managers, coaching staff to think and act like teams, the formation of a pilot team, and intensive training efforts that are attempting to overcome remaining doubts among department members. Often when total quality management (TQM) does not live up to expectations, that failure is a sign that implementation of TQM was simply fashionable "management hype" or "window dressing" without strong organizational underpinnings. TQM can have staying power when it is backed up by leadership basics of training people thoroughly and seeking ways to expand the organization in this era of downsizing. A successful TQM program must feature strong leadership, mission and vision, a strong and available training staff, and well-developed internal and external communications. Implementing TQM in libraries may require a higher comfort level among librarians with the language of business and the spirit of entrepreneurship. Also, librarians need not try to rush incremental improvements. (Contains 34 references.) (BEW)

Scarce resources, changing customer expectation, and the changing role of top management are all factors that have contributed to the implementation of total quality management (TQM) in libraries. Instructional articles, conferences, and videos can alleviate some concerns of cost and time commitment. Many libraries already practice some of the techniques of TQM, including an emphasis on good customer service, staff participation in decision making, and investigating user needs and levels of satisfaction, but do not have systematic methods for insuring that these things happen as a matter of course. TQM, perhaps with slight modifications tailored to specific library settings, can provide such methods. Among other things, those designing the program must keep in mind that starting small and simple is a good idea, that TQM should not be used as a panacea for personnel problems or for a sick organization in general, that teams should be made up of people who actually do the tasks and have ownership in the results, and that some staff will dislike the hype surrounding TQM and the application of business practices to a library setting. The hallmark tools in TQM include teams, customer surveys, flow charts and diagrams, and data. Brief details of experiences with TQM at Oregon State University are incorporated into the discussion. One problem with the outcome-based measures used in higher education is that they measure quantity but not quality. Benchmarking, or the use of some external standard of quality to measure tasks, processes, and outputs, is partially solving that difficulty. Benchmarking allows for the establishment of a systematic process to indicate if outputs are of quality, and even for organizations to develop their own definitions of "quality." It is typically used in strategic planning, in forecasting the organization's future, and in improving processes within the organization. Internal benchmarking compares similar activities performed by different departments in the same organization. Functional benchmarking compares one organization's processes to those of another organization deemed the leader in that same area. Generic benchmarking involves examining the best practices in areas that cross industry lines, like document processing or building maintenance. Finally, competitive benchmarking is looking at one's own performance in an area and comparing it to a competitor's. Usually it is services or products that are benchmarked, but internal work processes and support functions can also be measured this way. In the actual measuring process, pre-benchmarking means deciding what to measure and how, benchmarking involves gathering data and measuring outputs, and post-benchmarking includes analyzing the data and formulating future goals. The review/renew phase leads back to the beginning of the process as goals are reset. Sources of institutional data available for comparison, as well as sources offering guidance on the benchmarking process itself, are listed. (Author/BEW)

Identifiers—Continuous Improvement, *Duke University NC

This paper describes the Duke University Libraries' transition in early 1994 from its traditional hierarchical model to an organization emphasizing Total Quality Management (TQM) concepts such as self-managing teams and continuous improvement. Existing conditions at the libraries that played a role in the decision to switch included: (1) rising costs of library materials leading to less purchasing and more temporary access; (2) the arrival of networked information; (3) a truncation of time and workspace; (4) fiscal distress at other universities; (5) diminishing library share as a percentage of the overall university budget; and (6) expectation among non-MLS support staff for a career ladder in library service. The participatory approach had been getting results in technical services since the late-1980s, but it had yet to be implemented on a wider scale. Library administrators developed and made public a "Library 2000 initiative" to create a more flexible, holistic, and customer-based approach to library services. Three pilot project teams, or "quick start" teams, were assembled to define and investigate three problem areas. At the end of 3 months, the Implementation Planning Team looked at the quick start teams' work to assess the effectiveness of continuous improvement processes and of the team infrastructure. Team members were also surveyed for their comments. Then library administrators solicited proposals on organizational redesign; the 99 responses resulted in the formation of quality circles within "home teams," the new name and less hierarchical arrangement for "departments." Department heads were invited to become home team leaders. Recent team assessment has included performance criteria like inputs, processes, outputs, and outcomes as well as group-dynamics factors like inclusion, elbow room, ease of discussion, approach to conflict, support, clarity of purpose, use of skills, and leadership styles. Identifiers—Continuous Improvement, Dante (Alighieri), Divine Comedy, Empowerment, Kaizen, Work Values

A primary goal of the quality movement, like the traditional management techniques that preceded it, is to get the most committed effort possible from the members of the organization. This document surveys the literature in order to summarize the substantial debate on how to achieve that goal, and then offers a theoretical context of strategic choices faced by academic libraries. One source of disagreement is the value of performance appraisals that are customarily practiced in many academic libraries. Many proponents of total quality management (TQM) criticize appraisals for creating more anxiety than motivation and for being too general to be productive. Other TQM experts defend performance appraisals, saying that collecting relevant data and giving workers feedback is a vital part of any management scheme, including the quality movement. An administrator choosing between these opinions undertakes an almost Dantean journey: The "Divine Comedy's" literal level of mean-

ing, for example, can be translated to persisting with straightforward appraisals, and the allegorical level to embracing quality-movement concepts such as worker empowerment (kaizen) and partnering. Dante's moral level speaks to the TQM issue of intrinsic motivation, or work for its own sake without promise of reward. His highest level, the analogical or spiritual, can be compared to the quality movement's goal of an end to bureaucracy and hierarchy, although attachment to job status and to specialization currently present obstacles to that vision. Identifiers—Empowerment, *University of the West Indies (Jamaica), Work Habits

Well-designed performance appraisals should provide employees with feedback concerning their performance, serve as a basis for modifying behavior toward more effective work habits, and provide managers with data which they can use to judge future job assignments and compensation. Poorly-designed ones, used as short-term control systems, can create fear and mistrust. Performance appraisals can be very valuable, but they have been largely neglected because of the time and effort needed for data collection. This paper describes changes made in the performance appraisal process at the Mona (Jamaica) Campus of the University of the West Indies. The old review system included assessment by supervisors, review by a committee of peers, and review by the Library Assessing Committee. The new appraisal process, in step with Total Quality Management (TQM), begins with the assessor submitting a form on which he has identified both his achievements and areas for improvement. A questionnaire was administered eliciting the responses of professional staff members to both systems, and 15 of 22 were returned. Survey responses indicated that staff were unclear about the library's goals and their own duties. They disliked the perceived subjectivity of the appraisals, the limited scope for registering disagreements, and the emphasis on publications. As for the new process, respondents liked the idea of self-evaluation and liked the form itself but were unhappy about not being asked to participate in its development. The new system may continue to work if used in conjunction with other TQM principles like direct communication, setting the right goals, empowerment and training. Survey data is appended in nine tables. (Contains 13 references.) (BEW)

Identifiers—Saint Petersburg Junior College FL

In 1994, St. Petersburg Junior College (SPJC), in Florida, conducted a survey to determine the level of satisfaction with programs and services among graduates from 1992-93, the extent that graduates achieved their goals, and factors affecting goal achievement. Telephone and mail surveys resulted in responses from 1,358 of the 2,595 1992-93 graduates. An analysis of responses revealed the following: (1) 85.7% of the graduates felt that their overall experience at SPJC was very valuable or somewhat valuable, and 83.4% were very or somewhat satisfied with programs and services; (2) over 92% of the respondents indicated that they had achieved their goal; (3) of the 66% of graduates attending a four-year college, 94% had associate of arts (AA) degrees and 55% reported enrolling in the same major as at SPJC; (4) 79% of the graduates reported that they were employed, with 92.1% of associate of science (AS) and 75.1% of AA graduates indicating that they worked; (5) AS graduates employed full-time had higher income earnings than AA graduates, with annual salaries averaging over \$30,000; (6) 92.7% of the AS graduates were working in their preferred field; and (7) while graduates with higher grade point averages had higher rates of goal achievement, no student demographic characteristics were found to be related to achievement. The survey instrument, response rates by program, and student comments are appended. (GTI)

Identifiers—Gulf of Mexico Accord 1995

Under the auspices of the North American Free Trade Agreement, five states in the United States and six states in Mexico established the Gulf of Mexico Accord to create a working partnership to foster economic development in the Gulf of Mexico. The agreement addresses six major sectors: investment; communication and transportation; health; education and culture; agriculture, fishery, and forestry; and tourism. Florida's Daytona Beach Community College was assigned the lead for the education and culture sector, and as part of the Accord's efforts held the First Education Conference in September 1995. One significant outcome of the conference was the generation of support for the establishment of a permanent Education Commission for the Gulf of Mexico. The conference also established four task forces to work on the following educational priorities: (1) establishing a resource information center focusing on language, history, and culture; (2) creating programs for educational development related to curriculum design, teaching methodology, educational technology, and student success; (3) developing the relationship between education and business, creating permanent links to strengthen the regional economy; and (4) establishing distance learning programs. Needs identified in the conference included finding a balanced funding mechanism and a method of broadening educational programs to include elementary, middle, and secondary educational institutions. Appendixes include a list of the conference participants, participating institutions, sponsors, brief summaries of the Gulf of Mexico governors conference and the Gulf of Mexico Accord, and the text of the Accord. Identifiers—Florida, *Miami Dade Community College FL

Despite their accomplishments in providing practical and efficient programs to a wide spectrum of their communities, the roles and benefits of community colleges are frequently misunderstood or understated, leading to severe underfunding. Legislators and researchers use the number of associate degrees awarded as the sole indicator of the institution's effectiveness. However, student goals at Miami-Dade Community College (M-DCC), in Florida, for example, encompass far more than the achievement of associate degrees. M-DCC provides career workshops and placements, business consulting services, and legal and counseling services. M-DCC also services the community by operating art galleries, presenting dance and musical performances, participating in partnerships and outreach programs, opening college athletic facilities to the public, and providing free health care services. Specific accomplishments for M-DCC for the 1992-93 academic year include the following: (1) 77,525 students were enrolled in college credit courses and 37,371 were enrolled in occupational and special

courses; (2) 19,517 students improved basic skills or English proficiency; and (3) 68,485 students had achieved academic success in college level work, 9,709 left M-DCC with transferable courses, 3,386 completed associate in arts degrees, 8,263 left with specific occupational skills, 14,385 were employed and upgraded their job skills, and 1,179 students completed associate in science degrees. Identifiers—*Customer Satisfaction, Customer Services, *Okaloosa Walton Community College FL
Educational institutions rank second among the largest service industries in the United States with more than 9.1 million employees. Unfortunately, higher education institutions have shown a lack of orientation towards clientele service. Okaloosa-Walton Community College (OWCC), a comprehensive college enrolling approximately 16,000 students annually in Florida, recognizes its role as a service provider in its mission statement, but has no specific policy or training related to customer service. While a February 1991 survey of customer satisfaction at OWCC indicated that customers/students were satisfied with the treatment and level of service they received, negative responses were received. To ensure that quality customer service is provided, OWCC and other community colleges should consider the following initiatives: (1) prepare a set of statements that present the college's philosophy and expectations for effective customer relations; (2) design a method to assess the level of customer service and monitor customer service trends; (3) clarify roles and responsibility of faculty, administration, and staff in regard to customer relations and articulate a customer communication plan; (4) build an institutional identity and expectations about customer service through human resource management's recruitment, selection, hiring, and orientation with new personnel; (5) emphasize training to develop employees knowledge, skills, and attitudes in customer service; and (6) communicate attention toward customer relations and supply feedback on how the institution is accomplishing its service objectives. Contains 36 references. The student survey results are appended. (TGI)

Identifiers—*University of Hawaii Community College System

Compiled by the University of Hawaii Community Colleges (UHCC), this 1995 comprehensive report provides information about the seven UHCC campuses, focusing on educational programs, accomplishments, and enrollment. Following a message from the Chancellor, the report describes educational and employment training efforts implemented by the UHCC to accommodate the changing economy, including credit and non-credit instructional programs, cultural and tourism programs, partnerships with high schools for school-to-work programs, and career education. Next, the report reviews efforts to improve instruction through distance education, an international focus of the campuses and curricula, conversion of noncredit courses or job competencies to degree

credits, and computer and interactive multimedia instruction. Profiles are then provided of the seven colleges and the UHCC's Employment Training Center, with each profile including an introduction, a history of the institution, a narrative of 1994-95 accomplishments, and fall 1994 enrollment figures by program area and degree objective. Finally, a systemwide profile for 1994-95 is provided, including data on general fund appropriations; staffing; enrollment; classes taught; degrees and certificates awarded; student characteristics, such as full- or part-time status, gender, age, and ethnicity; programs of study offered; and special programs and community services. Identifiers—Ohio

After 40 years of efforts, the first bill authorizing the establishment of community colleges in the state of Ohio was finally adopted in June 1961. Before and after the passage of the act, attempts had been made to create a comprehensive community college system in Ohio, but all of them failed. A 1970 study by the Ohio Board of Regents (OBOR), for example, found that a lack of coordination among universities, technical schools, and community colleges led to a duplication of efforts and recommended the creation of comprehensive community colleges to better serve their communities. Public and private four-year universities, however, were against the recommendation fearing negative effects on enrollments. In 1992, a task force was created to suggest ways to improve the effectiveness and efficiency of the state's public higher education system, recommending restructuring the two-year campuses and again advocating a comprehensive community college system. The task force also found that the public were often confused about the services available at community colleges. In response, while not establishing comprehensive systems, the OBOR established service expectations for all two-year colleges and regional campuses. While these expectations represent a possible starting point, attempts to create a comprehensive community college system in Ohio have so far failed because of political pressure from influential interest groups, including private colleges, proponents of vocational and technical education, and state four-year universities. Each year, Prince George's Community College (PGCC), in Maryland, prepares a market analysis report to assist the college's enrollment management team in planning recruitment and promotional campaigns aimed at increasing credit student enrollment. This report provides the analysis as of fiscal year 1995 and includes historical data from past years to identify trends. The report is divided into the following sections: (1) a current student profile, including number of students, demographics, fall enrollment trends, summer session attendance, student incomes, and financial aid needs; (2) character-

istics of first-time college students at PGCC, including goals and plans, socioeconomic status, and academic and socio-cultural background; (3) market share analysis, focusing on the proportion of Prince George County residents attending college in Maryland and PGCC; (4) comparative statistics on the numbers of credit students at PGCC and other Maryland institutions; (5) reasons why potential students fail to enroll at PGCC, examining financial issues, enrollment at other institutions, work schedule conflicts, and transportation difficulties; (6) an analysis of the high school student market, indicating that PGCC enrolls more county high school graduates than any other Maryland four-year college or university; (7) an assessment of the adult higher education market in the county, presenting results of a spring 1995 survey of community perceptions of PGCC; and (8) enrollment objectives of PGCC's fall 1995 marketing plan. Tables of enrollment and survey data are included. (TGI)

Identifiers—University of Kentucky Community College System

In 1989, the Commission on the Future of the University of Kentucky Community College System issued recommendations for improving the colleges' role, effectiveness, and potential. This report assesses the progress made as of 1995 with respect to the recommendations, focusing on the areas of funding, governance, postsecondary technical education, economic and workforce development, access to higher education, effectiveness and accountability, and public awareness. For each of these issues, the report provides a summary of the current status as well as Commission recommendations and the rationale behind the recommendations. Major recommendations for 1995 include the following: (1) provide a 7% increase in higher education funding for each year of the 1996-98 biennium; (2) develop more collaborative processes and partnerships that result in joint ventures with the Kentucky TECH System for community development; (3) increase responses to business and industry needs with technical degree programs, job specific training and retraining, and services; (4) emphasize basic skills education and training; (5) increase the use of innovative methods for greater statewide access to higher education and public service offerings; (6) launch an educational campaign about the purpose, roles, and value of the community colleges to the community; (7) provide statewide advocacy and networking of the community colleges; and (8) strengthen the effectiveness of the local advisory boards. Community colleges are a primary delivery mechanism for postsecondary occupational programs, with over 60% of the state's high school graduates

who attend college attending community colleges. The report presents statistical data on the state's community colleges for 1994-95. The first section provides a list of board members and staff, a directory of community and junior colleges in the state, a map of the college districts, a schedule of board of trustees meetings, and a brief foreword. The second section focuses on enrollment, including 5-year enrollment trends from 1990 to 1994, credit and total enrollment by institution by campus for fall 1994, non-credit enrollment by college, percentages of in-district/out-of-district residency status by college, credit enrollment by county, and credit enrollment by race by college. The third section highlights system finances, including a comparison of revenue by source and expenditure by program, county tax support, student fees and charges per semester, education and general expenditures by function and object, auxiliary enterprise revenues and expenditures, and expenditures per full-time equivalent student by function. The final section features data on program completion by sex and race, academic faculty salaries, faculty average salary versus regional average salary, the 1995 learning resources survey, dormitory utilization, and transportation services. Identifiers—Community College of Rhode Island

As part of an effort to develop a skill-based education program for students that relates academic skills with workplace skills, the Community College of Rhode Island developed a working instructional model consisting of 6 areas, or strands, and 31 skills. The model is directed at students in grades 9 through 12 and recognizes the importance of establishing an educational continuum from elementary to postsecondary education. The six strands in the model are: (1) career occupational skills, including exploration, planning, preparation, maintenance, advancement, and transferable skills; (2) personal skills, such as attitudes toward self and team work, ethics, values, empowerment, accountability, daily living, and decision making; (3) interpersonal skills, such as communication, leadership, team work, conflict resolution, diversity, and internal/external customer relationships; (4) applied technology skills, including information access, information analysis, and computer literacy; (5) skills in understanding and working through systems, including government/political systems, social systems, economic systems, and organizational structures; and (6) critical thinking process skills, such as problem identification/resolution, information access, decision making, obstacles to problem resolution, and reflection. For each skill, a brief description, the targeted grade level, and suggested activities and assessment methods have also been developed. By implementing the skill-based instructional model, institutions can provide a sequential and cumulative program which is linked to the workplace and focuses upon life-long learning. (TGI)

*School to Work Transition

In an effort to relate academic skills with workplace skills and facilitate the transition from school to work, the Community College of Rhode Island developed a skill-based instructional model targeted at 9th through 12th graders and consisting of 6 instructional areas, or strands, and 31 related skills. This guide provides suggested activities for the skills and includes sample handouts and assignment sheets. The activities are organized by the following six strands: (1) career occupational skills, focusing on developing awareness of diverse careers and prerequisites, preparing an academic program reflective of the career choice, and job search strategies; (2) personal skills which examines essential personal attributes and their interplay with career development and develops a personal work ethic and critical thinking skills; (3) interpersonal relationships, including developing language mechanics, identifying leadership styles, exploring conflict resolution, and developing an awareness, understanding, and appreciation of diverse cultures; (4) applied technology skills, focusing on information access, information analysis, and computer literacy; (5) understanding and working through systems, providing a working knowledge of government/political systems, social systems, economic systems, and organizational structures such as union development; and (6) critical thinking process skills, identifying a school or community problem and proposing solutions. For each skill, an overview is provided and information is presented on a suggested time in the lesson plan for addressing the skill, the target grade level, and objectives. (TGI)

Implications of the Telecommunications Act of 1996 for Community Colleges.

American Association of Community Colleges,

Washington, DC.

Pub Date—14 Feb 96

Note—14p.

Pub Type—Reports - Descriptive (141) — Opinion Papers (120)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Community Colleges, Computer Mediated Communication, Computer Networks, Educational Legislation, *Educational Technology, *Federal Legislation, Government School Relationship, *Information Networks, *Internet, *Legal Responsibility, School Business Relationship, *Telecommunications, Two Year Colleges

Identifiers—Telecommunications Act 1996

The enactment of the Telecommunications Act of 1996 contains a number of provisions that clearly affect community college and university use of telecommunications and information services. The Telecommunications Act expands the concept of universal service, or the idea that all Americans should have access to basic telephone service; requires telecommunications carriers to provide special and affordable rates for educational institutions (defined as K through 12, but possibly extended to colleges), non-profit libraries, and rural health providers; and authorizes federal departments and agencies to provide financial assistance to a new private non-profit corporation for educational technology. The most controversial provision, the Communications Decency Act (CDA), has ignited a debate over freedom of speech with respect to provisions intended to protect minors from accessing obscene or indecent material through the Internet or other telecommunications devices. Activities proscribed by the CDA include knowingly making available to minors material that is "offensive to contemporary community standards" and permitting a telecommunications facility under one's control to be used for that purpose. The CDA also creates new federal crimes for these violations. Although the act does contain some defenses to liability for service providers, it significantly affects community colleges with its risk of institutional and personal liability for violations in such areas as minor students accessing indecent material through a college computer or a faculty member exercising academic freedom. Identifiers—Huerfano Junior College PR

The Industry-Academia Partnership Pilot Project (IAPPP) was undertaken by Huerfano Junior College (HJC), in Caguas, Puerto Rico, to improve advanced technical education, enhance the competitive capabilities of the region, and reduce the region's unemployment rate. The project consisted of three basic components: professional growth opportunities for faculty; curriculum development through job-specific educational experiences for all program students; and program improvement through a job orientation and work experiences or internships. In all three components, staff from participating industries acted as consultants to faculty and as mentors to students. All students enrolled in IAPPP were minority students, 84% were from rural towns, and 99% came from families with incomes below the federal poverty level. The program was implemented in the first 3 months of the project and consisted of coordinating professors' visits to industries to establish initial contacts. The second stage, implemented in the next 4 months, was dedicated to strengthening industry ties and scheduling students' visits. The final stage, lasting 4 more months, involved student internships. The program, which achieved a 100% retention rate, increased the employment outlook of participating students by 81%. Of the 23 participating students in the electronics program, 4 students were employed by the companies they had gained experience in, and 3 of the 9 students in the Computer Drafting program were employed by companies in which they practiced. Identifiers—*Georgia

In recent years, an emphasis has been placed on making the transfer process more effective and ensuring that all students are able to complete a Bachelor's degree. The Transfer Education Commission of the National Center for Academic Achievement and Transfer (NCAAT), for example, has issued an agenda that identifies academic practices and policy decisions that should be addressed in articulation efforts between two and four-year institutions to improve transfer success. The NCAAT agenda consists of the following nine key points: (1) establish a firm institutional commitment to transfer; (2) enrich the connection between teaching and transfer; (3) revitalize academic relationships between institutions; (4) manage transfer more effectively; (5) identify and realize transfer goals; (6) inform students fully; (7) issue a clear public call for improved transfer; (8) acknowledge the importance of financial support; and (9) establish firm expectations of transfer success. Other researchers have identified emerging national trends in transfer models, including an awareness of the value of articulation partnerships, communication and collaboration between faculty from two-year and four-year colleges, academic partnerships, and an emphasis on math and science competencies. Strategies identified in the literature for improving transfer effectiveness include creating formal articulation agreements, providing active student support services, undertaking curriculum reform to strengthen the collegiate na-

ture of community college curricula, and encouraging faculty collaboration with the articulation process. The NCAAT agenda is appended. (TGI)

Rural community colleges have an important role to play in the economic development of their communities and in preparing community members for technological, economic, and societal changes. Community-based programming (CBP) is one tool utilized by colleges to become aware of local problems by collaborating with citizens, leaders, and community-based organizations and agencies to identify and seek resolutions to major issues in the community. The CBP model has been effectively employed to combat illiteracy, one of the most pervasive problems facing rural communities. Specific strategies employed by the Appalachia Regional Steering Committee to address the problem of illiteracy in its region include the following: (1) policy strategies, such as identifying and working with community leaders to become involved in community development activities; (2) dispositional strategies, including promoting equal opportunity for rural adults and establishing peer support and career planning activities; (3) situational strategies, such as lobbying for reductions in transportation and educational costs; and (4) institutional strategies, including the development of cooperative partnerships at all levels. Finally, another pressing issue facing rural communities is educational access. Rural community colleges are providing technological learning systems such as distance education programs and instructional television broadcast channels to increase educational and employment opportunities. Identifiers—ERIC Digests

As a result of increasing pressure from external constituencies, community colleges have been called upon to demonstrate accountability through assessment activities and research on institutional effectiveness based on student outcomes. Since community colleges include transient student populations, students with a wide range of ability and academic goals, and large numbers of adjunct faculty, assessment should focus on the improvement of campus instructional and support programs to increase student success, rather than on national comparisons. In addition, it is critical that colleges determine who will assess the information collected and how it relates to student learning and instruc-

tion. Available assessment techniques and methods include competency-based models, self-reports, third-party reports, focus groups, in-depth interviews, participant observations, case studies, exit surveys, and alumni surveys. Assessment activities should take into consideration the needs of culturally, ethnically, religiously, and linguistically diverse students. Although offering extrinsic rewards encourages participation in assessment activities, assessment only becomes an integral part of the institution when this focus is clearly stated in the mission of the college and emphasized as a part of ensuring student success. Faculty resistance and lack of resources are often barriers to assessment processes. Finally, rather than searching for a single indicator to demonstrate success, institutions should value the use of different benchmarks as evidence of institutional effectiveness. (TGI)

The Student Intent Survey at Westchester Community College (WCC), in New York, is designed to determine students' primary reasons for attending WCC, where they learned about the college, and their future plans for completing their education. In November 1994, the survey was distributed to students in 66 English Literature and Composition courses, receiving responses from 412 students, of whom 277 were first-semester students and were included in the sample. An analysis of responses revealed the following: (1) 76.9% of the respondents were attending full-time, 50.2% were female, and 77.6% were under the age of 22; (2) 55.2% reported that their primary motive for attending WCC was to transfer to a four-year college, while 23.1% indicated that they wanted to prepare for a first career; (3) 33.8% indicated that they first heard about WCC from a friend or parent, 24.7% from a WCC student, and 23.7% from a high school guidance counselor; (4) 80.5% indicated that the low tuition at WCC was an important factor in their decision to enroll, while 61.2% cited the nearness of the campus to their home; and (5) with respect to future educational plans, 45.8% indicated that they intended to transfer to a four-year college before graduating and 37.9% that they planned to earn a degree. Each year, students at State University of New York community colleges are surveyed regarding their general characteristics, reasons for attending their college, and perceptions regarding their college. This report provides results from five sections of the spring 1994 survey of Westchester Community College (WCC) students and includes comparisons to results from a 1991 survey. The first section provides findings related to student characteristics, including data on employment while attending college, commute to campus, living accommodations

and residency, status upon entering WCC, marital status and number of children, choice of occupation, and changes from 1991 results. The second section reviews findings related to students' motivations for choosing WCC, indicating that low cost was cited as a major reason by 66.3% of respondents, transfer by 49%, the existence of desired programs and courses by 48%, and nearby location by 44%. The next section focuses on student attitudes toward WCC services and facilities, reporting that students were the most satisfied with library services and least satisfied with parking facilities. The fourth section describes student attitudes toward faculty and classroom activities, including data on faculty instruction, course availability, and the intellectual challenge of programs. The final section describes student attitudes toward the college climate, including data related to student perceptions of staff attitudes toward students, racial and ethnic harmony, campus media, and student sense of belonging. Data tables are included for each section. (BCY)

Identifiers—*Westchester Community College NY

This report describes progress made by Westchester Community College (WCC), in New York, on 23 strategic planning goals in the 1994-95 academic year. Information is provided on the following goals: (1) increase flexibility in operating the college; (2) increase flexibility in providing innovative academic and vocational programs; (3) upgrade equipment and technological support systems; (4) increase the involvement of community businesses and agencies; (5) keep up-to-date on local demographics; (6) enhance the visibility of the college; (7) expand the physical plant; (8) develop alternative delivery systems; (9) respond to the needs of special students; (10) enhance the developmental education program; (11) expand student and academic support; (12) increase the number and diversity, and maintain the quality of faculty and staff; (13) increase funding and maintain accreditation for the college; (14) assure a safe campus; (15) provide improved access to college facilities, services, equipment, and programs; (16) increase and support faculty development activities; (17) restructure the administrative and fiscal hierarchy; (18) develop alternative learning experiences, such as fieldwork and internships; (19) develop joint programs with elementary and secondary schools and other colleges; (20) maintain a campus climate that is conducive to learning; (21) promote student involvement in decision-making processes; and (22) increase communication among the college community. For each goal, information is provided on progress in the areas of academic affairs, administrative services, community services, college-community relations, the WCC Educational Opportunity Center, evening services, information systems, and student personnel services. Kids Learn from the Inside Out: How To Enhance the Human Matrix.

Report No.—ISBN-0-9625040-4-1

Pub Date—94

Note—282p.

Available from—Legendary Publishing Company, P.O. Box 7706, Boise, ID 83707-1706 (\$18.95, plus \$2.50 shipping).

Pub Type—Books (010) — Guides — Non-Classroom (055)

Document Not Available from EDRS.

Descriptors—Age Differences, Behavior Development, Behavior Problems, Child Health, *Devel-

opmental Continuity, *Developmental Stages, Early Childhood Education, Emotional Development, *Individual Development, *Learning Processes, Parent Child Relationship, *Perceptual Motor Learning, Pregnancy, Prenatal Influences, *Stress Management, Young Children Identifiers—Assisted Healing, Dysfunctional Family, Kephart (Newell), Montessori (Maria), Repatterning

Noting that humans develop according to a genetically encoded timeline and that departure from the timeline limits human potential, this book provides an illustrated practical guide to intervention to help children's bodies work as they should, to nurture children along their developmental timeline, to help children learn "from the inside out." Based on the concepts of assisted healing and repatterning (rather than physical therapy treatments) and physical challenges (rather than physical handicaps), the guide describes the Integrated Human Dynamics approach to fostering healthy child development and circumventing later problems that are built on a complex foundation of body memories, behavioral patterns, and stress. The book is divided into five major sections: (1) What It's All About; (2) The Innate Automatic Stage of Development; (3) The Motor-Perceptual Stage of Development; (4) The Perceptual-Motor Stage; and (5) The Perceptual Stage. Chapters are as follows: (1) "Learning from the Inside Out," on the human matrix and the damage of traumatic or negative events; (2) "Development and Stress," on how stress affects parenting and child development; (3) "Life before Birth," on the physiology of pregnancy and birth; (4) "The Fourth Trimester," on neonatal adjustment and needs; (5) "The AHA! of Kinesesthesia," on movement and visual perception in the first 2 years; (6) "Moving up in the World," on motor progression and orientation in space and time; (7) "Making Contact," on locomotion, grasping and reaching, and speech development; (8) "Systematic Exploration" (18 months to 4 years), on body awareness and social growth; and (9) "Ready for Action" (3 1/2 to 7 years), on completing motor generalizations, school readiness, and use of Ritalin for hyperactivity. Seven appendices contain chapter notes, case studies, comments on working with developmental therapists, guidelines for using the Integrated Motor Activities Screen (IMAS), and an 87-item bibliography. Tatum, Pam S.

Promoting Wellness: A Nutrition, Health and Safety Manual for Family Child Care Providers. Save the Children, Atlanta, GA.

Pub Date—Jan 94

Note—407p; Supported by an educational grant from Nestle USA.

Pub Type—Guides - Classroom - Teacher (052) — Guides - Non-Classroom (055)

EDRS Price - MF01/PC17 Plus Postage.

Descriptors—Child Health, Day Care Centers, Early Childhood Education, *Family Day Care, Guides, *Health Education, *Health Promotion, Nutrition, Training, Young Children Identifiers—Caregiver Training, Health Attitudes, Health Behavior, Health Information, Health Motivation, Nutrients, Nutrient Values, Nutritional Deficiencies, Recipes (Food), *Wellness

This manual provides a reference source for use by sponsor organizations of the Child and Adult Care Food Program (CACFP) in training family child care providers. The manual begins with separate introductory sections for trainers and for providers. The trainer's section includes materials on: how adults learn, strengths and limitations of various types of training techniques, facilitating caregiver skills, and 28 elements of a successful workshop. The providers' introduction is primarily an outline of responsibilities of providers participating in the CACFP. This section lists responsibilities of the federal government, state agencies, the sponsor, and the provider. The manual itself contains six chapters as follows: (1) "Mealtime in the Family Child Care Home," on how children are fed, feeding relationships, eating behaviors with respect to physical and social development, and promoting healthy attitudes toward food and eating; (2) "Understanding Dietary Guidelines," on nutritional information for providers with some background in that area and for those without; (3) "Change Your Diet: Making the Dietary Guidelines Work for You" (formatted as a workbook), on issues related to change and teaching providers how to evaluate diets, set goals, develop plans for meeting new goals, and monitor

dietary progress; (4) "Hungry Bodies, Hungry Minds: Recipes and Learning Activities for Children," listing 100 nutritious recipes for children, with suggestions for involving them in preparation; (5) "Protecting Children's Health: Preventing Infectious Disease and Food-borne Illness," on preventing disease and illness, developing a health policy, and purchasing, storing, preparing, and serving food safely; and (6) "Healthy Children in Safe Environments," on child health in relation to the day care setting, including immunizations, poison prevention, prevention of lead exposure, and oral health. How Does It Feel? Child Care from a Parent's Perspective.

Report No.—ISBN-1-86323-042-4

Pub Date—94

Note—76p.

Available from—Australian Early Childhood Association, Inc., P.O. Box 105, Watson, Canberra, Australian Capital Territory 2602, Australia (\$12.95 Australian Dollars; 15% discount on 20 or more copies).

Pub Type—Books (010) — Guides - Non-Classroom (055)

Document Not Available from EDRS.

Descriptors—Child Caregivers, Child Rearing, Cooperation, Day Care, Early Childhood Education, Foreign Countries, *Parent Attitudes, Parent Child Relationship, Parent Education, Parent Participation, Parent Role, *Parents, *Parent School Relationship, Partnerships in Education, *Teamwork

Identifiers—Australia, *Parent Caregiver Relationship, *Parent Needs

Noting the increasing attention in child care professions to the importance of understanding children in the context of their families, this guide attempts to help child care staff get a clearer idea of the feelings which parents have about placing their children in daycare. Forming partnerships between parents and child caregivers is emphasized through looking at child care situations from the parent's perspective. The chapters are as follows: (1) "Introduction," emphasizing that parents are the most important people in a child's life; (2) "What is a Partnership? How Can We Help Create One?," focusing on parent-caregiver partnerships—asserts that mutual respect, trust, sensitivity, communication, common goals, teamwork, equality, and shared decision making should all be components of the partnership; (3) "What Partnership Is Not," emphasizing that a partnership is not the same as parent involvement or parent participation; (4) "Through a Parent's Eyes," describing common situations that occur when parents use day care and focusing on empathy on the part of caregivers; and (5) "Not All Parents Are Lovely," asserting that while most parents are reasonable, responsible, and caring concerning their children, some are difficult, critical, irresponsible, or uncooperative. Identifiers—Maternal and Child Health Block Grants, *Maternal Health, *Public Private Partnership Programs

The Healthy Tomorrows Partnership for Children Program (HTPCP) was developed to support special

projects demonstrating how states, local agencies, organizations, and communities can work together to improve health of mothers and children. The HTPCP supports a coalition that includes the federal and state governments, professional organizations, foundations, corporate leaders, and families. The HTPCP grant projects described in this document encourage community-based approaches, strengthening the ability of communities to build public-private preventive health strategies. For each of the 54 programs described the problem addressed by the program is given, along with the goals and objectives, methodology, and an evaluation statement. This document details Healthy Tomorrows projects in the following states: (1) Alaska; (2) California; (3) Colorado; (4) Connecticut; (5) District of Columbia; (6) Georgia; (7) Hawaii; (8) Idaho; (9) Illinois; (10) Louisiana; (11) Maryland; (12) Massachusetts; (13) Michigan; (14) Minnesota; (15) Missouri; (16) Nebraska; (17) New Mexico; (18) New York; (19) North Carolina; (20) Ohio; (21) Oregon; (22) Pennsylvania; (23) Rhode Island; (24) South Carolina; (25) Texas; and (26) Wisconsin. Issues in Problem Solving Discourse: A Preliminary Study of the Socialization of Planning Skills during Science Lessons in a Kindergarten Classroom.

Pub Date—94

Note—38p; Paper presented at the Annual Meeting of the American Educational Research Association (75th, New Orleans, LA, April 4-8, 1994).

Pub Type—Speeches/Meeting Papers (150) — Reports - Research (143)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Bilingual Education, Child Development, Classroom Techniques, Discussion (Teaching Technique), *Elementary School Science, Interpersonal Relationship, Interviews, *Kindergarten, Participant Observation, Planning, Primary Education, *Problem Solving, *Science Instruction, *Socialization, Teaching Methods

This case study explored how social interaction during science lessons leads to the development of planning skills in students. An analysis of group discussions was conducted. Questions addressed were: (1) What is the nature of planning discourse during science problem-solving activities with young children? and (2) How is collaborative planning during science problem-solving encouraged by the teacher to help a student structure problem-solving attempts? An urban elementary school located in a transient, low-income, predominantly Latino neighborhood was selected. The class tended to be bilingual, but the analysis focused on activities where English was used primarily. The classroom population was 30 children, and one-third were fluent English speakers. Participant observation notes and unstructured interviews were conducted. Classroom documents and video and audio tapes of 1-2 hour durations were analyzed. Discourse and conversation analytic methods were used to complete both macro and micro analysis of classroom discourse. Results suggest that the teacher's general framing of learning as problem-solving opportunities for all participants profoundly affected the nature of instructional talk, and contributed to an emphasis on learning about planning during social interaction. In this case study, the teacher was in the process of building a classroom environment that engendered group problem solving by creating opportunities in which students could actively participate in planning activities. The social organization, shaped by a complex integration of linguistic, visual, and kinesthetic texts, provided students with a means to make sense of practical activity as forms of problem solving that require planning. Active participation in social interaction around planning had the consequence of shifting students' roles from receivers of knowledge to producers of knowledge. (Contains 37 references.) (WP)

Descriptors—Beliefs, Cognitive Processes, College

Students, Cultural Awareness. *Cultural Differences. *Cultural Pluralism, Decision Making Skills, Developmental Psychology, Early Childhood Education, Epistemology, Existentialism, Foreign Countries, Higher Education, Individual Differences, Literature Reviews, Parents, Preschool Teachers

Identifiers—*Cognitive Frameworks

This paper reviews four studies about the nature of professional thinking among teachers, and its relationship to parents' thinking about children and education. The main question addressed in the literature was when and why individual diversity of views appears more strongly in some individuals, but uniformity appears more strongly in others. The method of the studies reviewed in this paper were individual interviews, transcribed and analyzed for themes and content. Subjects were combinations of parents, experienced teachers, and preservice teachers. Across all studies there were a total of 14 students, 11 early childhood teachers, and 7 parents. Interviews in every case focused on aspects of psychology and child development. Individual participants were selected deliberately for their experiences as university students, early education teachers, and parents. One common theme was the ontology of the child. Another theme was the epistemology of participants. The outcomes of these studies suggest the need to understand better the factors that create either diversity or uniformity of beliefs. For educating parents and teachers, attending to different philosophical frameworks will have to be part of the agendas for educators of parents and of early childhood teachers. Identifiers—Adolescent Attitudes, Child Safety, *Free Time, Out of School Youth Program

All over America, young adolescents' experiences of growing up have changed dramatically in the past two decades. Family life for adolescents has changed, adolescents face greater risks to their health, and greater risks of being poorly educated for the next century. Families, schools, and community organizations, the three pivotal institutions that once met the crucial requirements of adolescents to become productive adults, have been slow to adapt to new social realities. This report provides a summary of a task force examination of community programs for youth. The report discusses the challenges facing today's youth—particularly the large amounts of discretionary time-adolescents' needs, and the potential of community organizations to support youth development. The report outlines 10 principles that are vital for successful youth programs and makes recommendations on how key partners such as families, schools, health agencies, businesses, government, and the media can contribute to quality programs for youth. Descriptions of six successful youth programs are included, as is a list of several organizations that serve as resources for youth program development. (TJQ)

This report presents Phase 1 of the International Association for the Evaluation of Educational Achievement (IEA) 3-phase Preprimary Project being conducted in 11 to 15 countries. The project spans the years 1987 through 1997. The Preprimary Project has been designed to be conducted in three interrelated phases: Phase 1, a household survey in each participating nation to determine the types of early care and education services used by families, some characteristics of these families, and daily-life patterns of 4-year-olds; Phase 2, an in-depth study of sample settings identified in Phase 1 to determine quality of care and education in various settings, to examine interactive and structural features of these settings, and to explore program and family factors on developmental status in 4-year-olds; Phase 3, follow-up studies of development and progress in Phase 1 children at age 7. Initially, Phase 1 documented what 11 nations' official government policies have been historically toward early childhood services. They are: Belgium, The People's Republic of China, Finland, Germany, Hong Kong, Italy, Nigeria, Portugal, Spain, Thailand, and the United States. Notably, over 60% of all children surveyed spend at least some time in extraparental care or education settings. Ten major findings resulted from the Phase 1 inquiries: (1) the trend from parent care to out-of-home care or education for preschoolers is linked to the movement of women into the paid workforce; (2) the trend toward extraparental care or education is not likely to be reversed; (3) most of the children receiving extraparental care or education do so in only one such setting; (4) these children spend from 17 to 35 hours per week in extraparental settings; (5) parents electing to keep their children at home did so for parent-related reasons; (6) most out-of-home care or education services are sponsored by government or religious groups; (7) few such settings or services offered comprehensive service; (8) without exception and irrespective of stage of economic development, in each country it was the mothers who took primary responsibility for preschooler's care and supervision; (9) nonfamilial caregivers spend a widely varying amount of time daily with these children and, in some of the countries, preschoolers are left alone for extended periods; (10) the majority of children spend most of the time at home or in an organized care center. Commentary papers contain references. (ET)

Identifiers—Wake County Public School System NC

This newsletter focuses on the results of Safe Schools Program activities funded by the North Carolina Center for Prevention of School Violence and the North Carolina Department of Public Instruction from January 1994 to June 1995. These activities included conflict resolution and peer mediation, coping with anger, crisis response teams, a Continuing Education Incarceration Program (for students in juvenile detention), and diversity training sessions. Additional projects included the development of three model schools to devise strategies

which could be useful to schools statewide. Results of these activities and projects included: (1) increases in the number of staff trained to deal with conflicts; (2) assignment of law enforcement officers to schools in order to provide security, hold parent conferences, make classroom presentations, attend school events, and work with formerly incarcerated students as they returned to school; (3) improvement in parents' perceptions of school safety; (4) slight increase in the number of suspensions for violent acts per elementary school student; and (5) stability in the number of violent acts reported. Identifiers—Goal Analysis, Goals 2000, Kamii (Constance), *National Education Goals 1990, *National Education Goals Panel, Piaget (Jean)

In 1990, the National Education Goals were established by the President and the 50 state governors. Great attention has been given to Goal 1, dubbed the "readiness" goal: By the year 2000, all children in America will start school ready to learn. The Goal 1 Resource Technical Planning Groups were asked to suggest ways in which Goal 1 could be measured. The purpose of this document is to further amplify the dimensions of early learning and development used by the National Educational Goals Panel to measure progress toward Goal 1. The following five dimensions are discussed: (1) "Physical Well-Being and Motor Development"; (2) "Social and Emotional Development," serving as the foundation for relationships which give meaning to school experience; (3) "Approaches toward Learning," referring to the inclinations, dispositions, or styles that reflect ways children become involved with learning; (4) "Language Development"; and (5) "Cognition and General Knowledge." For each of the dimensions, a rationale, general definition, the relationship to individual, cultural, and contextual variation; and a summary are given. The report concludes with a discussion of underlying issues, implications, and action steps. (Contains 83 references.) (BGC)

Identifiers—*Africa, Eritrea, Mali, Tanzania, United Nations Convention on Rights of the Child, Zimbabwe

Using data primarily from United Nations Statistical Yearbooks, but from other sources as well, this Atlas provides an overview, in graphical form, of issues affecting children in Africa. Some of the issues covered, such as immunization, affect children directly. Others, such as economic progress, are included because they form part of the environment in which children develop and grow. The maps and

graphs are divided into the following categories: (1) Background, including independence and alliances, parents and children, and economics; (2) Health, including child mortality, and immunizations; (3) Nutrition, including child malnutrition, and Tanzania's community approach to addressing malnutrition; (4) Water and Sanitation, including hygiene education; (5) Education, including girls' and women's education, and programs in Mali and Zimbabwe; (6) Women, including girls' and women's health, and women in Eritrea's struggle for independence; (7) Children's Environment, including urbanization and children, and land degradation; (8) Emergencies, such as refugees and displaced persons; and (9) Achievable goals, such as immunizations, salt iodization, primary school enrollment, and ratification of the UN convention on the Rights of the Child. A section of sources and definitions concludes the Atlas. (HTH)

*Child Care Occupations, Child Development Specialists, Day Care Centers, Developmental Stages, Early Childhood Education, Foreign Countries, Government Role, Job Satisfaction, *Professional Training, Training Allowances, Identifiers—Caregiver Attitudes, Early Childhood Development Programs, United Kingdom

This paper discusses the issues surrounding the establishment of a system of professional development and training for early childhood workers and practitioners in the United Kingdom. The paper focuses on what needs to be done to accomplish an effective and efficient program of continuing professional development of practitioners. The paper first distinguishes between the definitions of two terms, development and training. The paper then notes that the effect of current policy initiatives raises an anxiety that far from increases training opportunities and requirements. Thus, paying attention to training is a relatively inexpensive strategy for improving quality. The current levels of training and development paint a worrisome picture of an early years work force because of limited and sporadic funding. Most early childhood workers have no access to training at all. There have been a number of strategies, but it is clear that much needs to be done if the British government is to ensure that early childhood workers have a high standard of training. The paper ends with a review of twelve action initiatives that could raise the level of training and development in order to establish child care as a high-status and professional career. Contains 10 references. (AP)

Identifiers—*Behavior Management

A program was implemented in an elementary school to improve students' social skills, thereby reducing physically and verbally aggressive behavior and reducing off-task behavior. The targeted population consisted of second, third, and sixth graders in two northern Illinois elementary schools, one situated in a low socioeconomic neighborhood, the other located in a middle class neighborhood in an urban community. The behavioral problems were documented through teacher and student surveys,

teacher anecdotal records, and behavioral observation checklists. A review of solution strategies suggested by educational literature, combined with an analysis of the problem setting, resulted in the selection of the following three major categories of intervention: instruction in cooperative problem solving; instruction in conflict resolution; and implementation of a cross-age mentoring-tutoring program. Post-intervention analyses indicated that the intervention improved student behavior. Many students were positively influenced by the strategies, and their social skills improved. Students with severe learning and behavior problems or dysfunctional families were less influenced by this type of intervention than students who were less troubled. (Appendices include copies of the teacher survey, student survey, observation checklist, observer instructions, and lesson plans and ideas. Contains 34 references.) (Author/AA)

Descriptors—Class Organization, *Classroom Environment, *Classroom Techniques, *Cooperative Learning, Intellectual Development, Learning Activities, Learning Strategies, *Primary Education, *Student Motivation, Student Participation, Teamwork, Thinking Skills, Identifiers—Organizational Behavior, *Organizational Skills

A program was implemented for improving student's motivation in order to increase their performance and self-esteem. The targeted population consisted of primary grade students in middle-class communities within the southwest suburbs of Chicago. Analysis of probable cause data revealed students' lack of skills related to organization, communication, and peer interaction. Faculty reported student deficiencies in active listening and problem-solving skills. Review of instructional techniques revealed that a variety of teaching strategies to meet the needs of many types of learners within the classroom were not being employed. An analysis of the problem setting resulted in the selection of two major categories of intervention: (1) an increase in instructional emphasis on organizational skills and implementation of cooperative learning strategies in student learning tasks. Follow-up assessment indicated that the students showed a marked increase in the use of the targeted organizational skills. As a result of cooperative learning strategies used in the classroom, task-related behaviors also showed improvement. The number of parent contacts decreased. All facets of student work, including test scores, revealed greater productivity. (Three appendices include copies of the informed consent and parent-child survey, a behavioral checklist, a student self-assessment form, and materials used to promote cooperative learning. Contains 59 references. (AA/Author)

Greenberg, Roxanne Nathan And Others

Self-Esteem Enhancement through Adult Role-Model Intervention.

Pub Date—Apr 95

Note—68p; Master's Action Research Final Report, St. Xavier University.

Pub Type—Dissertations/Theses - Masters Theses (042)

EDRS Price — MF01/PC03 Plus Postage.

Descriptors—Childhood Attitudes, Cognitive Processes, Educational Environment, Elementary Education, *Elementary School Students, *Intervention, Modeling (Psychology), *Parent Child Relationship, Parent Participation, Parent Role, Personality Traits, Program Effectiveness, *Role Models, School Role, *Self Concept, *Self Esteem, Self Evaluation (Individuals), Student Characteristics

Children from four elementary schools in Illinois were participants in the implementation of a project intended to improve their self-esteem through adult role-model intervention. The objectives of the project were to demonstrate that: (1) the adults in children's lives play a significant role; (2) an individ-

ual's sense of belonging and acceptance can be affected by the labels placed upon them; (3) all teachers with whom children come into contact can affect an individual's self-esteem; and (4) how children perceive themselves can have an effect on their self-esteem. Interventions used were designed to address two major solution components, parents and teachers as positive role models. Parents were given two surveys regarding goals for self-esteem. Similarly, children were given their own survey to determine their own self-concept. Parental involvement in the classroom was encouraged through an open-door policy and a weekly newsletter reporting class activities or important information. Finally, teachers conducted self-esteem lessons for students. Data analysis showed that the project achieved its goal of helping students increase their levels of self-esteem through positive adult role-model intervention. (AA)

Breese, Julie And Others

Developing Strategies for Young Children To Deal with the Dangers of Strangers.

Pub Date—24 Aug 94

Note—57p; Master's Action Research Report, St. Xavier University.

Pub Type—Dissertations/Theses - Masters Theses (042) — Tests/Questionnaires (160)

EDRS Price — MF01/PC03 Plus Postage.

Descriptors—Child Abuse, *Consciousness Raising, Elementary Education, Elementary School Students, Interpersonal Relationship, Personality Traits, *Prevention, *Safety Education, *Skill Development, Social Behavior, Social Development, *Stranger Reactions, Stress Variables, Teaching Methods, Training Methods, Identifiers—*Abductions, *Child Safety, Self Protection

This report describes the implementation of a child safety-abduction awareness curriculum. The targeted population consisted of primary grade students in a growing, middle class, rural community located in northern Illinois. Assessment of students' skills revealed a lack of strategies to avoid child abduction. Analysis of probable cause data revealed student inability to use an appropriate strategy when presented with a child lure scenario. The faculty reported that no curriculum was being taught to improve these strategies for child safety. A review of solution strategies, combined with an analysis of the problem setting, resulted in the development and implementation of a child safety curriculum for the targeted grades of kindergarten, second and fourth. Determining curriculum effectiveness involved the assessment of students' use of strategies to avoid abduction. Post-intervention data indicated an increase in students' awareness and ability to use an appropriate strategy when presented with a child lure scenario. (Sixteen appendices include copies of the parent and teacher surveys, student interview, rubrics, safety posters, parent newsletter, and newsletter survey. Contains 18 references.) (Author/AA)

Kinzig, Karen Nakai, Janet

Improving Student Engagement in Social and Academic Activities.

Pub Date—May 95

Note—149p; Master's Field-Based Program, Saint Xavier University.

Pub Type—Dissertations/Theses - Undetermined (040) — Reports - Research (143) — Tests/Questionnaires (160)

EDRS Price — MF01/PC06 Plus Postage.

Descriptors—*Academic Achievement, Behavior Change, Change Strategies, Classroom Environment, *Classroom Techniques, Elementary Education, Elementary School Students, Family Environment, Interpersonal Competence, Intervention, Learning Activities, Program Effectiveness, Prosocial Behavior, Self Efficacy, Self Esteem, *Social Development, *Student Attitudes, Student Behavior, *Student Improvement, Teacher Effectiveness

Kindergarten and third-grade students in two suburban communities located in northern Illinois participated in the implementation of a program for improving student's engagement in social interactions and academic activities. The problem documentation indicated a need for teacher's intervention in order to improve student's social academic engagement as well as address parental concerns about their child's engagement. Analysis of probable cause data revealed that students' lack

of engagement is related to cultural differences; lack of experience in control over their environment; internalized performance variables including self-efficacy, lack of self-esteem and ownership in the learning process; absence of intrinsic motivation; poorly developed social skills; and poor self-confidence. Two major categories of intervention were suggested: (1) creating a learning environment in which students accept and develop an appreciation for diversity; and (2) using a variety of teaching strategies through which students' sense of ownership, self-efficacy, and self-esteem will be enhanced. Follow-up assessments indicated that, as a result of the interventions, the students in both kindergarten and third grade increased their levels of engagement in the classroom. Measures of satisfaction with self, self-efficacy, school attitudes, and friendship also indicated improvement following interventions. (Ten appendices include copies of the parent permission letter, student questionnaires, parent questionnaire, family history questionnaire, and behavioral checklists for kindergarten and third grade. Contains 47 references.) (AA)

EDRS Price - MF01/PC04 Plus Postage.

Descriptors—Cultural Pluralism, Educational Change, Educational Needs, Family Influence, Family Role, Innovation, Intergenerational Programs, Literacy, Literacy Education, Mothers, Navajo, Parent Child Relationship, Parent Participation, Parents as Teachers, Policy Formation, Program Development, Reading, Writing (Composition)

Identifiers—Family Literacy, Shared Book Experience, Shared Reading

Designed for administrators, educators, and people interested in children's learning, this book explores ways to reawaken parents' understanding of their role as their children's first teachers. The volume is divided into four major sections. Part 1, which provides a background and rationale for developing intergenerational programming in support of family literacy, strongly supports a new focus on educating families rather than children or adults alone, provides background information about family programming, and introduces a family literacy statute. Part 2 describes three family literacy programs that focus on adults and children reading storybooks together, emphasizing give-and-take as the basis for intergenerational communication. Part 3 examines family literacy in multicultural settings, describing multilingual communities as treasure chests of linguistic and cultural riches and warns that educators can either tap and nurture these riches, or preside over their rapid demise. Part 4 addresses the practitioner who may be working alone or with a team to generate increased parent participation in children's learning, and suggests methods to encourage parent-child interaction in a literacy context. The epilogue is a reaffirmation of parenting, pointing out that the growing awareness of the family's critical contribution to children's learning underscores the need to create educational programs that are more comprehensive and holistic. Most of the chapters contain references. (AA)

Development Programs, Rhode Island, Rhode Island Child Care Training System

The Rhode Island Child Care Training System (RICCTS) is intended to tie all aspects of the state's child care and education training into a single system that will produce staff who are competent in delivering high-quality programs for young children. The RICCTS was evaluated for the effectiveness of efforts to ensure quality programming for young children and their families. Data were gathered from 125 training subjects and 23 comparison group subjects and their supervisors on the training's effectiveness in: (1) improving trainees' perceived level of knowledge and skills; (2) improving the quality of work life for the trainees; (3) enabling the implementation of trainee-created action plans; and (4) the different types of training offered such as workshops, conferences, and on-going seminars. Findings showed that while the RICCTS was effective in terms of the first three research questions, with regard to the fourth question, there were no significant differences in effectiveness across the three types of training offered. Results suggest that quality training for child care providers can potentially improve the services offered to young children. (Contains 20 references.) (AP)

Identifiers—Early Childhood Development Programs, England, Wales

This booklet is part of a series of articles, reviews, and conference reports issued by Goldsmiths Association for Early Childhood (GAEC). This issue focuses on parents as partners from the point of view of parents, teachers, and childminders, discussing how the partnership between home and school continues to become a more equal one by cooperative contribution. The articles in this issue are: (1) "The Changing View of Home-School Partnership" (Sue Pidgeon), emphasizing the important role of parents in their children's education; (2) "Childminding - The State of Play" (Charles Rice), dealing with the definition and function of childminding in early childhood education; (3) "Reading and Writing in the Nursery and at Home," discussing parental involvement in a bilingual nursery in South West London; (4) "Children and Their Families," a collection of children's drawings; and (5) "Quality in Diversity," presenting a framework for early learning in England and Wales for children from birth to age 8. The GAEC 1994 conference report offers summaries of the keynote speech, two workshops, and seminars. Two book reviews, of "Read It Together" (Sue Pidgeon) and "First Steps Together: Home School Early Literacy in European Context" (Henette Dombey and Margaret Meek Spencer, Eds.), are included. (AP)

school Teachers, Teacher Attitudes, Teacher Student Relationship
Identifiers—Caregiver Child Ratio, Group Size, New Zealand

This study examined kindergarten teachers' perceptions of the impact of changes in group-size policy on 3- and 4-year-old children in New Zealand's Wellington Region Free Kindergarten Association. Data were collected through a series of interviews of Wellington kindergarten teachers from 54 kindergartens and focused mainly on the perceived effects of changing group size with regard to parent-teacher relationships, staff and child turnover, and adult-child ratios. The findings show that the changed policy had had a direct impact on children, programmers, teachers, and families. The major issues presented by the teachers are as follows: (1) they had less time to work with individual children and small groups; (2) even though the adult-child ratio remained constant at 1:15, the larger group size had a marked impact on the type of activities teachers were able to offer; (3) teachers were being forced toward a supervisory role; (4) increased roll numbers had an adverse, diluting effect on teachers' relationships with parents; (5) in some kindergartens children were being admitted at a younger age, which placed extra demands on teachers; and (6) there had been little training or support for teachers to cope with the consequences of the new policy. (Two appendices include the kindergarten group size project questionnaire and the interview schedule. Contains 44 references.) (AP)

Descriptors—Comparative Analysis, Competence, Constructivism (Learning), Context Effect, Curriculum Development, Foreign Countries, Interaction, Interpersonal Competence, Learning Experience, Learning Strategies, Preschool Education, Schemata (Cognition), Teacher Student Relationship, Young Children

Identifiers—New Zealand (Wellington), Schema Theory

This study examined curriculum change involving teacher development based on the intellectual development of teachers, parents, and children by means of the theory of schema development. The paper describes constructivist pedagogy and schema and their importance for young children's learning, then reports on a qualitative study of over 300 children in charted childcare centers, family day care, kindergartens, and playcenters that was conducted along with a telephone survey of parents throughout the Wellington (New Zealand) region. Two centers were chosen for the intervention component of the project to observe differences between children attending the schema and comparison centers. Ten schema children's artistic endeavors or actions were examined. The findings show that the schema children had higher scores in all of the "being" competencies, "doing" competencies, and intrapersonal competency. There was an especially big difference in intrapersonal competency between the schema children and comparison children. The fact that children learn from materials and equipment as well as by interacting with their peers and teachers suggests that teachers need to change curriculum content in terms of curriculum processes. (Contains 49 references. Two appendices containing child observation guidelines and the observation form are included.) (AP)

Pub Type—Guides - Non-Classroom (055) — Books (010)

Document Not Available from EDRS.

Descriptors—*Behavior Development, Caregiver Child Relationship, *Child Behavior, Childhood Attitudes, *Child Rearing, Developmental Stages, Discipline, Eating Disorders, Group Activities, Parent Child Relationship, Play, Separation Anxiety, Sex Education, *Young Children

Identifiers—Biting, *Parent Caregiver Relationship, Superhero Play, Toilet Training

Intended to facilitate communication between parents and child care providers through creative problem solving, this guide explains young children's normal developmental behaviors that frequently cause concern, and identifies factors parents and caregivers can control in the environment that may have an immediate positive response from a child. The guide consists of 16 chapters on the following topics: (1) separation anxiety; (2) toilet training; (3) finicky eating; (4) activity level; (5) getting attention; (6) sexual curiosity; (7) tall tales and falsehoods; (8) power struggles; (9) temper tantrums; (10) superhero play; (11) joining a group of players; (12) turn taking; (13) inappropriate language and swearing; (14) tattling; (15) aggression; and (16) biting. Each chapter is divided into four sections. The first section of each chapter, "For Providers," contains information for early childhood settings, while the second section, "For Parent(s)," offers advice for the family context. These two sections are of similar structure and include a description of the behavior, observation questions, suggestions for both the provider and the parent, guidelines regarding when to seek professional help, and further readings on related topics. The third and fourth sections of each chapter, "A Plan for Action" and "Parent(s) and Provider Action Form," present an overview of the chapter and a planning form to help providers and parents plan, modify, and promote consistency between the early childhood setting and home. Contains 60 references. (AP)

The second annual roundtable represents an on-going effort to share knowledge and information and to develop a common agenda and measure the achievement outcomes in child welfare. This roundtable's goals included: (1) reviewing and selecting appropriate outcomes for children and families in child welfare systems; (2) building understanding of a conceptual framework for identifying key outcomes; and (3) building agency and community consensus regarding outcomes. Following acknowledgements and an introduction, this summary of proceedings is comprised of the following sections: (1) "Roundtable Staff"; (2) "Opening Remarks"; (3) "Presentations of Experience," including presentations from Colorado, Texas, California, and Utah; (4) "Summary of Work Group Sessions," focusing on child safety, family continuity, preservation, child functioning, and family functioning; (5) "Getting Started" on some measurement issues to consider when developing outcome measures for child welfare services; and (6) "Summary of the Roundtable." Identifiers—Day Care Licensing, Day Care Regulations, *Family Day Care Providers, National Standards, *Professionalism

Family day care is generally defined as the care of six or fewer unrelated children in a caregiver's home. However, there are no national standards or regulations for family or group child care homes, and the definitions of family child care vary from state to state. Regulated providers have been rated as more sensitive and observed to offer more responsive care than nonregulated caregivers. It is estimated that the number of nonregulated family child care providers may be four to six times greater than the number of regulated providers. "Nonregulated" does not necessarily mean illegal, as many states have "exempt categories" of regulation. License validators must recognize the importance of diversity among family child care providers and promote professionalism, as put forth by the Family Child Care Accreditation Program. (BGC)

This volume reflects some of the disciplinary and interdisciplinary diversity found in the study of programs for young children, and its chapters cover a number of matters central to early childhood development and practice, including preparation for practice. The book has 11 chapters divided into 4 parts that cover family and community, adults and the classroom, classroom interactions, and Vygotsky's influence. Following an introduction on the social contexts of early development and education (Stuart Reifel), the chapters in the book are: (1) "Parent Empathy: A Key Element in the Mother-Child Relationship" (Norma D. Feshbach); (2) "Children's Conceptions of Poverty" (Judith A. Chafetz); (3) "The Child Development Associate Credential Program" (Nancy E. Barbour and others); (4) "University-Based Child Development Laboratory Schools: Multiple Challenges and Demands" (Brent A. McBride and Jaesook Lee); (5) "Reconceptualizing Theory through Practice: Insights from a First-Grade Teacher and Second-Language Theorists" (Celia Genishi and others); (6) "Infant Day Care Research: Limitations and Possibilities" (Robin L. Leavitt); (7) "Studying Children's Social Play through a Child Cultural Approach: Roles, Rules, and Shared Knowledge" (Alice M. Meckley); (8) "The Social Context and Young Children's Spatial Representations: Recreating the World with Blocks, Drawings, and Models" (Susan L. Identifiers—*UNICEF

This report summarizes the proceedings of UNICEF's Global Innocenti Seminar on "Achieving Gender Equality in Families: The Role of Males." The seminar examined how, as more women become economic providers for families, the role of males in families needs to develop new dimensions so that they can contribute to improved health and education of children, to making women's roles more equitable, and to increasing stability of families. Seminar topics included the following: (1) "Introduction: The Importance of Men in Achieving Gender Equality in Families," stressing the inadequacy of an exclusive focus on women; (2) "The Ongoing Struggle to Define Gender Equality," pointing out historical reasons that gender policy has focused on women; (3) "Gender Roles: How Do They Affect the Child?"; (4) "Social Change and the Loss of the Traditional Family"; (5) "The 'New Man': Male Caretakers and Gender Equality"; (6) "Family Life Cycles: Family, School and Adolescence"; (7) "The Media as Socializer of Gender Roles," detailing the pervasive and demeaning nature of the media; (8) "The Challenge of Programming for Gender Equality: How to Involve Males?"; (9) "What Can UNICEF and Others Do?"; and (10) "Recommendations," including suggestions to focus more analysis on the roles of males, developing a life cycle approach for boys as well as girls, and adapting existing policy on gender. A wrap-up "Incorporating the Role of Fathers in the Situation Analysis: Cape Verde," sample workplans, and a five-item suggested reading list are included in the Appendices. (BGC)

The Concept of the Child: 1890-1940.

Pub Date—Dec 95

Note—26p.

Pub Type—Information Analyses (070)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Behaviorism, Child Development, *Childhood Needs, *Child Psychology, *Children, *Educational History, Kindergarten, Literature Reviews, Personality, Personality Traits, Primary Education

Identifiers—Child Study Movement, Froebel (Friedrich), Historical Background, National Education Association

This paper examines how the concept of the "whole" child changed from 1890 to 1940 and how those changes affected approaches to early childhood education during that time. The literature survey is based on the content of the published proceedings of the Kindergarten Department of the National Educational Association. Examination of the literature found the following six dimensions of the whole child identified: the spiritual, aesthetic, physical, mental, social, and emotional dimensions. In the decade before 1900, several views of the child coexisted. The Froebelian notion of the child as spiritual, spontaneous, and innately good was reexamined in the light of science, and the new child psychology introduced the concept of a child with animal instincts, impulses, and habits. The objective, scientific study of children suggested that the child was neither good nor bad, and that the child's development was dependent upon nature and the environment. The goal of kindergarten was to supplement the nurture of the home and establish good habits, shape good citizens, and provide moral instruction. In 1923, criticism of behaviorism appeared, leading to the view that the inner life of the child was to be liberated to allow the child to reach his or her potential. The child had needs that had to be met, and the goal of education was to contribute to the growth of the well-rounded child's personality. The scientific study of children continues today, and while such study may encourage distance from children and condescension, it can also produce new respect for them. (Contains 46 references.) The Healthy Tomorrow Partnership for Children Program (HTPCP) was developed to support special projects demonstrating how states, local agencies, organizations, and communities can work

together to improve health of mothers and children. The HTPCP supports a coalition that includes the federal and state governments, professional organizations, foundations, corporate leaders, and families. The HTPCP grant projects described in this document encourage community-based approaches, strengthening the ability of communities to build public-private preventive health strategies. For each of the 52 programs described the problem addressed by the program is given, along with the goals and objectives, methodology, and an evaluation statement. This document details Healthy Tomorrow projects in the following 28 states: (1) Alaska; (2) California; (3) Colorado; (4) Connecticut; (5) District of Columbia; (6) Georgia; (7) Hawaii; (8) Idaho; (9) Illinois; (10) Kansas; (11) Maryland; (12) Massachusetts; (13) Michigan; (14) Minnesota; (15) Mississippi; (16) Missouri; (17) New Hampshire; (18) New Mexico; (19) New York; (20) North Carolina; (21) Ohio; (22) Oregon; (23) Puerto Rico; (24) Rhode Island; (25) South Carolina; (26) Texas; (27) Virginia; and (28) Wisconsin. Fear of Parental Death: Impact on Young Children.

Pub Date—[95]

Note—13p.

Pub Type—Information Analyses (070) - Opinion

Papers (120)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Child Development, *Child Health, *Childhood Attitudes, Child Psychology, Child Rearing, Children, *Death, Emotional Response, *Fear, Grief, *Mental Health, *Parent Child Relationship, Parents, Stress Management

Identifiers—*Loss

For adults, fear of death is universal, but young children are exposed to realities of death only infrequently and are often shielded from it by parents. Because parents realize the extent of a child's fear of losing a parent, parents sometimes take precautionary steps, such as avoiding both parents' traveling on the same airplane or designating someone to care for a surviving child. For young children, the greatest source of stress is loss of a parent. Short-term effects of parental death vary, and are readily observed and appropriately addressed. Long-term effects are complex and difficult to ascertain. Some researchers believe loss of a parent should be regarded as a potential developmental problem, but research is contradictory and inconclusive. In general, children who are surrounded by alternative sources of emotional support and understanding tend to adjust well. However, some situations, when interacting with other variables, may exacerbate the grieving process. Finally, children can be taught in a developmentally appropriate way about death and learn that fears about parental loss are normal. (Contains 16 references.) (TM)

Identifiers—National Association Educ of Young Children, National Council of Teachers of English, National Council of Teachers of Mathematics, National Education Goals Panel, National Standards

This book builds on Volume 1 of "Reaching Po-

tentials," which attempted to operationalize the "Guidelines for Appropriate Curriculum Content and Assessment" set by the National Association for the Education of Young Children (NAEYC) and the National Association of Early Childhood Specialists in State Departments of Education (NAECS/SDE). Volume 2 elaborates on the guidelines, including describing what content is of most worth, what content goals are accepted by educators and have the greatest intellectual integrity, what content goals are the most reasonable and attainable. This volume's purpose is to describe curriculum content by subject matter, focusing on ages 3-8. Each chapter takes current views of curriculum content exemplified in national standards and places them in developmental perspective. For each content area various perspectives regarding curriculum planning are covered. Emphasis is given to conveying important knowledge specific to a discipline and to considering how and when children develop and learn. The chapters are the following: (1) "Introduction" (Sue Bredenkamp; Teresa Rosegrant); (2) "Reaching Potentials Through National Standards: Panacea or Pipe Dream?" (Sue Bredenkamp; Teresa Rosegrant); (3) "Reaching Potentials Through Transforming Curriculum, Assessment, and Teaching" (Sue Bredenkamp; Teresa Rosegrant); (4) "Transforming Mathematics Curriculum" (Kathy Richardson; Leslie Salkeld); (5) "Transforming Science Curriculum" (Sally J. Kilmer; Helenmarie Hofman); (6) "Transforming Health Curriculum" (Charlotte Hendricks; Connie Jo Smith); (7) "Transforming Curriculum in the Visual Arts" (Christine Marie Thompson); (8) "Transforming Curriculum in Music" (Barbara Andrews); (9) "Transforming Curriculum in Social Studies" (Carol Seefeldt); (10) "Transforming Physical Education Curriculum" (David L. Gallahue); (11) "Transforming Curriculum in Language and Literacy" (Kathryn F. Whitmore; Yetta Goodman); and (12) "Transforming Curriculum Organization" (Sue Bredenkamp; Teresa Rosegrant). (BGC)

Note—28p.

Pub Type—Reports - Descriptive (141)

EDRS Price - MF01 Plus Postage. PC Not Available from EDRS.

Descriptors—Adoption, *Child Health, Children, Child Support, *Child Welfare, *Community Support, Disadvantaged, Family Programs, Foster Care, Foundation Programs, Health Programs, Program Descriptions, *Social Services, Social Support Groups, Well Being

Identifiers—Family Preservation Services, Family Support, University of Chicago IL

This report consists of brief descriptions of projects that, for the most part, are current or were completed in the last 3 years by the Chapin Hall Center for Children at the University of Chicago. The first section, "Problem-Oriented Services for Children and Families," describes 27 studies involving children's problems and the systems and services designed to address them. Projects studied addressed the child welfare system, child health and well-being, substitute care and adoption, family preservation and family support, mental health, and the juvenile court system. The second section, "Community-Based Supports for Children and Families," describes 33 studies concerned with the development and well-being of all children, usually with a community orientation; many of these projects focus on poor or disadvantaged children. Projects addressed primary services for child and youth development; comprehensive community strategies; documentation, evaluation, and technical assistance; and schools. The third section, "Special Consultations and Other Activities" describes five activities that supplement Chapin Hall's research activities with foundations. List of earlier projects are included in each section. (TM)

Identifiers—Australia, *Developmental Play, *Play Theory, Vygotsky (Lev S)

This issue of the ACEA resource series focuses on the role of sociodramatic play in early childhood development, giving recommendations and examples for developing children's social understanding through play. Sections include the following: (1) "Developing Understanding through Play," which introduces the concepts; (2) "Complex Sociodramatic Play," discussing how sociodramatic play can involve both pretending and sharing pretense; (3) "Why Is Complex Play Important?"; (4) "Different Perspectives," focusing on how children realize that others have different views and interpretations; (5) "Negotiation," showing how children negotiate different perspectives within sociodramatic play; (6) "Shared Focus," asserting that children draw upon a shared focus and communication during complex play; (7) "Some Strategies for Supporting Complex Play"; (8) "Providing Shared Experiences"; (9) "Adult Involvement in Play," including a discussion of managing play, modeling negotiation skills, accepting children's play, supporting rather than taking over play, using praise appropriately, and representing the play; and (10) "Supporting Complex Play," on the delicate balance between adults supporting and extending play and dominating play. Contains 14 references. (BGC)

Identifiers—*Developmentally Appropriate Programs, National Association Educ of Young Children, Naturalistic Evaluation, Professionalism, Vygotsky (Lev S)

Developmentally appropriate evaluation (DAE) and developmentally appropriate practice (DAP) are clearly allied. The concept of DAP has expanded to include cultural, economic, ethnic, religious, and familial appropriateness. These same concepts are equally applicable to appropriate evaluation. Factors to consider for appropriate evaluation include: (1) the importance of naturalistic observation; (2) evaluation effectiveness; (3) the context of the child, including the child's social environment; (4) biological maturation; (5) measuring quality of care; (6) parents as partners, including improving parent-teacher communication; and (7) professional observation. Key components of DAE include: (1) objective recording of the child's behavior; (2) selection of appropriate methodologies for recording; (3) recognition of biases; (4) emphasis on process of individual development; (5) basing of evaluations on objective data; (6) validation of inferences drawn from observations; and (7) careful use of theoretic models. Identifiers—Bandura (Albert), Media Ethics, Music Videos, Television Theory

Aimed at primary care physicians and nurses, educators, and parents, this book reviews media effects on adolescent behavior and psychology. The book notes that television is a powerful medium to which adolescents are uniquely susceptible and how studies have shown television's ability to shape social attitudes. Theories of how television affects children's and adolescents' attitudes are discussed, including theories of social learning, excitation or arousal, cognitive neoassociation, and cognitive scripting. The chapters cover a number of topics as follows: (1) "Overview: How Is the Research Done? What Are the Issues?" covering the role of communications research; (2) "Media Violence and Aggressive Behavior," focusing on early research, desensitization, guns and the media, suicide, and video games; (3) "Adolescent Sexuality and the Media," discussing sexual information and pornography on television, in movies, and in print media; (4) "Adolescents, Drugs, and the Media," focusing on advertising of alcohol and cigarettes; (5) "Nutrition"; (6) "Rock Music and Music Videos"; and (7) "Adolescents and the Media: Solutions." Contains 485 references. (BGC)

Identifiers—*Food Research and Action Center DC, Food Stamp Program, School Breakfast Program, School Lunch Program, Women Infants Children Supplemental Food Program

The Community Childhood Identification Project (CCHIP) is regarded as a model for measuring hunger in low-income families. This second and final CCHIP study was the result of surveys conducted at 11 sites in 9 states and the District of Columbia between 1992 and 1994. A total of 5,282 households were interviewed. Chapters in the report are as follows: (1) "The Community Childhood Hunger Identification Project (CCHIP)," questioning an overview of CCHIP operations, the questionnaire, how hunger was measured in the surveys, and characteristics of low-income households; (2) "Hunger and Its Effect on Families," detailing key findings, characteristics of hungry families, hunger as a chronic

condition, and coping with hunger; (3) "Food Assistance Programs," including federal programs, characteristics of participants, the Food Stamp program, the Women, Infants, and Children (WIC) program, and the school lunch and breakfast programs; and (4) "Hunger and Financial Resources," focusing on expenditures for food, shelter, and other necessities. The central findings of the CCHIP study are that 4 million children under age 12 in this country are hungry, and another 9.6 million are at risk of hunger. Hungry children are far more likely to experience health problems and miss school more often than their low-income peers who are not hungry. The report ends with an overview of the Food Research and Action Center (FRAC), its mission, and its new program—Building Blocks. Eleven appendices include the CCHIP chronology/survey sites, hunger rates for households in 11 CCHIP survey sites, and characteristics of low-income households with children under age 12 in the CCHIP surveys and in the U.S. Decennial Census. The High/Scope Institute for IDEAS began in the early 1960s as a summer camp program and is now a dynamic learning program for teens that emphasizes working with them in an environment which supports emotional, social, and intellectual development. The High/Scope model for adolescent programs is based on the following principles: (1) adolescents need a safe psychological environment; (2) adolescents need a chance to make new beginnings; (3) adolescents need program activities designed to relate to their developmental stages; and (4) adolescents need to be given genuine responsibility. This book describes the High/Scope model in the following chapters: (1) "The High/Scope Institute for IDEAS Program—The Beginnings and Evolution," giving the history of the institute along with its philosophy and long- and short-term benefits; (2) "Who Are the Participants and What Do They Need?" focusing on developmental characteristics, tasks and developmental gains, and meeting adolescent needs; (3) "Creating a Supportive Context for Learning," outlining the program schedule and daily routine and also discussing psychological and physical safety, expectations, and adult participation; (4) "The Educational Approach," dealing with the five essential components of choice, active learning, plan-do-review, cooperative learning, and leadership development; (5) "Learning Potential Within the Institute Setting"; and (6) "Lessons Learned: Beyond the High/Scope Institute Model." *Critical Thinking, Curriculum Development, Developmental Stages, Developmental Tasks, Dramatic Play, Educational Sociology, Emotional Development, Language Acquisition, Literacy, Modeling (Psychology), Piagetian Theory, Primary Education, Problem Solving, *Skill Development, *Teacher-Student Relationship, *Thinking Skills, Young Children
 Identifiers—*Developmentally Appropriate Programs, Developmental Theory

In order to promote critical thinking in young children, particularly children ages 5-8, teachers need to understand skills and dispositions of critical thinkers. This paper discusses these skills, dispositions, and the appropriate classroom climate, within the context of pedagogy, along with learning activities for kindergarten and primary classrooms. Piaget's concept of autonomy is asserted as an important aspect of critical thinking, and the development of language in children. Developmentally appropriate practices are useful for incorporating thinking skills and dispositions into the curriculum. A list of skills and sub-skills necessary for adult critical thinking is given, along with a discussion of appropriateness for emphasis with young children, including the following: (1) interpretation; (2) analysis; (3) evaluation; (4) inference; (5) explanation; and (6) self-regulation. To emphasize these skills appropriately, teachers of young children should emphasize and model the following dispositions: (1) curiosity; (2) open-mindedness; (3) fair-mindedness; (4) flexibility; (5) organization; (6) understanding of other points of view; and (7) emotional maturity. Teaching techniques best suited for promoting critical thinking are also discussed, including: (1) developing questions; (2) teaching problem solving; (3) teaching conflict resolution; (4) using cooperative groups; and (5) developing a dramatic play corner. Contains nine references and a six-item list of additional helpful materials. (BGC)

The middle years of childhood are challenging for both children and their parents, as children master skills and develop behaviors that will strongly influence their later health and well-being. This parenting manual offers up-to-date information and guidelines on key emotional, physical, and behavioral issues that parents of school-age children confront. The nine parts in the guide are: (1) "Promoting Health and Normal Development," including physical development, safety and injury prevention, and sexuality; (2) "Nutrition and Physical Fitness," including special diets, and physical fitness and sports; (3) "Personal and Social Development," including the child's developing sense of self, and dealing with prejudice; (4) "Behavior and Discipline," including communicating with the child, and managing common behavior problems; (5) "Emotional Problems and Behavior Disorders," including stress, habit formation, fears and phobias, and child abuse; (6) "Family Matters," including strengthening the family, developing as a parent, siblings and sibling rivalry, divorce, single parenting, and stepfamilies; (7) "Children in School," including parent involvement, and learning disorders; (8) "Chronic Health Problems," including school issues for chronically ill children, and family adjustment; and (9) "Common Medical Problems," including

chronic problems such as asthma and diabetes, and common emergencies, such as bleeding, seizures, and poisoning. (HTH)

Identifiers—Adolescent Attitudes, Baumrind (Diana), Erikson (Erik), Rutter (Michael)

Noting that the current generation of adolescents is experiencing more stressful and negative experiences at an earlier age than previous generations, and that the consequences include drug abuse, delinquency, and mental illness, this book provides caregivers and parents with specific tactics to move teenagers successfully through adolescence. The book suggests that prevention of adolescent casualties is accomplished through three major tools: information, communication, and education. The chapters are: (1) "Difficulties Facing Today's Teens"; (2) "Adolescence: Historical Root, Definitions, and a Map of the Territory"; (3) "The Dawn of Adolescence; Too Much Too Soon; Too Little Too Late; Myths of Adolescence"; (4) "Mid-Adolescence: Times You Might Need Help"; (5) "Finishing Adolescence: Movement into Adulthood—Developmental Tasks of Late Adolescents and Young Adults"; (6) "The Family Group: The Peer Group; The Impact of Peers on Values"; (7) "Separation, Divorce, and New Relationships: Impact on Children's and Adolescent's Movement into Adulthood"; (8) "The Twenty Commandments for Adults Working with Teenagers: A Legacy of Optimism and Positive Thinking"; (9) "Adolescent Love: Discovering Sexuality and Dating"; (10) "Talents, Flairs, and Competencies: A Teenager's Uniqueness"; (11) "Work: Practicing Adulthood—What Will I Do with My Life?"; (12) "Renaissance in Schools," on bringing new technology and talent into middle and high school classrooms in new ways; and (13) "Epilogue," touching upon issues such as drug abuse, television's influence, and psychological abuse. Descriptors—*Agency Cooperation, Childhood Needs, Community Coordination, *Cooperative Planning, *Delivery Systems, *Family School Relationship, *Integrated Services, Referral, *Social Services

Identifiers—*Interagency Collaborative Initiative, School Based Services

Noting that schools need to be concerned with non-academic conditions that affect academic achievement and need to work with other services and programs to help students, the introductory chapter of this book offers reasons why existing programs are not working and suggests interagency collaboration as a solution. The second chapter offers, as a guide, the following nine-step program for building interagency collaboration to serve students and families: (1) finding out what programs are be-

ing offered currently by the school and other agencies; (2) understanding what school-linked services are and whether they exist in the local and neighboring communities; (3) knowing the basic needs of families and children, and identifying gaps and overlaps in services; (4) agreeing on a common vision of the collaboration; (5) setting goals and expectations; (6) designing comprehensive services; (7) developing a plan; (8) planning an evaluation; and (9) acting on the plan. The third chapter discusses the following seven areas of decision-making in designing the collaboration: leadership and management; location of services; delivery of services; staffing; client targeting; funding; and evaluation. It also indicates the pitfalls to be avoided in relation to each of these areas. The three possibilities subsequent to the collaboration and what can be done with regard to each are highlighted in the last chapter. Those are: maintaining the collaborative's current scope; expanding its scope to other sites; or discontinuing the initiative for lack of funding, support, or interest. Includes 38 references. (BAC)

Children's Perceptions of Kindness and Anonymity in Others' Helping.

Pub Date—Apr 95

Note—16p.; Paper presented at the Biennial Meeting of the Society for Research in Child Development (61st, Indianapolis, IN, March 30-April 2, 1995).

Pub Type—Reports - Research (143) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Age Differences, *Altruism, *Children, Elementary Secondary Education, *Helping Relationship, Higher Education, Incentives, Individual Differences, *Perception, Rewards
 Identifiers—*Anonymity

This study examined whether children view anonymity or non-anonymity in helping as reflecting a greater degree of kindness on the part of the helper. The subjects of the study were 165 kindergarten to college students, primarily white and middle class. Five story pairs containing contrasting helper attributions were presented to the subjects. Three story pairs contrasted intentional vs. accidental, spontaneous vs. solicited, and freely-given vs. bribed helping; two story pairs contrasted anonymity vs. non-anonymity in the case of a recipient and of a peer. Younger children were individually read the story pairs and older children and college students were presented the pairs in booklets. Following the story, all subjects were questioned about which character in the story they thought was kinder. The question about why they felt the selected character was kinder was answered by the younger children in response to all five pairs, and by the older children and college students in response to the two pairs involving anonymous attributions. Results revealed that the view that anonymous helping is kinder than non-anonymous helping appears to be acquired quite late by most children. The justifications for the greater kindness of non-anonymous helping are discussed. Future research is suggested that can investigate differences in justifications in relation to other proposed individual differences in motivations for helping. (BAC)

*Self Determination, Teacher Aides
Identifiers—*Australia (New South Wales), Empowerment, Koori People

This paper describes the development of a research project in 1993 to address concerns and issues related to education of Aboriginal students in the Shoalhaven area of New South Wales, Australia. Specifically, the purpose of the project was to examine the relationships between Aboriginal communities, students, and their schools, and important outcomes related to employment, unemployment, and further education and training. The research team included Aboriginal education assistants (AEAs) from the participating schools, a local Aboriginal community representative, and representatives of the Koori Centre at Sydney University. Historically, indigenous people have been subjected to a range of research methodologies that have been unacceptable, inappropriate, and offensive. In contrast, this project emphasized the development of culturally appropriate approaches, based on participatory action research, that could be conducted by Aboriginal communities. As well as providing profile information and participating in interviews, each school was invited to develop and implement an action research plan based on their current priorities or concerns in the area of Aboriginal education. This paper includes reflections of research team members and addresses implications for education and research related to government and bureaucratic control and indigenous self-determination, domination by nonindigenous people, community-based decision making and representation, constraints and difficulties faced by AEAs, student concerns about educational relevance, and participatory and collaborative action-oriented research. Identifiers—*India (Maharashtra), Public Works, *Workfare

"Workfare" schemes that offer poor participants unskilled jobs at low wages have become a popular alternative to cash or in-kind handouts. Yet little is known about a key determinant of the cost effectiveness of such schemes in reducing poverty: the behavioral responses through time allocation of participants and their families. These responses affect the foregone incomes of participants and, hence, the net transfer benefits. This paper estimates how time allocation within sampled households responded to new rural employment opportunities under the "Employment Guarantee Scheme" (EGS) of the State of Maharashtra, India. Data were obtained from households surveyed over 6 years in two villages, Shirpur and Kanara, that differed in wealth, land ownership patterns, agricultural factors, and occupational structure. Participation in the projects was affected by gender, village, and household wealth and caste. Literacy and education had little effect on EGS employment except in Kanara, where head of household's education was significant and positive. In both villages, EGS employment was generally exogenous to time allocation, suggesting that the ideal of providing work on demand was not being met. Significant gender cross-effects in time allocation were observed, as well as displacement of different activities for different genders: unemployment for men, leisure and domestic activities for women. Overall, the projects generated sizable net income gains to participants, certainly far greater than implied by using market wages to value foregone income. Transfer benefits alone led to a reduction in poverty, of almost the same magnitude as a uniform and undistorting allocation of the same gross budget. Contains 34 references, 13 data tables, and statistical equations. (SV)

This bilingual (English and Spanish) illustrated children's book relates the story of Carlos, a young boy who lives with his aunt Nina and dog Chico in the small Mexican town of San Bernardo. Nina and Carlos are poor, but their house is full of love. Carlos is excited because he is getting ready to attend the first night of "las posadas," a festival preparing for the birth of Christ. Carlos joins other children gathered in front of a house. Two boys carry a tray with small statues of Joseph and Mary riding a donkey. Carlos and the other children sing a song asking for shelter for Mary and Joseph. The door to the house opens and Carlos sees cookies, fruit punch, and candies. For the next nine nights, Carlos attends the festivities and returns home to tell Nina about the games he has played and to share the food and other gifts he has received. Every night Carlos worries about what he will offer to the Baby Jesus on Christmas Eve. He wants his gift to be special, but he and his aunt have no money. Nina tells Carlos to collect the plant that grows wild near his favorite rock and offer this as his gift. Carlos does not want to take a weed as his gift, but Nina assures him that love makes small gifts special. On Christmas Eve, Carlos stands in line before the manger holding his little plant. Carlos feels sad and tears slip down his face and fall on his plant. One after another, the leaves turn bright red. Carlos put down his glowing red plant—the most beautiful gift in the church. Includes songs sung during las posadas. (LP)

Identifiers—*Community Learning Centers

In 1994, a 2-day symposium was conducted on a broadened, more inclusive mission for rural schools—rural schools functioning as community learning and service centers. The symposium aimed to enhance the knowledge base related to five key dimensions that must be planned, implemented, and evaluated when designing rural schools in this fashion: community development; economic development; partnerships among family, school and community; school-to-work transition; and integrating education, health, and social services. Part 1 of the report briefly describes challenges facing rural schools, including limited financial resources, educational opportunities, and rural employment prospects. Part 2 describes the nature of the symposium. Ten experts in the five key areas responded to questions about basic assumptions and key definitions in their particular area of focus; the major problems (needs, barriers) that inhibit rural schools from operating effectively in this area; the major strengths (capacities, facilitators) that enable rural schools to operate effectively in this area; the design tasks that must be accomplished to further the concept of

schools functioning as community learning and service centers; and what additional research questions and development initiatives need to be pursued. The next four sections contain participants' responses to the questions and present a number of assumptions and issues related to the five key dimensions. All participants supported the concept of rural schools serving as community learning and service centers and strongly agreed that educational change cannot take place unless the communities in which the schools reside are both viable and sustainable. The last section of the report consists of concluding perspectives on public policy formation and program development. Contains 11 references. (LP)

Service-Learning as a Component of Systemic Reform in Rural Schools and Communities.

Research for Better Schools, Inc., Philadelphia, Pa. Spons Agency—Office of Educational Research and Improvement (ED), Washington, DC.

Pub Date—Nov 95
Contract—RP91002004
Note—84p.

Pub Type—Information Analyses (070)

EDRS Price - MF01/PC04 Plus Postage.

Descriptors—Curriculum Development, *Educational Benefits, *Educational Change, Educational Objectives, Educational Policy, Educational Principles, Education Work Relationship, Elementary Secondary Education, Program Descriptions, Program Implementation, Rural Areas, Rural Education, *Rural Schools, *School Community Programs, School Community Relationship, *Service Learning, Teacher Attitudes, Teacher Education
Identifiers—*Systemic Change

This report illustrates how community service learning can be used as a vehicle for achieving the goals of education and youth development and, currently, how it is highly consistent with the goals of systemic educational reform, particularly in rural schools and communities. Part 1 covers the definition of service learning as a method of teaching and learning; the need for service learning, including a brief historical overview and rationale; the different types of service learning; examples of service learning curricula for elementary and secondary students; the nature of service learning instruction, including the concept of reflection and the issue of assessment; barriers to integrating service learning into curriculum and instruction; and the purported benefits and proven results of service learning. This section also addresses special concerns of rural schools and communities and provides examples of rural service learning initiatives. The second section addresses the convergence of service learning and educational reform and covers definitions of systemic educational reform; linkages between service learning and Goals 2000; Educate America Act and other legislative initiatives; relationship of service learning and school-to-work transition as reform strategies; views of educators regarding the relationship of service learning and systemic reform; descriptions of state-level approaches to service learning in Colorado, Maryland, and Delaware; relationship of service learning to teaching standards and teacher education; and a teacher's insights into how a school's culture can be transformed to include service learning. Appendices include implementation strategies for integrating service learning into curriculum and instruction; a list of resource guides, organizations related to service learning and the National Service-Learning Cooperative Partners; and a description of the K-12 Clearinghouse on Service-Learning. Contains 85 references. (LP)

Education, *Elementary School Students, *Language Proficiency, *Learning Disabilities, Limited English Speaking, *Mexican American Education, *Mexican Americans, *Second Language Learning, Special Education

Identifiers—*Hispanic American Students, Latinos

This report examines patterns related to academic performance and language development in the lives of 16 children of Mexican descent in grades 3-5 who were identified as learning disabled. Research questions focused on factors that made these students eligible for referral for learning disabilities, patterns in the development of students' oral and literacy skills, and how such factors and patterns impact on their future opportunities for language and literacy development and advanced academic success. Data collection included review of student academic records; interviews with students, parents, teachers, and other staff; and oral reading sessions with each student. Findings do not address whether the students were, in fact, learning disabled. However certain generalizations emerged. All children began school anxious to learn but were overwhelmed as instruction became meaningless due to incomprehensible input. Because students had developed basic English language abilities appropriate for contextualized environments, teachers overestimated their abilities to handle context-reduced texts that rely on previous experiences and higher levels of language proficiency for construction of meaning. Noticing limited progress, teachers suspected disability. Parents were not aware of the demands the curriculum made on their children, nor of the level of linguistic skills necessary to succeed in school. Children's early experiences with reading and language were limited. Homework and much classwork was out of the zone of proximal development of these learners and their parents. Special education interventions were too restrictive to promote change, given these learners' characteristics and needs. Recommendations are offered for policy makers, practitioners, and parents. Contains 85 references and interview questions. (SV)

Identifiers—Congress 104th, *State Tribal Relationship, Tribal Management, Welfare Reform

A hearing before the Senate Committee on Indian Affairs received testimony concerning the feasibility of providing direct federal funding through block grants to tribes and the ability of tribes to administer local welfare and social services programs. An Assistant Secretary of the Department of Health and Human Services (DHHS) listed federal human services programs with specific funding allocations for Native Americans, described federal support to tribal governments in providing services to children and families, and discussed the Clinton Administration's support for welfare reform but opposition to the block grant approach. A representative of the Office of Inspector General, DHHS, reported on a study indicating that the current structure of DHHS programs created a barrier to tribal governments receiving federal funds for foster care and other child welfare services. Other witnesses included U.S. Senators; other elected officials; and representatives of numerous tribes, tribal agencies, and national Indian organizations. Their testimony included the following topics: high levels of poverty and unemployment on reservations, the need for tribal governments to design and manage their own

social services programs, concern that tribal sovereignty and the special government-to-government relationship between the tribes and the federal government be maintained, avoidance of conflict between tribal and state governments, tribal determination of its service population, and service delivery by multiracial consortia. Appendix of written statements includes program descriptions and funding details. (SV)

Identifiers—*Native Americans

This book, appropriate for secondary students, includes brief biographies of 21 Native Americans of the 20th century. The biographies focus on childhood experiences, cultural heritage, and career goals. The book is divided into four units that feature Native Americans with successful careers in the fields of literature and drama; fine arts and performance; the sciences and math; and education and public service. The book contains biographies of Hannay Geigomah (Delaware-Kiowa playwright and dramatist); N. Scott Momaday (Kiowa-Cherokee writer and artist); Wendy Rose (Hopi-Miwok poet); Leslie Marmon Silko (Laguna Pueblo writer); Joy Harjo (Creek poet); Kay WalkingStick (Cherokee painter); Billy Mills (Ojibwa Lakota Olympic distance runner); Pablita Velarde (Tewa artist and illustrator); Rodney Grant (Omaha actor); Jaune Quick-to-See Smith (Cree-Salish-Shoshone painter); Mary Ross (Cherokee engineer); Al Qoyawayma (Hopi mechanical engineer, environmentalist, and potter); Laura Weber (Mohawk environmental engineer); Fred Begay (Navajo physicist); Lois Steele (Assiniboine physician); Rick Hill (Tuscarora museum curator); Ben Nighthorse Campbell (Northern Cheyenne senator); Shirley Hill Witt (Akweasane Mohawk anthropologist); Thomas Segundo (Tohono O'odham council chairman); Laura Wittstock (Seneca media consultant); and Billy Frank (Nisqually environmental activist). Following each biography are discussion questions and exercises on understanding words in context, recalling details, understanding inferences, reading interpretation, analyzing quotations, and critical thinking. In addition, each unit includes activities aimed at career awareness, understanding Native culture, and building research skills; learning activities related to social studies, language arts, visual arts, health, math, and science; and instructions for writing autobiographies and biographies. Includes a glossary, a bibliography, photographs, and an index. (LP)

Identifiers—*Illinois

This newsletter addresses educational reform related to student use of computers and the development of computer networks in Illinois schools. This educational trend is particularly relevant for improving the educational opportunities of rural students. Both the Illinois State Board of Education and the Illinois Planning Coalition for Educational Technology have called for using technology as a resource to support student learning and improve operational efficiency. A combination of communications and information technologies constitutes the National Information Infrastructure, commonly referred to as the Internet. The Internet provides students and teachers with access to the following: (1) networking and collaboration through worldwide electronic mail, distribution lists, and group mail; (2) numerous databases and electronic bulletin boards, through which users can exchange information in the form of text, audio, and graphic formats; (3) collaborative investigation allowing teachers and students to investigate problems and issues and share products across geographic and political boundaries; and (4) resources ranging from curricula to exemplary classroom activities. Because of the Internet, every school regardless of size, location, or socioeconomic condition can provide students with the same opportunities heretofore available only to students in affluent schools. This newsletter also discusses cautions for rural and small schools in using the Internet, information on getting connected to the Internet, equipment needs and costs associated with using the Internet, and efforts in Illinois to promote Internet access for all K-12 schools. Contains 25 references. (LP)

Identifiers—*Illinois

Rural schools typically face multiple challenges related to providing educational opportunities for students and staff. A comparison of curricular offerings in English, foreign languages, and mathematics in a Chicago suburban high school, a rural high school district, and a small rural unit district reveals the curricular disadvantages of small rural high schools. This newsletter reports on how eight schools and one intermediate educational service unit in Illinois have utilized technology to improve educational opportunities and expand curricular offerings. The schools were identified by technology consultants in Illinois Educational Service Centers as making effective use of educational technology. The schools are not all rural, but were chosen as models that can be replicated in rural settings. Each case study includes a program description, examines technology resources, addresses future directions, and provides the name and address of a contact person. A common denominator in the case studies was that one individual was the driving force behind the technology integration process. In most schools, there was no technology plan in place, and schools appeared to "wing it" when adopting the use of educational technology. In most cases, the only evaluation was anecdotal in nature, and frequently hardware was purchased with no thought as to how to use the technology. It is suggested that schools follow a three-step process in implementing technology: (1) conduct a district technology needs assessment focusing on current practice and desired practice; (2) develop a technology implementation plan and regularly update the plan; and (3) develop a cadre of teachers that are willing to experiment and provide the training and resources for its success. Identifiers—*Service Learning

Service learning is a teaching tool in which students apply classroom skills to solve real problems in their communities. Community service becomes service learning when it is connected to classroom learning and contains opportunities for students to reflect upon their experiences. In addition to enhancing learning through experience, service learning programs offer rural schools and communities an opportunity to develop new and positive connections. Profiles of service learning programs in schools and colleges illustrate the benefits that service learning provides students and communities. K-12 service learning programs in Arkansas, West Virginia, and Alabama involve youth in decision making and staff development training, leading to a sense of ownership and empowerment; allow blind and deaf students to shift roles from passive recipient to active provider of services; and link school reform to community development as student activities focus on community study, support community viability, and celebrate rural life. Service learning programs at colleges and universities include an early intervention, mentoring program that pairs college students with elementary students having similar special talents and interests; programs that promote a sense of citizenship through community development activities and foster compassion through interpersonal relationships with young children, the elderly, and diverse populations; and international exchange programs in rural communities abroad. A list of additional information sources contains 42 references, 3 Internet resources, and 13 organizations. (SV)

Identifiers—*Canada, Criminal Justice System

This book contains 13 chapters analyzing important practical issues that must be addressed as Aboriginal self-government becomes fully operational in Canada. These issues are related to social problems and policies, criminal justice, community services, education, employment and job training, finance, the land base of government, women's rights and concerns, and Metis political structures. Of particular educational interest are chapters examining Aboriginal education in Australia, four models applicable to development of Aboriginal postsecondary education, and an Aboriginal training and employment initiative in which decisions are made by community boards. Chapters are: "Aboriginal Peoples and Euro-Canadians: Two World Views" (Murray Sinclair); "The Case for Aboriginal Self-Government: A Social Policy Perspective" (John H. Hylton); "Aboriginal Self-Government:

Implications of the Australian Experience" (John Ekstedt); "Community Healing and Aboriginal Self-Government: Is the Circle Closing?" (John D. O'Neil, Brian D. Post); "Education for Self-Determination" (Eber Hampton, Steven Wolfson); "Self-Government and Criminal Justice: Issues and Realities" (Carol La Prairie); "Pathways to Success: Aboriginal Decision-Making in Employment and Training" (Tina Eberts); "The Financing of Aboriginal Self-Government" (Allan M. Maslove, Carolyn Dittburner); "The Geographies of Aboriginal Self-Government" (Evelyn J. Peters); "Aboriginal Women and Self-Government" (Margaret A. Jackson); "Aboriginal Self-Government and the Metis Nation" (Clein Chartier); "Attitudes toward Aboriginal Peoples and Aboriginal Self-Government in Canada" (J. W. Berry, M. Wells); and "Future Prospects for Aboriginal Self-Government in Canada" (John H. Hylton). Contains references in each chapter, an index, and contributor profiles. (SV)

Identifiers—*American Camping Association

This book outlines standards that provide a basis for camp accreditation and site approval by the American Camping Association (ACA), Inc. The purpose of the ACA accreditation programs is to educate camp owners and directors in the administration of key aspects of camp operation, particularly those related to program quality and the health and safety of campers and staff. ACA accreditation is voluntary and focuses on standards that go beyond the minimum requirements of licensing. An introduction overviews eligibility requirements; program administration; and content, history and development, and format of the standards. Standards cover the following areas: (1) site, including fire protection, food service, sleeping quarters, and bathing and toilet facilities; (2) administration, including procedures for overall site safety, child protection, and administrative concerns; (3) transportation procedures concerning drivers, vehicles, and traffic on-site; (4) personnel, including staff qualifications, training, and supervision ratios and procedures; (5) program, including activity leadership qualifications, safety regulations, facility and equipment requirements, and procedures for conducting program activities; (6) health care, including staff qualifications, procedures, facility requirements, record-keeping, and health information requirements; and (7) activity requirements for aquatic programs, trip or travel camping programs, and horseback riding programs. The guide also includes a glossary; a form for self-assessment of additional professional practices; and sample forms, checklists, and outlines of materials to be included in various documents. (LP)

Identifiers—*Annenberg Rural Challenge

Former U.S. Ambassador and philanthropist Walter H. Annenberg has pledged a significant portion of his personal wealth to America's public schools if his contribution is "matched" by the nation. Up to \$50 million in matching money over the next 5 years has been earmarked specifically for rural schools. This document provides a context for the Annenberg Rural Challenge, an explanation of its vision for rural schools, and an overview of how it operates. The Annenberg Rural Challenge recognizes that improving the nation's schools requires the full involvement of the rural constituency, routinely excluded from key national policy making decisions. This rural initiative seeks to confront the myths and stereotypes that haunt rural education, and to challenge those involved with rural schools to build on their strengths to create lasting reform and "genuinely good" schools. Such schools recognize that every child is special and can learn, expect rigorous intellectual performance of each student, and promote democracy and authority in the classroom and in school governance and policy making. In addition, genuinely good rural schools make the most of their rural nature, acknowledge their dual obligation of preparing students for rural and urban environments, and effectively compensate for rural-related disadvantages. The Rural Challenge will place the overwhelming majority of its resources in those communities, schools, districts, and networks that are acting in harmony with its vision. Rather than being a grant competition, the Rural Challenge features a search process carried out by regional teams, collaboration with a variety of rural partners, inclusiveness of all stakeholders and interested citizens and of diverse rural populations, and a national agenda of network building and advocacy for rural education. Includes photographs. (SV)

Identifiers—*Environmental Awareness, ERIC Digests, Outdoor Leadership

This digest provides a framework for professional development of outdoor educators. Outdoor and environmental educators share similar principles of outdoor learning. Thus, the performance standards recently drafted by the North American Association for Environmental Education (NAAEE) can serve as a useful guide for outdoor education generally. NAAEE-recommended competencies fall into seven categories. First, knowledge and skills are needed in such areas as safety, group management, problem solving, technical equipment, environmental protection, and expedition planning. Second, teacher understanding of basic education foundations, current educational theories, and children's physical and intellectual development is as important for outdoor learning as in the classroom. Third, educators interested in conducting outdoor education experiences regularly would benefit from a grounding in the history and evolution of outdoor education and its methodology. Fourth, outdoor educators should have the knowledge and skills needed to awaken in students an environmental sensitivity or appreciation. Fifth, use of a variety of teaching methods to directly involve students in exploring the world around them fosters creativity and critical thinking. Sixth, capable outdoor educators create a safe place for learning that encourages exploration and discovery and provides an open and stimulating environment. Finally, outdoor teachers need skills in assessment practices. (SV)

Identifiers—*Outdoor Leadership

Adventure education seeks to promote individual growth and development through the purposeful planning and implementation of educational processes that include risk in some way. This book introduces major topics in the broad literature of adventure education by bringing together 53 writings of adventure education practitioners. The writings are organized into 10 sections: (1) model programs in adventure education; (2) a historical overview of the origins of adventure education; (3) a philosophical overview of the foundations of adventure education; (4) social psychology and the nature of the adventure experience; (5) experience as the cornerstone of learning in adventure education; (6) leadership components, training, and certification; (7) program development, administration, and evaluation (including personnel management and staff development); (8) adventure settings from wilderness to artificial environments; (9) various client populations (ethnic minorities, schoolchildren, juvenile delinquents, college students, older adults, women, corporate teams, and tourists); and (10) the role of adventure education in environmental consciousness raising and the future of adventure education. Contains references in most chapters. (SV)

Identifiers—*Delaware, Networking, *Rural Assistance Councils

This paper reports on recommendations resulting from a 1994 conference conducted by the Delaware Rural Assistance Council on "Designing Rural Schools as Community Learning and Service Centers." Specifically, the purpose of the conference was to develop information, insights, and plans that would help the staffs of educational, health, and social service agencies make decisions leading to better coordination of rural community services. Participants included administrators, teachers, counselors, nurses, support staff, and school board members from rural school districts in Delaware and representatives of community health and social services agencies. A number of key concepts and recommendations were generated, dealing with identifying stakeholders involved in the process of designing rural schools as community learning and service centers; identifying the essential needs of children, youth, and families; developing initial action plans; and exploring ways in which existing county interagency councils can work more closely with schools. Twenty-five recommendations directed toward the Delaware RAC, school districts, and community service agencies cover advocacy, networking, and planning strategies for integrating services in rural school districts. Identifiers—*Native Education Centre BC, Researcher Subject Relationship

This book is a critical ethnography of the Native Education Centre (NEC) in Vancouver, British Columbia. It presents an intimate view of the center, focusing on the people that work there—First Nations students, board members, teachers—and revealing their beliefs about First Nations control of education and how they put those beliefs into practice. Fieldwork was conducted at NEC during the 1988-89 school year, at which time over 400 adult students were enrolled in 11 programs ranging from basic literacy to "skills training." The chapters of the book are structured to lead through the various processes of research involvement, thereby replicating the temporal and spatial bases of development of the researcher's understandings. Following a tour of the NEC building and its surroundings, Part 1 provides a framework of concepts related to power, culture, and control, drawing particularly on Foucault; describes the conduct of the research, including how the non-Native researcher began and proceeded in her relationship with NEC participants; highlights episodes in the struggle for First Nations control of education; and outlines the history of NEC. Part 2 uses interview excerpts to convey the feelings of students and staff about NEC as a place and about the programs offered there, as well as their explicit thoughts about Indian control of Indian education, power relations, and Native values. Part 3 sums up major themes of the study, focusing on the contradictions inherent in an institution that prepares Indian students to participate in an exclusionary non-Native society while attempting to enhance their appreciation of their own cultures and heritages. Contains over 200 references, an index, and interview questions. (SV)

Wilderness Therapy for Women: The Power of Adventure.

Report No.—ISBN-1-56024-682-0

Pub Date—94

Note—266p.; Also published as a journal issue:
Women & Therapy; v15 n3-4 1994.

Available from—The Haworth Press, Inc., 10 Alice St., Binghamton, NY 13904-1580; (individual chapters available from Haworth Document Delivery Service).

Pub Type—Books (010)—Collected Works—General (020)—Information Analyses (070)

Document Not Available from EDRS.

Descriptors—Adventure Education, Camping, *Females, Feminism, Group Dynamics, *Individual Development, Mental Health, Personal Narratives, *Rehabilitation Programs, Risk, *Self Concept, Therapeutic Environment, Therapy, *Wilderness

Identifiers—*Adventure Therapy, *Empowerment
This anthology contains 18 chapters that deal with wilderness therapy for women and the symbolic value of wilderness accomplishments to women's mental health. Sections of the book present theoretical perspectives on wilderness therapy; describe programs providing empowerment, challenge, and therapy for general populations of women and special populations such as survivors of rape and welfare mothers; and present personal narratives about women's adventure experiences. Following an introduction (Ellen Cole, Eve Erdman, Esther D. Rothblum) and a poem "Nuestra hermana" (Anjanette Estrellas), chapters are: (1) "Wil-

derness Therapy: What Makes It Empowering for Women" (Irene G. Powch); (2) "Self-Control: The Key to Adventure? Towards a Model of the Adventure Experience" (Jackie Kiewa); (3) "Transforming Body Image through Women's Wilderness Experiences" (S. Copland Arnold); (4) "Ethical Considerations in Adventure Therapy: A Feminist Critique" (Denise Mitten); (5) "The Wilderness Solo: An Empowering Growth Experience for Women" (Jean Angell); (6) "Women on the Ropes: Change through Challenge" (Ba Stopha); (7) "Building Self-Efficacy through Women-Centered Ropes Course Experiences" (Linda Hart, Linda Silka); (8) "What is the Therapeutic Value of Camping for Emotionally Disturbed Girls?" (Lynn Levitt); (9) "Equine Psychotherapy: Worth More Than Just a Horse Laugh" (Judith J. Tyler); (10) "Two Bears, Dancing: A Mid-Life Vision Quest" (Darion Gracen); (11) "Therapeutic Considerations of Wilderness Experiences for Incest and Rape Survivors" (Shirley Joseph Asher, Gayle Quick Huffaker, Marie McNally); (12) "Breaking through Barriers: Wilderness Therapy for Sexual Assault Survivors" (Deborah Levine); (13) "Women's Adventure Group: Experiential Therapy in an HMO Setting" (Margaret J. Kessell); (14) "So...What Does Rock Climbing Have To Do with Career Planning?" (Annette Aubrey, M. J. MacLeod); (15) "When I Reach the Place I'm Goin', I Will Surely Know My Way" (Lauren Crux); (16) "Climbing for My Life" (Molly Gierasch); (17) "After the Next Full Moon" (Connor Sauer); and (18) "A New Generation of Women in the Wilderness" (China Galland). Identifiers—Bible Study, Community Renewal, Liberation Theology, Rituals, *Virginia (Ivanhoe)

The closing of local mines and factories collapsed the economic and social structure of Ivanhoe, Virginia, a small rural town once considered a dying community. This book is a case study that tells how the people of Ivanhoe organized to revitalize their town. It documents the community development process—a process that included hard work, a community consciousness raising experience that was intentionally sensitive to cultural and religious values, and many conflicts. It tells the story of the emergence and education of leaders, especially women, and the pain and joy of their growing and learning. Among these leaders is Maxine Waller, a dominant, charismatic woman who gave the townspeople inspiration and a sense of their capabilities and of their rights as human beings. Part I covers the community development process and includes chapters on historical background, community mobilization, confronting and using power, community education, using culture in community development, leadership and organizational development, and the relationship between insiders and outsiders in participatory research. The chapter on education describes how a community needs survey led to the creation of the community education center—a place for GED classes, literacy tutoring, job training workshops, and community college classes. Part II describes and analyzes Ivanhoe's local theology, focusing on Bible study and reflection sessions, community rituals, the role of women, and the role of the church in community development. An appendix discusses context and methodology and approaches related to participatory research, feminist theory, anthropological ritual studies, and liberation theology. An index is included. (SV)

This collection of 15 writings by Aboriginal and non-Aboriginal educators examines the issues and dilemmas of First Nations education in Canada 25 years after the beginnings of First Nations control of education. Organized around the concept of the Sacred Circle, the essays are grouped into four sections: reconceptualizing First Nations education, connecting with and maintaining our relations, meeting the challenge of incoherence, and transforming First Nations education. Chapters are: (1) "Towards a Redefinition of Indian Education" (Eber Hampton); (2) "Peacekeeping Actions at Home: A Medicine Wheel Model for a Peacekeeping Pedagogy" (Sharilyn Callioui); (3) "Redefining Science Education for Aboriginal Students" (Madeleine MacIvor); (4) "Aboriginal Epistemology" (Willie Ermine); (5) "Quasammetko and Yetko: Two Grandmother Models for Contemporary Native Education Pedagogy" (Shirley Sterling); (6) "Language and Cultural Content in Native Education" (Robert Leavitt); (7) "Learning Processes and Teaching Roles in Native Education: Cultural Base and Cultural Brokerage" (Arlene Stairs); (8) "A Major Challenge for the Education System: Aboriginal Retention and Dropout" (Ron Mackay, Lawrence Myles); (9) "Teacher Education and Aboriginal Opposition" (Rick Hesch); (10) "The Challenge for Universities" (Agnes Grant); (11) "Non-Native Teachers Teaching in Native Communities" (John Taylor); (12) "Treaties and Indian Education" (James [sakej] Youngblood Henderson); (13) "Taking Control: Contradiction and First Nations Adult Education" (Celia Haig-Brown); (14) "Locally Developed Native Studies Curriculum: An Historical and Philosophical Rationale" (Jo-ann Archibald); and (15) "The Sacred Circle: An Aboriginal Approach to Healing Education at an Urban High School" (Robert Regnier). "Bibliography of First Nations Pedagogy" (Kathy Vermette) lists 189 entries in the categories of learning styles, teaching styles, teacher-community relationship, language and culture, and curriculum and content. Contains references in each chapter, contributor profiles, and an index. (SV)

This interdisciplinary collection of 26 readings in rural studies aims to address the paucity of information and absence of informed people to advise public debate about rural issues. Sections of the book examine the pastoral tradition in literature; the changing

ing nature of the countryside; money, jobs, and space; distress and poverty; regional and ethnic diversity; and the rural social and institutional context (including education). Chapters are "The Forgotten Hinterlands" (Emery N. Castle); "Land and Word: American Pastoral" (William Howarth); "The Urban Invasion of Rural America: The Emergence of the Galactic City" (Peirce Lewis); "Rural and 'Farm' No Longer Mean the Same" (John Fraser Hart); "Population Change in Nonmetropolitan America" (Glenn V. Fugitt); "The Location of Economic Activity in Rural and Nonmetropolitan United States" (Edwin S. Mills); "The Use and Management of Rural Space" (Pierre Crosson); "Extractive Industries and Rural-Urban Economic Interdependence" (Bruce A. Weber); "Finding Rural Success: The New Rural Economic Landscape and Its Implications" (Mark Drabenstott, Tim R. Smith); "Understanding Trends in Rural Labor Markets" (Gene F. Summers, Francine Horton, Christina Gringeri); "Persistent Rural Poverty" (Gene F. Summers); "The Determinants of Rural and Urban Poverty" (Thomas A. Hirschl, David L. Brown); "Why Rural Poverty is Growing Worse: Similar Causes in Diverse Settings" (Janet M. Fitch); "Conflict and Change on the Landscapes of the Arid American West" (Paul F. Starrs); "Rural Latinos: Evolving Conditions and Issues" (Refugio I. Rochin); "American Indian Economic Development" (C. Matthew Snipp); "The Rural South: A Historical View" (Charles S. Aiken); "African-Americans in the Rural South: The Persistence of Racism and Poverty" (Bruce B. Williams, Bonnie Thornton Dill); "The Rural People of the Midwest" (Sonya Salomon); "Social Organization in the Countryside" (Daryl Hobbs); "Structures and Patterns of Rural Governance" (Ronald J. Oakeson); "Rural Education and Training: Myths and Misconceptions Dispelled" (Ruy A. Teixeira); "Linking Education and Community Development: Rural and Inner City Strategies" (Joan Fitzgerald); "Rural Education: Decentering the Consolidation Debate" (David R. Reynolds); "Living with the Minimum: Rural Public Policy" (William P. Browne, Louis E. Swanson); and "An Overview" (Emery N. Castle). Contains over 700 references, nearly 100 data tables and figures, photographs, profiles of contributors, and an index. (SV)

Identifiers—*Deloria (Vine Jr.), *Mathews (John Joseph)

This book is a comparative interpretation of the works of Vine Deloria, Jr. (Standing Rock Sioux) and John Joseph Mathews (Osage), two American Indian intellectuals of this century. In bringing these two thinkers together, the book lays the groundwork for a discussion of several crucial issues in contemporary American Indian critical studies: (1) the extent to which various conceptual and analytical categories currently available in American Indian scholarship provide an adequate framework for a mature Native cultural and literary criticism; (2) the impact of increasing awareness of and engagement with American Indian writers of earlier periods on the way that contemporary Native intellectuals develop Indian critical studies; (3) how construing the field in terms of intellectual history rather than literary or generic history changes the critical landscape; and (4) the extent of Native intellectuals' responsibility for addressing such issues as economic and social class, gender, and sexual orientation within Indian life. Examining the works of Deloria and Mathews provides a means to identify how contemporary American Indian intellectual discourse can confront the challenges of the present and future. The book's three chapters are "Deloria and Mathews in the Context of American Indian

Intellectual Traditions from 1890 to 1990"; "The Violation of Sovereign Land and Community in Deloria and Mathews"; and "Intellectual Sovereignty and the Struggle for an American Indian Future." Contains references in chapter notes, an extensive bibliography, and an index. (SV)

Descriptors—*American Indian Culture, *American Indian History, American Indian Literature, Annotated Bibliographies, *Anthropology, Archaeology, Canada Natives, Culture Contact, Foreign Countries, Nonformal Education, North American History, Religion, *Sioux (Tribe)

Identifiers—Native Americans, North Dakota, *South Dakota, *Spirituality

This annotated bibliography contains 1,504 entries focusing on Native American cultures that existed across North and South Dakota in relative isolation from non-Indian influences before and immediately after contact with Whites. The book is aimed particularly at scholars and teachers of Native American studies. Entries include books, journal articles, doctoral dissertations, research reports, official documents, and reference works published from the mid-1800s to the present. Following a chronology of the history of the Dakotas, a chapter on prehistory cites items comprising information about Sioux and other Indian communities of the Dakotas derived from archaeological and anthropological analysis. Items in the second chapter supply profiles of traditional Sioux culture and some information about its change through exposure to non-Indians. Major themes include origins and survival of tribal sovereignty; land loss and the struggle to protect natural resources; conflicts with neighboring tribes and federations; and cultural studies of art, music, language, literature, material culture, kinship, traditional education, and life style. A chapter on religious traditions covers the Sacred Pipe of the Sioux, missionaries and the installation of Christianity, Peyote religion, spiritual teachings, the Ghost Dance, and the Sun Dance. The fourth chapter lists sources of information about Sioux people published in Canada and Europe. The final chapter cites reference works on Dakota, Lakota, and other Siouan languages, and on winter counts. Includes author and subject indexes covering this book and "South Dakota History: An Annotated Bibliography." (SV)

Identifiers—Economic Decline, Farm Crisis, *Iowa

In Iowa in the 1980s, dreams of prosperity were suddenly replaced by economic nightmares as plummeting land values generated economic decline and dislocation in rural communities and individual lives. This book examines the experience of over 400 Iowa families who lived through the Great

Farm Crisis and now face an uncertain future. Interviewed as part of the Iowa Youth and Families Project (IYFP), these families live on farms or in small rural communities that are financially dependent on a volatile agricultural economy. In 1989, all families included a seventh-grade adolescent and a sibling within 4 years of age. This family configuration provided the basis for assessing the impact of economic hardship on marital, parent-child, and sibling relationships. Chapters of the book are separately authored by members of the IYFP research team, but each evaluates dimensions of a specific model of family economic stress. As proposed in the model, financial hardship directly increased risk for emotional problems, especially among parents. Personal unhappiness and irritability translated into hostile and angry behaviors with other family members, including children, and threatened the perceived quality of family relationships for all family members. Ultimately, family conflict and turmoil increased the risk of adjustment problems in the development of children and adolescents. Fortunately, strengths of family members and their relationships within and outside the nuclear family served to attenuate these difficulties. Chapters cover the IYFP; methodology; rural economic and social trends; families under economic pressure; survival, loss, and adaptation among farm families; children's and adolescents' role in the household economy; family origins of personal and social well-being; psychological consequences of economic hardship; marital relations; harsh parenting; resilient and vulnerable adolescents; sibling relations; and summary and recommendations. Authors are Rand D. Conger; Glen H. Elder, Jr.; Frederick O. Lorenz; Janet N. Melby; Paul Lasley; Elizabeth B. Robertson; Monika Ardel; E. Michael Foster; Les B. Whitbeck; Ronald L. Simons; Shirley Huck; Ruth Montague; Xiao-Jia Ge; Chyi-In Wu; and Katherine J. Conger. Appendix includes scales for observer rating of family interactions. Bibliography contains over 250 references. Subject and author index included. (SV)

The question that ought to be at the heart of the school reform debate is: Why do we have schools? An answer to this question will drive the sorts of "improvements" that schools attempt. This book proposes that schools exist to help young persons create meaning and discover their own being through development of the mind. The mind is the starting point for personal progress, and its development allows for success in all facets of life. Asserting the strong claim of the mind on the rural school curriculum disavows a popular notion about school purpose—that it ought to be economically centered. Focusing on human development also challenges the currently accepted "technocratic" approach to schooling, which relies on ready-made "one best" solutions devised by experts, manipulative methods, and mechanical techniques. In contrast, a "thoughtful" approach to education aims to create meaning by going beyond the transmission of information. Thoughtful learning involves consideration both for ideas and for other people. Students who engage in thoughtful learning acquire a disposition to be mindful—to weigh evidence, make connections among ideas, understand perspective, find alternatives, and judge value. Ultimately, thoughtful learning results from thoughtful settings brought about by thoughtful teachers and administrators. Although the pros-

pects for widespread institutional change are slim, individual teachers and administrators have the potential to commit themselves to meaning and thoughtfulness and to transform their own school settings. An appendix contains an annotated bibliography of 12 resources on predicative teaching and learning. Contains 79 references. (SV)

Identifiers—Asia, Asia Pacific Region

The Science across Asia Pacific Project introduces a new approach to learning science and environmental issues through encouraging communication between school children in different Asia Pacific countries. The aims of the project included the following: introducing an Asia Pacific dimension into science education by raising awareness of different perspectives, ways of life, and national traditions of students in Asia Pacific countries; raising awareness of the ways in which science and technology interact with society, industry, and the environment; providing opportunities for students to develop communication skills in the widest sense, including in languages other than their own; and providing opportunities for schools in different countries to collaborate. This book includes three environment related topics: "Drinking Water," "What Do You Eat?" and "Using Energy at Home." The teaching units provide activities that can be meshed into the curricula of 14 to 17 year old students of science as well as other curriculum subjects. The teaching units are self-contained and include information about using the units, teacher and student notes, maps, and forms including an exchange form to allow students to exchange responses with schools in different countries. Earth Systems Education (ESE) is an effort to establish within U.S. schools more effective programs designed to increase public understanding of the Earth System that surrounds and sustains us all. ESE focuses on establishing an understanding of the processes that operate within our environment and uses the science thinking and problem-solving processes that are of most use in studying and solving the many social problems that confront the world today. This document is a product of a special summer workshop of participants from the Program for Leadership in Earth Systems Education (PLESE). Sections include: (1) "Exploring Earth Systems Education"; (2) "The National Context for Science Education Reform"; (3) "Successful Strategies for Using Earth Systems Education in Science Curriculum Restructure and Implementation"; (4) "Teaching Approaches in an Earth Systems Classroom"; (5) "Resources for Implementing Earth Systems Education"; (6) "Conducting Earth Systems Education Workshops"; (7) "Scoping Out an Earth Systems Curriculum"; and (9) "Sample Activities and Units." Children's Problem Posing in Computational Contexts.

Pub Date—Apr 95

Note—59p.; Paper presented at the Annual Meeting of the American Educational Research Association (San Francisco, CA, April 18-22, 1995).

Pub Type—Reports—Research (143)—Speeches/Meeting Papers (150)

EDRS Price—MF01/PC03 Plus Postage.

Descriptors—Arithmetic, *Cognitive Processes, *Computation, *Elementary School Students, Foreign Countries, Grade 3, Mathematics Instruction, Primary Education, *Problem Solving

Identifiers—*Problem Posing

Problem-solving abilities of 54 third graders who displayed different patterns of achievement in number concepts and novel problem solving were investigated in this paper. The children were administered a problem-solving pretest followed by an instructional program (for half the sample) and a delayed posttest. Among the findings are the limited range of problems posed by all children and the difficulties they experienced in recognizing the standard addition and subtraction sentences as representing a variety of situations, even after exposure to the program. The children showed greater problem diversity within informal contexts although, overall, still favored the basic change problems. Appendices contain sample items from number and problem-solving tests, an overview of the problem-solving program, and sample student responses. Contains 65 references. (Author/MKR)

Identifiers—Reform Efforts

This document presents an overview of the Biological Sciences Curriculum Study (BSCS) Teacher Development Modules for Elementary School Science. It documents the collaboration of BSCS with science educators, science supervisors, and outstanding science teachers in developing, evaluating, refining, and disseminating four teacher development modules to support the improvement of science teaching in the elementary school. The modules are based on the major themes of the contemporary reform in science education: innovative instruction (constructivism, cooperative learning, and learning styles), curriculum emphases (thematic, less-is-more, and science-technology-society), equitable teaching, and alternative assessment. Subtopics include the nature of science and technology, major science concepts, classroom management, and educational technology. The population that conducted the content review process for the modules included project staff, members of the advisory board, university faculty, teachers, and science supervisors. It is reported that overall, reviewers and teachers responded very positively to the modules and voiced the need for such materials for both inservice and preservice teachers. Contains 60 references. Descriptors—*Beliefs, Foreign Countries, High Schools, *High School Students, Interviews, Science and Society, *Sciences, *Technology

Identifiers—Newfoundland

In this technologically expanding world it is important for teachers and other educators to be aware of students' existing conceptions of technology and to provide appropriate avenues for change. This study interviewed high school students (n=26) in Newfoundland, Canada, about their beliefs of science and technology. Questions were asked regarding examples, processes, and purposes of science and technology; relationships between them; characteristics and responsibilities of scientists and technologists; and relationships between science and technology with society. The majority of students made the distinction between examples of technology and examples of science confidently and correctly. This was also true for the distinction between the processes involved in doing science and technology. Although most students were aware that technology is concerned with the improvement of human life, they did not distinguish technology and science at all well in this regard. Many of the students held the well known stereotype of the scientist as a white coated, unkempt, bespectacled male but, surprisingly, about half of the students considered technologists to be just as likely female as male. Both scientists and technologists were seen as having a responsibility to help people. The general impression gained is that there is a need for improvement in students' understanding of technology and technologists. (MKR)

Larson, Jane O.

For All Intents and Purposes: Probing the Levels of Intended Curriculum for a High School Chemistry Class.

Pub Date—23 Apr 95

Note—21p.; Paper presented at the Annual Meeting of the National Association for Research in Science Teaching (San Francisco, CA, April 23, 1995).

Pub Type—Reports - Research (143) - Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Chemistry, Ethnography, High Schools, Models, *Science Curriculum, Science Teachers, *Secondary School Science

The purpose of this study was to compare and contrast significant features of the multiple layers of policy statements and objectives comprising the intended curriculum of a chemistry class. Levels of this curriculum include state, district, and local school science curriculum policies as well as those of curriculum developers and teacher. An additional objective was to determine the relative influence of each level upon the teacher and his subsequent implementation. Using data collected in a year-long ethnographic study of curriculum modulation within a Department of Defense Dependents Schools high school on an overseas military base, matrix was constructed to form a composite of the levels in terms of objectives, recommended instructional methodologies, theoretical perspective, and science curriculum emphasis. Preliminary findings suggest areas of inconsistency and contradiction between the levels, creating an uncoordinated system of intent. It was found that the teacher chose to ignore the outer layers of intended curriculum and implement the chemistry curriculum according to personal objectives with some input from the text and associated materials. Descriptors—*Cognitive Structures, *Education Majors, Elementary Education, Higher Education, *Sciences, Scientific Concepts, *Teacher Attitudes

Elementary education majors (n=22) in a science methods course at a small liberal arts college in the U.S. Midwest were asked to write a paper about science in their own lives. Based upon their writings, the students were categorized according to the five ways of knowing described by Belenky, Clinchy, Goldberger, and Tarule: silence, received, subjective, procedural, or constructed knowledge. The largest category was subjective knowers and was comprised of only female students. The implications for these subjective knowers involve inaccessibility to formal scientific knowledge and expertise. These women were unable to connect to the science they were learning in their classrooms and so turned to their own personal experience upon which they could depend. The large number of subjective knowers and the lack of formal scientific information as an ultimate source of knowledge seen in this study seem to indicate that many students are not making the connection between their science classes and everyday lives. As a result of the decline in the thickness of the atmospheric ozone layer, the surface of the Earth will be exposed to increased levels of solar ultraviolet B radiation. This radiation has been shown to have harmful effects for life on Earth. These include damage to plants, animals, and materials. It has also been linked to many human health impacts such as sunburn, skin cancer, eye damage, and suppression of the body's immune system. In order to protect children from the negative health effects of ultraviolet B radiation, schools must embark on a SUNSafe education program which includes: SUNSafe education including nutritional education on boosting

immune function, clothing recommendations, planning and staging of school events, and facilities design. Actions which should be taken include: teaching students about the hazards of excessive exposure to the sun, planning school activities around the peak sun hours, requiring proper protective clothing when outdoors, providing shading around playgrounds and sports fields, providing temporary shading for sports tournament venues, and protecting a child's right to seek protection from the sun. Descriptors—*Animals, Biological Sciences, *Ecology, Elementary Secondary Education, *Environmental Education, *Inquiry, Science Activities, Science Experiments, Science Projects

Animals Alive! is designed to help teachers develop an inquiry-oriented program for studying the animal kingdom in which, whenever possible, live animals are collected locally, studied, observed, and then released completely unharmed back into their natural habitats. By careful selection and modification of the chapter questions, activities, and challenges in this book, teachers can plan, write, and conduct live-animal activities that can be adapted to a wide range of ages and learning abilities. The sequence and content of this book are adaptable to most commercial textbook series and could be used to supplement existing texts and laboratory materials. Topics include: lower invertebrates including sponges, cnidarians, and flatworms; upper invertebrates including segmented worms, mollusks, and arthropods; lower vertebrates including fish, amphibians, and reptiles; and upper vertebrates including birds and mammals. Six appendices include: a guide to classification, commercial suppliers of live animals, wildlife and natural resource authorities, state departments of education, state departments of health, and additional resources. Identifiers—National Science Foundation, *Reform Efforts

The National Science Foundation (NSF), in collaboration with 24 states and one territory, is engaged in a multi-year effort to improve the quality of mathematics, science, and technology education for all students in a systemic way. The goal of the Statewide Systemic Initiatives (SSI) is to develop broad strategies for coordinating or aligning state-level initiatives and policies in curriculum, assessment, teacher education, professional development, and other key components of educational change. In order to assist other states seeking to implement system-wide reform, this report provides a brief glimpse of some of the SSI strategies that are positively changing teaching and learning in mathematics, science, and technology education. The strategies included are in the following areas: addressing the needs of policy makers, enriching coop-

eration and collaboration among educators, and sustaining the scale-up of reform. (JRH)

A natural history museum is a building where animals, plants, minerals, and other things in nature are kept and exhibited for study. This document is a curriculum guide to provide a variety of activities for educators and their students to use not only when visiting the International Wildlife Museum (Tucson, Arizona), but also with natural history museums and wildlife displays everywhere. It consists of lesson plans and activity sheets grouped by grade level. Most lesson plans contain a materials list, time requirements, structure, resources, source, skills, objectives, background, procedures, closure, and extension. (MKR)

Descriptors—Elementary Secondary Education, *Environmental Education, Learning Activities, *Outdoor Activities, *Recreational Programs

Outdoor recreation programs are valuable because they always permit, and always can promote interactions between participants and natural elements of the environment. Because such programs provide direct, personal experience in the outdoors, they should also seek to provide participants with a basic understanding of, and an appreciation for the interrelationships that exist in the environment and between humans and the environment. All outdoor programs, including recreational ones, should promote environmental literacy. Fun should be learning, too. Because most outdoor recreation programs are fundamentally recreational, not educational, it is unreasonable to expect them to provide for a formal program of instruction. However, while education, in at least a basic form, should be an integral part of outdoor programming, too little attention has been paid to systematically programming for education in outdoor recreation programs. By making an effort to systematically incorporate learning as an element of fun, programs can help acclimatize participants to the natural environment, provide skills for life-long leisure, and contribute to participants' sense of social and environmental responsibility. More importantly, programs can promote caring about the environment, and can insure that participants return home with rich, meaningful, and unforgettable memories about their experiences in the outdoors. Descriptors—Elementary Education, *Elementary School Students, Foreign Countries, Learning Strategies, *Light, Observation, Physics, Science Instruction, *Science Process Skills, *Scientific Concepts

In studying young children learning in inclusive environments, we designed ways to enable children to explore scientific knowledge that is usually believed to require later didactic teaching. Aspects of this design under scrutiny here are, first, the capacity of natural learning to lead to effective scientific ideas, and second, further clarification of the role of context. We found that in conversational modes,

children were able to generate ideas and theories, to test them (by extended discussion in which they examined the logical consequences of holding those ideas, and by subjecting them to critical tests), and then to generate further theories. In doing so, the role of analogical analysis was especially productive; the simile of moving objects bouncing from a surface helped the idea of light traveling to emerge naturally (a contrary finding to the belief that understanding the propagation of light should precede the study of reflection). In this environment children studied keenly and cooperatively, kept records and critiqued the topic. As a result of this learning our view on the ages at which children might begin to deal with scientific ideas have been revised downwards. (Author)

The importance of educating Canadians about their water resources is the mandate of many government and non-government agencies and groups. The aim of this bibliography is to outline what is presently available in this area in order to identify gaps in the development of water education programs and products. This educational tool has been prepared for schools (teachers, students, and librarians), environmental organizations, government, business, the general public, and other audiences who are searching for materials of a general, non-technical, and non-scientific nature. It contains over 400 English and 50 French references to documents including books, audiovisual materials, and curriculum resources. The main focus is on Canadian products but a sampling of materials from other countries is also included. Each document is indexed according to primary geographic area, target audience, and material type designation, and is cross-referenced where possible. The five target audience divisions are: general public; educators; students; groups and associations; and policy-makers, managers, and administrators. The contents of this bibliography are also available online as a sub-set of AQUAREF, an Environment Canada computerized database accessed through CAN/OLE. (JRH)

Descriptors—*Communications, Elementary Secondary Education, *Evolution, Science Activities, Scientific Concepts, Space Exploration

The possibility of life on other worlds is one of enormous fascination. This book emphasizes how intelligence and culture helped humans form a civilization that now has the technology to detect and communicate with possible extraterrestrial civilizations. Topics discussed include indications and characteristics of intelligence, the evolutionary increase in the size of the human brain, survival needs, and the stages of human culture. Activities encourage students to examine the possibility of sending messages through space and the social issues related to the search for extraterrestrial intelligence and to contemplate how an extraterrestrial civilization may have evolved. Each unit includes the following: overview, concepts, skills, teacher's guide, and logbook. (JRH)

The Influence of a Problem-Solving Approach to Teaching Mathematics on Preservice Teachers' Mathematical Beliefs.

Pub Date—Oct 95

Note—10p.; Paper presented at the Annual Meeting of the North American Chapter of the International Group for the Psychology of Mathematics Education (17th, Columbus, OH, October 21-24, 1995).

Pub Type—Reports—Research (143)—Speeches/Meeting Papers (150)

EDRS Price—MF01/PC01 Plus Postage.

Descriptors—*Beliefs, *College Students, *Education Majors, Elementary Education, Higher Education, Interviews, Mathematics Achievement, *Mathematics Instruction, Surveys

If healthy mathematical beliefs are to be fostered in students, the teachers' beliefs must also be considered. The purpose of this study was to determine: (1) the impact on interns' (n=137) mathematical beliefs of an exploratory, student-centered mathematics course, "Mathematics for Elementary Teachers Via Problem Solving." (T104) for preservice elementary teachers and (2) whether the T104 style of teaching had a stronger influence on challenging the beliefs of students with high or low levels of mathematics achievement. A Likert-style survey and a short answer survey, as well as nine interviews with preservice teachers, were administered. Results of interviews showed four key themes: (1) There is more than one way to solve a problem and some problems have more than one correct answer; (2) Understanding concepts in mathematics is more important than memorizing procedures; (3) It is reasonable to expect people of average mathematical ability to discover some mathematical concepts on their own; and (4) T104 caused preservice teachers to reconsider and, in some cases, change their ideas of how to teach mathematics. Statistically significant improvements were observed for four of five beliefs investigated in a Likert-style beliefs survey. Contains 18 references. (MKR)

Pub Type—Opinion Papers (120)—Speeches/Meeting Papers (150)

EDRS Price—MF01/PC01 Plus Postage.

Descriptors—*Cognitive Processes, *Constructivism (Learning), Elementary Secondary Education, Epistemology, *Mathematics Education, *Neurology, *Neuropsychology

The purpose of this paper is to explore the relationship between constructivism and neural organization. Support is given for a constructivist epistemology in current brain theory. A brief description of constructivism is provided, followed by the implication of this set of beliefs for viewing humans as self-organizing systems. What has been learned about how the brain is organized for cognitive functioning, with special attention to neuroplasticity, is described. Evidence for sensitive periods of development in the nervous system is presented. Recently developed techniques for studying human brain activity while engaged in cognitive activity are described. In the closing section of the paper, the implications of models of human brain functioning for theories of knowing are outlined, suggesting that constructivism fits well with these models. Contains 52 references. (MKR)

The Role of Multiple Representations in Learning Algebra.

Pub Date—20 Oct 95

Note—55p.; Paper presented at the Annual Meeting of the North American Chapter of the International Group for the Psychology of Mathematics Education (17th, Columbus, OH, October 20, 1995).

Pub Type—Reports—Research (143)—Speeches/Meeting Papers (150)

EDRS Price—MF01/PC03 Plus Postage.

Descriptors—Algebra, *Context Effect, *Cooperative Learning, *Functions (Mathematics), Grade 7, Grade 8, Junior High Schools, *Junior High School Students, *Mathematics Instruction, Middle Schools, Problem Solving, Teaching Methods, Word Problems (Mathematics)

Identifiers—Middle School Students, Pre Algebra, *Representations (Mathematics)

Middle school prealgebra students (n=157) learned about functions in a 20-day unit that emphasized: (1) representing problems in multiple formats, (2) anchoring learning in a meaningful thematic context, and (3) discussing problem-solving processes in cooperative groups. They produced smaller pretest-to-posttest gains on symbol manipulation tasks, such as solving equations, and larger gains in problem representation tasks, such as translating word problems into equations, tables, and graphs, than did a comparison group taught in the standard way. Although the groups did not differ in their pretest-to-posttest gains in calculating correct answers for word problems, the treatment group produced a larger gain in using mathematical representations while solving word problems than did the comparison group. The same pattern of results was obtained for lower-achieving students and language-minority students. Implications for cognitive theory and educational practice are discussed. Contains 72 references. Reconstructing the Whole: A Gauge of Fraction Understanding.

Pub Date—Oct 95

Note—9p.; Paper presented at the Annual Meeting of the North American Chapter of the International Group for the Psychology of Mathematics Education (17th, Columbus, OH, October 1995).

Pub Type—Reports—Research (143)—Speeches/Meeting Papers (150)

EDRS Price—MF01/PC01 Plus Postage.

Descriptors—*Cognitive Processes, *Context Effect, Elementary Secondary Education, *Fractions, Grade 4, *Graphs, Higher Education, Intermediate Grades, Interviews, Mathematics Tests, *Misconceptions

This study analyzed graphical solutions of 344 students in grades 4 through college who were administered a 40-item assessment of basic fraction

concepts. Of particular interest were six problems that required students to complete the whole given a fractional part presented in area contexts and set contexts. Results indicated that fourth graders frequently used the "doubling" strategy even if the fractional part showed two-thirds. In the set context, students sometimes connected the outer dots to form a rectangular unit that was totally unrelated to the given fractional part. Videotaped interviews of six fourth-grade students clearly revealed these dominant strategies. Nevertheless, there was improvement in student solution strategies as well as success in completing the unit as the grade level increased. Implied misconceptions held by both preservice teachers and elementary students include the assumption that the unit is always a regular-shaped region rather than irregular. The findings indicate the strong influence of the rectangular model often used in traditional mathematics textbooks on students' understanding of the whole. These findings support reforms in the teaching of fractions that include not only unit partitioning activities but also completing the whole using a variety of models. (Author)

Graph Knowledge: Understanding How Students Interpret Data Using Graphs.

Pub Date—Oct 95

Note—23p.; Paper presented at the Annual Meeting of the North American Chapter of the International Group for the Psychology of Mathematics Education (17th, Columbus, OH, October, 1995).

Pub Type—Speeches/Meeting Papers (150)—Reports—Research (143)

EDRS Price—MF01/PC01 Plus Postage.

Descriptors—*Cognitive Processes, *Data Analysis, Elementary School Students, *Graphs, Intermediate Grades, Middle Schools

Identifiers—*Representations (Mathematics)

This paper discusses a research study that focused on middle grades students' abilities to read and to move between different graphical representations before and after instruction. The data analyzed were collected from a group of 76 sixth grade students who were in 3 different mathematics classes in a middle school located in central North Carolina. The ways that students made sense of information presented through graphical representations and made connections between related pairs of graphs were investigated. General conclusions indicate that students need to talk more about graphs, including talking about the structure of graphs and how this informs the statements that can be made about: (1) the information depicted by the graphs and/or (2) the predictions or inferences that can be drawn from the graphs. Contains graphs and questions used on written pre- and posttests. Contains 26 references. (MKR)

Descriptors—*Beliefs, *Education Majors, Elementary Education, *Field Experience Programs, Higher Education, Interviews, *Mathematics Instruction, Observation, Questionnaires

Identifiers—*Teacher Candidates, *Teacher Change

The research in this paper explores the possibilities of challenging preservice teachers' mathematical beliefs through a specifically designed early field experience intended to encourage both reflective analysis and instructional skill acquisition. The subjects in this one-semester study were 25 preservice elementary teachers at a small, private, liberal arts college in north-central Indiana. The study involved collecting data by administering three mathematical beliefs inventories, observing classroom teaching episodes, analyzing students' written lesson plans and reflective evaluation reports, and conducting interviews with selected preservice teachers and their respective supervising classroom teachers. The theoretical framework of this research was based on the premise that beliefs and practices are not linear-causal but are more interactive in nature. Re-

sults indicated that key beliefs do influence choices of content and methods in instructional settings and that particular aspects of a first teaching experience have differential effects on beliefs related to personal teaching efficacy, curriculum content, roles of teacher and student, and appropriate learning tasks. Contains 24 references. (MKR)

Fostering Connections between Classes of Polynomial Functions.

Pub Date—Oct 95

Note—14p. Paper presented at the Annual Meeting of the North American Chapter of the International Group for the Psychology of Mathematics Education (17th, Columbus, OH, October, 1995).

Pub Type—Speeches/Meeting Papers (150)—Reports—Research (143)

EDRS Price—MF01/PC01 Plus Postage.

Descriptors—Algebra, *Concept Formation, *Functions (Mathematics), *Graphs, High Schools, *High School Students, Interviews

Identifiers—*Connections (Mathematics)

The typical path of instruction in high school algebra courses for the study of polynomial functions has been from linear functions, to quadratic functions, to polynomial functions of degree greater than two. This paper reports results of clinical interviews with an Algebra II student. The interviews were used to probe into the student's conceptual understanding of polynomial functions and the connections that the student made graphically and algebraically between the classes of polynomial functions. Results suggest that building polynomials from linear expressions may foster connections between the classes of polynomial functions and between the graphical and algebraic representations of these functions. Descriptors—*Education Majors, Elementary Education, Higher Education, *Mathematics Instruction, *Methods Courses, Portfolio Assessment, Portfolios (Background Materials), *Preservice Teacher Education, *Student Evaluation

Relying on only one method of assessment does not necessarily yield an accurate picture of student achievement. This paper discusses aspects of designing, implementing, and evaluating portfolios in a mathematics methods classroom; describes how the use of portfolios has influenced teaching practice; and contains excerpts from student portfolios. The paper also includes an excerpt from the portfolio description sheet, the grading criteria sheet, an excerpt from the syllabus, the midterm portfolio review grading rubric, an example of a video critique sheet, an activity recording sheet, and a group activity rating sheet. Effects of Differing Technological Approaches on Students' Use of Numerical, Graphical and Symbolic Representations and Their Understanding of Calculus.

Pub Date—Oct 95

Note—10p. Paper presented at the Annual Meeting of the North American Chapter of the International Group for the Psychology of Mathematics Education (17th, Columbus, OH, October 21-24, 1995).

Pub Type—Speeches/Meeting Papers (150)—Reports—Research (143)

EDRS Price—MF01/PC01 Plus Postage.

Descriptors—*Calculators, *Calculus, *College Students, *Educational Technology, Higher Education, *Mathematics Achievement

Identifiers—*Graphing Utilities, Mathematics (Computer Algebra System), *Representations (Mathematics)

This study sought to gather empirical evidence of the effectiveness of calculus instruction like that

used in the Calculus and Mathematics project by examining and comparing the effects of three different instructional approaches to calculus on students' ($n=100$) abilities to use and understand connections between numerical, graphical, and symbolic representations when solving calculus problems. Data were collected using classroom observations, pre- and posttest instruments, and 36 student interviews. Analysis of the data indicated that: (1) Calculus and Mathematics students were better able to use and to recognize and make connections between different representations than the other students; (2) graphics calculator students were proficient at using graphical representations but had some trouble using symbolic representations and recognizing and making connections between graphical and symbolic representations, even though the use of these representations was stressed during their course; and (3) traditional students were the least proficient at using graphical representations and had the most difficulty recognizing and making connections between different representations. An appendix contains the posttest instrument. Contains 20 references. (MKR)

Raymond, Anne M.

Mathematics Teacher Development: Lessons Learned from Two Collaborative Action Research Partnerships.

Pub Date—Oct 95

Note—32p. Paper presented at the Annual Meeting of the North American Chapter of the International Group for the Psychology of Mathematics Education (17th, Columbus, OH, October 21-24, 1995).

Pub Type—Speeches/Meeting Papers (150)—Reports—Research (143)

EDRS Price—MF01/PC02 Plus Postage.

Descriptors—Action Research, College School Cooperation, *Educational Change, Junior High Schools, *Manipulative Materials, *Mathematics Teachers, *Problem Solving, *Professional Development

Identifiers—*Teacher Change, Teacher Researcher Cooperation

Collaborative action research partnerships create rich opportunities for the professional development of teachers and classroom reform. This paper reports results from two action research projects. The first was a collaboration between the author and a seventh-grade mathematics teacher who wanted to change his mathematics teaching in an effort to more effectively address the National Council of Teachers of Mathematics' call to infuse problem solving into the mathematics classroom. The second collaborative project stemmed from an eighth-grade teacher's desire to investigate whether or not her efforts in teaching algebra through the use of a "Hands-On" manipulative program were worthwhile. Both projects were teacher-driven and yielded a number of interesting results. In this paper the two studies are described, the process of engaging in collaborative research is discussed, the similarities and differences between the roles of the university researcher in the two projects are discussed, and the role of action research in the professional development of mathematics teachers is considered. Appendices contain a survey on student beliefs about problem solving, a "solo" problem-solving test, interview questions, a year-end class survey, and tables illustrating individual student scores by class period. (MKR)

Evaluating the Effects of Environmental Science Programs on Teachers, Students and Communities (Part II: Partnering for Elementary Environmental Science Program). Draft Copy.

Spons Agency—Eisenhower Program for Mathematics and Science Education (ED), Washington, DC.

Pub Date—Oct 95

Note—28p. Paper presented at the Annual Meeting of the Midwestern Educational Research Association (Chicago, IL, October 11-14, 1995).

Pub Type—Reports—Evaluative (142)—Speeches/Meeting Papers (150)

EDRS Price—MF01/PC02 Plus Postage.

Descriptors—Cooperation, Educational Change, Elementary Education, *Environmental Education, Interviews, *Knowledge Base for Teaching, *Partnerships in Education, *Professional Development, Questionnaires, Science Education, Student Attitudes, Teaching Skills

Partnering for Elementary Environmental Science, a professional development program developed to enhance teachers' skills and content knowledge in science education, pairs classroom teachers with resource professionals for one year of collaborative instruction. This paper reports part of the evaluation and research related to the program. Specifically it examines changes in teachers' attitudes and instructional behaviors, changes in students' attitudes toward and participation in science and schooling, and changes in the learning environment and community as a result of teachers' involvement in the program. Data was collected from participating teachers and resource professionals using questionnaires, inventories, and interviews. Results indicate that both teachers and resource professionals responded positively to environmental science and partnering and this partnership increased teachers' confidence in teaching environmental science. The effect of the program on teaching was that it became less traditional, more integrated and collaborative, had more hands-on components, had more process emphasis, and was more analytical and reflective. The program increased student enthusiasm and positive attitudes toward science and school. It was concluded that the program was effective in bringing about general change in science instruction and in accomplishing many of the goals of science education reform movements. Contains 11 references. (JRH)

A School Quality Planning and Evaluation Tool: Science, Mathematics, and Related Technologies Quality Measurement (SMARTQM).

Pub Date—Nov 94

Note—21p. Paper presented at the Annual Meeting of the Mid-South Educational Research Association (Nashville, TN, November 9-11, 1994).

Pub Type—Reports—Research (143)—Speeches/Meeting Papers (150)

EDRS Price—MF01/PC01 Plus Postage.

Descriptors—Academic Achievement, *Educational Assessment, *Educational Quality, Elementary Secondary Education, *Institutional Evaluation, Interviews, Mathematics Instruction, Observation, Science Instruction, Surveys, Technology Education

The purpose of this study was to discover the efficacy of the Science, Mathematics, and Related Technologies Quality Measurement (SMARTQM) as a measure of total school quality and to determine the usefulness of this instrument in predicting school performance through self-reported student achievement. SMARTQM is an integrated data collection and reporting system designed to determine how closely a school resembles the "ideal" school. It consists of 13 survey forms, site and classroom observation, and focus group discussions designed to obtain a complete picture of a school. Participants in the process include teachers, administrators, non-teaching staff, school-based councils, parents, students, previous students, and community members. A total of 17 schools participated in the pilot testing of the SMARTQM of which 15 were sufficiently complete for inclusion in the study. Schools were selected to fill slots in a sampling matrix. Schools were surveyed, visited by an evaluation team, and school community personnel participated in focus groups. The evaluation team independently scored the school on the SMARTQM characteristics. Appendices contain sample cover letter and surveys, site visit observation forms, and focus group questionnaire and procedures. (Author/MKR)

Pub Date—Jan 96

Contract—MDR-8955041; MDR-91123001

Note—92p.

Pub Type—Reports—Evaluative (142)

EDRS Price—MF01/PC04 Plus Postage.

Descriptors—*Computer Simulation, Evaluation, Geometry, *Hands on Science, Higher Education, High Schools, Inquiry, Interdisciplinary Approach, Science Activities, Science Education, *Science Experiments, Science Process Skills, *Secondary School Science

This is the final evaluation report of the On Growth and Form (OGAF): Learning Concepts of Probability and Fractals by Doing Science project that aimed at engaging high school students in hands-on science activities, experiments, and computer simulations that use probability and fractal geometry to model ragged structures in the real world. Formative evaluation techniques were employed which included content inspection of program materials by experts, pilot tests with small numbers of students, and field tests with larger numbers of students and teachers. Other data collection techniques included formal interviews with project participants, informal conversations and analysis of project documents. This report includes the following sections: overview of the OGAF project, evaluation plan, description of final OGAF units, experiments to accompany OGAF units, strategies for program monitoring and evaluation, findings from initial formative evaluation, field trials in area high schools, impact on teaching and learning, effects on participating teachers, the promotion of interdisciplinary science and mathematics, effects on other participants in the development process, the model of development—lessons learned, the future of OGAF—The future of high school science, and dissemination. Descriptors—Foreign Countries, Higher Education, *Preservice Teacher Education, *Program Evaluation, *Technology Education

Identifiers—Scotland
This paper aims to provide a reflective overview of the curriculum developments in teacher education for Scotland in the Division of Technology, Department of Maths, Science and Technology Education, University of Strathclyde. A course in technology must by its very nature be frequently updated and reviewed if it is to be considered to be pertinent and relevant. This paper aims to gauge the design and technological confidence and developing capability of students. Two cohorts have completed the first two years of the four-year degree course, B.Ed Design and Technology. As the third cohort begins, progress to date is considered. The question is asked: Does the course educate for technological literacy and provide students with the creativity to educate for technological literacy with perspective, sensitivity, creativity, and confidence? This evaluation forms the basis of the paper. Identification of the strengths and weaknesses existing in the current

system will provide indications for subsequent developments of the B.Ed Design and Technology at the University of Strathclyde. Appendices include changing face of technology subjects; chronological changes in examination subjects presented by technical departments; comparison of girls and boys in technology studies, graphical communication and craft and design; and interim questionnaire analysis and school and student questionnaires. Conceptual Change Based on Laboratory Experience.

Pub Date—Apr 95

Note—35p.; Paper presented at the Annual Meeting of the National Association for Research in Science Teaching (San Francisco, CA, April, 1995).

Pub Type—Reports—Research (143)—Speeches/Meeting Papers (150)

EDRS Price—MF01/PC02 Plus Postage.

Descriptors—*Apprenticeships, *Cognitive Development, *College School Cooperation, Ethnography, Foreign Countries, Higher Education, High Schools, *High School Students, *Laboratory Training, *Science Instruction, Scientists

The purpose of this study was to examine the activities and discourse between scientists and high school student apprentices (from Santa Barbara, California) in research laboratories and how these supported and/or constrained student learning of science. The study covered 3 consecutive years of a summer science program and included 32 high school student participants. Data were collected and analyzed within a multiple perspective research design composed of microethnography and interactional sociolinguistics. Student apprentices made noticeable gains in conceptual understanding of science as well as gaining new insights into the world of the scientist. Program experiences carried over positively into the classroom in the school year following the program. Results suggest that a cognitive apprenticeship model of science learning would be a worthwhile pursuit in school science instructional settings. Contains 27 references. (Author/MKR)

Descriptors—*Aquariums, Educational Research, Elementary Secondary Education, Foreign Countries, Literature Reviews, *Museums, *Science Instruction, Teaching Methods, *Zoos

Interactive science and technology centers are flourishing throughout the world. Displays in museums, aquaria and zoos are becoming much more interactive. These places offer exciting opportunities for school children to experience science and technology in a stimulating environment. But do such centers affect learning? Do they offer valuable motivational opportunities for students to learn science? If so, how can teachers use them to promote students' engagement in school science, which might seem boring and mundane by comparison? A review of research related to science learning is presented, together with a summary of findings intended to assist teachers to use these centers effectively. Contains 104 references. (Author)

Ipsative Evaluative Attitudes versus Vocational Interests and Cognitive Abilities of Bright Male Versus Female Seventh-Graders.

Pub Date—Apr 95

Note—41p.; Paper presented at the Annual Meeting of the American Educational Research Association (April 20, 1995).

Pub Type—Speeches/Meeting Papers (150)—Reports—Research (143)

EDRS Price—MF01/PC02 Plus Postage.

Descriptors—*Academically Gifted, *Cognitive

Ability, Grade 7, Junior High Schools, *Junior High School Students, *Sex Differences, *Student Interests, Tests, *Values

This empirical study involves three types of "tests": values, interests, and cognitive abilities useful for learning science. It also involves three methods of test-battery construction or use: ipsative (forced-choice), non-ipsative ("normative"), and ipsative (i.e., normative scores changed to ipsative ones). Scores from ipsatively constructed or ipsatively scored test batteries have no overall level; every examinee earns the same total score. Thus, ipsativity creates strange statistics, but sometimes (as in this study) yields interesting results. For the bright seventh-grade students studied, some of the main findings are as follows: (a) The boys' Theoretical evaluative attitude relates best to the eight cognitive tests, whereas the girls' Aesthetic evaluative attitude relates best; (b) The boys are much more Theoretical, Economic, and Political than the girls, and the girls are much more Aesthetic, Social, and Religious than the boys (the same findings as for college students); (c) The cognitive test scores intercorrelate surprisingly highly, considering the great selectivity of the samples studied; and (d) There is considerable agreement between scores on the intrinsically ipsative Allport-Vernon-Lindzey Study of Values and those on the normative Holland Occupations Checklist (HOC), and even more so when the HOC scores are forced to become ipsative. Evaluation of the Effectiveness and Implementation of a Math Manipulatives Project.

Pub Date—9 Nov 94

Note—17p.; Paper presented at the Annual Meeting of the Mid-South Educational Research Association (Nashville, TN, November 9-11, 1994).

Pub Type—Speeches/Meeting Papers (150)—Reports—Research (143)

EDRS Price—MF01/PC01 Plus Postage.

Descriptors—Demonstration Programs, High Schools, *Inservice Teacher Education, *Manipulative Materials, *Mathematics Teachers, *Secondary School Teachers

This paper reports on a project to enrich high school algebra and geometry programs through the use of manipulatives. The evaluation design utilized qualitative and quantitative methodology to determine the effectiveness and impact of training with manipulatives on 40 high school teachers. The final evaluation was based on: (1) review of the program proposal; (2) participation in the planning process for the workshops with the project staff; (3) observation of the methodology of the trainers and provisions for participant involvement in each of the workshop sessions; (4) group discussion of classroom implementation strategies; (5) observation of the use of manipulatives in the participants' classrooms; and (6) review of participants' self-reports of student utilization and response to the manipulatives. The project was successful in addressing the stated objectives of the proposal through the techniques of well organized workshop training sessions, follow-up reporting and evaluation, and extended local training. The manipulatives are being used extensively, and student attitudes, participation, and performance have been enhanced. (MKR)

A Case Study of Postgraduate Supervision in a Natural Science Department.

Pub Date—Apr 95

Note—16p.; Paper presented at the Annual Meeting of the American Educational Research Association (San Francisco, CA, April 18-22, 1995).

Pub Type—Reports—Research (143)—Speeches/Meeting Papers (150)

EDRS Price—MF01/PC01 Plus Postage.

Descriptors—Case Studies, *Doctoral Dissertations, *Faculty Advisers, Foreign Countries, *Graduate Students, Higher Education, *Science Departments, *Supervision

This case study explored the perspectives regarding graduate dissertation supervision held by professors and graduate students in a university science department. Expectations and personal relationships within the graduate dissertation supervision process are discussed in order to establish better supervision practice in a climate of expanding graduate enrollment numbers. Observations, interviews, and action research were used in gathering data. Appendix contains supervision of research students

questionnaire. From the collection of opinions represented in this paper, it is clear that, in the natural sciences, students usually channel their research into the existing areas of supervision in the school. This situation creates postgraduate supervision in research teams, which is unique to the natural sciences and which encourages cooperative relationships amongst staff and students. This case study suggests that clear expectations and procedures should be established in order to provide supervisors and graduate students with better opportunities to establish a collaborative working relationship. Teaching Scientific Concepts with Transparent Detector Models: An Example from Optics.

Pub Date—Apr 95
Note—8p. Paper presented at the Annual Meeting of the American Educational Research Association (San Francisco, CA, April 18-22, 1995).

Pub Type—Reports - Research (143) — Speeches/Meeting Papers (150)
EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Geometry, Instruction, *Models, *Optics, Physics, Science Instruction, *Scientific Concepts, Secondary Education

This paper describes an attempt to facilitate students' learning of scientific concepts by using detectors that take as input physical information and output an instantiation of the concept. The principle hypothesis was that students would have a better understanding of the concept of image if they were taught to use a simplified, runnable model of their own visual detectors, than if they were taught using a more traditional approach. To test this hypothesis, two almost identical versions of a curriculum in geometrical optics were created, one version used a mechanistic, interpretive eye model, while the other treated the eye as a passive receiver of light. Results indicate that students who were taught a runnable model of visual perception exhibited a better understanding of the difficult relationship between an observer and a virtual image, were better able to identify the location of an image in a range of real-world optical situations, and were less likely to think of it as located on the surface of a mirror or lens. It was concluded that significant gains are made by teaching students a transparent-detector model of image formation rather than a more traditional geometrical definition of image formation. (JRH)

Issue-Based Discussion in a Classroom of Designers.

Pub Date—Apr 95

Note—19p. Paper presented at the Annual Meeting of the American Educational Research Association (San Francisco, CA, April, 1995).

Pub Type—Speeches/Meeting Papers (150) — Reports - Research (143)
EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Discussion (Teaching Technique), Grade 7, Junior High Schools, *Junior High School Students, *Learner Controlled Instruction, Observation, Science Instruction, *Student Participation

This paper focused on student participation in controlling classroom activity. Issue-Based Discussion is described and promoted as a form of activity that can be used in the classroom to both enculturate students into the ready-made-culture of modern, western science and empower them to share in the control of activity as they participate in a culture-in-the-making. An analysis of an exemplary case of whole-class, issue-based discussion shows how this kind of discussion can support a balance between teacher and student control of activity. This discussion occurred in a seventh-grade general science class consisting of 30 students in Oakland, California. Results suggest a fairly high degree of student control. In addition, the analysis of the co-text surrounding student and teacher requests and statement indicates that while students and teacher contributed to controlling the discussion, they did so from different roles with different investments. "I'd Need To Do A Lot Of Reading Myself before Teaching This." How Do Primary Student Teachers Know What Science To Teach?

Pub Date—95
Note—12p. Paper presented at the Annual Meeting of the National Association for Research in Science Teaching (St. Louis, MO, March 31-April 3, 1995).

Pub Type—Speeches/Meeting Papers (150) — Reports - Research (143)
EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Elementary Education, Foreign Countries, *Knowledge Base for Teaching, Misconceptions, *Preservice Teacher Education, Questionnaires, Scientific Concepts, *Student Teachers

Identifiers—England, Pedagogical Content Knowledge, Subject Content Knowledge

The subject knowledge primary teachers have as a basis for their teaching has become a major concern in preservice and inservice teacher education. This paper reports on a study that investigated the science and pedagogical content knowledge of a sample of 42 preservice primary teachers in England. Assignments and questionnaires were used to collect the data. Many students identified particular areas of science in which they felt confident, or more often where they lacked knowledge—most commonly they felt least confident in the physical sciences. Many of the responses to the questionnaires revealed a lack of specific subject knowledge and misconceptions. Many of the students were able to draft suitable plans for teaching significant scientific ideas and to summarize relevant subject knowledge at their own level. However, there were many assignments where the subject and pedagogical knowledge were not tightly linked, for instance some student teachers presented a collection of science facts and concepts about the topic to be taught but did not focus on the key ideas that would require explanation. The results also indicated specific curriculum knowledge and wide use of published teaching resources by the student teachers. Contains 22 references. (JRH)

"Biodiversity" is the term used to describe the incredible variety of life on Earth, the wealth of habitats that house all the life forms, and the interconnections that tie everything together. This activity guide is designed to help teachers use the "Web of Life" video and to provide information and activities to expand on concepts introduced in the video. It contains a summary of each segment of the video along with key points and discussion questions for each one. The background information is divided into four major sections: "What Is Biodiversity?"; "Why Is Biodiversity Important?"; "Why Are We Losing Biodiversity?"; and "What Are We Doing about the Loss of Biodiversity?" Each background section is followed by two or three related activities. Each activity lists the materials needed and the video segments that complement the activity. The resource section contains a list of reference books, multimedia resources, and activity guides. (JRH)

This book highlights women's achievements in science and mathematics from the first century A.D. to the present. Included are paleontologists, geologists, astronomers, mathematicians, chemists, botanists, biologists, engineers, physicians, entomologists, and atomic physicists. Their noteworthy accomplishments are translated to students through hands-on experiments and activities. The information and activities presented here are appropriate for ages 8 through 13. This book contains 23 units that spotlight women scientists, their work, and its importance. All units feature a hands-on experiment/activity duplicating the scientist's work or demonstrating a scientific principle relevant to her work, a bibliography, and a newsletter. These units help develop learning skills and common curriculum goals including evaluation of information, oral and written expression, reasoning skills, fundamental concepts in science, and mathematical relationships. (JRH)

Warren, Rebecca Lowe Thompson, Mary H. *Scientist within You, Vol. 2: Women Scientists from Seven Continents—Biographies and Activities. Instructor's Guide for Use with Students Ages 10-15.* Report No.—ISBN-1-884414-12-5
Pub Date—Oct 95
Note—224p; For volume 1, see SE 057 758.
Available from—ACI Publishing, P.O. Box 40398, Eugene, OR 97404-0064 (\$24.95; quantity discounts).

Pub Type—Guides—Classroom—Teacher (052)
Document Not Available from EDRS.
Descriptors—Biographies, Elementary Education, Global Approach, Hands on Science, Science Activities, Science History, *Scientists, Sex Differences

Identifiers—Gender Issues, *Women In Science
This book is intended to celebrate the global successes of women in a variety of scientific fields. These women provide life stories and career images that positively impact girls' expectations of themselves and their performance in math and science. This book features full biographies on 29 women scientists, mathematicians, and engineers spanning a time-line from 1868 to the present. Each scientist is presented through a biography, a photograph, a hands-on experiment/activity that duplicates the scientist's work or demonstrates an idea relevant to her work, and a bibliography. The book is divided into 24 Discovery Units that offer extensive class activities, experiments, or projects. The units include an introduction page listing key points, supplies needed, an order of events, an instructor's

guide with background information and comprehensive instructions, sheets for students to record findings, and a newsletter. The section, Bridging the Continents, highlights women whose work in science has intercontinental significance. Seven Continental Summaries are included that emphasize an aspect of that continent's scientific history and include continental facts unique to that land mass, continental curiosities to pique student interest, exploration questions for classroom or individual research, and suggested enrichment activities. Doron, Rina. *Absorption and Adjustment Problems among Immigrant Students Studying for the Practical Engineering Degree in Israel.* Pub Date—Jan 96

Note—24p; Paper presented at the Jerusalem International Science and Technology Education Conference on Technology for a Changing Future: Theory, Policy and Practice (2nd, Jerusalem, Israel, January, 1996).

Pub Type—Speeches/Meeting Papers (150)—Reports—Research (143)

EDRS Price—MF01/PC01 Plus Postage.
Descriptors—Acculturation, *Adjustment (to Environment), *Cultural Differences, *Engineering, Foreign Countries, Higher Education, *Immigrants, Questionnaires, *Student Attitudes
Identifiers—Israel

The main objectives of this study were: to examine the problems faced by immigrant students (N=294) from the former Soviet Union studying for the practical engineering diploma; to examine their attitudes towards various aspects of training in the college, and to make recommendations that facilitate the absorption process of the immigrant students. Findings showed that most of the immigrant students indicated that they had enrolled in those colleges because they were looking for a profession that could be studied in a short period so they would be able to join the labor force as soon as possible. Most of the students surveyed (74%) preferred to study in Hebrew rather than in their mother tongue, 71% expressed the opinion that the teaching techniques used in the colleges suited them, and 81% preferred studying in mixed classes in which the number of immigrants were equal to that of the veteran students or in classes where the immigrants were a majority. As far as social integration was concerned, it was found that only 28% of the new immigrants visited veteran students' homes, and only 25% were visited by Israeli students. The most frequently mentioned suggestions for improvement relate to the attitude of teachers and the administration to immigrants and the network of ties with veteran Israeli students. Contains 16 references. (JRH)

Water Celebration! A Handbook. Montana State Univ., Bozeman. Watercourse. Spons Agency—Bureau of Reclamation (Dept. of Interior), Washington, D. C.

Pub Date—93
Note—32p.
Available from—Watercourse, 201 Culbertson Hall, Montana State University, Bozeman, MT 59717-0057.

Pub Type—Guides—Non-Classroom (055)
Document Not Available from EDRS.

Descriptors—Conservation (Environment), Elementary Secondary Education, Environmental Education, Exhibits, *Natural Resources, Science Activities, Science Programs, *Water Resources
A Water Celebration is a free one- to three-day event to entertain and educate communities about the importance of water. Celebrations organized for school children include classroom activities, exhibit areas, contests, games, and teacher networking opportunities. Celebrations for adults range from water conservation conventions to forums on wise water use to public debates on water rights. This booklet is a detailed guide to organizing a Water Celebration and includes sections on getting organized, scheduling, and communications. Appendices include: communications with participants; communications with exhibitors and presenters; communications with the media; scheduling-master lists and matrices; games and contests; surveys; and references and order forms. This document is a guide to building a Liquid Treasure Water History Trunk that allows educators and students of all ages to learn about water from a historical perspective. By assembling historical water related items into a meaningful and interesting learning format—The Liquid Treasure Trunk—teachers and students of all ages can gain a glimpse of the past and perhaps discover useful insights for the present and the future. The artifacts, photographs, political documents, and words that illustrate our interaction with water throughout history offer useful lessons and activities. Appendices include reference resources, general bibliography, grant proposal, sample budget, shipping and order forms, and sample class play. (JRH)

Descriptors—Cooperative Learning, *Educational Resources, Elementary Secondary Education, *Mathematical Concepts, Mathematics Teachers, *Problem Solving

This book is designed to give mathematics teachers a host of interesting and useful ideas thereby raising their consciousness level and enabling an enrichment of the mathematics instruction program. The chapters in this book capture a broad spectrum of ideas in the area of mathematics problem solving. Chapters are: (1) "Strategies for Problem Exploration" (Ewen, Ira); (2) "Unconventional Problem-Solving Strategies in Mathematics Instruction" (Posamentier, Alfred); (3) "Interest Grabbers: Exciting Motivational Problems with Punch and Personality" (Conrad, Steven); (4) "Check the Answer, Please!" (Salvadori, Mario); (5) "The Logic of Error" (Akin, Ethan); (6) "Trial and Success" (Paul, Fred); (7) "Reduce, Expand, and Look for a Pattern" (Krukli, Stephen; and Rudnick, Jesse); (8) "The Pigeonhole Principle for Problem Solving" (Posamentier, Alfred; and Lee, Wei); (9) "Handling, Seeing, and Thinking Experiences in Mathematics" (Maletsky, Evan); (10) "Problem Solving as a Continuous Principle for Teaching: Suggestions and Examples" (Humenberger, Hans; and Reichel, Hans-Christian); (11) "Another View of Combinatorics (or Counting Without Really Counting)" (Moresch, Stephen); (12) "Problem Solving by the Use of Functions" (Schulz, Wolfgang); (13) "Symmetry Saves the Solution" (Singmaster, David); (14) "An Application of Congruence Transformations in Problem Solving" (Trojak, Jan); (15) "Graph Theory: Tools to Solve Mathematical Problems" (Lee, Wei); (16) "A Different Solution for Problems With Extreme Values: A Didactic Journey Into the World of Jakob Steiner's Ideas" (Kiesewetter, Karl; Stowasser, Roland; and Haapasalo, Lenni); (17) "The Problem of the Duplication of a Cube" (Kaiser, Hans); (18) "Solving Mathematical Problems Using Game Strategies" (Kauke, Marion; and Ziller, Sabine); (19) "Cooperative Learning Approaches to Mathematical Problem Solving" (Hartman, Hope); and (20) "Problem Solving and the Mathematically Gifted Student: A Psychological Perspective" (Rollett, Brigitte). Appendices include sources for problems and readings on problem solving. (JRH)

Descriptors—Educational Change, Elementary Secondary Education, *Evaluation, National Curriculum, *Professional Development, Science Education, *Scientific Literacy

Identifiers—*National Science Education Standards, *Reform Efforts

The National Science Education Standards present a vision of a scientifically literate populace. The standards outline what students need to know, understand, and be able to do to be scientifically literate at different grade levels. They describe an educational system in which all students demonstrate high levels of performance, teachers are empowered to make the decisions essential for effective learning, interlocking communities of teachers and students are focused on learning science, and supportive educational programs and systems nurture achievement. After an introductory chapter and a chapter that outlines the overarching principles that underlie the vision of scientific literacy for all students, the National Science Education Standards are presented in six chapters. The standards for science teaching presented in Chapter 3 focus on what teachers know and do. Chapter 4, "Standards for Professional Development for Teachers of Science", focuses on how teachers develop professional knowledge and skill. The standards in Chapters 3 and 4 present a broad and deep view of science teaching that is based on the conviction that scientific inquiry is at the heart of science and science learning. The science education assessment standards are presented in Chapter 5 as criteria for judging the quality of assessment practices and apply equally to classroom-based and externally designed assessments and to formative and summative assessments. The content standards, organized by K-4, 5-8, and 9-12 grade levels, are found in Chapter 6. These standards provide expectations for the development of student understanding and ability over the course of K-12 education. Content is defined to include inquiry; the traditional subject areas of physical, life, and earth and space sciences; connections between science and technology; science in personal and social perspectives; and the history and nature of science. Chapter 7 contains the program standards which provide criteria for judging the quality of school and district science programs. The system standards in Chapter 8 consist of criteria for judging the performance of components of the science education system beyond the school and district: the people and entities, including education professionals and the broader community that supports the schools. Throughout the Standards, examples have been supplied that are based on actual practice and include a brief description of some of its features and a list of the standards that might be highlighted by the example. New Ways of Science Teaching: The Active and Professional Support Project.

Pub Date—28 Sep 95

Note—10p.

Pub Type—Reports—Descriptive (141)

EDRS Price—MF01/PC01 Plus Postage.

Descriptors—*Educational Change, Educational Strategies, Elementary Education, Foreign Countries, *Professional Development, Science Curriculum, *Science Instruction, Science Process Skills, Scientific Methodology, Teacher Improvement

Identifiers—Australia, Indonesia, Reform Efforts
Indonesian primary school children are taught to memorize science facts and learn only routine skills. School science lessons focus on low-order thinking as required on the frequent district formative tests and a national year six examination. Because of this emphasis on testing, students show little interest in asking questions about everyday scientific observations. The Ministry of Education and Culture, concerned about this trend, initiated a teacher professional development project to try to change teachers' and educators' behavior in the teaching and learning process in order to raise the level of student understanding. This initiative, the Active Learning and Professional Support (ALPS) project, is described and reviewed in this paper. The ALPS project is perceived as three interrelated dimensions of change: learning processes and school development, school development and continuing professional support for teachers, and new patterns for inservice training. This project has provided teachers with skills necessary to involve children to speculate about phenomena, classify materials, observe carefully, use simple measuring equipment, infer, carry out experiments, interpret data, and control variables. Impact of ALPS implementation and associated problems are also discussed in this paper. (JRH)

Incorporation of the World Views of Indigenous Cultures: A Dilemma in the Practice and Teaching of Western Science.

Pub Date—Oct 95

Note—8p.; Paper presented at the International History, Philosophy, and Science Teaching Conference (3rd, Minneapolis, MN, October 29-November 2, 1995).

Pub Type—Speeches/Meeting Papers (150)—Opinion Papers (120)

EDRS Price—MF01/PC01 Plus Postage.

Descriptors—*American Indian Culture, *Cultural Context, Multicultural Education, *Scientific Concepts, *Scientific Methodology, Technology Identifiers—*Knowledge Bases, *World Views

The teaching of science in the United States is dominated by examples of the contributions of European and American scientists. The multitude of contributions of knowledge and ways of thinking of the many other cultures of the world have been largely ignored. This paper presents evidence from the Yupiaq culture in southwestern Alaska that demonstrates that indigenous cultures have developed their own scientific bodies of knowledge and ways of thinking about the world that differs in crucial ways from that of Western Science. Yupiaq contributions to science and technology and Yupiaq world views are described. Implications for curriculum development and pedagogy are discussed. (JRH)

Learning, Higher Education, Inquiry, *Outdoor Activities, Science Instruction, Science Programs, Scientific Methodology, *Student Centered Curriculum

The concept of experiential education has gained increasing popularity among many types of institutions and organizations. Experiential education is an interactive learning process between student, instructor, subject, and environment where the student becomes actively involved with the subject at hand through discussion, activity, and creative thinking. It combines direct experience that is meaningful to the student, with guided reflection and analysis. This report describes a course of study, Integrated Field Study-The John Wesley Powell Journey, that incorporates experiential learning in its design. This 15 credit course was offered through Prescott College's Outdoor Action and Environmental Studies programs during the months of October, November, and December of 1992. The course offered a unique opportunity to integrate wilderness expedition skills and white water rafting with intensive earth sciences and scientific research. Appendices include: course proposal, course application, faculty resumes, promotional material, permit processes, equipment lists and menus, curriculum planning, itineraries, student projects, and the learning contract. Descriptors—Earth Science, Elementary Secondary Education, Environmental Education, Hands on Science, *Marine Education, *Oceanography, Science Activities, Water

This book is one in a series of Earth science books and contains a collection of 18 hands-on activities/demonstrations developed for the middle/junior high school level. The activities are organized around three key concepts. First, students investigate the unique properties of water and how these properties shape the ocean and the global environment. Second, students perform activities investigating the complex systems that lead to the development of currents, waves, and tides. This section focuses on the interactions of wind, water, gravity, and inertia. In the third section, students study the impact that humans have on the ocean and the marine environment, particularly effects of pollutants. The five readings included are intended to enhance teacher preparation or serve as additional resources for students interested in further study by elaborating on concepts presented in the activities. Other readings introduce supplemental material so that teachers can connect science to broader social issues. An annotated bibliography is included as Appendix B and is intended to serve as a supplemental materials guide. Entries are divided into various categories: activities and curriculum projects, books and booklets, audiovisual materials, instructional aids, information and references, Sea Grant programs, and Internet resources. Descriptors—*Earth Science, Elementary Secondary Education, Hands on Science, Interdisciplinary Approach, Science Activities, Science Course Improvement Projects, *Space Science
Identifiers—*Craters, Moon, Planets, *Scope Sequence and Coordination

This book provides a complete Scope Sequence and Coordination teaching module. First, craters are introduced as a generally observable phenomena. Then, by making craters and by investigating the results, students gain close-up, hands-on experience with impact events and their products. Real crater examples from the Moon and elsewhere are included to allow students to connect their laboratory experiences to phenomena space scientists investigate every day. Interdisciplinary connections are also developed when students use cratering as a foundation to launch investigations into topics traditionally found in separate disciplines. This book contains many ready-to-photocopy images that enable students to examine images of craters from the Earth, the Moon, or other planetary bodies. Activities are divided into the following sections: discovering craters, making craters, impact distributions, kinetic energy and impacts, impacts on Earth, impacts and the history of life, and impact implications. Appendices include background to cratering, a master materials list, introduction to the CD, and a resources list. (JRH)

Descriptors—Elementary Secondary Education, Inquiry, Interdisciplinary Approach, Investigations, Mathematics, *Measurement, Physics, Science Activities, Science Experiments, *Structural Elements (Construction)

Identifiers—Scale Analysis

The theme of Scale and Structure (or simply Scale) appears in many state science frameworks and projects of national importance. The major idea of this theme is that a change in scale will affect the nature of the given structure. This book is designed as a guide and set of activities for third- through eighth-grade teachers. The activities included are designed to help students develop a feeling for and an understanding of structure and how it changes with scale change. This book should be considered as a collection of starting points that provide endless opportunities for sustained investigations and experimentation. The activities explore a set of phenomena using different materials and approaches, thus allowing students to develop a better understanding of the phenomena over time. The book is divided into four sections: teaching scale and structure, the physics and engineering of structure, the mathematics of scale, and the effect of scale on structure. Appendices include a resource guide, blank charts for mathematics of scale activities, and sample science record sheets. (JRH)

Descriptors—Ecology, Elementary Education, *Environmental Education, Experiential Learning, *Natural Resources, *Observation, Outdoor Activities, Outdoor Education, *Parent Participation, Science Activities

Identifiers—*Natural History

This book is designed to provide parents and other adult companions with activities to do with children on outdoor walks. The activities offer adults and children a shared learning experience and have been

adapted from the children's education program at Habitat Institute for the Environment (Massachusetts). The activities are arranged seasonally, based on natural history events that can be observed during those particular seasons. Eight distinctly different seasons can be observed: late winter's quiet giants (trees in February and early March), subtle signs of early spring (late March and April), spring's dramatic changes (May and June), long days and warm nights of summer (July and August), summer's grand finale (September), forests in autumn (October), late autumn preparing for winter (November and early December), and snow (mid-December and January). Each seasonal section includes nature study activities that have a reasonably good chance of being done with success in that season. Within the seasonal sections, the activities are presented in random order. (JRH)

Descriptors—*Creative Thinking, Foreign

Countries, Higher Education, *Problem Solving,

*Technical Education

Identifiers—Slovenia

This paper deals with the different aspects of solving technical problems. To solve a technical problem in an optimal way it is not enough to consider the appropriate technical and technological principles, the different organizational, economical, and ergonomical principles must also be taken into account. The didactic aspects of solving technical problems at different levels are described. The different levels include: the functionality level, conceptualization, design and construction, and the production and maintenance level. Rules that must be considered when didactically designing a technical problem or its simulation are also described. It is concluded that different problem-solving based exercises stimulate student's creativity especially in technical and technological fields. Contains 12 references. (JRH)

Document Not Available from EDRS.

Descriptors—Cognitive Processes, Elementary Secondary Education, Higher Education, Learning Strategies, Teaching Methods, *Thinking Skills

Identifiers—Learning Systems

"Thinking Connections" is a thinking strategy program that teaches critical and creative thinking within the context of the regular curriculum. The main focus is helping students think to learn. Other results of this program are to develop positive attitudes, the ability to think an activity through to its conclusion, and to understand the importance of thinking. The process of teaching thinking skills is a method for teachers to integrate subject matter into their curriculum. The instruction book is divided into three modules. The first module begins with an orientation lesson about the mental management strategy in which students develop an awareness and purpose of the task set before them. They make connections by using their knowledge and learn how to convert their thoughts into thinking. After they have completed the problem, they are

given time to analyze and review their performance. Module 2 concentrates on how students can make decisions by asking themselves about the options, the reasons, and the best choice. The third module involves the strategy of understanding through design by asking three important questions: what are the purposes?; what are the features and reasons?; and how well does it work? All the strategies offered not only improve the students ability to think and learn, but also aid the teacher in teaching and learning skills. The instruction manual is designed so that teachers can incorporate the strategies into their classroom environment. The volume includes illustrations, diagrams, and answers to questions. (JAG)

Identifiers—Chesapeake Bay, Murray River Re-
gion, Rio de la Plata

This paper is part of a larger study, conducted as part of a Christa McAuliffe Fellowship research project, "A Comparative Geography of Three Ecologically Similar Regions." The study compared the Chesapeake Bay region of Maryland with the Murray River region of South Australia and the Rio de la Plata region of Uruguay. The project was designed to be usable by teachers and readable by students. The readings and questions after the readings are complete in themselves. Teachers are encouraged to draw upon other resources to add more depth to this unit. Using any two of the studies (Australia, Uruguay, or Maryland) permits teachers to use a technique called comparative geography which presents data and encourages students to draw conclusions about similarities and differences in the three regions. A question segment accompanies the readings. Some vocabulary words are in Spanish to help children become acquainted with a new language. (EH/Author)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—*Adolescents, Choral Music, *Fe-
males, Fine Arts, Literature Reviews, Music,

*Singing, *Vocal Music, Voice Disorders, *Women's Studies

This paper discusses the research findings in voice mutation, vocal instruction, and the application of knowledge to vocal instruction. Much research involves changes in the male and female adolescent voices, especially of interest to choral directors and music educators. The research defines the vocal development categories as: (1) posture; (2) breath management; (3) relaxation; (4) phonation; (5) resonance; (6) registration; and (7) articulation. A segment on therapy and exercise suggests ways to develop the voice that has been abused. An extensive list of references offers further topics for research. (EH)

EDRS Price - MF01/PC03 Plus Postage.

Descriptors—Cultural Education, Cultural Traits, Elementary Secondary Education, History Instruction, *Interdisciplinary Approach, *Legends, *Music, Music Education, Oral History, Oral Tradition, *Revolutionary War (United States), Social Studies, Story Telling.

"FolkSong in the Classroom" is designed to be used by teachers of history, literature, music, and the humanities to encourage the study of history through folk song. This volume focuses on the history of the American Revolution, using song and script to better understand the American Revolutionary War. A question and answer segment encourages discussion. Pictures and maps accompany the text. Songs in this issue include: (1) "The Liberty Song"; (2) "Revolutionary Tea"; (3) "The Irishman's Epistle"; (4) "To the Commons"; (5) "Fish and Tea"; (6) "British Grenadiers"; (7) "Yankee Doodle"; (8) "The Deserter"; (9) "Sir Peter Parker"; (10) "The Dying Redcoat"; (11) "Nathan Hale"; (12) "The Battle of Trenton"; (13) "Riflemen of Bennington"; (14) "The Fate of John Burgoyne"; (15) "The Battle of the Kegs"; (16) "Come Out Ye Continentals"; (17) "Yankee Doodle's Expedition to Rhode Island"; (18) "How Stands the Glass Around"; (19) "Johnny Has Gone For a Soldier"; (20) "Paul Jones' Victory"; (21) "The Ballad of Major Andre"; and (22) "Lord Cornwallis' Surrender." Social Studies in the Netherlands: A Challenging Experience.

Noordelijke Hogeschool Leeuwarden (Netherlands).

Pub Date—Nov 95

Note—12p.; Paper presented at the Annual Meeting of the National Council for the Social Studies (75th, Chicago, IL, November 9-12, 1995).

Available from—Noordelijke Hogeschool Leeuwarden, P.O. Box 1018, 8900 CA Leeuwarden, The Netherlands (free).

Pub Type—Speeches/Meeting Papers (150) — Reports - Descriptive (141)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Comparative Education, *Cross Cultural Studies, Foreign Countries, Foreign Culture, Higher Education, International Education, Preservice Teacher Education, Schools of Education, *Social Studies, *Teacher Education, *Teacher Education Curriculum, *Teacher Education Programs

Identifiers—*Netherlands

This paper outlines the development of the social studies curriculum of the Noordelijke Hogeschool Leeuwarden (NHL), a polytechnic college in the north of The Netherlands. The following issues are addressed: (1) current developments in the labor market and in education that have to be addressed by a new curriculum; (2) the concept of "learning how to learn" as a key feature of the NHL curriculum; (3) social studies as a thematic form of education in the NHL definition; (4) the method of curriculum development that is used to implement the framework; and (5) problems and points of discussion in the current implementation process.

Graphs and charts help explain the different learning techniques described in the paper. The paper contends that the distinction between Dutch universities and colleges for professional education, such as the NHL, can be made productive within a national educational system. (EH)

Directionless from Birth: The National Council for the Social Studies, 1921-1937.

Pub Date—Nov 95

Note—22p.

Pub Type—Information Analyses (070)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Educational History, Elementary Secondary Education, Faculty Organizations, *History, *National Organizations, *Professional Associations, Social History, Social Science Research, *Social Studies, *Teacher Associations

Identifiers—*National Council for the Social Studies

This paper recounts the early years of the National Council for the Social Studies (NCSS), from its 1921 beginnings and partnership with the National Education Association. NCSS began as a service organization to close the gap between social scientists and secondary school teachers and to re-examine knowledge within the disciplines in light of potential use in schools. NCSS was founded by five practitioner-researchers, but the organization was taken over by two hard working entrepreneurs with little vision other than an organizing spirit. NCSS emerged directionless from birth. Many in higher education with deep interest in the social sciences and professional organizations became very interested in NCSS and its influence in the school curriculum. These alliances allowed for the Council to meet on neutral ground. NCSS allied early with the National Education Association (NEA) and the American Historical Association (AHA). Although it was never a formal part of the AHA, the AHA provided financial support for many years. From 1925 to 1969, NCSS was officially part of NEA as its Department of Social Studies. For the first 10 years, NCSS campaigned for members to give it life. By the late 1920s NCSS had begun to gain the interest of teachers; by the 1930s the Council attracted educators and social scientists with more pronounced academic views and involvement. NCSS had a few women officers in the early years but many were involved with Committees and Yearbook chapters. This history laments that little has changed in the nearly 60 years as NCSS still struggles for acceptance, membership, intellectual respect, and a political voice in the debate on schools. (EH)

Descriptors—*Anti Semitism, Attitudes, *Bias, Civil Liberties, Civil Rights, Elementary Education, Ethnic Groups, European History, Global Education, International Crimes, Jews, Judaism, Junior High Schools, Minority Groups, Nazism, Social Bias, Social Studies, Values, *World War II

Identifiers—*Genocide, *Holocaust

The goal of this teaching guide is to help students develop a positive self-image, behave as responsible individuals, and accept differences in order to have the tools to challenge the forms of prejudice and discrimination that confront society. The Holocaust and continuing genocides are prejudice in its most extreme form. The Holocaust raises the most serious questions and concerns about the nature of human behavior; the role of the perpetrator; the bystander; and the victim. The goals of the lessons and activities are to raise the level of awareness, critical thinking skills, and problem solving techniques through dilemmas, readings, and discussions. Teachers can decide which lessons to use based on the level of maturity of the students. The guide consists of lesson plans and activities, professional resource materials, and suggested resources for obtaining additional materials. The units are developed by grade levels and topics and include: (1) Grades K-2: "Learning How to Be Friends"; (2)

Grades 3-4: "Communities Are People"; (3) Grades 5-6: "People Are People"; and (4) Grades 7-8: "Choosing to Make a Better World." (EH)

Identifiers—Diary of Anne Frank, *Frank (Anne), *Holocaust, Holocaust Literature

This guide helps secondary students to understand "The Diary of Anne Frank" through a series

of short essays, maps, and photographs. In view of new scholarship, the historical context in which Anne Frank wrote may be studied to improve the student's perspective of recent history and of the present. A drawing shows the hiding place in the home where the Frank family lived. The essays include: (1) "The Need for Broader Perspective in Understanding Anne Frank's Diary" (Joel S. Fishman); (2) "The Uniqueness of the Holocaust" (Alex Grobman); (3) "Anne Frank's World" (Elma Verhey); (4) "Anne Frank and the Dutch Myth" (Elma Verhey); (5) "A New Perspective on Helpers of Jews During the Holocaust: The Case of Miep and Jan Gies" (Dienke Hondius); (6) "Teaching the Holocaust through the Diary of Anne Frank" (Judith Tydor Baumel); (7) "Examining Optimism: Anne Frank's Place in Postwar Culture" (Alex Sagan); (8) "Dutch Jewry: An Historical Overview"; and (9) "Chronology of the Frank Family and the Families in the Secret Annex." A selected bibliography accompanies the text. (EH)

Identifiers—Georgia
This paper reports from an observant participant's point of view on a theme study conducted in a fifth-grade classroom at a laboratory elementary school of a small, private liberal arts college in Georgia. The "Theme Study" is a student-centered approach that "emphasizes a coherent and holistic approach to learning through the study of broad themes rather than compartmentalized subject areas." The study discusses the basic four components for theme study: (1) planning; (2) researching; (3) synthesizing; and (4) presenting. The themes presented include: (1) "Why are we Here?" (geology/geography); (2) "Native American Studies" (changes); (3) "Exploring the Unknown" (early U.S. explorers/astronomy); (4) "Taking Off on Investigations" (pioneers and heat energy); and (5) "Greed and Charity" (slavery and the Civil War). Contains 36 references. (EH)

Identifiers—*Quilting

Quilters have been practicing geometric principles for centuries. Since straight seams are easier to sew than curved ones, the grid naturally evolved as the basis for their designs. This book is a resource for experimenting with traditional patchwork quilt patterns. It provides students a hands-on understanding of geometric concepts. It contains grids for reproducing traditional patterns or creating original designs, an index of quilt patches, and a selection of patchwork patterns. The first section, "Grids," includes basic grids and special grids for the four most common quilt patterns: four patch, five patch, seven patch, or nine patch. The second section, "Visual Index," provides a visual reference of nearly 300 traditional patch or block designs. The final two sections provide students with opportunities to experiment with color and design. In section three, "Classic Symmetrical Designs," a single block altered by horizontal or vertical manipulation results in 16 varied patterns. In the last section, "Designs With Variations," a block, rotated 90 degrees, reflected, or staggered, creates pattern variations. Suggestions for student activities are included. (MM)

 Identifiers—*Caldecott Award

This book uses Caldecott Award winning books as a resource for classroom teachers to provide students with experiences that combine art with children's literature. The book contains three lessons for each of the 57 Caldecott books from 1938-1994. Lessons examine the key art concepts contained in the illustrations of the Caldecott books. These lessons are organized around a variety of media used in artmaking. These include: (1) "Pencil"; (2) "Crayon"; (3) "Marker"; (4) "Colored Pencil"; (5) "Chalk"; (6) "Stencils"; (7) "Collage"; (8) "Watercolor"; (9) "Tempera"; (10) "Color Mixing"; and (11) "Printmaking." Lessons focus on basic art principles and art elements, such as line, color, texture, shape, space, and value. The step-by-step instructions, complete materials lists, and detailed illustrations are designed for teachers with little or no art training. They can be adapted to suite grades K-6. An appendix lists Caldecott Award winners from 1938-1994. (MM)

This one-hour documentary on videotape reveals how computer technology and interactive media rely on the languages of the arts—images, sounds, colors, and movements—to engage children in new ways of learning about the arts and other subjects. Students are shown using educational software that encourages development of knowledge and skills in art, music, dance, history, geography, mathematics, and chemistry. Educators engage in a discussion on curiosity about the world that is being stimulated by an electronic medium that breaks down barriers of departmentalized disciplines through utilization of the integrating, common language of art. Unity in Diversity: History and Religion in Indonesia.

Spans Agency—Center for International Education (ED), Washington, DC.

Pub Date—95

Note—28p.

Pub Type—Guides - Classroom - Teacher (052)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Area Studies, *Asian History, Asian Studies, *Cultural Pluralism, Foreign Countries, Global Education, Higher Education, *Non Western Civilization, Religion Studies
 Identifiers—*Indonesia, Islam

This paper, intended as lecture material for university students or as background material for teachers of social studies and world history, assumes that students already have some knowledge about

the origins, practices, and beliefs of Islam, but that they have no prior background about Indonesia or its history. The paper describes the diversity and the history of Indonesia, including its experience with Dutch colonialism, Japanese occupation, and the struggle for independence. It compares the administrations of Presidents Sukarno and Suharto. The document provides a brief survey of economic development and education in Indonesia, focusing on Islam, and Indonesia's commitment to religious pluralism and toleration. Finally, the paper discusses the role of women in Indonesia. Learning objectives and discussion questions are included. The paper outlines nine objectives and eight discussion questions. Contains 33 references. (JAG)

Matthews, Stephen F.

Indonesian "Adat" Customs as the Backbone of Effective Environmental Policies.

Spons Agency—Center for International Education (ED), Washington, DC.

Pub Date—[95]

Note—13p.

Pub Type—Reports - Descriptive (141)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Area Studies, *Cultural Influences, Culture, *Environmental Standards, Foreign Countries, Global Education, Higher Education, *Islamic Culture, Non Western Civilization
 Identifiers—*Adat, Environmental Protection, *Indonesia, Islam

"Adat" is a term in Indonesia that defines culture, customs, and traditions to foreigners, but to the people of Indonesia it means basically the rules of the village life. Villages are predominant and overseen by chiefs. Adat's rules are the roots of Islamic religion. Many of Indonesia's environmental policies stem from the teachings of Adat. While the people live Adat's religious philosophy, they naturally abide by the rules in balancing their environment and adhering to the government's policies. An important factor for preserving the environment is involving village communities at all local levels. A list of six related readings concludes the paper. Five photo copies of articles associated with Indonesia's environment are provided. (JAG)

Captivating the Public through the Media While Digging the Past.

Baltimore City Life Museums, MD.

Pub Date—Dec 87

Note—58p. A compilation of papers presented at the Annual Meeting of the Society for Historical Archaeology Conference (Sacramento, CA, 1986). Document contains broken type.

Available from—Baltimore Center for Urban Archaeology, Baltimore City Life Museums, 800 E. Lombard St., Baltimore, MD 21202 (\$5).

Pub Type—Reports - Descriptive (141) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC03 Plus Postage.

Descriptors—*Archaeology, Community Characteristics, Cultural Background, *Heritage Education, Higher Education, *Local History, Mass Media, *Mass Media Effects, *Mass Media Use, *Public Opinion

These papers illustrate concrete ways in which historical archaeological resources and projects can become known to wider audiences with appropriate messages of heritage values, resource preservation and study, and excitement of proper discovery. The papers claim that the media, newspapers, and other researchers are the pipeline to citizens and their feelings, opinions, and interests. Papers in this collection include: (1) "Best Foot Forward: Relationships with Public Affairs/Media Professionals" (Roger E. Kelly); (2) "Excavation and the Public Perception: A Sensible Approach to Effective Media Coverage" (David Gerald Orr); (3) "Baltimore's Magnificent Media Machine" (Elizabeth Anderson Comer; Lawrence L. Baker); (4) "Programmed Mass Education through the Media: A Case Study of the Old Spanish Fort on Point Loma" (Ronald V. May); (5) "The Media Blitz and Archaeology: What's In It for You?" (Rob Edwards); (6) "Surviving the Second Battle of the Little Bighorn: Methods of Effectively Dealing with a Media Blitz" (Douglas D. Scott); (7) "Exhibiting Archaeology" (Pauline Darcy-Staski); and (8) "Afterword: Discussant's Viewpoint" (Holly W. Bundock). (EH)

Improving High School Students Critical Thinking Skills.

Pub Date—May 95

Note—49p.; M.A. Practicum, St. Xavier University.
Pub Type—Dissertations/Theses - Masters Theses (042)**EDRS Price - MF01/PC02 Plus Postage.**

Descriptors—Critical Thinking, Decision Making, Decision Making Skills, Earth Science, Evaluative Thinking, Grade 9, *High School Freshmen, High Schools, *Learning Strategies, Physical Geography, *Problem Solving, *Thinking Skills

This report describes a program for advancing critical thinking skills in an integrated earth science geography course. The targeted population consists of high school freshmen from a growing, upper middle class, suburban community 40 miles west of Chicago. The information on these students comes from teacher observation, colleague surveys, and assessment of student work. Analysis of probable cause data reveals: (1) students are indifferent; (2) critical thinking strategies have not been developed sufficiently; (3) students do not make relationships within and between subjects; and (4) the traditional 50-minute classes cause learning to be segmented and interrupted. Student questionnaires, faculty surveys, and a review of current science curriculum document these probable causes. Solution strategies suggested by knowledgeable others, combined with an analysis of the problem setting resulted in a selection of three major interventions: (1) a change in the current 50-minute class structure; (2) a change of curriculum content; and (3) a change in instructional procedures. Tables, teacher questions, a teacher check list, and a teacher survey are included in the appendix of the research. Contains 19 references. (EH)

Promoting Multiracial Relationships by Utilizing the Principles of Community Building.

Pub Date—May 95

Note—83p.; M.A. Thesis, Saint Xavier University.
Pub Type—Dissertations/Theses - Masters Theses (042) — Reports - Descriptive (141)**EDRS Price - MF01/PC04 Plus Postage.**

Descriptors—Conflict Resolution, *Cultural Awareness, Cultural Differences, Cultural Interrelationships, Culture, Culture Contact, *Diversity (Institutional), Ethnicity, Grade 8, *Intercultural Programs, Junior High Schools, Middle Schools, *Multicultural Education, Peace, Social Integration

Identifiers—Rockford School District 205 IL

This report describes a student leadership program, Putting the Environment Above the Common Ego (PEACE), designed to reduce incidences of eighth grade students forming self-segregating groups based on ethnic or racial heritage. The targeted groups form the diverse student body attending a middle school with 1,400 students in Rockford, Illinois. Formation of the student-devised segregated groups was revealed by staff and administration. Analysis of staff and student surveys, personal logs, and the study of the student composition of after school groups confirm the initial observations of this middle school's professional staff. Causes of the problem include: (1) a city historically and geographically divided with societal tendencies to categorize people by race, economic circumstances, or ethnic background; and (2) a school culture that failed to address adequately the issue of diversity. The PEACE leadership program, based on survey interpretation and personal logs, did not appear to have had an impact on the incidences of students forming self-segregating groups. The school has a template of this organization, its purposes, practices, and ideals, but the challenge remains to bring the diverse student group together. Charts and graphs are included along with eight appendices. (EH)

Team Teaching a Senior Seminar with a Faculty Member (with/out) Disabilities.

Pub Date—Aug 95

Note—35p.; Paper presented at the Annual Meeting of the American Political Science Association (Chicago, IL, August 31-September 3, 1995). Illegible print in cartoons.

Pub Type—Speeches/Meeting Papers (150) — Reports - Descriptive (141)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Assistive Devices (for Disabled),

Communication Aids (for Disabled), Cooperative Planning, Higher Education, *Language Impairments, *Physical Disabilities, Political Science, Seminars, *Speech Impairments, *Teachers with Disabilities, *Team Teaching, Teamwork, Undergraduate Study

This paper describes what occurred during a senior political science seminar when taught by two faculty members, one with and one without disabilities. Such team teaching in political science had not been done before. The study explored the issues raised during the instruction of the course when one instructor was in a wheelchair and had impaired speech and spoke with the aid of a computer. The study contended that the issues raised in the class should be relevant to everyone since many professors are perceived as having some unusual physical characteristic. The theme of the seminar was "Citizenship in the 21st Century." The evaluation of the class focused on the following: (1) in what ways was the class hindered or enhanced by the instructor's disability; (2) how can disability issues be incorporated into a political science senior seminar; and (3) how did instructor A and instructor B adapt to one another? Student interview questions, comments, and an evaluation for the seminar are included in an appendix. Contains 23 references. (EH)

Assessment and the Political Science Major: The Movement Afoot.

Pub Date—Sep 95

Note—21p.; Paper presented at the Annual Meeting of the American Political Science Association (Chicago, IL, August 31-September 2, 1995).

Pub Type—Reports - Descriptive (141) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Academic Achievement, Academic Standards, Achievement Tests, *College Outcomes Assessment, Higher Education, *Political Science

Identifiers—*Assessment of Baseline Curriculum, College Education Achievement Project, Tests of Academic Progress

This study examines the question of whether a college education meets society's expectations in today's world. Assessment programs are being used by academia to determine a college student's achievements and whether his or her performance will enable him or her to be effective in the real world. Assessment, however, is under fire by those who have different ideas about testing and about what standards to use. One popular assessment, the pre-testing and post-testing, used by some colleges has been shown to be helpful in gathering information on what students are learning. There are also several alternative assessment tests that are used by others in the academic arena. Commercially designed examinations are employed to measure general knowledge. Locally designed examinations allow for local autonomy. Portfolios promote interactive learning and a way for students to see improvement in areas where they need to improve. Theses and projects are still another form of assessment along with oral examinations. Contains 14 references. (JAG)

Descriptors—Area Studies, Cultural Pluralism, *Culture, Foreign Countries, Global Education, Government (Administrative Body), Higher Education, *Non Western Civilization, Religion, *Religion Studies, Social Bias

Identifiers—Government Information, *Indonesia
When U.S. citizens travel to Indonesia, it is hard for the majority of them to understand the country's culture and people. This project outlines some of the major fallacies individuals have when in Indonesia, and how they can avoid them by studying ahead of time. The project begins by requiring the individuals to plan their trip properly, know the Indonesian currency and where to obtain a passport. There are 12 questions pertaining to Indonesia's geographical, religious, political, and social make-up. Participants are asked to identify and understand Indonesia's customs such as food, family structure, music, and

the country's motto. Additional learning activities include brief questions on Indonesia's history, researching three important current events, and locating significant places on a map of Indonesia and places of relative importance. A bonus exercise concludes the project and asks individuals to create a poster that includes the people, land, and life in Indonesia. These activities offer a traveler to Indonesia pertinent information to help them as they make their journey through the country. (JAG)

Identifiers—Historical Research, *Indonesia, Religious Art

This document outlines a slide presentation on Southeast Asia with primary emphasis on Indonesia. How international trade has influenced the design and development of Indonesian arts, crafts, and architecture are main points of interest. A geographical overview of Indonesia is described along with its natural resources, population, and religious practices. Indonesia's history focuses on the indigenous culture of the people who migrated and developed the land. Hinduism, Buddhism, and Islamic religions spread to Indonesia through foreign trade and impacted on the visual arts throughout the centuries. The paper concludes with personal thoughts and experiences about visiting Indonesia. (JAG)

Identifiers—Depression (Economic 1929), Folk Music, *Jewish Culture, Labor History, New Deal, New England

The eighth volume of "Folkson in the Classroom" covers three periods in U.S. history where folk music was a cornerstone in the lives of people. The first issue of the volume contains a brief history of the Jewish experiences and hardships and how individuals stood by each other in maintaining a rich, musical, Yiddish folkson heritage. Nine popular Yiddish songs are listed along with suggestions to present the music. A 10-item discography concludes the issue. The second issue refers to the Depression and New Deal where many immigrants worked long hours in factories. Songs created during this time reflect the abuse of big business and the forced labor of young children. This issue concludes with a bibliography/discography, song notes, and suggestions for teachers. Issue 3 explores the 1800s when women worked in New England textile factories in order to help support their families. Most of the women were immigrants who were discriminated against because of their European and Eastern European backgrounds. A 12-item discography/bibliography concludes this issue. (JAG)

Identifiers—*United States Capitol Building

The United States Capitol building fashions an historical awe that includes images of the founding fathers, legislative branch, executive branch, and the American people. Even though it was built for elected officials to take care of governmental business, it serves to represent the democratic republic from which the United States was created. Words and phrases like "Freedom," "We the People..." are thoughts that stand out in one's mind upon viewing the Capitol. William Thornton was the first architect chosen to construct the Capitol in 1793. He began the project that was later passed on to other architects as the Capitol building expanded along with the nation. George White was one of the last Capitol architects in the 1970's and was responsible for most of the current renovation. Today, the Capitol is visited by millions of people from all over the world. Not only do they see the working government, but they also learn a rich history through the many pieces of art that depict great moments in U.S. history. The Capitol is probably most noted as the site of presidential inaugurations. The Capitol is not only a tourist and working environment, but also is a small city. It has its own restaurants, post office, barber shop, printing service, and offices for those who work there. The U.S. Capitol is a shrine dedicated to the American people and the freedom in which they believe. (JAG)

This report was commissioned to present a coherent set of relevant level descriptions, organized in a coherent range, and based on Maori learning and teaching principles. There are five chapters in this book. Chapter 1, "Traditional Concepts of Higher Education" (Richard Benton; Tipene Chrisp), provides a highly condensed form of the review of published texts about traditional Maori educational theory and practice. Chapter 2, "Contemporary Maori Principles of Learning and Teaching" (Nena Benton), discusses modern Maori principles of learning and teaching. Chapter 3, "Level Descriptors for Units for Maori National Qualifications" (Richard Benton; James Swindells), relates material from earlier chapters to the technical question of descriptors for the assigning of Maori units to levels within the National Framework and suggests three criteria to be added to the sets of descriptors at each level for Maori units within the Framework with modifications to the other descriptors. Chapter 4, "Descriptors for Maori National Qualifications," suggests possible structures, with corresponding descriptors, for Maori qualifications within the National Framework. Chapter 5, "Conclusions," dwells on the theme of interconnectedness. Two

appendixes contain terms relating to traditional Maori higher education and accreditation guidelines. Contains an index of terms and 60 references. (EH)

Identifiers—Curriculum Review Development and Implementation, New York City Board of Education, *Peace Education

The Resolving Conflict Creatively Program (RCCP) began in New York City by Linda Lantieri who is now the national director. This program is for teachers, students, administrators, and parents who seek to make schools and society more peaceful through creative means. RCCP was developed because of the increasing statistics of violent acts that take place in U.S. schools and the increasing number of suicides and homicides by young people. RCCP helps people recognize different ways to resolve conflicts through peaceful means rather than through the violent acts young people see perpetuated in the media. Teachers can implement RCCP by employing a new classroom management style that includes the following components: (1) K-12 classroom curriculum; (2) professional training and ongoing assistance and support for teachers; (3) a student-led mediation program; (4) parent training; and (5) administrator training. The program finds that teachers report positive results. (JAG)

War, *Non Western Civilization, Secondary Education, Social Sciences, Social Studies

Identifiers—*Koreans, North Korea, South Korea Korea's recorded history extends back before the birth of Christ. Through their long history, the Koreans have endured a variety of social, political, and economical crises. Confucianism has long been one of the most popular religions by which the Korean people have lived. However, Koreans also have embraced Buddhism and Christianity while maintaining Confucian ideals. Forms of aristocracy have been part of Korea's fabric through most of its history. At the turn of the 20th century, Japan's power in Asia allowed them to control Korea as a colony. In the 1950's, following the Korean War, Korea was divided into North and South. North Korea followed a communist form of government while the South maintained a democratic, capitalistic style of government. Since the end of the Korean War, the United States has maintained a presence in South Korea for its protection against the North. However, in recent years, there have been attempts by both sides to seek reunification. A series of discussion questions and an annotated reading list conclude this volume. (JAG)

Assessing the Influence of Portfolios on Higher Order Thinking Skills.

Pub Date—May 95

Note—59p; Masters project, Weber State University.

Pub Type—Dissertations/Theses - Undetermined (040) — Tests/Questionnaires (160)

EDRS Price - MF01/PC03 Plus Postage.

Descriptors—Educational Research, Elementary Secondary Education, *Evaluation, Higher Education, *Portfolio Assessment, School Surveys, Thinking Skills

Identifiers—*Educational Research and Development Report, Utah

How the use of portfolios in the classroom will influence the higher order thinking skills is the main focus of this project. The introduction of portfolios as assessment tools is rather new to educational research, but does offer a legitimate area for serious study. Portfolios when used by students can offer them not only a way to showcase their talents, but also allow them to reflect on past achievement to compare any improvement. Reflective thinking should be a main result students acquire in this process so that they may understand themselves along with how and what they learn. A literature review and a survey of 32 teachers was conducted for the purpose of developing the rationale. This particular study went into two different schools in Utah and different disciplines in order to gather data. Layton High had the control group while the experimental group that used self-reflection was at Northridge High. The portfolio programs implemented were modified to fit properly in the specified classroom so that accurate results could be obtained. Based on the acquired results, it was determined that portfolios did not have much effect in increasing higher thinking skills, but did show positive findings. The utilization of portfolios in the classroom is too new to teachers as a tool to better the overall education of students. The study concludes that when more teachers understand the portfolio program and what it can offer, then more will take serious steps in experimenting with it. Contains 7 references, 16 tables, 3 appendices containing teaching units, and the survey instrument. (JAG)

Identifiers—*Congress, Womens History

Women's participation in congressional politics began in 1917 when Jeannette Pickering Rankin became the first woman in Congress. This was an unusual historic mark because women did not have the right to vote until 1920 when the 19th Amendment was passed. The book lists 12 prominent women who made an impact in U.S. politics. Corrine Boggs, like several other women legislators, took office due to the death of her husband. Corrine Boggs had always been involved in her husband's campaign and when she took his place, she continued to represent the citizens of her state well. Shirley Chisholm became the first African American to be elected to Congress and was very active in pursuing social equality programs. Helen Douglas was once an actress who used her popularity to become a successful legislator most noted for the "Market Basket" which had to do with price controls. Millcent Fenwick, an outspoken middle-of-the-road politician, made a name for herself in Congress. Congresswoman Geraldine Ferraro became the Democratic nominee for Vice President in 1984. Ella Grasso, from Connecticut, was the first woman governor who also served as a congresswoman. Margaret Heckler was an attorney who utilized her legal skills to become a hard working congresswoman. Texan, Barbara Jordan, another African American, worked on the Watergate hearings. Clare Booth Luce was a controversial congresswoman who also was noted for her theatrical contributions. Lynn Martin succeeded in her congressional role and went on to serve in the Bush cabinet. And Margaret Smith, who was one of the few women in the House and Senate, made great contributions to both. A complete list of all the women who served in Congress can be found in the appendices. (JAG)

Descriptors—*Cognitive Processes, Critical Thinking, Decision Making, *Educational Change, Educational Improvement, Educational Innovation, *History Instruction, Learning Processes, Problem Solving, *Social Science Research, Thinking Skills

This study reviews interventions in history teaching history from 1985 and 1995, an era of major redefinition in the field of instruction. Kindergarten through grade 12 are the focus population for the research. The study examines the context for educational change and addresses four central questions about the development of new curriculum programs for teaching history and the social sciences. The questions include: (1) What vision of history has recently emerged in an era of school reform? (2) What cognitive processes need to be developed in students for such a study of history? (3) What do successful examples of recent curricular interventions in the teaching of history look like and what makes them effective? and (4) What does this research tell us about educators' future work in the teaching of history? Research related to each of these questions is examined with recommendations offered for future action. (EH)

The Portrayal of Federal Intervention in Domestic Disorders in Selected U.S. History Textbooks.

Pub Date—May 91

Note—150p; Ed.D. Dissertation, University of Virginia.

Pub Type—Dissertations/Theses - Doctoral Dissertations (041) — Reports - Research (143)

EDRS Price - MF01/PC06 Plus Postage.

Descriptors—Constitutional History, Content Analysis, Course Content, Dissent, *Federal Government, *Federalism, *Federal State Relationship, High Schools, Political Science, Secondary Education, State Government, *States Powers, Textbook Content, *Textbooks

This dissertation addresses how federalism is portrayed in high school U.S. history textbooks. The guiding questions of this study include: (1) How well do senior high school U.S. history textbooks

portray federalism through description of domestic disorders? (2) When domestic disorders are included in these textbooks, how accurately are they presented? and (3) When domestic disorders are included, how much emphasis is given to each major event where the domestic disorder requires federal intervention? Five textbooks were selected based upon the highest number of volumes sold as well as those in use in Virginia. Fifteen selected domestic disorders were investigated for their inclusion in the texts. Basic findings focused on: (1) the explanations of the causes of the disorders; (2) explanations of the issues involved which legitimized the federal intervention; (3) explanation of the delegation of power between the federal and state authorities in determining federal intervention; (4) descriptions of any conflicts between the President and state authorities; and (5) description of the adjudication of the incident. The study concludes that the story of federalism is told only partially in high school U.S. history textbooks' portrayals of federal intervention in domestic disorders. (EH)

This collection of writings by trade book authors, public school teachers, and college-faculty offers support for using children's literature in history education. Divided into three parts, the Introduction asks "Why Teach History to the Young?" (Terrie L. Epstein). Part 1, "The Creative Process," addresses the process of writing and illustrating historical fiction and nonfiction with essays that include: (1) "Perspectives on Historical Fiction" (Joan W. Blos); (2) "Historical Nonfiction for Young Readers: An Artist's Perspective" (Leonard Everett Fisher); (3) "Voices from the Past" (Milton Meltzer); (4) "Finding Ourselves in History" (Pam Conrad); and (5) "Bring 'Em Back Alive" (Russell Freedman). Part 2, "Research and Other Considerations," compares and contrasts history textbooks and trade books by examining content emphasis and coverage, along with other stylistic concerns, in the essays: (1) "The Content and Writing of History in Textbooks and Trade Books" (Carl M. Tomlinson; Michael O. Tunnell; Donald J. Richgels); (2) "I Wanted to Be There: The Impact of Narrative on Children's Historical Thinking" (Linda Levstik); and (3) "Unmasking the Fiction of History: Children's Historical Literature Begins to Come of Age" (Michael O. Tunnell). Part 3, "Practical Applications," shares teacher-tested strategies for structuring history units around the reading of children's and adolescent literature and includes the essays: (1) "A Look at Other Trade Book Topics and Genres" (Richard Ammon; Diane Weigard); (2) "Approaches for Using Children's Literature to Teach Social Studies" (Judith S. Wooster); (3) "Teaching the Holocaust through Trade Books" (Gail Tunnell; Jeannie Ammon); and (4) "Breathing Life into the Past: The Creation of History Units Using Trade Books" (Anita Downs). (EH)

Scott, Carolyn McPherson

Ancient India: The Asiatic Ethiopians.

Center for International Education (ED), Washington, DC.

Pub Date—[93]

Note—31p; Consists largely of eight "Readings" in the form of lengthy quotations from various published works by other authors.

Pub Type—Guides - Classroom - Teacher (052)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Asian Studies, Ethnic Groups, Foreign Countries, Foreign Culture, *Multicultural Education, *Non Western Civilization, *Religion Studies, Secondary Education, Social Studies, World History

Identifiers—Ethiopians, *India

This curriculum unit was developed by a participant in the 1993 Fulbright-Hays Program "India: Continuity and Change." The unit attempts to place India in the "picture frame" of the ancient world as a part of a whole, not as a separate entity. Reading materials enable students to draw broader general conclusions based on the facts presented. The Indian culture today is tied together with the glorious ancient past through Hinduism. The eight readings include: (1) "Ethiopian/Kush: The Indian Connection"; (2) "The Glory that was Nubia" ("Smithsonian," June 1993); (3) "Indus Valley Inhabitants"; (4) "Prehistory and the Indus Civilization"; (5) "Discovery of the Indus Valley Civilization"; (6) "India's Vedic Age"; (7) "Birth and Development of Hinduism"; and (8) "Quest for the Universal One." Activities and handouts accompany the readings. (EH)

Descriptors—Area Studies, *Educational Strategies, Global Approach, Integrated Activities, *Interdisciplinary Approach, Mass Media, *Mass Media Use, *Primary Sources, Resource Materials, Secondary Education, Social Studies, Teaching Methods, *Thematic Approach

This handbook contains lesson plans developed by secondary teachers for working with primary source materials drawn from 20th century novels and motion pictures. Readers are encouraged to adapt these materials to fit their own teaching. Lessons are developed around: (1) "The Jungle," (Upton Sinclair); (2) "Gandhi" (film); (3) "All Quiet on the Western Front" (Erik Remarque and film); (4) "The Grapes of Wrath" (John Steinbeck); (5) "The Mortal Storm" (1940), "Tender Comrade" (1943), and "The Best Years of Our Lives" (1946) to study history through film; (6) "The North Star" (1943), a film to explore film as a reflection of society or affected by society; and (7) "Ben Hur" (1959) as a film to supplement the study of the Roman Empire and the rise of Christianity. Suggestions for activities and evaluations are included. Appendixes contain many supplemental materials. (EH)

History Workshop: Reconstructing the Past with Elementary Students.

Report No.—ISBN-0-435-08900-5

Pub Date—93

Note—151p.

Available from—Heinemann, a Division of Reed Elsevier Inc., 361 Hanover Street, Portsmouth, NH 03801-3912.

Pub Type—Books (010)

Document Not Available from EDRS.

Descriptors—*Active Learning, Discovery Learning, Elementary Education, *History Instruction, *Interdisciplinary Approach, Oral History, *Social Studies, Student Participation, Whole Language Approach, Writing Across the Curriculum

This book details the studio setting of a history workshop in which learners discuss the meaning of artifacts, oral history transcriptions, historical photographs, and other firsthand sources from the past. Teachers facilitate interactions among children and play the role of elders, guiding younger learners as they explore a variety of historical writings. The parallels between the history process and the reading/writing/thinking process are examined with outlines of what are believed to be essential elements of an effective history workshop. The book contains three parts. Part 1 is "Learning History as a Process." Part 2 details "The History Workshop." Part 3 examines "Children Reconstructing the Past: Case Studies." A pictorial bibliography is included. (EH)

This paper is of the opinion that multicultural education and citizenship education must resolve the tensions within as well as between them and work closer together, merge if possible, for the good of society. The paper contends this can be accomplished if both movements would commit to an overarching goal that clearly is to the benefit of all people in society. The paper addresses: (1) tensions within multicultural education; (2) tensions within citizenship education; (3) tensions between multicultural education and citizenship education; and (4) the solution: going beyond diversity to community building. Contains 13 references. (EH)

Identifiers—*Central America

This lesson is a series of activities and multi-media presentations designed to enable students to understand the historic and geographic roots of some of the problems that Central American nations have faced. Geography, history, writing, and storytelling are used as ways of understanding a multicultural world. Creative thinking and participation in decision-making processes are interactive strategies used in the lessons. A regional approach is used to examine the circumstances that make each nation different from their neighbors. Part of the study is set in the mid-to late-1980s, a time of especially intense turmoil that was of great concern to the foreign policy makers in the United States. Students are encouraged to examine and compare this time to the present through current events and research. (EH)

Identifiers—Paraguay, Peace Corps, South America, World Wise Schools

This guide offers a closer look at Paraguay as a landlocked republic in the heart of South America. The activities emphasize the interaction between the people and their land and pertain to three academic levels. Activities for grades 3-5 include: (1) "Packing for Paraguay"; (2) "Where in the World Are We Going and How in the World Will We Get There?"; (3) "Now Boarding for Departure"; (4) "Getting There is Half the Fun"; (5) "Sights Along the Way: A Field Guide to Wildlife in Paraguay"; (6) "A Day in the Life"; and (7) "Aieluysa" Activities for grades 6-9 include: (1) "Destination: Paraguay"; (2) "Testing the Waters"; (3) "Paraguay's Blending of Cultures"; (4) "Agriculture in Paraguay"; (5) "School Life in Paraguay"; and (6) "Source of Power." Activities for grades 10-12 include: (1) "Land of the Rivers"; (2) "Viewing the Video"; (3) "Nueva Minneapolis"; (4) "Deforestation in Paraguay"; (5) "Compulsory Democracy"; and (6) "Tales of the Chaco." The six basic themes of geography serve as the essential organizing structure of the units. Each activity is coded by number to the geography standards to which it best relates and is presented in five sections: (1) focus; (2) resources; (3) background; (4) activities; and (5) extension. Activities can be adapted for the needs and interests of different students. (EH)

Descriptors—Cultural Education, Education Courses, Elementary Education, Higher Education, *Preservice Teacher Education, *Social Sciences, *Social Studies, *Teacher Education, *Teacher Education Curriculum, Teaching Methods, Units of Study

This text is based upon three assumptions: (1) the reader has completed a professional sequence of the teacher preparation program with a general background in the academic disciplines such as history, sociology, and anthropology, that serve as a foundation for elementary social studies; (2) the reader is scheduled for only a one-semester, one-to-three-credit course in teaching social studies, or a core methods course in which social studies instruction is integrated; and (3) other courses in the teacher preparation program expose the reader to learning theory, curriculum planning, teaching concepts, generalizations, and instructional technology. The book limits the scope of the work to topics that are basic, specific, and yet critical to teaching the social studies in the elementary years, K-8. Chapters in this edition include: (1) "The Elementary Social Studies Curriculum"; (2) "Planning for Social Studies Instruction"; (3) "Instructional Strategies"; (4) "Social Studies in the Primary Grades"; (5) "Social Studies in the Fourth through Eighth Grades"; (6) "Elementary Citizenship Education"; (7) "Culture Learning"; (8) "Language Learning in the Social

Studies"; (9) "Teaching Social Studies Skills: Time, Space, Technologies"; and (10) "Assessing and Evaluating Children's Progress in the Social Studies." (EH)

Identifiers—*Holocaust

This guide helps secondary students to understand the role of the rescuers of the Jews during the Holocaust. The rescuers included atheists, government bureaucrats, German soldiers, antisemites, devout Christians, and even German collaborators. The focus is on how people, both good and bad, react in times of stress and of the moral choices all people may have to face in their lives. The essays include: (1) "Using This Guide: A Word to Teachers about Classroom Approaches to Teaching about the Rescuers" (Allan H. Scholl); (2) "Who Are the 'Righteous among the Nations'?" (Joel S. Fishman); (3) "The Significance of Yad Vashem's 'Righteous Program' (honoring non-Jews who risked their lives to save Jews) (Mordecai Paldiel); (4) "The Process of Commemorating Deeds of Heroism" (Alex Grobman); (5) "The Impact of the Holocaust upon a Christian" (Harry James Cargas and Joel Fishman); (6) "Righteous among the Nations: A Tool for Teaching Moral Development" (Efraim Zuroff); (7) "Sempo Sugihara, Who Dared to Save Lives" (Mordecai Paldiel); (8) "Keeping the Rescuers in Historical Perspective" (Alex Grobman); and (9) "New Insights on Holocaust Survivors and Their Helpers" (Dienke Hondius). Contains a selected bibliography. (EH)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Art, *Art Criticism, Art Education, Art History, Elementary Secondary Education, *Whole Language Approach

For centuries societies have understood the importance of art in relationship to other disciplines. Many great artists were also writers and poets. Many artists were well educated in classical literature from which they drew inspiration for paintings and sculptures. The document argues that the obvious meeting place for the two disciplines of art and language is the field of art criticism. Here students may combine art and whole language skills. In four sections this document: (1) reviews the tenets of whole language philosophy; (2) argues that art is a whole language that holds the same tenets as whole language; (3) explains art criticism as a system or model for talking about art in a whole language way; and (4) provides an exercise in art criticism. The document contains brief models of art criticism, a list of resources, and seven references. (MM)

This 1980 bibliography is designed to assist students of paper conservation by supplying a cross-section of conservation literature. The litera-

ture includes subject-matter information and data concerning the authors of that information. Accessibility of the literature has been considered with obscure sources and foreign language sources scanted. Paper conservation materials are rated: (A) indicates required reading for basic knowledge of materials and methods of conservation; (B) indicates more advanced and, or more detailed or controversial information; and (C) designates reference books. The resources are organized under 16 sections. A concluding section gives a "Bibliography for Individuals Interested in the Conservation of Photographs," with resources rated as (A), advanced, or (G), general information. (MM)

Identifiers—China, *Chinese Art, Tang Dynasty
Brushwork is the essential characteristic of Chinese painting. Ink and brushwork provide the foundation of Chinese pictures, even when color also is used. In the quality of the brushwork the artist captures the spirit resonance, the *raison d'être* of a painting. In China, painting and writing developed hand in hand, sharing the same tools and techniques. This teacher's packet includes a brief history of the development of Chinese calligraphy, a discussion of the tools of writing and painting, and the development of Chinese painting since the Tang Dynasty. Charts and illustrations demonstrate: "Linear Techniques for Figure Painting"; "Basic Vocabulary of Strokes"; "Texture Strokes in Landscapes"; "A Vocabulary of Dots"; "Script Evolution in China"; and a timeline "Chronology of China." The packet also contains 20 slides, a "Slide List"; "Slide Descriptions"; and a "Brushstrokes Bibliography." (MM)

Descriptors—Ancient History, Archaeology, Area Studies, Art, Art Education, *Art History, Asian History, *Chinese Culture, Elementary Secondary Education, Foreign Countries, Non Western Civilization

Identifiers—Ancestor Worship, Armor, China, *Chinese Art, Costume History, *Tomb Art
Tomb art provides an invaluable window into China's history and culture. The understanding that spirits of dead ancestors can exert power and influence over the lives of their descendants has been a central tenet of the Chinese belief system, propelling the culture into practices ensuring the provision of comfort and status to the deceased in their afterlife, as well as respectful preservation of their burial places. This packet contains materials based on a museum exhibition of tomb art from ancient Xi'an.

a major center of power for most of an 1800-year period, beginning with the founding of the Zhou Dynasty in 1100 B.C. It focuses on life and death in the capital of Imperial China to the end of its classical period with the fall of the Tang Dynasty in A.D. 906. Materials include historic background of Chinese culture through the Qin, Han, and Sui, and Tang Dynasties based on archaeological tomb findings. A pronunciation guide, illustrations of tomb figures in various costumes, maps, a timeline of Chinese history, and a poster of "Chinese Warriors to Arm and Color" also are provided. The slide list introduces 20 provided slides that are featured in the "Slide Descriptions" and "Slide Script." A bibliography completes the packet. (MM)

Identifiers—Mandala, *Visual Thinking

Based on the premise that the primary ways individuals make sense of the world is through observation, analysis, imagination, and feeling, this work suggests that through the use of graphics, students can experience these functions as they interact with reading and writing activities. Graphics encourage students to read more closely, make visual connections, and respond holistically and analytically to what they read. The book is a practical guide with specific activities for engaging students through use of graphic maps and mandalas. Concepts supporting the assignments are appropriate to students at all levels. The text is organized into seven chapters in three parts. Part 1, "The Foundations of Graphic Thinking," includes chapters: (1) "The Mandala: The Word and the Symbol"; and (2) "The Graphic Map." Part 2, "Process and Product: When, Why, and How," contains chapters: (3) "Getting Started"; (4) "Graphics and the Study of Literature"; and (5) "Extended Applications." Part 3, "Analysis and Synthesis: Character, Style, and Concept," includes (6) "Literary Character Graphics"; and (7) "Making Connections." The book concludes with an afterword, "Balancing the Curriculum." (MM)

The Powers of the Feminine. Sacred Images of India and Southeast Asia. Teacher's Packet.

Asian Art Museum of San Francisco, CA.

Pub Date—90

Note—64p.

Available from—Asian Art Museum of San Francisco, Golden Gate Park, San Francisco, CA 94118 (\$25 includes 20 slides).

Pub Type—Non-Print Media (100) — Guides - Classroom - Learner (051) — Guides - Classroom - Teacher (052)

Document Not Available from EDRS.

Descriptors—Area Studies, Art, Art Education, *Art History, Elementary Secondary Education, *Females, Foreign Countries, Non Western Civilization, Painting (Visual Arts), *Religion Studies, Sculpture, Visual Arts

Identifiers—Asia (Southeast), Buddhist Art, Fertility Cults, Goddess (Concept), Hindu Art, India, Indian Art, Religious Art, *Southeast Asian Art

Sacred women have been portrayed throughout the history of India and Southeast Asia. Some were depicted as consorts to the Hindu gods and regarded as the necessary force that activates male energy. Other images arose out of local fertility cults and represented uncontrolled feminine energy that could be terrifying in aspect. The calmer Buddhist female was first seen as a participant in the life of the Buddha and then as goddess or consort to Buddhas and Bodhisattvas. The diversity of sculptures of females in the Asian Art Museum collection reveal regional preferences in goddess worship and in the ways women have been depicted. This packet provides resources for presenting these images. It includes the booklet, "Women Auspicious and Divine

Images of Southeast Asia and India," which discusses regional cult images, Hindu goddesses, and Buddhist representations. The "Slide List" and "Slide Descriptions" introduce the 20 provided slides. The packet includes maps of India and Southeast Asia; a time line; line-drawn goddess figure illustrations; "Symbols or Attributes of the Gods"; "Symbolism of Some of the Weapons of the Goddess" with written descriptions; and a "Mandana Floor Painting" classroom activity. A "Vocabulary List" and "Bibliography" complete the packet. (MM)

Descriptors—Art, Attitudes, *Display Aids, *Display Systems, *Educational Environment, Elementary Education, *Exhibits, Social Studies, Visual Learning, Visual Stimuli

Practical technical information and procedures for display are given in this book. An implicit theme recognizes school environments as distinct socio-cultural contexts in which children learn and develop. This environment should provide comfortable private and public places that recognize the complex social needs of students and teachers. Patterns of interaction through display and environment may provide incentive for students and teachers to engage in a variety of symbolic languages as a means of exploring and expressing understandings of the world. The values, beliefs, and goals of the educators are conveyed to students through environmental setting. The chapters are: (1) A Pressing Need: Why Display and Environment for Learning Matter; (2) Displays and the Art of Displaying; (3) Resources for Display; (4) Developing a Curriculum-Based Display Project; and (5) Creating Displays—the Ways and the Means. The book includes illustrations, diagrams, instructions, and suggestions for constructing display areas, presenting displays, and exhibiting children's projects. (MM)

Identifiers—Benin, Chinese Art, Grave Markers, *Memorials

Throughout history, in all parts of the world, people have struggled with the problem of loss. Moving words have been written and beautiful objects created to preserve the memory of people and their achievements. This theme issue explores the different ways that people have been praised and remembered in works of art. An introduction suggests a variety of memorial types and discusses aspects of durability and selectivity. Four memorials are presented: (1) "A Memorial to a King: Head of an Oba"; (2) "A Memorial to a Soldier: 'Painting No 47, Berlin'" (Marsden Hartley); (3) "A Memorial to an Athlete: 'Ritual Road Serving Vessel'" (Jing Gui); and (4) "A Memorial to a Family Member: 'Adams Memorial'" (Augustus Saint-Gaudens). A lesson plan section gives suggested activities that correlate with the memorials described. A student worksheet and take home page in English and Spanish are given. The issue concludes with a list of resources. (MM)

This packet, written for teachers of sixth-grade art and language arts courses, is designed to inspire creative expression in words and images through an appreciation for Japanese art. The selection of paintings presented are from the Freer Gallery of Art, Smithsonian Institution. The interdisciplinary approach, combines art and language arts. Lessons may be presented independently or together as a unit. Six images of art are provided as prints, slides, and in black and white photographic reproductions. Handouts for student use and a teacher's lesson guide also are included. Lessons begin with an anticipatory set designed to help students begin thinking about issues that will be discussed. A motivational activity, a development section, closure, and follow-up activities are given for each lesson. Background information is provided at the end of each lesson. The three lessons are: (1) "Learning from Paintings: Is a Picture Worth a Thousand Words?"; (2) "Making Paintings: Pictures and Writing"; and (3) "Reading Paintings: Painting Stories." Lists of recommended books and resources conclude the materials. (MM)

Descriptors—Children's Literature, Dance, Elementary Education, Fine Arts, *Integrated Activities, Interdisciplinary Approach, Literature Appreciation, Melody, *Music, *Music Activities, Musical Composition, Musical Instruments, Music Appreciation, *Music Education, Poetry, Rhythm (Music), *Social Studies, Songs

Identifiers—Folk Music, Sonatas

This book integrates music education with literature and social studies. Lessons are based on children's books. Some suggested books include illustrated folk songs or explanations of style or form in musical history. Others are inherently musical in the lyricism of the author's words or the rhythm of the text. Each lesson is self contained. The degree of musical aptitude required to teach the lessons varies. The book includes 40 lessons, representing 40 books, organized into six sections: (1) "Rhythm"; (2) "Melody"; (3) "Form and Style"; (4) "Instruments"; (5) "Dances"; and (6) "History." The structure of each lesson is patterned after the musical structure of a sonata movement within a written sonata-allegro form. This structure consists of an exposition, development, recapitulation, and occasionally, coda. The book concludes with a "Song Collections" list, an index, and information about the author. (MM)

Identifiers—*Automobile Design, *California, Festivals

This 1993 study attempts to define the size and scope of state-wide economic activity generated by the arts in California. The analysis is based on data from surveys of nonprofit arts organization and five case studies. The case studies, which provided context for the core research, include examinations of: (1) artists in Los Angeles County; (2) the motion picture and television industry in California; (3) seven California festivals; (4) art and auto design in California; and (5) the manufacturing of musical instruments in California. Survey and case study findings indicate: (1) the economics of the nonprofit arts sector are robust, with \$2.159 billion in economic activity and 115,153 jobs in 1993. (2) Los Angeles County artists are deeply involved in the community and arts as volunteers, contributors to charity, and participants in commercial and nonprofit art worlds, and have average incomes of \$38,000 a year. (3) The motion picture and television industry employs a core staff of 50,000 Californians with average salaries of \$80,000 in 1992. (4) Cultural tourism is a growth industry for the state with festivals being a strong attraction for tourism. For example, the Half Moon Bay Main Street Beautification Committee spent \$70,000 on their Art and Pumpkin Festival and generated \$10.5 million including \$79,815 in local sales tax. (5) Art and auto design produces \$47 million in business revenues and employs more than 400 people. (6) The manufacturing of musical instruments results in \$75 million in wages and salaries by the \$500 million industry. The arts are found to be a significant basis of California's economic strength. The report includes an "Executive Summary," charts, statistical tables, sample surveys, and acknowledgements. (MM)

struments in California. Survey and case study findings indicate: (1) the economics of the nonprofit arts sector are robust, with \$2.159 billion in economic activity and 115,153 jobs in 1993. (2) Los Angeles County artists are deeply involved in the community and arts as volunteers, contributors to charity, and participants in commercial and nonprofit art worlds, and have average incomes of \$38,000 a year. (3) The motion picture and television industry employs a core staff of 50,000 Californians with average salaries of \$80,000 in 1992. (4) Cultural tourism is a growth industry for the state with festivals being a strong attraction for tourism. For example, the Half Moon Bay Main Street Beautification Committee spent \$70,000 on their Art and Pumpkin Festival and generated \$10.5 million including \$79,815 in local sales tax. (5) Art and auto design produces \$47 million in business revenues and employs more than 400 people. (6) The manufacturing of musical instruments results in \$75 million in wages and salaries by the \$500 million industry. The arts are found to be a significant basis of California's economic strength. The report includes an "Executive Summary," charts, statistical tables, sample surveys, and acknowledgements. (MM)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Academic Achievement, *Achievement Tests, Competence, *Educational Change, Educational Improvement, Educational Quality, *Educational Testing, Elementary Secondary Education, *Geography, Geography Instruction, Grade 4, Grade 8, Grade 12, Social Studies, *Student Evaluation

Identifiers—*National Assessment of Educational Progress

This publication briefly describes the 1994 National Assessment of Educational Progress (NAEP) assessment in geography. In early 1994, about 19,000 students in grades 4, 8, and 12 across the nation participated. This was the first comprehensive geography assessment by NAEP and will provide baseline data to measure future progress. Sample questions from the 1994 assessment are included. NAEP geography scores are reported on a scale that ranges from 0-500. Results are reported according to geography achievement levels—basic, proficient, and advanced. The NAEP assessment includes: (1) a mixture of 228 multiple-choice items; 80 short constructed response items; and 30 extended constructed-response tasks across grades 4, 8, and 12; (2) performance tasks that require students to demonstrate geographic skills; (3) analytical tasks in which students are asked to construct geographic representations such as maps, charts, and diagrams; and (4) balanced and comprehensive coverage of topics that are engaging and relevant to students' experiences and world concerns. Charts and figures accompany the text. (EH)

tary Secondary Education, Foreign Countries, Foreign Students, Higher Education, Intellectual Disciplines, *Multicultural Education, Nursery Schools, Preschool Education, Preservice Teacher Education, Social Change, Social Interaction, Teacher Attitudes
Identifiers—Europe, *Italy

This paper describes intercultural education in Italian elementary through secondary schools, examines intercultural education in teacher education programs, and raises disciplinary questions about the multicultural approaches now favored in Europe. A discussion of multicultural society and intercultural education touches on increases in foreign students in Italian schools, teacher fears and sense of inadequacy facing these students' needs, historical trends, and changing social awareness. A section on nursery school discusses the rights of foreigners, the goals of intercultural education at this level, and relevant fields of application and competence in intercultural education. A section on the elementary level notes that democratic coexistence and the learning of a second language are emphasized. The section on the middle school describes the accepted aims of this level and explores problems in making known presumed areas of common values across many cultures. The section on secondary education describes official positions of three different agencies on the focus of intercultural education at this level. The section on teacher formation briefly describes programs at several universities. This leads to a discussion of the disciplinary status of interculturalism and whether it is its own discipline or an approach that should permeate all scholastic and university teaching. Descriptors—College School Cooperation, Educational Change, Educational Improvement, Educational Research, Educational Trends, Elementary Secondary Education, Higher Education, *Inservice Teacher Education, *Institutional Characteristics, National Surveys, *Partnerships in Education, Preschool Education, *Preservice Teacher Education, *Professional Development Schools, Program Content, School Restructuring. Profiles of 66 partnerships that have developed and implemented professional development school (PDS) programs at 301 preK-12 schools are included in this directory. The profiles include information, which was collected during a national survey, on the following program features: school, college, and teachers union partners; level of faculty participation; use of computer technology; sources of funding; program start date; number of schools and their grade levels, collaborative activity, including research; diversity issues; and program activities for preservice, beginning, and inservice teachers. Each profile includes contact information for the overall program and the individual schools. Survey data are summarized and presented in table and graphical formats. Findings from the survey reported in this directory, when compared to findings from an earlier survey, indicate a dramatic increase in the number of PDSs nationwide. The appendices include the survey instrument, a bibliography featuring literature about the profiled schools and partnerships, and information on the activities and products of the Clinical Schools Clearinghouse, which produced the directory. This report summarizes the deliberations, findings, and recommendations of the National Commission on Adolescent Sexual Health. The report defines the characteristics of a sexually healthy adolescent, provides a foundation for understanding the three developmental stages of adolescents (early, middle, and late adolescence), and offers recommendations for policymakers, parents, educators, health professionals, and the media. A statement reflecting the consensus of the commission is included, with a list of national organizations that have endorsed the statement. The background of the consensus statement discusses adolescent development, characteristics of a sexually healthy adolescent, adolescent sexual behavior in the 1990s, and the adult role in promoting adolescent sexual health. Recommendations for policymakers include: (1) recognize that sexual development is an essential part of adolescence and develop public policies consistent with research about adolescent development, adolescent sexuality, and program effectiveness; (2) support parents and families as integral members of efforts to improve adolescent sexual health; (3) support comprehensive sexuality education, which includes human development, relationships, personal skills, sexual behavior, sexual health, and sexuality and culture; (4) provide a full range of confidential sexual and reproductive health services tailored for adolescents and encourage cultural messages that support sexual health and responsible sexual relationships; (5) support research on adolescent sexuality and provide funding for coordinated and integrated adolescent programs; (6) respond to the diverse sexual health needs of adolescents, including the disenfranchised, disabled, and gay and lesbian adolescents; (7) involve youth in program planning and implementation; and (8) value and respect adolescents. Additional readings and biographical sketches of the commissioners are included. (Contains 43 references.) (ND)

Descriptors—*Administrator Attitudes, Elementary Education, Elementary Schools, Elementary School Teachers, Middle Schools, *Principals, *Science Education, *Science Teachers, *Teacher Attitudes, Teacher Background.

Identifiers—Alabama, *Teacher Principal Relationship.

The purposes of this pilot study were to determine if elementary and middle school teachers and principals have similar perceptions of science education, and to compare the teachers' perceptions of science education with their perceptions of the principals' enthusiasm for the teaching of science. The study used three elementary and two middle schools in southwest Alabama. There were 90 elementary and 51 middle school teachers in the study, and 5 elementary and 2 middle school administrators. The

survey consisted of questions to ascertain demographic data, the number of science/science education courses taken at the undergraduate and graduate level, and to compare teachers' perception of the importance of teaching science and administrators' views on the importance of teaching science. The findings of the study indicated that the vast majority of elementary school teachers believe that teaching science is important or very important in the curriculum. They also perceive their principals' view of science as important or very important in the curriculum. This is consistent with the principals' own perception of science, indicating that good communication exists between administrators and their faculty concerning science education. Middle school teachers view science more highly than their elementary counterparts, while their perceptions of the principals' enthusiasm for science is somewhat lower. The middle school principals viewed their enthusiasm for science as very important. Data indicated that elementary school teachers spend about 50 minutes per day in science instruction and that middle school science teachers spend approximately 25 hours per week in science instruction. Great Expectations: Preparing Rural Teachers for Educational Reform.

Northwest Regional Educational Lab., Portland, Oreg.

Spons Agency—Office of Educational Research and Improvement (ED), Washington, DC.

Pub Date—30 Sep 95

Contract—RP91002001

Note—65p.

Available from—Northwest Regional Educational Laboratory, 101 S.W. Main Street, Suite 500, Portland, OR 97204.

Pub Type—Reports—Descriptive (141)

EDRS Price—MF01/PC03 Plus Postage.

Descriptors—*Beginning Teachers, Career Planning, College School Cooperation, Educational Change, *Educational Environment, Elementary Secondary Education, *Faculty Development, Higher Education, Inservice Teacher Education, Models, *Preservice Teacher Education, *Rural Education, *Rural Schools, School Community Relationship, Standards, Student Teacher Supervisors, Teacher Exchange Programs, Teacher Supervision.

This report describes issues relating to rural teacher preparation and inservice opportunities. Among these issues are: the need to prepare teachers for the rural education experience; the characteristics of success to be developed by teachers in rural settings; programs and strategies to engender those characteristics; and the considerable obstacles to be overcome by those whose mission is teacher preparation. The report begins by exploring the number and nature of rural schools in the U. S. Northwest and how recent educational reform initiatives have affected these schools. The role of the rural teacher in carrying out reform initiatives is then discussed, particularly in light of expectations held for teacher performance. Next, how teacher preparation programs develop educators for these expectations is examined. Finally, an ideal rural teacher development program is conceptualized to emphasize the need for additional support for training rural teachers to acquire the skills and knowledge they need to engage in ongoing school improvement. Recommendations are given in the areas of technology, exchange teachers and professors, university/school partnership, preservice preparation of rural teachers, inservice and professional development for rural teachers, career ladders, community/school partnerships, teaching contracts, and local student-teacher supervisors. "Model Standards for Beginning Teacher Licensing and Development, Interstate New Teacher Assessment and Support Consortium (INTASC)" is appended. (Contains 72 references.) (ND)

Faska, Daniel, Jr.

Critical Thinking and Moral Reasoning: Can You Have One without the Other?

Pub Date—Nov 94

Note—17p. Paper presented at the Annual Meeting of the Mid-South Educational Research Association (Nashville, TN, November 8-11, 1994).

Pub Type—Speeches/Meeting Papers (150)—Information Analyses (070)

EDRS Price—MF01/PC01 Plus Postage.

Descriptors—*Creative Thinking, *Critical Thinking, *Curriculum Design, Elementary Secondary Education, *Ethics, Higher Education, Literature Reviews, *Moral Development, *Thinking Skills Identifiers—*Moral Education, *Moral Reasoning

Much research has been done on critical thinking and on moral reasoning, but little has been conducted or reported on the relationship between the two. Since these two abilities are of current concern at all levels of education and since students are supposed to develop the ability to think analytically and behave ethically, it seems that some determination should be made as to if and/or how these two abilities are related. Some researchers have attempted to integrate creative thinking skills with moral reasoning skills and have found them generally to be related. In considering the importance of both critical thinking and moral reasoning, several researchers have recommended that children can learn that ethical acts must have reasons. They have suggested a method called "Ethical Inquiry" to facilitate this learning and relationship. In a sense, it has been pointed out, "ethical reasoning" is logically valid moral reasoning. If moral education is considered character education and reasoning or cognition an important aspect of this process, then issues of character may also be issues of cognition. Implications for curriculum design and research are noted, including several curriculum models reported in the literature. (Contains 21 references.) (Author/ND)

What Type of Motivation Is Truly Related to School Achievement? A Look at 1428 High-School Students.

Pub Date—Apr 95

Note—20p; Paper presented at the Annual Meeting of the American Educational Research Association (San Francisco, CA, April 18-22, 1995).

Pub Type—Reports—Research (143)—Speeches/Meeting Papers (150)

Descriptors—*Academic Achievement, Academic Aspiration, Foreign Countries, *Grade Point Average, *Grade Prediction, High School Students, Junior High School Students, Learning Motivation, Secondary Education, Self-Motivation, *Student Attitudes, Student Characteristics, *Student Motivation

Identifiers—Quebec (Montreal)

This paper reports on research to examine the types of motivation related to school achievement. A total of 1428 students from an inner city high school in the Montreal (Quebec) area participated in the study, 714 males and 714 females. The students ranged in age from 12 to 18, and approximately 40 percent were minorities (Hispanic, Asian, Black). The study used the "Academic Motivation Scale" (AMS), a measure of motivation toward education based on self-determination theory. "Amotivation" indicates that no link between actions and the ensuing outcomes is perceived; "intrinsic motivation" refers to being engaged in an activity for itself and for the pleasure and satisfaction derived from participation; "extrinsic motivation" pertains to behavior in which the goals of actions extend beyond those inherent to the activity itself. The results of the study demonstrated that academic motivation is significantly related to grade point average (GPA), and that motivation does not occur under the same conditions for boys and girls or for junior-high and senior-high students. Amotivation appeared to be a better predictor of school achievement for girls and junior-high students, while intrinsic motivation seemed to foretell school achievement for boys and senior high students. These data revealed that the relationship between GPA and motivation emerged differently for boys and girls, as for younger and older students. The data also indicated that amotivation was the type of motivation most significantly related to GPA for both boys and girls, across all levels of secondary schooling. The findings suggested that development of self-determined motivation in adolescent boys and girls should be an important goal for educators, and that further study of amotivation could lead to better understanding of adolescent academic motivation and perhaps help to identify at-risk students. Descriptors—*Classroom Techniques, *Cultural Pluralism, *Curriculum Development, *Educational Change, Educational Objectives, Elementary Secondary Education, *Multicultural Education, Opinion Papers, Parent Participation, State Departments of Education, State Programs, *Statewide Planning

Identifiers—*Diversity (Student), *Kentucky

This position paper suggests ways in which the practice of multiculturalism in teaching could be enhanced within the context of Kentucky's school reform. The Kentucky Education Reform Plan advocated high educational goals for students; developed an accountability system that rewarded schools which improved the success of students and intervened in schools that did not; provided for school councils composed of educators, parents, and teachers who made decisions on curriculum, instruction, and school management; increased funding for professional development and technology; established early childhood education programs to help students at risk become better prepared for school; and made changes in structure to reduce politicization of education in many school districts and to correct the financial disparity between wealthier and poorer school districts. The Kentucky Revised Statutes and six learning goals and their implications for multicultural education are summarized. The goals are: (1) basic communication and mathematical skills; (2) core concepts and principles pertaining to science, mathematics, social studies, arts and humanities, practical living skills, vocational studies, and cultural heritage; (3) self-sufficiency, adaptability and flexibility, self-control and discipline, ethical values, and independent learning; (4) responsible group membership and teamwork; (5) critical thinking and problem solving; and (6) knowledge integration. Pertinent literature on multicultural education is reviewed, looking at the philosophical basis for multicultural education, guidelines for developing multicultural curricula, parental and family involvement, and classroom techniques. Finally, the proposed multicultural education plan is outlined. (ND)

Descriptors—*Classroom Observation Techniques, *Cooperating Teachers, Elementary Secondary Education, Feedback, *Field Experience Programs, Higher Education, Preservice Teacher Education, *Student Teacher Supervisors, *Student Teaching, *Teacher Supervision, Theory Practice Relationship

Field experience has long been considered a valuable component to the professional development of prospective teachers. This paper describes a program to determine whether consistent training and support of the participants in supervised field experiences would impact the overall achievement of prospective teachers and increase each participant's satisfaction with the experience. The program was implemented at 2 universities over a 2-year period, with approximately 30 elementary and secondary student teachers and their cooperating teachers, and 5 university supervisors. Training topics address three main areas: goals and expectations of the teacher education program, roles and responsibilities of each participant, and critical aspects of supervision (conferences, observation strategies, and feedback). Cooperating teachers and university supervisors conducted weekly "formal" observations of their assigned preservice teachers, and student teachers conducted peer observations. Study results indicated increased involvement among all participants: university supervisors made more frequent contacts with cooperating teachers, addressing issues and problems as well as discussing the progress of student teachers; cooperating teachers felt less isolated; and student teachers experienced less anxiety in observations. The outcomes of the supervi-

sion process—the feedback—seemed to be enhanced. Findings of the study suggested that it is possible to prepare field-based participants for an experience that encourages taking supervised instructional risks, communicates realistic expectations, and provides developmentally appropriate feedback. Identifiers—Cummings (James), *Diversity (Student), *Student Empowerment

This paper focuses on Frontier High School, a new school designed as an alternative to more traditional schools in its district. While the school is still clarifying its structure and philosophy, it is committed to "honoring diversity," defined in such terms as race/ethnicity, sexual orientation, socioeconomic status, alternative lifestyles, and so on. The paper examines how the school's structure, curriculum, and dominant pedagogies emphasize the value of understanding and respecting multiple points of view, with a focus on student empowerment. The analysis shows that students empowered by their school experiences develop the ability, confidence, and motivation to succeed academically. The analysis draws on interviews conducted with a cross-section of one-third of the school's students (representative in terms of gender, grade, and ethnicity); the resulting data are linked with observations from classrooms and faculty meetings as well as policy statements developed by the school. The paper looks at definitions of student empowerment and how Frontier High School promotes empowerment (as knowledge, as appreciating multiple points of view, and as a social phenomenon). Data are summarized into six general findings: (1) empowerment is not an add-on to the school structure; it has been integrated throughout various aspects of school life; (2) Frontier High did not attempt to achieve student empowerment through a single means; (3) what constitutes empowerment and how it will be achieved is jointly defined by all community members, not just teachers and administrators; (4) in addition to giving students power and responsibility, faculty explicitly seek to help students think about how they would use their power; (5) empowerment is both a means to an end and an end in and of itself; and (6) empowerment is hard. Identifiers—Recruiting Trends Survey
This publication reports on a study of 294 elementary and secondary school systems throughout the United States employing new teacher education graduates. Among the school districts reporting hires for 1994-95 and anticipated hires for 1995-96, job prospects for new education graduates were expected to increase by only 3.2 percent. School districts reported an ample supply of new elementary

education graduates for filling available positions, though some school districts reported shortages at the middle and high school levels. Among the hardest positions to fill were: special education, reading, mathematics, science, vocational/technical, foreign language, and music teachers; guidance counselors; speech, physical, and occupational therapists; bilingual teachers; librarians/media specialists; and teachers for the talented and gifted. Retirements among current teaching staff will influence the new teacher job market. Forty-four percent of new professional staff hired by surveyed school districts were beginning teachers with no prior full-time experience. Minority representation was reported as one of the most important criteria for selecting new staff, though minority teachers and administrators were almost impossible to find and hire. Most school districts responding to this survey did not have a minimal acceptable grade point average for new teachers. Among factors other than grades, school district recruiters considered interpersonal skills, attitude, enthusiasm, knowledge of subject matter, prior teaching experience, references, and personality. Southwestern, southeastern, and southern regions of the United States offered the most job opportunities for new teaching graduates. The average starting salary for new teachers with bachelor's degrees was \$22,689; starting salaries for new teachers with master's degrees averaged \$25,502. (ND)

Wood, Deborah N.

Teacher Credential Candidates' Perceptions of the Need for Preservice Training in Comprehensive Health Education.

Pub Date—Oct 95

Note—Sp.; Paper presented at the Annual Meeting of the American School Health Association (Milwaukee, WI, October 25-29, 1995).

Pub Type—Reports - Descriptive (141) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Comprehensive School Health Education, Elementary School Teachers, Elementary Secondary Education, *Health Promotion, Higher Education, *Knowledge Base for Teaching, *Preservice Teacher Education, Secondary School Teachers, *Teacher Attitudes, Teacher Education Curriculum

Identifiers—*Preservice Teachers

Teachers carry out a variety of responsibilities in comprehensive school health, including health instruction and identification of students who may be experiencing health problems. Teacher education is considered a major factor in the effective implementation of comprehensive school health. A study was conducted, therefore, to investigate preservice teachers' opinions regarding the need for preparation in health education and the desired characteristics of such training. The study also explored whether prospective teachers' ideas about preservice health education were related to the grade level they expected to teach or their prior school experiences. Study participants included 110 California teacher credential candidates who rated the importance of 35 school health topics in preservice teacher training, grouped into 5 general categories: (1) health content; (2) promoting wellness; (3) teaching strategies; (4) identifying and managing student health problems; and (5) healthy school environment. Results indicated that 53 of the 55 topics were judged "important" or "essential" to preservice training. Prospective elementary/middle school teachers rated training in health content knowledge, teaching strategies, and identifying and managing student health problems significantly more important to their preparation than did prospective high school teachers; no significant differences were found between the two groups in the perceived importance of promoting wellness and healthy school environment. Study results indicated that credential candidates believe training in health education at the preservice level can help prepare them to assume more health-related responsibilities such as HIV/AIDS instruction, violence prevention, and conflict resolution. A table provides a list of topics that are included in the five areas of comprehensive health education. (ND)

Identifiers—Teacher Principal Relationship

This publication is designed to show principals how to improve staff development strategies. It begins by laying the foundations for teacher development. The first chapter explains what is known about teaching and identifies four general groups of teachers: productive teachers, who are highly motivated and skilled; novice teachers, who are still mastering the basic skills of teaching; marginal teachers, experienced teachers, who still demonstrate serious deficiencies; and passive teachers, who are competent but unmotivated. The second chapter explains the kind of work environment that all teachers and principals should have, termed a "learning community" in which growth and development flourish in a collaborative culture. Chapter 3 explains how to organize that learning community for individualizing developmental services. However, rather than prescribing one set of structures for all schools, the chapter explains the basic principles needed and presents a process that can be used in developing homegrown structures. Chapters 4, 5, 6, and 7 explain how principals can foster the development of the four groups of teachers identified. Each of these chapters begins by describing the characteristics and needs of the group considered, then explains what services are needed and how they can best be provided. Chapter 8 focuses on the nonteaching professional staff—the nurses, librarians, counselors, social workers, and classified staff. The final chapter discusses ways principals can develop the support resources needed to accomplish the goals identified. (Contains 74 references.) (ND)

Identifiers—Ohio

This study investigated attitudes concerning inclusive education among teachers and building administrators (principals and vice principals) in Ohio. Sixteen grants were awarded to educators in 28 public schools to support their efforts in conceptualizing and implementing inclusive education. Inclusive education was defined as any educational situation in which both students with disabilities and students without disabilities are educated within the same classroom or environment. Building administrators and teachers involved in the grant projects agreed, as a condition of the award, to complete a survey questionnaire, first in the spring of 1994 and then again during the spring of 1995. Findings from the surveys indicated that building administrators and teachers perceived the 10 principles of inclusion addressed in the survey to be critically important and that they believed themselves to be functioning well in relation to these principles, with no significant differences between 1994 and 1995 data. The 10 principles relate to responsibility for student learning regardless of that student's learning rate; com-

munication with inclusive education stakeholders, parents, and colleagues; daily instructional functioning in inclusive settings; appropriate support for inclusive classrooms; an understanding of the inclusion process; and appropriate inservice to implement inclusion. Teachers' Attitudes toward School Based Decision Making.

Pub Date—95

Note—15p.

Pub Type—Reports - Research (143)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Educational Administration, *Educational Innovation, Elementary School Teachers, Elementary Secondary Education, Leadership, *Participative Decision Making, Policy Formation, Predictor Variables, Public Schools, *School Based Management, *School Organization, Secondary School Teachers, Teacher Administrator Relationship, *Teacher Attitudes

Identifiers—Kentucky

Teachers in 12 Kentucky schools were surveyed to determine their attitudes toward school based decision making (SBDM). The 228 subjects included teachers at SBDM schools as well as non-SBDM schools. A Likert scale survey instrument, designed to solicit information specific to the adopted Kentucky SBDM legislation, was administered to teachers in cluster sampled schools in which SBDM had been adopted as well as those in which SBDM had not been adopted. Frequency data were analyzed by Chi square at the .05 probability level. The data indicated that those teachers in SBDM schools tend to report more positive attitudes toward SBDM than those at non-SBDM schools. However, neither group reported negative attitudes toward this management approach. By the fall of 1996 all Kentucky schools must adopt this form of school management. Based on these data, it appears that these teachers will have little resistance to incorporating SBDM as a management approach. (Author/ND)

Identifiers—*Diversity (Student), *Northern Arizona University

In the spring of 1995 Northern Arizona University initiated a pilot program for a new content emphasis for elementary education majors. This new emphasis, "Diversity in Educational Contexts," is designed to prepare teachers to instruct the diverse children they will encounter in their public and private classrooms. The new program addresses effective teaching of ethnic minority children, non-English speaking children, handicapped children, and gifted and talented children, and issues relating to the differential treatment afforded boys and girls in U.S. schools. The program has three components: foundation knowledge, personal interactions with diversity, and professional interactions with diversity. The evaluation of the program looked at three areas: (1) the overall perceptions of persons involved in the content emphasis; (2) suggestions for improving the program; and (3) change among student participants (by virtue of their participation in the program) in the areas of knowledge, skills, and/or dispositions. Data for the evaluation came from student journal entries, tests administered in each content emphasis class, focus group interviews, and questionnaires. The preliminary results of the evaluation suggest that students were

able to transfer the knowledge and skills they learned into classroom situations, and they demonstrated the desire to know more about other cultures and people outside the context of the classroom. Faculty responses indicate that the opportunity to participate in such a diverse curriculum as well as having on-going discussion of their experiences provided students with unique and valuable opportunities to learn and reflect about issues they will face in the classroom. Identifiers—Fort Worth Independent School District TX, *Teacher Collaboration, Texas (Fort Worth)

Teaming incorporates an ever expanding curriculum, without an overlapping of subjects, by a collaboration of teachers and students learning from one discipline to another. Through the teaming approach to teaching, the child gains from the emotional, motivational, and enrichment of interrelationships of different subject teachers. Stimulation for teachers is provided by closer association among colleagues who use varied styles, strategies, and techniques aimed at shared goals and communication. This publication is a guide for team teaching from a program entitled "Nobody Else Outshines Neons" (NEON). The goal of the approach is to share and combine expertise and curriculum objectives to integrate a discipline into interesting and entertaining units, through a mutual set of procedures that are consistent throughout the day, regardless of individual personalities, styles, and disciplines. The publication includes exercises, curriculum suggestions, suggested teaching methods, poems, selections from literature, and other background material on successful team teaching. The "Neon Sam: Student-Parent Assignment Manual" is included. (ND)

Identifiers—Canada, *Diversity (Student)

A major benefit of inclusive education is to give students and staff learning and teaching opportunities that reflect the wide range of contributions by and roles open to people similar to and different from themselves. Inclusion covers all students, including those with behavior problems, lower academic abilities, and health conditions. For inclusion to succeed, schools must think about how students function in each of four general domains: (1) language and literacy; (2) cognitive-conceptual development; (3) psychosocial functioning; and (4) sensory-physical abilities. Several educational methods and curriculum designs to help students in these domains are suggested, including: support systems to deal with behavior problems; structuring models of effective instruction throughout the school; teaching strategies such as guided notes and cooperative educational curricula; a contextual and social approach to teaching rather than an individualized approach; treating students with disabilities like students without disabilities, especially with regard to core subjects such as math and language arts; and the need for high quality teaching methods for all students. Approaches to gifted education are also discussed. While the common view is that gifted students should be taught in inclusive classrooms, the research seems to support gifted students being taught in isolation from other students. Recommendations for developing inclusive education include: increased support and involvement of parents, students, and teachers; planning curriculum change and providing resources for that change; and providing continuous staff development. Discussion also focuses on special needs, techniques for individualizing instruction, guidelines for helping students who work hard but still have difficulties, attending to student differences, self concept, outside factors such as home life and socioeconomic status, intelligence, brain research, and the legal rights of children with special needs. The paper concludes that, though inclusive education can be difficult and does not always work, it can be very rewarding for teachers and beneficial in promoting the personal and educational development of all students. Descriptors—*Career Choice, Classroom Environment, Elementary Secondary Education, Employer Employee Relationship, *Job Satisfaction, Public School Teachers, Questionnaires, *Teacher Attitudes, *Teaching Conditions

Identifiers—Pennsylvania

A teacher job satisfaction instrument was developed from a brainstorming session in Pennsylvania with 81 teachers representing 5 school districts from urban, suburban, and rural schools. The resultant 10-question job satisfaction instrument was incorporated into a longer questionnaire that included school-related issues; it was given to 114 different teachers, and results were converted into a numerical score for each based on personal and employment characteristics. The study goal was not to generate a numerical comparison score, but rather to expose areas of concern for individuals and the work situation. Findings revealed that pay did not appear to be a satisfier or dissatisfier, that interaction with students was the most satisfying factor, and that the majority of subjects would approve of their children following in their profession. Lack of administrative support was chosen as the most dissatisfying factor (23 per cent), and teachers were not happy with the State-mandated innovations of Outcome Based Education (OBE) and inclusion. Identifiers—Pennsylvania

Sixty-one graduate student teachers (from seven urban, rural, and suburban districts) responded to five questions relating to how they viewed their involvement and importance in making decisions in the operation of their schools. Questions were designed by 14 teachers who met twice for about 2 hours each meeting. This development group believed that most teachers would state that they were not adequately involved because it was believed that administrators and Boards of Education did not make teacher involvement in such questions a priority.

ity. Question 1 dealt with the purpose of inservice days; questions 2, 3, and 4 with curricular concerns; and question 5 with teacher knowledge of official channels available to them for their curricular concerns. Results indicated that 95 per cent of teachers did not feel involved, 64 per cent did not know of any gaps in teaching/testing programs, 51 per cent believed that children were not being educated to their full potential and that there were curriculum problems, and 44 per cent indicated no channel or forum for voicing curricular concerns. Overall findings suggested that many teachers are out of the decision making loop, to the detriment of their students. (NAV)

Identifiers—*Dwight D Eisenhower Math and Science Educ Program, Indiana

This Dwight D. Eisenhower Mathematics and Science Education in-service project in northwest Indiana, based on a contextual constructivist perspective, sought to enhance science learning by improving science teaching in grades K-8. Elementary and middle school teachers from urban, suburban, and rural public and parochial schools attended a summer workshop in which they engaged in activity-based science learning; participated in exercises in cooperative planning, science concept enrichment, process skills development, and relevant computer applications; and discussed options for interdisciplinary science learning. After school began, the teachers attended assessment training workshops during which they developed pre- and post-test instruments for evaluating student science learning. Lesson plans developed during the summer workshop were implemented during the school year, and assessment instruments were submitted, including journals, data record sheets, notebook entries, charting and graphing, laboratory techniques and reports, written tests and concept mapping, observations and oral exchange, and drawings and art projects. Nearly all teacher reported improved student attitudes and science learning among the 1,772 project students. Project results underscore the value of teacher-prepared multiple assessment measures for equitable and realistic evaluation of science learning. (NAV)

Talbot, Gilles L.
Self-Regulated Learning, Effort Awareness and Management in College Students: Are They Aware of How They Act on Learning Tasks and Their Learning Skills?

Pub Date—Jan 96

Note—35p.

Pub Type—Reports - Research (143)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—*Academic Ability, *Academic Achievement, *Cognitive Style, *College Students, Foreign Countries, Formative Evaluation, Higher Education, *Learning Strategies, Peer Counseling, *Self Concept, Student Attitudes, Student Motivation, Study Skills, Workshops

Identifiers—Attributional Feedback, Champlain Saint Lawrence College PQ, Developmentally Appropriate Programs, Developmental Theory, Quebec, *Self Awareness

With a view to understanding developmental education, this project studied 100 college students at Champlain-Saint Lawrence College (Quebec) to measure their motivations and perceptions of ability and to see how different types of students responded to assistance. Students with a learning orientation (LO), who viewed ability as derived principally from effort, were aware of their attitudes and behaviors. Goal oriented (GO) students, who saw ability as based on innate capacity rather than the result of effort, were aware that they tended to be deficient in the same variables as learning oriented students. Helping students achieve academically through

peer counselors, workshops, ungraded formative feedback, and re-attributional training to "work smarter not harder" were not equally helpful to both types of students. LO students tended to make use of these resources and were motivated to examine and reflect on the learning tasks and their learning skills. GO students were less interested in examining their strategies and skills for learning. By mid-term, LO and GO students remained stable, and students' perceptions of their learning skills had not changed. GO students, unlike LO students, had not made the necessary adjustments between demands from learning tasks and modifying learning strategies. Helping empower students, especially the GOs to engage in purposeful effort, as opposed to false or avoidance effort, may require teachers to do two things: first, to re-examine the manner of assigning and justifying academic tasks; and second, to find ways of dealing with students who do not make realistic efforts to accomplish reasonably difficult tasks. Contains 23 references, 7 tables, and a study instrument and student worksheet. (JB)

Identifiers—Teacher Collaboration, *Weber State University UT

A teacher education conceptual model, Teachers Reflecting, Engaging, and Collaborating (TREC), is presented that guides an innovative teacher education program's goals, processes, outcomes, and evaluation. The model, which presents the teacher as a reflective practitioner, is not an instructional sequence model, but rather a conceptual model that identifies the priorities which permeate the program and serve as a unifying structure for the three TREC components (reflecting, engaging, and collaborating). The program maximizes the integration of courses, field experiences, and supplemental knowledge and skills acquired through coursework and interaction with school district professionals for elementary, early childhood, and secondary undergraduate student teachers; it is based on five learning levels that include classroom and field learning. Level 1 is the foundations level; level 2 provides students with their first field experience. Levels 3 and 4 involve specialization in elementary and secondary learning, while level 5 is a 10-week, full-time student teaching experience. Each level also deals with multicultural, bilingual, and developmentally appropriate practices; special effort is made to recruit minority students into the program. (NAV)

Identifiers—Mutism, Neurodevelopmental Therapy, *Neurodevelopmental Treatment Approach, Reflexes, Sensory Qualities

This book describes a neuro-developmental approach to learning difficulty assessment and remediation through assessment of a student's reception of

information through the sensory channels, processing of sensory information in the brain, and repertoire of responses for expression. Chapter 1, "Reflexes: Their Impact on Success or Failure in Education," describes the Moro, Palmar, Asymmetrical Tonic Neck, Rooting, Spinal Galant, Tonic Labyrinthine, and Symmetrical Tonic Neck reflexes. Chapter 2, "From Primitive Reflex to Postural Control" discusses postural reflexes and in particular the Landau, Amphibian, and Segmental Rolling Reflexes as well as equilibrium reflexes. Chapter 3, "Brain Development," looks at development in the first year of life. Chapter 4, "The Senses," covers balance and the vestibular system, touch, hearing, seeing, taste, and smell as well as proprioception or kinesthesia. Chapter 5, "Reflex Testing," gives test procedures and scoring ranges for 15 reflexes and is illustrated with drawings. Chapter 6, "Remedial Steps Available to the Teacher," discusses various sensory difficulties and corrective activities, and provides tables outlining the development and transformation of the reflex system, historical indicators of neuro-developmental delays, and suggested remediation for retained reflexes. An appendix contains useful addresses, a glossary and index, and three selected papers: "Elective Mutism: The Unchosen Silence"; "Developmental Milestones: A Blueprint for Survival"; and "Why Do Our Children Roll and Tumble?" (Contains 84 references.) (JB)

Identifiers—Diversity (Student), Jacksonville State University AL, *Preservice Teachers

The Teaching/Learning Center (T/LC) at the Jacksonville State University College of Education (Alabama) is Level 2 in a 5-level teacher education program that is intended to build student competency through reflection and revision of the student's teaching practices. T/LC is a practicum laboratory for preservice teachers and an on-campus, after-school tutoring program for a diverse population of children in grades K-12. It is often referred to as the "center for two learners," that is, for both preservice teachers and students. The T/LC practicum, established in 1992, allows the

preservice teacher to interact with children by individualizing a one-on-one tutorial in the university setting and under university supervision. In the last 12 years, the program has proved itself a considerable contribution to the community and to the professional growth of the preservice teachers; follow-up surveys given to graduates reaffirm the program's value in the teacher training effort. Preservice teachers gain additional practice through communication with parents, guardians, teachers, and professors. They gain confidence and self-satisfaction while learning to interact with students from varying backgrounds in a caring and supportive manner. (NAV)

Identifiers—Massachusetts Institute of Technology
In the summer of 1993, more than 55 educators from across the United States attended The Institute for Learning and Teaching (TILT) at the Massachusetts Institute of Technology (MIT) in Cambridge (Massachusetts). Teachers, school administrators, and their champions in the community joined MIT students, professors, and professionals from Boston-area businesses and organizations in a professional development experience. Planning and implementing the TILT model had six phases: evaluation and planning; recruitment of community teams; training of TILT staff; conducting the 3-week residential session; supporting teams throughout the school year; and supporting teams long term. TILT offered a unique combination of professional development linked to adult learning; teamwork and collaboration; and integrated, technology-based, multidisciplinary projects. TILT conveyed the concept and importance of understanding systems to its participants through a repeated emphasis on mechanical, organizational, and technological systems. This report describes the TILT program, staffing requirements, planning and implementation, and programmatic components and offers suggestions for duplicating the program elsewhere. Appendixes include a description of the historical background of the program, an application form for attending the program, and actual documentation and results from the 1995 program. (NAV)

Play Is What We Desire in Physical Education. A Phenomenological Analysis.

Pub Date—Oct 96

Note—25p.

Pub Type—Opinion Papers (120)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Athletics, *Child Behavior, Elementary Secondary Education, Foreign Countries, Health Promotion, Physical Activities, Physical Development, *Physical Education Teachers, *Physical Fitness, *Play, Recreational Activities, *Sport Psychology

A comparison and contrast is made between different notions and occurrences of play in daily life to highlight the sense of the importance of play in a physical education lesson. The meaning and definition of play are detailed, and its impact in and as part of actual learning is discussed. Two stories of real-life situations are described in which children are "coaxed" into play as a cover for a physical education exercise. These two examples suggest that the actions of the teachers, as privileged spectators and conductors of play, have enabled every child to realize (in a physically dominated way) the social reliance, to and from relationship, serious focus, and double meaning of play in a physical education lesson. It is hoped that the report will help teachers to reinterpret what play means and to re-value the role of play in physical education. Serious play can create situations of physical, cognitive, emotional, and social danger; it is up to the teacher's reflexive attention to the lesson to skillfully channel this danger into opportunity. (Contains 14 references.) (NAV)

Identifiers—California Commission on Teacher Credentialing, *California State University Los Angeles, National Council for Accreditation of Teacher Educ., *Preservice Teachers

In an effort to provide prospective teachers with chances to reflect on their professional competence, and to demonstrate their teaching effectiveness and growth, the teacher education program at California State University, Los Angeles, decided to require students to develop portfolios. All students were introduced to the portfolio format during the required introduction to teaching course. The portfolios were expected to fulfill California Commission on Teacher Credentialing (CTC) and National Council for Accreditation of Teacher Education (NCATE) professional standards that demand evidence of achievement. Portfolios were to include evidence of competencies gained from courses and evidence of student teaching competencies in 10 CTC areas. The department recommended that students use CTC and NCATE standards to serve as guides for portfolio formats. A sample format would contain an introduction and information on classroom environment, instructional planning/implementation, diverse strategies/materials, assessment/reflections, professional development, and community involvement. Portfolio development was expected to begin with the introductory teaching course and to continue as the student progressed through the subsequent course work and student teaching experiences. Faculty were concerned about portfolio advisement and decided to have

portfolio checkpoints and advisement opportunities during student teaching assignments. A sample portfolio table of contents and a course/skills checklist are included. (JB)

Descriptors—*Beliefs, *Cognitive Processes, *Comprehension, *Concept Formation, Learning Problems, *Misconceptions

Identifiers—Behavioral Stability, *Conceptual Change, Misinterpretation

This paper reports on the learning of difficult and complex concepts, the characteristics of these concepts that make them difficult for students to learn and understand well, the kinds of misconceptions students acquire, and the difficulty of changing these mistaken beliefs. A scheme, the Conceptual Stability Scheme, is presented for analyzing a concept and its related concepts for potential stability. A set of studies is reviewed that confirmed that the misconception that was predicted to be highly stable according to the Conceptual Stability Scheme was, in fact, highly stable. The mental maneuvers (knowledge shields) learners engage in to ward off changing their beliefs are presented and discussed. Many different kinds of shields are used in a variety of circumstances. This reference manual guides users in developing or amending school improvement plans for the 1993-96 Performance-Based Accountability Program (PBAP) of the North Carolina Department of Public Instruction. The PBAP was established with the passage of the state's School Improvement and Accountability Act (1989). In addition to establishing a specific mission for the public schools, it provides incentives for school systems to move beyond state accreditation and to set higher standards for student performance. Participating districts may receive funds for differentiated pay for certain state-paid employees. A local education agency that participates in the PBAP must develop a 3-year school improvement plan, and even districts that do not participate are subject to the testing and reporting provisions of the legislation. The manual discusses program guidelines and plan components and provides some information about resources for assistance in plan development and implementation. Ten forms used in the participation process are presented. The pertinent legislation is attached. (Contains three figures.) (SLD)

This compilation of tables presents information on Maryland's public schools. The state's 1,254 schools include 791 elementary, 202 secondary, 175 middle, and 23 combined schools as well as 49 special education centers and 14 alternative centers. A breakdown for each type of school is given for each of the state's 23 counties and Baltimore city, with vocational and technical schools identified among the secondary schools. Forty-six elementary schools in the state have enrollments of fewer than 100 students, and 31 have enrollments of 800 and above. Only 20 secondary schools have enrollments under 400 and only 9 have enrollments of 2,000 or more. Tables also present information on pupil membership by elementary and secondary schools for each county and for Baltimore City. (Contains six tables.) (SLD)

Descriptors—*Academic Achievement, *Accountability, Achievement Tests, Databases, *Educational Quality, Elementary Secondary Education, High School Graduates, Models, *Outcomes of Education, *Productivity, Regression (Statistics), Robustness (Statistics), Test Results

Identifiers—Educational Production Function, *Texas

This paper explores educational productivity in Texas as it relates to the development of an educational productivity model based on information in the Accountability System of the Texas Education Agency. A number of educational inputs were identified that were found to be related to specific educational outputs. Stepwise regression analysis was used to develop an educational model relating independent variables to dependent variables. Initial results suggested that a richer dataset might be needed to develop a robust model. Data from the Texas Academic Excellence Indicator System (AEIS), which included achievement test scores, were then used to develop revised models. Results of these analyses produced models that were slightly improved over the preliminary models, although it was still difficult to explain much of the variance in student performance outputs from available AEIS educational inputs. In fact, the best educational productivity models that could be derived were those based on graduates and graduates with advanced seals. Appendix 1 contains a bibliography of 20 resources used to prepare this report. Appendix 2 lists the AEIS variables considered. (Contains five tables and nine references.) (SLD)

Content, Testing Programs
Identifiers—Prototypes, *Wisconsin Student Assessment System

The Wisconsin Department of Public Instruction has contracted with the Wisconsin Center for Education Research to develop and field test performance assessments in mathematics, language arts, and science. Together with a Wisconsin-developed knowledge and concepts test, the new performance assessments will provide important information about the state's students. These samples of prototype performance assessments describe the assessment's content and present examples of proficient student responses. While they are not polished activities, they do provide a working description of the content and academic expectations in the performance assessment instruments. All of the instruments use the same score categories, ranging from advanced response to not scorable. Samples are included for the mathematics, science, and language arts performance assessments. Questions and answers about their construction and use follow the examples. (Contains 8 figures and 10 references.) (SLD)

Development of Procedures for Resolving Irregularities in the Administration of the Listening Comprehension Section of the TOEFL Test.

Educational Testing Service, Princeton, N.J.
Report No.—ETS-RR-91-6; TOEFL-TR-3

Pub Date—Feb 91

Note—41p.

Pub Type—Reports - Evaluative (142)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—*Analysis of Covariance, *Bayesian Statistics, *English (Second Language), *Language Proficiency, Language Tests, Listening Comprehension, *Listening Comprehension Tests, Simulation, Test Construction, *Testing Problems, Test Interpretation

Identifiers—*Test of English as a Foreign Language

Two procedures were developed to determine whether examinees in a given test center were affected by a testing irregularity on the Listening Comprehension section of the Test of English as a Foreign Language (TOEFL). One approach employed analysis of covariance (ANCOVA) on Listening Comprehension (Section 1) means using scores on Structure and Written Expression (Section 2) and scores on Reading and Vocabulary (Section 3) as covariates. The second procedure entailed a Bayesian approach that used prior information about performance at the center in question. Analyses using these two procedures were carried out with simulated data and data from actual testing irregularities at 5 centers involving 639 affected examinees and numerous comparisons. Results indicated that both ANCOVA and Bayesian approaches provided useful information. They usually agreed, but differences occurred in specific situations as discussed. Although both procedures should be incorporated into the operational procedures for resolving testing irregularities, results should be interpreted with caution, particularly if they produce discrepant results. An appendix contains five tables of summary statistics. (Contains 1 figure, 10 tables, and 3 references.) (Author/SLD)

Descriptors—*Computer Software Development, Goodness of Fit, *Item Response Theory, *Maximum Likelihood Statistics, *Sampling Identifiers—Calibration, *Confidence Intervals (Statistics), *Three Parameter Model

A large sample method for obtaining asymptotic simultaneous confidence bands for a three-parameter logistic response curve is described. Simultaneous confidence bands indicate the sampling variation of item response curves relative to a fitted function. A procedure is given which requires as input maximum likelihood parameter estimates and an asymptotic error covariance matrix. Illustrative plots of item response curves with corresponding confidence bands are presented. These procedures are simple enough computationally to be used eco-

nomically in regular item response studies. Incorporating the calibration and graphical display of simultaneous confidence bands into calibration software would greatly benefit test designers. (Contains four figures and seven references.) (Author/SLD)

Descriptors—*Adaptive Testing, Comparative Analysis, *Computer Assisted Testing, Identification, *Item Banks, Psychometrics, Scores, *Selection, Simulation, Test Construction, Test Format, *Test Items, Test Results

Identifiers—*Parallel Test Forms, Test Security

The construction of parallel editions of conventional tests for purposes of test security while maintaining score comparability has always been a recognized and difficult problem in psychometrics and test construction. The introduction of new modes of test construction, e.g., adaptive testing, changes the nature of the problem, but does not make it disappear. Items in adaptive testing pools may become overused and require replacement. However, in order to insure score comparability, important characteristics of the pool must remain constant. Three methods of selecting candidate new items and three methods of identifying items for replacement are developed and compared with each other and with a previous method through a simulation study. Results indicated that using conventional item statistics to screen items before deciding to seed them was important and effective in terms of maintaining the information structure of the adaptive test item pool. The online calibration of larger sets of seeded items from which to select replacements can substantially improve the ease with which the information structure of the pool can be maintained. (Contains 1 table, 11 figures, and 4 references.) (Author/SLD)

Descriptors—Adaptive Testing, *Computer Assisted Testing, *Costs, Pilot Projects, *Scoring, Test Construction, Test Format, *Testing Problems, *Test Items, Test Use

Identifiers—*Graduate Record Examinations, *Hypothesis Formulation, Prototypes, Subjective Tests

Issues concerning the cost and feasibility of using Formulating Hypotheses (FH) test item types for the Graduate Record Examinations have slowed research into their use. This project focused on two major issues that need to be addressed in considering FH items for operational use: the costs of scoring and the assignment of scores along a range of values rather than the conventional number-right scoring. The first issue was addressed directly by seeking ways to increase the efficiency of scoring through computerized delivery and scoring. The second issue was addressed both directly and indirectly by recommending specific procedures for the computer recognition of responses and problem delivery that will be sufficiently reliable and well-rationalized to be acceptable to reasonable evaluators. After a series of analyses to explore the design and scoring of FH-type items, specific recommendations were suggested for developing a system to deliver computerized versions. When developed, the prototype will also serve as a computerized research tool to conduct further studies. Appendix A gives an example of an FH item and scoring system. Appendix B presents six tables of test analysis with the Writer's Workbench software. Appendix C gives the instructions and items for a small pilot test and eight

graphs from test examples. (Contains 35 references.) (Author/SLD)

Descriptors—Error of Measurement, *Estimation (Mathematics), *Item Response Theory, *Measurement Techniques, Scaling, *Statistical Inference, *Test Items

Identifiers—Jackknifing Technique, *Linking Metrics, National Assessment of Educational Progress, *Uncertainty

In many practical applications of item response theory, the parameters of overlapping subsets of test items are estimated from different samples of examinees. A linking procedure is then employed to place the resulting item parameter estimates onto a common scale. It is standard practice to ignore the uncertainty associated with the linking step when drawing inferences that involve items from different subsets, a situation that arises, for example, in the measurement of change. This paper outlines how the uncertainty can be accounted for and exemplifies the ideas with a jackknife approximation for the Stocking-Lord linking procedure. Examples from the National Assessment of Educational Progress suggest that the resulting uncertainty will usually be negligible for inferences about individuals, but can constitute a major source of estimation error in aggregate statistics such as changes in group means. Descriptors—*Career Guidance, *Computer Uses in Education, Cost Effectiveness, Decision Making, *Educational Technology, Individual Differences, *Interaction, *Online Systems, *Systems Development, Theories, User Needs (Information)

Identifiers—System of Interactive Guidance and Info Plus, *System of Interactive Guidance and Information

Beginning in the 1960s the interactive capabilities of computers were recognized as providing unprecedented opportunities for the development of computerized career guidance systems. Such systems offered individualized assistance in career decision making to large numbers of people at low cost. Recognizing that each user may present a unique combination of needs, experiences, circumstances, values, interests, skills, styles, and perceptions, a developer can enable a well-planned system to respond appropriately to individual differences. A system can store, retrieve, and manipulate vast amounts of information, putting great resources at the fingertips of each user, and it can bring many personal, occupational, and educational variables together, combining them in distinctive ways for each client. These capabilities do not ensure that the substance of any system will be of high quality. Much of a system's worth depends on its conceptual framework, the strength of its theory and rationale, and the coherence of its functions and structures. The "black box" of theory underlying every system should be opened up and exposed to the light of scrutiny and evaluation. Examples from the principles, research, model, and structures for the System of Interactive Guidance and Information (SIGI) and SIGI PLUS are used to illustrate the links between theory and practice. Identifiers—*Austin Independent School District TX, Reading Recovery Projects

The 1993-94 school year was the first year of the Accelerating Literacy Program (ALP) of the Austin (Texas) Independent School District. The ALP used a grant from the Texas Education Agency to train elementary educators in the methods of a short-term reading intervention program based on the Reading Recovery/Whole Language theory. A group of 367 first-grade students who were identified as low-achieving was selected to participate in the 4-week program of accelerated instruction on 13 elementary campuses. Across the whole program, students increased their reading skills 0.47 levels (on a 4-point scale) on a 26-item developmental checklist, with the difference between preprogram and postprogram means found to be statistically significant. This checklist was used when no common standard of comparison was available; the lack of a common standard made evaluating program success difficult. Levels of student attendance varied greatly, as did levels of parent involvement. Plans were made for continuation of the program in the 1994-95 school year, with recommendations for improvement centered on establishing a common standard for judging achievement and additional staff training and student retention efforts. (Contains 1 summary table, 5 figures, and 3 references.) (SLD)

Identifiers—Austin Independent School District TX, *Austin Youth River Watch Program TX

The City of Austin (Texas) provided funds for a supplementary educational activity to involve at-risk minority high school students in water quality issues. The program attempts to provide an interesting and authentic activity that also develops academic skills. Principal activities were testing river water for pollutants and the tutoring of at-risk students by their student mentors. In addition to the 9 1992-93 student trainees who continued in the program, the 1993-94 Youth River Watch Program recruited and trained 37 minority, at-risk students in river water monitoring. As a group, participants achieved higher grade point averages than the mean for all Austin high school students. All participants agreed that they would encourage others to participate, and all planned to continue participation. In addition, the water quality database for the Colorado River and its tributaries was improved. Recommendations were made for program continuation and continued student recruitment and training. Identifiers—*Internal Consistency, Public Library Statistics Program, Staffing Patterns

This is the fourth in a series of reports evaluating the Public Library Statistics (PLS) program, an annual census of public libraries in the United States. The census includes, in addition to a full count of public libraries and their outlets, a variety of statistics about the services provided by and, the financial condition and the staffing levels of public libraries. This report contains the results of an evaluation of the definitions and internal consistency of the staffing variables and a comparison of the statistics collected for these variables to selected statistics from independent sources. This evaluation was conducted to raise specific issues for discussion among members of the Federal State Cooperative System for Public Library Data. Chapter 1 evaluates the definitions used for the staff variables, while Chapter 2 considers the internal consistency of staff measures. Chapter 3 compares statistics from the public library census to those from other reference sources for public library staffing information. Four appendixes list the variables, libraries without paid staff, and library reports and directories, and present comparisons of dataset and other figures. (Contains 70 references and 14 tables.) Descriptors—Achievement, *Attribution Theory, *Beliefs, *Competence, Feedback, *Learning Strategies, Locus of Control, *Motivation, Self Concept, Self Evaluation (Individuals), *Social Cognition, Teaching Methods

Identifiers—*Self Regulation

The self-regulation of attributions, beliefs concerning the causes of outcomes, is explored. An increasing body of research substantiates the idea that effective self-regulation depends on forming positive attributions that promote perceptions of competence and sustain motivation directed toward learning. Self-regulation refers to the process by which learners direct their cognitions, motivation, and behaviors toward the attainment of their academic goals. Social cognitive theory postulates three important processes in self-regulation: self-observation, self-judgment, and self-reaction. Learners observe their task progress, judge its acceptability, and react by sustaining action or altering strategies. Effective self-regulation depends on holding an optimal sense of self-efficacy (perceived competence) for learning and on making attributions (perceived causes of outcomes) that enhance self-efficacy and motivation. Research is reviewed that demonstrates positive effects of attributions and attributional feedback on self-regulation and that highlights important causal and correlational processes among attributions and achievement outcomes. Implications for teaching practice and future research suggestions are discussed. (Contains 33 references.) (Author/SLD)

Identifiers—*Middle School Students, North Carolina, *Outward Bound

The guidance and counseling department of a western North Carolina middle school wanted to identify more precisely what it was that a week's participation in Outward Bound provided for their students. Outward Bound is an adventure-based, or wilderness-based, educational experience that promotes self-esteem through achievement in a challenging environment. Questionnaires and open-ended interview questions were prepared and administered to 135 eighth-grade students who participated in Outward Bound and 85 ninth graders who had participated the year before. Responses indicated that the overwhelming majority of participants did indeed enjoy a positive experience. The study reinforced the belief of the guidance and counseling department that their students had a positive experience as Outward Bound participants. Approximately 98% of the ninth graders felt that Outward Bound had helped them become more positive and contributing participants in group activities, and 88.2% thought that they were now more capable of accomplishing more challenging tasks. Responses of the eighth graders, who had more recently completed the program, were similar. Three questionnaires are provided. (Contains 20 tables and 20 references.) (Author/SLD)

Identifiers—*Hierarchical Analysis, Netherlands, Standard Setting

In previous studies of educational systems, Markov chains have often been used in simulations in which history played no role because all events were described as independent of each other. Mono-level dynamics (i.e., the social context in which learning occurs is ignored) have also been applied to simulations. Educational theories, however, are usually multilevel in nature, since they describe pupil learning as a function of the characteristics of the group in which learning takes place. Moreover, teacher behavior is affected by organizational interventions. A three-level simulation model for educational effectiveness is presented. This mathematical model adequately describes the functioning of standard setting by teachers, which can be seen as the lever for raising performance levels. Experiments with the model show that it is almost impossible to achieve different, and possibly conflicting, policy goals simultaneously. The model is applied to two major educational policy programs in the Netherlands, the introduction of a Common Core Curriculum and a program addressing inequality of educational opportunities, the Educational Priority Programme. An appendix contains the source code for the model. (Contains 9 tables, 6 figures, and 28 references.) (Author/SLD)

Identifiers—*Maryland

This series of tables presents the status of professional employees in Maryland local education agencies as of October 15, 1994 by assignment, race and ethnicity, and gender. The tables show the head counts of males and females in the central office and in elementary, secondary, and middle and combined schools. Staff are further classified according to the race and ethnic categories designated by the Equal Employment Opportunity Commission. The work assignments used in the classifications correspond with position codes defined in the "Staff Reporting System Guidelines for Local School Systems in Maryland." The grand total of professional personnel, 55,488, is divided among the state's 23 counties and Baltimore city. The majority (77.9%) are white and female (31,882). Roughly 20% of the state's professional school employees are African American, and 1.8% represent other racial and ethnic groups. A similar breakdown by race is found for central offices, but the numbers of male and female employees are more nearly equal at 799 male employees statewide compared to 770 female. Of the state's 1,286 principals, 913 are white, and 606 are male. (Contains 33 tables.) (SLD)

Identifiers—Comprehensive Tests of Basic Skills, *Maryland, Scholastic Aptitude Test

This handbook presents statistics about the public and private schools of Maryland. In 1994 there were 790,938 public school students and 156,582 nonpublic school students in the state, representing a 13.2% increase in public schools over 5 years and a 17% growth in the nonpublic schools. There were 1,262 public schools in 1994-95 and 1,024 nonpublic schools. Of the state's 87,704.1 total public school employees, 19,533.2 were in noninstructional positions and 60,153.7 were in instructional positions. The majority of Maryland's public school students were white (58.1%), with 34.7% African American, 0.3% American Indian/Alaskan native, 3.8% Asian/Pacific Islander, and 3.1% Hispanic. Most of the state's teachers (78.7%) were white, with 19.6% African American and 1.7% of other racial and ethnic groups. The statewide average dropout rate was 4.96%, but in Baltimore city, the dropout rate was 15.19%. Most (79.5%) of the state's 39,669 high school graduates planned to attend college. Information is also provided about achievement test results for the Scholastic Aptitude Test and the Comprehensive Tests of Basic Skills, as well as about teacher salaries, financial resources, special programs, and vocational and adult education. A list of state school information resources is provided. (Contains 1 map, 33 tables, and 6 figures.) (SLD)

Identifiers—*Discrimination Parameters, *Information Function (Tests), Three Parameter Model

Items with the highest discrimination parameter values in a logistic item response theory (IRT) model do not necessarily give maximum information. This paper shows which discrimination parameter values (as a function of the guessing parameter and the distance between person ability and item difficulty) give maximum information for the three-parameter logistic IRT model. The optimal discrimination parameter value is shown to be inversely related to the distance between item difficulty and person ability. An upper bound for the information as a function of these parameters is derived; and this upper bound is used to formulate a fast item selection algorithm for adaptive testing. In a small simulation study this algorithm was one and one half to six times as fast as an algorithm in which the information of all items in an item bank is calculated. This handbook is designed to help educators understand program evaluation processes so that they will be able to carry out evaluation tasks and talk knowledgeably to evaluators about what they want to find out from a program evaluation. The book reviews the purposes and uses of evaluation to help the reader identify the scope and direction of the evaluation process. Section 3 introduces the strategic steps in an evaluation and gives practical suggestions to avoid pitfalls. The 10 basic steps to program evaluation are delineated: (1) identify program goals; (2) state objectives; (3) decide on the scope of the evaluation; (4) formulate evaluation questions; (5) design the evaluation; (6) choose the method of information collection; (7) list evaluation activities and establish a timeline; (8) estimate the cost of the evaluation; (9) collect, analyze, and interpret the data; and (10) communicate and act on the evaluation findings. How to report and use findings is reviewed, and a glossary of evaluation terms is included. (Contains 26 references.) (SLD)

Since 1969-70, the National Catholic Educational Association has published a statistical report on Catholic elementary and secondary schools in the United States. This year's report contains the core school enrollment and staffing data from the Association's database and includes data on Chapter 1 services, extended care programs, school boards of education, and coeducational and single-sex schools. It is based on information submitted by 174 archdiocesan and diocesan offices of education or state Catholic Conferences about the nation's 7,114 Catholic elementary schools and 1,231 Catholic secondary schools (data from the 1993-94 school year). Catholic school enrollment continues to increase, increasing 9,215 students between 1992-93

and 1993-94. Full-time faculty in Catholic schools numbered 157,201, of whom the majority (88%) were lay people. Recent studies have shown that Catholic school students excel in reading, science, and mathematics and that the religious commitment of the schools and the community support they receive help explain their remarkable success. The statistics presented in this report demonstrate the achievements of Catholic schools. Three appendices give a summary report of basic school statistics, a list of states with enrollment increases, and a summary report of data on special programs. (Contains 25 exhibits.) (SLD)

Wisconsin Performance Report for Districts and Schools within Districts, 1994-95 Eighth Grade Knowledge and Concepts Examinations.

Wisconsin State Dept. of Public Instruction, Madison.

Pub Date—Jan 95

Note—385p.

Available from—Office for Educational Accountability, Wisconsin Department of Public Instruction, P.O. Box 7841, Madison, WI 53707-7841.

Pub Type—Reports - Descriptive (141)

EDRS Price - MF01/PC16 Plus Postage.

Descriptors—*Academic Achievement, *Achievement Tests, Grade 8, Junior High Schools, Knowledge Level, Language Arts, Mathematics Education, Reading Instruction, *School Districts, Science Education, Scores, Social Studies, *State Programs, *Testing Programs, *Test Results

Identifiers—*Wisconsin Student Assessment System

This report displays summary results from the Wisconsin Student Assessment System 1994-95 Eighth Grade Knowledge and Concepts Examinations for all Wisconsin school districts and schools with an eighth grade. Statewide data for 57,388 of Wisconsin's 58,821 eighth graders are reported; certain categories, such as limited English speaking students, are excluded. Data from the districts are reported in alphabetical order, with schools containing eighth graders listed under each district. Mean raw score, national percentile rank and stanine, and state percentile rank and stanine are listed for each multiple-choice subject area (reading, mathematics, language, science, and social studies), the multiple-choice battery total, and two types of writing (imaginative and persuasive). An average grand composite score gives an indication of overall district achievement. These results are presented in tabular form (187 pages). (SLD)

Descriptors—Educational Assessment, Elementary Secondary Education, *Evaluation Methods, Evaluation Utilization, *Feedback, *Formative Evaluation, Higher Education, *Material Development, *Program Development, Self Evaluation (Groups), Validity

Formative evaluation consists of assessing educational programs or other kinds of educational products while they are being developed to help shape them into their final forms. This publication is intended for those whose job it is to develop new programs and products or to evaluate them during development. Topics discussed include: (1) the nature and importance of formative evaluation; (2) when to conduct them and what to look for; (3) sources of formative feedback; (4) data-gathering instruments and procedures; (5) formative evaluation in practice; and (6) guidelines for planning a formative evaluation. Careful planning is stressed, as is the use of multiple evaluation methods, validated before use. Each stage of an examination should focus on the kinds of information that will be of immediate use in improving the quality of the product. Results of each evaluation should be used to modify and shape the product as it moves through

development. (Contains 9 figures and 20 references.) (SLD)

Results of the 1993 Multilevel Assessment Program in Urban Schools, Report 1.
Northern Territory Dept. of Education, Darwin (Australia).

Spons Agency—Northern Territory Board of Studies, Darwin (Australia).

Report No.—ISSN-1322-7025

Pub Date—95

Note—59p.

Pub Type—Reports - Descriptive (141)

EDRS Price - MF01/PC03 Plus Postage.

Descriptors—*Academic Achievement, Educational Assessment, English (Second Language), Foreign Countries, Grade 5, Grade 7, *Indigenous Populations, Intermediate Grades, Junior High Schools, *Mathematics Tests, Racial Differences, *Reading Tests, Scores, Sex Differences, State Programs, Testing Programs, *Test Results, *Urban Schools

Identifiers—*Australia (Northern Territory)

The Multilevel Assessment Program tests for urban schools are conducted annually across Australia's Northern Territory in reading and mathematics. The program allows performance to be monitored at the system level for Years 5 and 7. Results show that, in terms of system performance on the link questions, there was no difference between 1992 and 1993 in reading everyday texts or in Year 5 reading comprehension, but the performance of Year 7 students on the link questions in the reading comprehension test was significantly lower in 1993. While girls scored better than boys on every reading subtest, there were few differences between boys and girls on mathematics tests. Non-Aboriginal students scored higher than their Aboriginal peers on all tests, but the gap in mathematics appeared to be declining. Appendices contain: (1) a list of assessment committee members; (2) score distributions by subgroup; (3) average subtest scores by gender; (4) average subtest scores for Aboriginal and non-Aboriginal students; (5) average subtest scores by English as a second language students and others; (6) a glossary; and (7) sample test questions. (Contains 2 figures, 16 tables, and 32 graphs.) (SLD)

Orabuchi, Iheanacho I.

The Results of the Evaluation of the Annual Conference of National Alliance of Black School Educators (NABSE) (22nd, Los Angeles, California, November 17-19, 1994).

Pub Date—Mar 95

Note—281p.

Pub Type—Reports - Evaluative (142) — Tests/Questionnaires (160)

EDRS Price - MF01/PC12 Plus Postage.

Descriptors—Age Differences, Analysis of Variance, Audience Analysis, *Black Teachers, *Conferences, Employment Patterns, *Inservice Teacher Education, *Public Speaking, Regression (Statistics), Research Reports, *Satisfaction, Sex Differences, Surveys, Teaching Experience

Identifiers—*National Alliance of Black School Educators

The quality of the Annual Conference of the National Alliance of Black School Educators (NABSE) was evaluated through surveys of participants. Conference attendees' ratings of the presenters, the facility, and the inservice training was studied for subgroups based on position, gender, age, and experience. Four sets of data were collected relating to the different areas, with one of the data sets being participant observation. There were 3,214 responses collected from the approximately 5,000 attendees, analyzed by frequency, means statistics, analysis of variance (ANOVA), and regression. The results indicated that there were more teachers and principals than any other educator group. Females, persons aged 41 to 50 years, and those with 21 to 30 years of professional experience were more likely to attend. More people attended afternoon sessions and the Friday sessions. Presenters were rated highly by the various subgroups, and ANOVA results indicated that there were no statistically significant differences in presenters' ratings between and among subgroups. Regression analyses indicated that clarity, session environment, presentation skills of the speaker, and presenter preparedness were among the important factors or influences considered in rating the overall quality of the session. Six appendices contain data collection instru-

ments and participant comments. (Contains 163 tables.) (Author/SLD)

Authentic Assessment, Professional's Guide.

Report No.—ISBN-1-55734-838-3; TCM-838

Pub Date—94

Note—76p.

Available from—Teacher Created Materials, Inc., 6421 Industry Way, Westminster, CA 92683 (Order Number TCM 838).

Pub Type—Books (010) — Guides - Non-Classroom (055)

Document Not Available from EDRS.

Descriptors—Academic Achievement, *Educational Assessment, Language Arts, Mathematics, *Observation, Parent Participation, *Portfolios (Background Materials), Sciences, *Scoring, Social Studies, Student Evaluation, *Test Construction

Identifiers—*Authentic Assessment, *Performance Based Evaluation, Scoring Rubrics

Authentic assessment is the process of gathering evidence and documenting student learning and growth in an authentic context. Authentic assessment can do a better job than more traditional forms of assessment in informing educators and parents about a student's real achievement. The first chapter of this book presents an overview of authentic assessment, its origins, and its goals. The next four chapters focus on authentic assessments that can be used across the curriculum: (1) portfolios; (2) performance assessment; (3) rubrics; and (4) observation-based assessment processes. The following chapter focuses on the inclusion of students and parents in the assessment process. The final four chapters identify authentic assessments that can be used specifically with the content areas of language arts, mathematics, science, and social studies. A list of professional resource organizations is included. (Contains 2 samples, 10 checklists and forms for assessment processes, and 28 references.) (SLD)

Multilevel Analysis of Structural Equation Models via the EM Algorithm.

Pub Date—[95]

Note—19p.

Pub Type—Reports - Evaluative (142)

EDRS Price - MF01 Plus Postage. PC Not Available from EDRS.

Descriptors—Algorithms, *Bayesian Statistics, Equations (Mathematics), *Error of Measurement, Estimation (Mathematics), *Maximum Likelihood Statistics, Sampling, *Statistical Bias, *Structural Equation Models

Identifiers—*EM Algorithm, Hierarchical Models, Missing Data, *Multilevel Analysis

The question of how to analyze unbalanced hierarchical data generated from structural equation models has been a common problem for researchers and analysts. Among difficulties plaguing statistical modeling are estimation bias due to measurement error and the estimation of the effects of the individual's hierarchical social milieu. This paper presents empirical Bayes estimation by means of the EM algorithm in the context of unbalanced sampling designs. The EM algorithm is particularly useful when analytic expressions exist for the conditional distribution of the missing data given complete data and for the complete-data maximum likelihood estimates of the model parameters. One example is included for illustrating the specification of the model that incorporates variations at two levels of hierarchy. (Contains 2 tables, 1 figure, and 32 references.) (Author/SLD)

A Qualitative and Quantitative Comparison of the Impact of Portfolio Assessment Procedures versus Traditional Assessment in a College Physics Course.

Pub Date—Apr 95

Note—19p; Paper presented at the Annual Meeting of the National Association for Research in Science Teaching (San Francisco, CA, April 1995).

Pub Type—Reports - Research (143) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Academic Achievement, *College Students, Comparative Analysis, Educational Assessment, Higher Education, Objective Tests,

*Physics, *Portfolios (Background Materials), Pretests Posttests, Qualitative Research, *Student Attitudes, Test Use

Identifiers—*Alternative Assessment, Focus Groups Approach, Self Report Measures

Popular belief in alternative assessment procedures suggests that the use of student portfolios can help learners successfully organize and integrate newly acquired scientific knowledge. This two-group comparison study documents the use of student created portfolios in an algebra-based, college-level, introductory physics course. Sixteen students were assessed primarily using a portfolio-style assessment procedure. Nineteen students were assessed primarily using traditional, objective examinations. Both groups were given the same cumulative, multiple-choice final examination. All students completed a pre/post self-report survey of achievement in physics. There were no significant differences in learner achievement between the two groups on the final examination or on the self-report of achievement given before and after instruction. Analysis of two focus group discussions did, however, suggest that the students assessed by portfolios feel less anxious about learning physics, devote considerable time to reading and studying outside of class, internalize and personalize the content material, and enjoy the learning experience. The results of this study suggest that portfolio-style assessment procedures support student achievement at least at the same level as traditional assessment procedures and appear to have additional benefits. (Contains 2 figures, 3 tables, and 20 references.) (Author)

Descriptors—*Criteria, *Educational Assessment, Elementary Secondary Education, Parent Attitudes, *Portfolio Assessment, Portfolios (Background Materials), Scoring, Student Attitudes, *Teaching Methods, Test Construction, *Test Use

Portfolios can demonstrate student mastery of material and their work with concepts and content, as well as their ability to link material with other knowledge. Portfolios can closely relate what students learn to what teachers believe they teach. The decision to use portfolios requires planning, professional development, decision making, and a reconceptualization of space and time management. Teachers who use portfolios find that they become facilitators who direct students toward information and resources. A working knowledge of portfolio assessment is vital for all involved, especially parents, who must have good and consistent information. Students can be helped to understand portfolio assessment if criteria (rubrics) are developed that define performance. Although there are a number of issues that must be considered in portfolio development and some problems that must be overcome, it is apparent that portfolios offer advantages in philosophical congruence and instructional strategy. Five national clearinghouses that disseminate information on portfolios and seven schools using portfolio assessment are listed. (Contains 2 tables and 18 references.) (SLD)

Report on Grade Level Retention of Texas Students, 1992-93 and 1993-94.

Texas Education Agency, Austin.

Report No.—GE5-601-12

Pub Date—Feb 95

Note—33p.

Available from—Texas Education Agency, 1701 North Congress Avenue, Austin, TX 78701-1494

Publication Number GE5-601-12.

Pub Type—Numerical/Quantitative Data (110) — Reports - Descriptive (141)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Academic Failure, Age Differences, *Blacks, Elementary Secondary Education, *Ethnicity, *Grade Repetition, *Hispanic Americans, Minority Groups, *Racial Differences, *Sex Differences, State Legislation, Student Promotion, Whites

Identifiers—*Texas

A legislative mandate requires the Texas Central Education Agency to submit a report each odd-numbered year that includes data collected on students retained in grade, including the reason for retention. This report presents current summary data on the retention rates of Texas students by grade level, age, gender, and ethnicity for 1992-93; year-end summary data; and an overview of state policy regarding retention and promotion. Some preliminary data for the 1993-94 year are also presented. Research on the effects of grade level retention has consistently shown that having students repeat a grade or delaying entry to kindergarten or first grade when the child is of the appropriate chronological age does not help students academically or personally. In 1992-93 an estimated 5% of Texas public school students were retained, but about 7% of Hispanic and African American students were retained. Hispanic students represented 47% of all students retained in 1992-93. The highest retentions continued to be in the ninth grade, and males continued to outnumber females in retentions. Overage students represented 16.2% of regular education students, but were 26.9% of regular education students who were retained. (Contains 1 table, 12 charts, and 8 references.) (SLD)

Descriptors—*Advocacy, Data Analysis, Databases, *Data Collection, Evaluation Utilization, *Information Utilization, Intervention, Legislation, Program Development, Program Implementation, Resources, *Statistical Data, *Youth Programs

Identifiers—*Indiana

This guide presents an introduction to the basics about data collection and discusses the uses of data in daily work. The emphasis is on youth programs in Indiana, but the information is useful for programs in other states. Ways in which program planners and advocacy activists can use data are described, and local, state, and national resources for data use are listed. The word "data" means a collection of things known or assumed, whether information that describes or information from which conclusions can be inferred. A glossary of terms that program planners and advocates can use is presented. Using data for program planning, design, development, and evaluation is described; and using data for advocacy is explored relative to education, intervention, and legislation. Information resources are listed in the following categories: (1) recent Indiana statistical publications (34 publications); (2) recent national statistical publications (17 publications); (3) national clearinghouses and sources of data (29 clearinghouses and sources); (4) data sources about Indiana (14 sources and organizations); and (5) 10 electronic databases and resources. ***Report Cards, *School Districts**

Identifiers—*Educational Indicators, *Mississippi

The Mississippi Report Card (MRC) is used by the State Department of Education as a public school accountability tool. The MRC describes and characterizes school district performance and links the performance indicator profile to the accreditation level for each school district in the state. This study provided a descriptive profile of each of the state's 149 school districts for each assigned accreditation level based on indicator variables in the 1993 MRC and also determined the relationship between indicator variables and the student outcome measures. The difference between the accreditation levels computed using the MRC indicator variables and the accreditation levels assigned by the State Department of Education was studied. It was determined that about 25% of school districts placed into accreditation levels 1, 2, and 3 by the state were placed differently according to the MRC variables. It was also apparent that the MRC, in its present format, does not discriminate well when assigning school districts into accreditation levels. Only 6 of 37 indicator variables were significant discriminating variables for placing districts into accreditation levels. Recommendations are made for improvement of the MRC and accreditation placement. (Contains 15 tables and 19 references.) (SLD)

Descriptors—*Academic Achievement, *Affective Behavior, Cognitive Ability, Correlation, Foreign Countries, Higher Education, Interaction, Learning, Outcomes of Education, *Sex Differences, Student Attitudes, *Teaching Methods, *Test Anxiety, *Undergraduate Students

Identifiers—Canada

This paper examines the effects of gender and test anxiety on students' achievement, cognition, and affects, with an interest in exploring why some students are less likely to benefit from classroom instruction than others. The data came from a western Canadian university study of 424 undergraduate students. Correlational and univariate statistics were used to examine the relationships among variables. Results indicated that gender and test anxiety differentially influenced student learning and learning-related outcomes. Low test anxious males showed higher achievement outcomes, perceived more success over their performances, and felt more confident than high test-anxious males or females. The results extend previous research and are discussed in terms of their practical applications for college teaching. (Contains 4 figures, 3 tables, and 43 references.) (Author/SLD)

College Students' Theory of Learning Introductory Statistics: Phase One.

Pub Date—27 Mar 95

Note—62p.; Paper presented at the Annual Meeting of the American Educational Research Association (San Francisco, CA, April 18-22, 1995).

Pub Type—Reports—Research (143)—Speeches/Meeting Papers (150)

EDRS Price - MF01/PC03 Plus Postage.

Descriptors—Academic Achievement, Algorithms, College Faculty, *College Students, *Educational Theories, Higher Education, *Instructional Effectiveness, Intervention, Interviews, Learning, *Statistics, *Student Attitudes, Student Characteristics, *Teaching Methods

Identifiers—*Grounded Theory

Impediments that hamper learning statistics, the relative characteristics of successful and unsuccessful learners, and the nature of interventions required to make learning statistics successful and meaningful were studied. Twenty graduate and 15 undergraduate students in different fields from a large public university, a small private college, and the engineering department of a large polytechnic institute, all in the capital district region of New York participated. The study was conducted using methods for constructing a grounded theory, with contin-

ual checking back with subjects to see if they considered emerging data categories credible. Initial interviews with the 35 subjects were conducted using topics, derived from a literature review, to stimulate student recollection of the learning experience. All the students except for one experienced a traditional algorithmic approach to instruction through lecture and practice problems. Rechecking student opinions resulted in a preliminary theory of learning statistics that identifies teaching ability as an integrating category. Many students explicitly identified teaching ability, or the lack thereof, as the single most important contributor to their success or failure. A compilation of student opinions provides teaching-ability components, focusing on an interest in students and the subject. An appendix presents participant profiles. (Contains 1 table and 17 references.) (SLD)

Construction of Parallel Test Forms Using Optimal Test Designs.

Pub Date—Apr 95

Note—22p.; Paper presented at the Annual Meeting of the National Council on Measurement in Education (San Francisco, CA, April 19-21, 1995).

Pub Type—Reports—Evaluative (142)—Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Elementary School Students, Grade 4, Intermediate Grades, *Item Banks, Language Arts, Listening Comprehension Tests, Reading Comprehension, Scores, *Selection, Statistical Distributions, *Test Construction, Test Format, Test Reliability, Writing Tests

Identifiers—*Parallel Test Forms

The effectiveness of an optimal item selection method in designing parallel test forms was studied during the development of two forms that were parallel to an existing form for each of three language arts tests for fourth graders used in the Connecticut Mastery Test. Two listening comprehension forms, two reading comprehension forms, and two written communication forms were developed using item-response-theory-based Optimal Test Design software. The tests included mixed item formats, cluster-based sections, and passage-related items. Three item banks were available for the study. For each of the 1993 forms, test and cluster information curves were computed. Restrictions on the number of passages that could be accessed for any test meant that relatively few items were available, but weakly parallel tests, as indicated by their relative information curves, were assembled using the software. The parallelism of the tests was also portrayed by similarities among the total score distribution indices and reliabilities of the tests. The small differences in the test information between the target and new forms were not significant threats to the parallelism of the forms. (Contains 2 tables, 4 figures, and 20 references.) (SLD)

Descriptors—Data Collection, Employment Patterns, *Graduates, Higher Education, *Research Methodology, *Response Rates (Questionnaires), Responses, Sample Size, Statistical Bias, *Surveys, *Teacher Education, *Vocational Followup

Identifiers—Missing Data, *Nonresponse Bias, University of Tennessee Knoxville

This study was designed to determine the extent to which the results of an employment survey of graduates of a teacher preparation program would have been affected by changes in response rate. At the University of Tennessee, Knoxville, a follow-up of teacher education program graduates is conducted annually. A total of 284 graduates of the 1992 teacher education program were identified as the target population for the 1993 survey. A total of 184 individuals responded to the mail survey (64.8%), with 33.8% responding to the first wave, 17.2% responding to the second, 6.3% to the third wave, and 7.4% responding late. Telephone calls

elicited information from 40 additional persons (14.1%). Supplemental information about employment from other sources resulted in the eventual determination of the occupations of 265 of the 284 individuals (93.3%). There was no evidence that data collected after about 50% of the sample had responded resulted in any meaningful differences in survey results. These results suggest that concentrating on potential nonresponse bias may not be as important as attending to other aspects of survey methodology, such as sample size and questionnaire design. (Contains 2 tables and 28 references.) (SLD)

Identifiers—*National Education Longitudinal Study 1988, *Transition Time

This report describes the growth in cognitive skills and achievement, and the continuities and discontinuities experienced in school and at home by the eighth-grade cohort of the National Education Longitudinal Study of 1988 (NELS:88) during the 2 years between the study's base year (1988) and the first followup (1990) surveys. The report examines school change in view of the almost universally experienced transition to high school, with findings about patterns of school transition and changes in students' perceptions of safety and overall learning environment. Major changes in home life and family are also outlined. Finally, the report examines the tested achievement of the cohort by exploring gains and the content areas in which they occurred. By the followup, about 6% of the students were no longer in school, and half reported that they left simply because they did not like school. In terms of simple achievement gains, students gained in all four subject categories of science, mathematics, social studies, and reading comprehension, although gain patterns were complex. Data from NELS:88 and its followups are a rich source of information for policy makers and education practitioners. Four appendices discuss standard errors, research methodology, an overview of the program, and an annotated bibliography of 30 NELS:88 publications. (Contains 14 tables, 40 figures, and 70 references.) (Author/SLD)

This volume presents observations and thinking of scholars from a variety of disciplines about parental cultural belief systems. The chapters are concerned with the sources and consequences of parental ethnotheories in a number of societies. The following chapters are included: (1) "Introduction" (Sara Harkness and Charles M. Super); (2) "Parents' Free Descriptions of Child Characteristics: A Cross-Cultural Search for the Developmental Antecedents of the Big Five" (Geldolf A. Kohnstamm, Charles F. Halverson, Jr., Valerie Havill, and Ivan Mervielde); (3) "Processes of Generalization in Parental Reasoning" (Juan Valiner and Gorjana Litvinovic); (4) "The Answer Depends on the Question: A Conceptual and Methodological Analysis of a Parent Belief-Behavior Interview Regarding Children's Learning" (Irving E. Sigel and Myung-In Kim); (5) "Essential Contrasts: Differences in Parental Ideas about Learners and Teaching in Tahiti and Nepal" (Robert I. Levy); (6) "How Do Children Develop Knowledge: Beliefs of Tanzanian and American Mothers" (Ann V. McGillicuddy-De Lisi and Subba Subramanian); (7) "Japanese Mothers' Ideas about Infants and Temperament" (David W. Shwalb, Barbara J. Descriptors—*Children, Family Programs, Fatherless Family, *Females, Individual Differences, Low Income Groups, *Poverty, *Public Policy, *Welfare Recipients, Welfare Services

Identifiers—*Aid to Families with Dependent Children, Reform Efforts, Self Sufficiency, Welfare Reform

Stories of living on welfare are told by five women

and their children. Each represents a group of women who use Aid to Families with Dependent Children. The reasons these women have turned to public aid, and their means of achieving self-sufficiency illustrate why welfare policy and family policy must be redefined to account for the differences among recipients. Their experiences explode many myths about welfare. It is shown that welfare is not generous, and that families on welfare remain below the poverty level. Most women on welfare are not long-term welfare dependents; half of all women who go on welfare will leave it within two years. Contrary to myth, women on welfare do not keep having children to increase their payments, and almost half of all women on welfare turned to it after a divorce. The implications of proposed reforms for women and children are discussed. Changes are needed, not just in welfare, but in other areas of family policy to enhance family life and to provide real protection for poor children. (SLD)

Identifiers—*Reform Efforts

A tension has long existed between Americans' intense faith in education and the slow pace of changes in educational practices. Citizens have attempted to improve the future by arguing about how to improve youth through education, but actual school reforms have rarely matched expectations. Why this situation has occurred, and why such resistance to change exists, are explored in this history of educational reform. This interpretation of educational reform blends political and institutional analysis. A political perspective shows how groups become mobilized to publicize problems, devise remedies, and secure the adoption of policies by school boards and legislatures. Understanding the actual implementation of reforms in schools requires insight into the distinctive institutional character of schools. Change in the daily interactions of teachers and students is the hardest and most important reform to achieve, but it can be accomplished. It will be essential to put aside the recent radical restriction of debate on public and social goals and to renegotiate a pluralistic conception of the public good. (SLD)

Identifiers—*Chicago Public Schools II, *Local School Councils, Reform Efforts

The Chicago (Illinois) School Reform Act of 1988 set in motion a chain of reform efforts that have been the subject of considerable study. The plan emphasizes returning control of the schools to parents and the community through school-based management and local school councils. This book reports on studies of the implementation of the re-

form effort, and shares successes and failures of many participants in trying to reshape an ineffective urban school system. Part 1 presents a detailed account of the implementation and outcomes of the Chicago reform effort, with a chronology and some case studies. Part 2 challenges local, state, and national policy and fundamental assumptions about urban schools and at-risk students. How to adapt traditional assumptions to result in school restructuring is explored. The radical initial efforts of the Chicago plan appear to be laying the groundwork for more ordinary, incremental change and restructuring. It is still too soon for the last word on the Chicago experience, but change is occurring. Appendix A discusses monitoring the reform effort, and Appendix B explores the financial aspects of the reform effort. (Contains 2 text tables, 7 tables and 5 figures in Appendix B, and 216 references.) (SLD)

This book provides educators and other interested readers with an overview of the most recent developments and changes in the field of gender and mathematics. The overview is grounded in a model for understanding how change occurs. The model, developed by P. McIntosh (1983), arose from the examination of efforts in North America to liberate mathematics from a male-dominated Eurocentric world view and to develop a more inclusive curriculum. An introductory chapter describes the McIntosh model, which moves from "womanless mathematics" through stages to a reconstructed mathematics. Twenty-six additional chapters are grouped into the following sections: (1) "Intervening with Female Students"; (2) "Working with Female Teachers"; (3) "Focusing on Practicing Teachers"; (4) "Educating the Public"; (5) "Comparative Studies"; (6) "Cultural Perspectives"; (7) "Feminist Pedagogy in Mathematics Education"; and (8) "Changing the Discipline." References follow each chapter. (Contains 1 figure and 22 tables.) (SLD)

Identifiers—*Florida (Fort Lauderdale)
In 1992, Pine Crest School, an independent school in Fort Lauderdale (Florida) combined with three other independent schools in Broward County to form the Greater Fort Lauderdale Consortium and to build on their previous experience with summer programs to develop a summer enrichment program for low income high school students. The program, "Gain the Edge," served 180 students over 3 years. Each campus offered a 6-week enrichment program in mathematics, English, and a third subject varying by school at no cost to the student. A recurring theme for all the schools was that when teachers taught what they loved, a message was sent to students about developing a sense of pleasure in learning. Overall, the schools were most successful in the aspects of the project that came closest to their specialties: conveying a sense of pleasure in learning, teaching self-discipline in relation to study, providing individual attention, and developing skills for applying to college. Their results in relating to the public schools and to the business community were more mixed, with some failures in

obtaining financial support. The joint functions of the Consortium are also described. (SLD)

Identifiers—*Education Consolidation Improvement Act Chapter 1, Middle School Students, *Saginaw City School System MI

The school district of the City of Saginaw operates a supplemental educational delivery Chapter 1 system in reading and mathematics, the Elementary Compensatory Education (CE) program and the Secondary CE program. The elementary CE, a push-in program operating in the regular classroom and a pull-out program (periodically taking students out of regular classrooms), served 2,475 students in grades 1 through 5. The secondary CE is a self-contained classroom program that involved approximately 542 students in grades 6 through 8. Broad goals were to provide intensive academic instruction, to involve parents, to supply incentives for academic achievement, to measure academic growth, and to prepare students for the general classroom. The greatest achievement gains were made at the junior first and first-grade levels, with mathematics gains greatest at grade two. Reading test scores improved, and the advanced mathematics scores improved, although no data were available for comparison for basic mathematics. Recommendations are made for program improvement. Five appendices provide supplemental information about participants, their achievement, and the achievement of students in the Help One Student To Succeed mathematics program. (Contains 5 tables in the text, 14 tables in the appendices, and 1 reference.) (SLD)

Descriptors—Academic Achievement, *Children's Rights, Citizenship Education, Court Litigation, Elementary Secondary Education, *Freedom of Speech, Intellectual Freedom, *Public Schools, *Student Rights, Values, *Values Education

Identifiers—*First Amendment

The extent to which public school students deserve First Amendment rights and the values and interests regarding public schooling that should limit student free speech are explored. Eight chapters are entitled: "Pursuing Excellence and Order"; "The Emergence of Children's Rights"; "Free Speech and Public Education"; "A Focused Balancing Alternative"; "Tolerating Student Speech"; "Assisting Student Expression"; "Access to Information and Ideas"; and "A Matter of Degree." The dual pursuits of academic excellence and classroom order often inflame conflicts between students and school officials, and may result in litigation. The public education, children's rights, and free speech literature provide the background for a discussion of the complexities of student free speech issues. The synthesis of this literature and examination of recent court decisions provide a framework for thinking about student free speech, along with specific guidelines for granting students First Amendment protection. Children require a healthy mix of protection and autonomy. It must also be recognized that the inculcative function, the transmission of

values, plays a vital role in public schooling. The First Amendment should curb excesses of the inculcative function, but it should not unduly infringe on the legitimate and essential role of the transmission of values in public education. (SLD)

Descriptors—*Attitude Change, Beliefs, *Blacks, Democracy, Elementary Secondary Education, *Equal Education, Ethnic Groups, Justice, Low Achievement, Multicultural Education, Power Structure, Racial Bias, *Racial Discrimination, Racial Relations, *Social Structure, *Whites

This book is about the uprooting of racism, explaining how individual beliefs and actions need to be reexamined in order for people to participate effectively in that uprooting. It serves as an invitation to join the tradition of white people who have been committed to ending the effects of racism. The first step is for white people to talk together and to explore the fact that whiteness is a many faceted phenomenon, a fiction that seeks to protect the power that accrues to white people. Following the examination of what whiteness means in our society, there is an exploration of the dynamics of racism and a discussion of what it can mean to be an

ally of people of color. The effects of history are reviewed, and some ideas are given for fighting institutional racism. Of particular interest is the discussion of racism in education and the schools and the problems of educational inequity and low academic achievement. How to promote democratic and antiracist multiculturalism is the focus of the final chapter. Exercises and assignments are given to complement the chapters, with questions and actions devoted to major ethnic groups. (Contains 285 references.) (SLD)

Descriptors—Adolescents, Census Figures, Demography, *Early Parenthood, *Educational Attainment, Elementary Secondary Education, *Employment Patterns, *Enrollment, Financial Support, High School Graduates, Socioeconomic Status, Urban Schools, *Urban Youth, *Young Adults

Identifiers—*New York (New York)

This study describes New York City's population of 16-to-24-year-olds using data from the 1990 Census' Public Use Microdata Sample. Selected characteristics pertaining to the education and employment of these young adults are examined, and information is given about the school and work status of youth in the city according to various demographic variables. Nearly three quarters of New York city's young adults are U.S. born, and more than half are enrolled in school. Of the 55.1% who are labor force participants, 9.7% are unemployed. Only 22% work full time exclusively, and 20% are not enrolled and are not working. In the older segment of this population, 1 in 10 is not a high school graduate, not in school, and not working. These groups of marginal young people require special training and employment programs. For nearly 10% of the young women, motherhood is an early reality, and premature childbearing is an apparent deterrent to both education and employment. Programs to prevent adolescent pregnancy and encourage high school completion are critical. The picture of New York city's youth supports arguments for continued public spending in their interest. Four appendixes discuss data limitations, provide a glossary, and present four additional tables of data about the city's youth. (Contains 31 figures, 20 tables, and 25 references.) (SLD)

Identifiers—Europeans, *Language Minorities, Middle East, New York (New York), New York City Board of Education

This report describes the major linguistic minority groups residing in New York (New York). Hispanics are the largest language minority in the city. In 1990, nearly one-quarter of the city's population was of Hispanic origin, and 35% of school children were Hispanic. The Latino population continues to grow through natural increase and immigration. Since 1965, the Asian population has been growing steadily, and by 1990, Asians as a whole represented the second largest group of language minorities in

New York city. Immigrants from Asia were likely to speak English less well than members of other immigrant groups. Haiti ranks fifth among countries sending immigrants to New York, and, in 1989, there were more than 6,000 Haitian-Creole-speaking students in the city's public schools. A number of European immigrants, notably Soviet Jewish refugees, are among the limited English speaking students the city's schools serve. There are also significant numbers of language-minority students from the Middle East. The number of New Yorkers for whom English is not the primary language is expected to grow over the next decade, and some projections indicate that by the year 2000, over half the city's population will have been born outside the United States. The city must plan for a linguistically diverse population. (Contains 2 tables, 43 figures, and 39 references.) (SLD)

Project VIP (Violence Is Preventable) is a comprehensive research-based program designed to help children and young adults make smart choices about violence. It emphasizes the use of student-centered approaches to help develop strategies for conflict resolution and for avoiding violence. The student book is a workbook with a number of activities; the "Leader's Guide" provides resources the teacher or leader can use to implement the project effectively. Level 1, aimed at students aged 8 to 12 years, introduces violence and its causes and effects. Students learn conflict resolution strategies and practice them in age-appropriate activities. Awareness of media coverage of violence is included. The "Leader's Guide" contains a letter introducing the program to parents, support for the student book, and a reproducible certificate of achievement for program completers. (SLD)

Identifiers—Choice Behavior

Project VIP (Violence Is Preventable) is a comprehensive research-based program designed to help children and young adults make smart choices about violence. It emphasizes the use of student-centered approaches to help develop strategies for conflict resolution and for avoiding violence. The student book is a workbook with a number of activities; the "Leader's Guide" provides resources the teacher or leader can use to implement the project effectively. Level 3, designed for students aged 14 to 18 years, helps students analyze patterns in school and community violence and become proactive by planning and implementing a school- or community-based violence prevention program. The "Leader's Guide" contains resources to help the adult leader or teacher implement the age-appropriate activities for teens. A letter is enclosed to introduce the program to parents, and a certificate of completion is included. (SLD)

Identifiers—Congress 103rd, *Gun Control

The first of several hearings on the Gun Violence Prevention Act of 1994 introduced and discussed the Act as comprehensive legislation to address gun violence through six discrete initiatives: (1) handgun licensing; (2) prohibition of firearms possession by persons convicted of violent misdemeanors; (3) regulation of gun dealers; (4) limitation of the secondary gun market; (5) requirement of gun safety courses; and (6) banning certain types of guns. Support for the bill was presented by the presiding senators, Paul Simon (Illinois) and Howard Metzenbaum (Ohio). Reservations about the necessity for the legislation, but not about the need for reduction in violence, were expressed by Senators Hank Brown (Colorado) and Orrin Hatch (Utah). A number of speakers supported the bill, with the Surgeon General Joycelyn Elders speaking first. Panel discussions with educators and physicians followed.

The testimony of each witness is followed by his or her prepared statement. (SLD)

de Acosta, Martha
Reconsidering the Role of Community in Home-School Links: Implications for Research and Practice. Occasional Paper #14.

Cleveland State Univ., OH. Urban Child Research Center.

Pub Date—Aug 94

Note—26p.

Pub Type—Information Analyses (070) — Reports - Evaluative (142)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Ancillary School Services, Community Cooperation, *Community Development, Community Involvement, Educational Practices, Educational Research, Elementary Secondary Education, *Family School Relationship, *Partnerships in Education, *School Community Relationship, School Role, Social Support Groups, *Urban Education

Identifiers—School Based Services

Current research on the relationship between home, school, and community is reviewed and juxtaposed to perspectives on communities developed by scholars of families and child development, community developers, and urban sociologists. Research findings suggest the importance of learning more about the communities in which family involvement projects are located. Researchers and school staff should become part of community mapping efforts, which would not only strengthen the links between schools, universities, and the community, but would also provide rich information about community assets. The current work of community developers suggests that looking at the school from the vantage point of the community shows it to be an essential player in community redevelopment. Partnerships between schools and businesses and community agencies have been one of the most studied aspects of community involvement in schools. Researchers now need to focus on the various kinds of school-based comprehensive services being started across the United States. In addition, the social networks families use to assist them in their relationships with schools should be explored. (Contains 65 references.) (SLD)

Descriptors—*Academic Achievement, Attendance, Comparative Analysis, Dropouts, *Educational Change, Educational Improvement, Educational Objectives, Educational Status Comparison, Educational Trends, Elementary Secondary Education, *High School Graduates, *Low Achievement, Outcomes of Education, *Urban Schools

Identifiers—*Cleveland Public Schools OH, *National Education Goals 1990

An assessment of the educational status of children and youth attending Cleveland (Ohio) public schools was conducted through analysis of recent trends in the district and a comparison of the performance of students in the Cleveland schools with that of students in other large urban districts, Atlanta (Georgia), Boston (Massachusetts), and San Francisco (California). Goals for educational reform established in Cleveland in its Vision 21 plan were closely aligned with the national urban education goals and the six national education goals defined in 1990. These goals provided the framework for the evaluation of the status of Cleveland school children. Comparing them with students in the other three urban districts made it apparent that Cleveland students fared below average on five of six national education goals and were evidently performing considerably below the national average. Knowing that Cleveland students lag in achievement, attendance, and graduation rates is not enough to bring about improvement. More specific data on how instruction is being conducted at present is required in order to design changes that will promote student outcomes that indicate compe-

tence and mastery. (Contains 13 tables and 15 references.) (SLD)

Fossey, Richard
African American Students in East Baton Rouge Parish: How Have They Fared in Desegregated Schools?

Pub Date—25 Jan 96

Note—17p.; Paper presented at the Annual Meeting of the Southwest Educational Research Association (New Orleans, LA, January 1996).

Pub Type—Reports - Evaluative (142) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Academic Achievement, *Black Students, *Desegregation Effects, Desegregation Litigation, Educational Environment, Educational History, Elementary Secondary Education, *High School Graduates, *Racial Integration, Resource Allocation, *School Resegregation, Special Education, Suspension

Identifiers—African Americans, *East Baton Rouge Parish School System LA

Three generations of children have passed through the Baton Rouge (Louisiana) school system since the "Brown" decision (1954) and one generation since the federal court's 1981 desegregation order. The impact of school desegregation on African American children was studied in the East Baton Rouge School District. For the student body as a whole, graduation rates have declined slightly, stabilizing at about 60%. African American graduation rates have ranged from 50 to 65% over the time period. African American students have been, and remain, far more likely to be suspended than any other race. About half the African American students attending district middle schools in 1992-93 received at least one suspension. African American students are disproportionately represented in district special education programs. Racial isolation is increasing in the schools, with predominantly white gifted and talented students in one set of classes and the general school population, largely African American, in another set of classes. Increasing amounts of human and financial resources are being poured into the district, but it is evident that conditions have not improved for African American students in Baton Rouge. Findings suggest that now is the time to reexamine the way African American students are being educated in Baton Rouge. (Contains 13 references.) (SLD)

Descriptors—Cooperation, Criteria, Elementary Secondary Education, Experience, Foreign Countries, *Information Dissemination, Information Networks, International Cooperation, *International Educational Exchange, *Policy Formation, Program Development, Public Policy, Youth Problems, *Youth Programs

Identifiers—Contextualism, Research Replication, Stakeholders, Universalism

This paper reviews the key issues and methodologies involved in the effort to internationalize youth policies and programs so that the exchange of information and experience could provide useful ideas for others. Related general processes of knowledge transfer and dissemination and the more specific strategies involved in replication and going-to-scale are examined. Section 2 provides a discussion of the global commonalities and local specificities of youth issues. Section 3 emphasizes the need for a corresponding international connectedness in developing responses as well as the possibility of learning from each other. Different approaches to these issues and related strategies are reviewed in sections 4 through 8, where a distinction is explicitly drawn between the universalist and the contextualist schools. The final section lists criteria for guiding practices with respect to coordinated policy formation and action.

These criteria stress the importance of networking and the involvement of stakeholders. (Contains 59 references.) (SLD)

Descriptors—Community Change, Employment Opportunities, *Employment Patterns, *Geographic Location, *Inner City, Low Income Groups, *Mobility, Neighborhood Improvement, Poverty, Public Policy, *Suburbs, *Urban Areas, Urban Renewal, Urban Youth

The suburbanization of employment is examined as a key change in metropolitan settlement structure. Settlement structure refers to the physical landscape of the city and the social landscape of boundaries and routes. The study seeks a middle ground between the breadth of a national study and the depth of a local study. Conditions that characterize contemporary urban policy in the United States are reviewed as a prelude to detailed information on the changing location of employment in a group of large metropolitan areas. A third section discusses the implications for antipoverty strategy of poverty concentration and job suburbanization. A powerful metropolitan pattern of poverty at the center, with opportunity only at the edge, is emerging, giving the search for antipoverty strategies a profoundly geographic character. The three basic strategies that have been attempted so far are dispersal of the poor from the city centers, development of the inner city, and providing for the mobility of inner city residents to enable them to reach jobs. The last alternative deserves a demonstration trial as part of a comprehensive approach to residence and employment patterns. (Contains 64 figures.) (SLD)

Identifiers—*Urban Corps

The Urban Corps Expansion Project (UCEP) enrolls youth aged 18 to 23 who have been unsuccessful in the labor market. They are paid a combination of wages, stipends, and incentives that is at least equal to the minimum wage for at least 25 hours of work and 9 hours of basic education and life skills instruction each week. The program incorporates an assessment package to evaluate its key elements, the Urban Corps Assessment Package (URCAP). This URCAP manual describes the four complementary survey instruments developed for the URCAP. They are the: (1) youth survey; (2) staff report; (3) staff survey; and (4) director's report. The underlying theory and the development of these measures are reviewed, and the scales are presented with supporting psychometric evidence. Appendixes present descriptive statistics on scale items (16 tables), correlations among scales (11 tables), and preliminary evidence from a field test of a model of engagement (1 table). (Contains 24 text tables and 63 references.) (SLD)

Descriptors—Classroom Techniques, Cooperating Teachers, Educational Innovation, Faculty Mobility, Interpersonal Relationship, Mentors, Secondary Education, *Secondary School Teachers, *Student Teachers, *Teacher Education, Teacher Supply and Demand, Teaching Methods, Urban Schools, *Urban Teaching

The inadequate preparation of urban teachers contributes to the high rate of teacher attrition in city schools. This paper describes an attempt to alleviate the rapid turnover of urban teachers through a project that helped secondary urban student teachers become effective. In the spring semester of 1993, a teacher educator, an Urban Practicum Advisor (UPA), led seminars and worked with one male and six female student teachers. The UPA was a consultant and support person and served as an adjunct to each student teaching triad of student teacher, secondary school, and school of education. Seminars throughout the semester focused on classroom management techniques. Cooperating teachers found these student teachers to be effective classroom managers, and student teachers appreciated the work of the UPA and found the program helpful. Students also appreciated that their relationships with the UPA were volitional and free of organizational demands for evaluation or supervision. All participants felt that the UPA provided a wider variety of methods and techniques for dealing with issues of urban classroom management than did their college supervisors. (SLD)

Identifiers—Tolerance

The changing demographics in the United States have contributed to the increase of the preexisting multicultural nature of the American society. To actively participate in their meaningful civic function, individuals need to be more sensitive to the contextual demands of the communicative event as they relate to language, culture, ethnicity, and race. This will in turn reduce prejudice and promote tolerance, foster understanding and enhance communication, facilitate socialization and increase harmony, and augment appreciation of diversity in the pluralistic society. In particular, today's classrooms, as a microcosm of the whole diverse society, present teachers with the challenging task of cultivating culturally diverse communication patterns and maintaining a meaningful interaction in the learning/teaching environment. Thus teachers must be keenly aware of different interactional patterns brought in to the classroom and be sensitive to the communication styles of their students. This paper explores these issues and presents pedagogical implications for promoting an ambience conducive to learning in culturally diverse environments. (Contains 25 references.) (Author)

Descriptors—*Adolescents, Community Characteristics, *Crime, Educational Objectives, Prevention, Private Schools, Public Schools, Racial Relations, Safety, Secondary Education, *Secondary School Students, *Student Surveys, *Urban Problems, *Violence, Youth Problems

A survey considered young people's attitudes toward crime and violence and community service. The survey was based on a sample of 2,023 public, private, and parochial school students in grades 7 through 12, including a representative sample of urban students. The majority felt safe in their communities, but many did not always feel safe. Twenty-nine percent were worried about drive-by shootings. More than one in three thought crime was a serious problem in their communities, and three in four believed conditions were not changing or were growing worse. Racial tensions and violence were perceived to be bigger problems in urban areas. Seven in 10 either did not know or did not think they could do anything to help prevent crime in their neighborhoods. In addition, teens were often ambivalent about the roles of different social institutions in their communities. Three out of four, across race and location, said that going to college, saving money, having career goals, and having a family are very important. Overall, the survey demonstrated that awareness and fear of crime influence the behaviors of large numbers of young people. Four appendixes discuss survey methodology and present the questionnaire. (Contains 54 text tables, 6 tables in Appendix B, and 2 tables in Appendix C.) (SLD)

Subject Index

This index lists titles of documents under the major subject terms that have been assigned to characterize their contents. The subjects, which conform to those presented in the *Thesaurus of ERIC Descriptors* and the *Identifier Authority List*, are in word-by-word alphabetical order.

As shown in the examples below, the accession number is displayed below and to the right of the document title. Additional information about the document can be found under that number in the resume section.

The symbol // appearing after an accession number identifies a document that is not available from the ERIC Document Reproduction Service and that is not in the ERIC Microfiche Collection.

Author Index

This index lists documents under the name(s) of their author(s). The index is arranged in alphabetical order by the person's last name.

As shown in the example below, the accession number is displayed below and to the right of the title. Additional information about the document can be found under that number in the resume section.

The symbol // appearing after an accession number identifies a document that is not available from the ERIC Document Reproduction Service and that is not in the ERIC Microfiche Collection.

Author ————	McKeachie, Wilbert J.	
	Teaching Tips: A Guidebook for the Beginning College	
Title ————	Teacher, Eighth Edition.	
	ED 298 813————	Accession Number

Institution Index

This index lists the titles of documents under the institution responsible for them and/or the agency sponsoring them. The index is arranged in alphabetical sequence by the name of the university, agency, association, etc. Names beginning with the word "University" have generally been inverted in order to provide a more distinctive entry, e.g. Wisconsin University (for the University of Wisconsin).

As shown in the example below, the accession number is displayed below and to the right of the title. Additional information about the document can be found under that number in the resume section.

The symbol // appearing after an accession number identifies a document that is not available from the ERIC Document Reproduction Service and that is not in the ERIC Microfiche Collection.

Institution	American Association of State Colleges and Universities, Washington, DC. Planning Now for College Costs: A Guide for Families.	ED 298 804 — Accession Number
Title

This index lists documents under the Publication Type that has been assigned to them to characterize their form or organization, as contrasted to their subject matter.

As shown in the example below, the accession number is displayed below and to the right of the document title. Additional information about the document can be found under that number in the resume section. The symbol // appearing after an accession number identifies a document that is not available from the ERIC Document Reproduction Service and that is not in the ERIC Microfiche Collection.

The Publication Types are displayed in a classified index arrangement, according to the outline below.

Code	(052) Guides - Classroom - Teacher	Publication Type

Work and Family: The Crucial Balance = Travail et la Famille: Un Equilibre Delicat.
- ED 391 129

Clearinghouse Number/ED Number Cross-Reference Index

This index cross-references the temporary ERIC Clearinghouse accession number to the permanent ERIC Document (ED) accession numbers by which resumes are arranged in *Resources in Education (RIE)*. Readers who have only Clearinghouse numbers for a given document may use this index to trace the item to this ED number and hence to its location in *RIE*.

The symbol // appearing after an accession number identifies a document that is not available from the ERIC Document Reproduction Service and that is not in the ERIC Microfiche Collection.

The following Clearinghouse prefixes are used in this index.

AA — ERIC Processing and Reference Facility	JC — Community Colleges
CE — Adult, Career, and Vocational Education	PS — Elementary and Early Childhood Education
CG — Counseling and Student Services	RC — Rural Education and Small Schools
CS — Reading, English, and Communication	SE — Science, Mathematics, and Environmental Education
EA — Educational Management	SO — Social Studies/Social Science Education
EC — Disabilities and Gifted Education	SP — Teaching and Teacher Education
FL — Languages and Linguistics	TM — Assessment and Evaluation
HE — Higher Education	UD — Urban Education
IR — Information and Technology

THESAURUS ADDITIONS AND CHANGES

279

The following additions and modifications have been made to the ERIC controlled vocabulary since December 1994. They are, therefore, not included in the main body of the 13th (1995) edition of the *Thesaurus of ERIC Descriptors*.

Academic Senates (Colleges)

USE COLLEGE GOVERNING COUNCILS (unqualified use reference "Academic Senates" was deleted)

AMERICAN DREAM

SN The ideals of freedom, equality, and opportunity traditionally held to be available to everyone in the U.S.—also, the popular belief that perseverance and hard work in the U.S. will bring forth happiness, success, and material well-being

BIRTHS TO SINGLE WOMEN

UF Illegitimacy
Illegitimate Births (1967 1995)
Nonmarital Childbirth
Out of Wedlock Births
Single Mother Births
Unmarried Mother Births

CAREER ACADEMIES

SN Schools-within-schools (usually high-school level) focusing on broadly defined career themes (health careers, electronics, etc.), with highly integrated academic and vocational curricula and active involvement of local employers
UF High School Academies (Career Development)
Job Training Academies
Partnership Academies (School and Business)
Vocational Academies

CHARTER SCHOOLS

SN Public schools run by groups of parents, teachers, and administrators under contract with local or state school boards, and given broad freedom from regulations in exchange for the promise of such favorable outcomes as improved test scores, attendance rates, and dropout rates

CHILDREN'S WRITING

SN Writing by, not for, children (note: see also the Identifiers "Beginning Writing" and "Early Writing")

COMPREHENSIVE SCHOOL HEALTH EDUCATION

SN Sequential programs of health instruction, health services, and healthful school environments that enable students in kindergarten through grade 12 to develop the awareness, knowledge, and skills needed for healthy behaviors—health areas covered include mental and emotional health, community and environmental health, consumer health, family life, growth and development, nutrition, personal health and fitness, safety and accident prevention, disease prevention and control, and substance use and abuse
UF Comprehensive School Health Programs

CULTURAL RELEVANCE

SN Applicability of materials, methods, or programs to one's own ethnicity, social status, gender, religion, home and community environment, and/or personal experiences (note: if possible, use the more specific term "Culturally Relevant Education")
UF Relevance (Cultural)

CULTURALLY RELEVANT EDUCATION

SN Educational practices and resources that reflect the culture, values, customs, and beliefs of students (i.e., help to connect what is to be learned with the students' own lives)
UF Culturally Appropriate Education
Culturally Responsive Education
Culture Based Curriculum

DOCUMENT DELIVERY

SN Transmission of a print or electronic document, such as a journal article, from a vendor or a library to the requestor—may be fee-based or free

DROUGHT

SN Climatic period(s) of extreme dryness, in which natural water supplies are insufficient for plant life and other needs (note: see also the Identifier "Desertification")

EMERGENT LITERACY

SN The early stages of learning to read and write — an increasing awareness of the print world, usually associated with young learners observing and experimenting with reading and writing processes (note: in the 1980s, the emergent literacy perspective was a departure from the more traditional stage view of reading/writing readiness followed by formal learning)
UF Early Literacy

ENGLISH ONLY MOVEMENT

SN Efforts to make English the single official language of a government or other group (commonly, of the nation and states of the U.S.A.)

ENGLISH TEACHERS

SN Teachers of English-language arts and letters (note: may be coordinated with "English (Second Language)" for teachers of English as a second language)

Faculty Senates (Colleges)

USE COLLEGE GOVERNING COUNCILS (unqualified use reference "Faculty Senates" was deleted)

FLOODS

SN Bodies of water that overtop their natural or artificial confines and that cover areas not normally underwater

Government Policy

USE PUBLIC POLICY

Hands on Learning

USE EXPERIENTIAL LEARNING

HANDS ON SCIENCE

SN Science activities and programs that require active personal participation

HEALTH MAINTENANCE ORGANIZATIONS

SN Prepaid comprehensive medical service systems (note: see also the Identifier "Social Health Maintenance Organizations")
UF HMOs
Managed Care (HMOs)

HURRICANES

SN Tropical cyclones with high-speed winds equaling or exceeding 64 knots (73 mph)
UF Tropical Cyclones
Typhoons

Illegitimate Births (Del Dec95)

USE BIRTHS TO SINGLE WOMEN

INTERNET

SN The international network of computer networks interconnected by routers or gateways and using the standard TCP/IP telecommunications protocol to transfer data such as electronic mail—the Internet connects millions of users among industry, education, government, research, commerce, and private households (note: see also the Identifier "National Information Infrastructure" for documents related to the U.S. Government's Federal NII/Internet policy initiative)
UF Electronic Superhighway
Information Superhighway

JAPANESE CULTURE

Mar. 96

JOURNALISM RESEARCH

SN Basic, applied, and developmental research conducted to advance knowledge about journalism (note: use as a minor Descriptor for examples of this kind of research—use as a major Descriptor only as the subject of a document)

NATIONAL TEACHER CERTIFICATION

SN Use of nationwide competency assessment and testing to certify teachers (Note: Do not confuse with the Identifier "National Teacher Examinations," which is a specific test series published by the Educational Testing Service)
UF National Certification (Teaching)

NURSERY RHYMES

SN Short rhymed poems or songs for children that often tell a story
UF Mother Goose Rhymes

OUTCOME BASED EDUCATION

SN The effort, often by a state or local education agency, to organize all the features of schooling (including aims, curriculum, instruction, and assessment) so as to produce specifically delineated results (often including noncognitive as well as cognitive results) and generally with the expectation that all students will demonstrate such results
UF OBE
Outcomes Based Education
Results Based Education

PACIFIC ISLANDERS

SN Indigenous peoples of Micronesia, Polynesia, and Melanesia, and their descendants (note: use the more specific term "Pacific Americans," if appropriate—see also the geographic Identifiers "Pacific Islands" and "Oceania")

PAPAGO

SN (Scope Note Added) The Uto-Aztecan language of the Tohono O'odham nation of American Indians—related to Pima, the two languages are sometimes referred to collectively as O'odham, the Papago and Pima word for "people"

PARENTS WITH DISABILITIES

SN Parents who have a disability or impairment of any type
UF Disabled Parents

PERFORMANCE BASED ASSESSMENT Apr. 96

SN Evaluation of achievement, learning, etc., that requires direct demonstration of knowledge and skills via the construction of responses, and for which scoring can be based on the processes of the response construction as well as the final product—typically, performance-based assessments are designed to elicit and strengthen examinees' critical-thinking skills, problem-solving strategies, self-evaluation skills, and other higher-order thinking skills (note: do not confuse with "Performance Tests," whose usage is restricted to evaluations of manual manipulations and body movements—see also related Identifiers "Alternative Assessment," "Authentic Assessment," and "Direct Assessment"—prior to Apr96, the Identifier "Performance Based Evaluation" was used to index this concept)

UF Performance Assessment (Higher Order Learning)
Performance Based Evaluation

PERFORMANCE TESTS Jul. 86

SN (Scope Note Changed) Tests that require the manipulation of objects or skilled bodily movements (note: do not confuse with "Nonverbal Tests," which minimize the use of language but may not emphasize the manipulation of objects or skilled movement—prior to Mar80, the use of this term was not restricted by a scope note—use "Performance Based Assessment" for "higher-order" performance testing)

UF Performance Assessment (Skilled Bodily Movements)

PETS Mar. 96

SN Animals kept for pleasure and companionship (note: coordinate with individual animals as appropriate, e.g., Descriptors "Birds," "Horses" or Identifiers "Cats," "Dogs")

UF Companion Animals

POPULAR MUSIC Jan. 96

SN Music enjoyed by the general public and commonly disseminated via the mass media (note: prior to Jan96, this concept was frequently indexed by "Popular Culture" coordinated with "Music" terms)

UF Pop Music

POSTTRAUMATIC STRESS DISORDER Oct. 95

SN Acute or chronic delayed reaction to highly stressing events such as military combat, sexual assault, childhood abuse, natural disasters, unexpected deaths, and life-threatening accidents—symptoms include anxiety, depression, intrusive recollections, and emotional detachment

UF Post Traumatic Stress Syndrome
Posttraumatic Neurosis
PTSD

PUBERTY Dec. 95

SN Period of life at which the individual reaches sexual maturity and is capable of reproduction (note: see also the Identifier "Puberty Rites")

RAINFORESTS Apr. 95

SN Woodlands of dense, mainly broad-leaved evergreen trees in areas of high annual rainfall (note: coordinate with Identifiers "Deforestation," "Tropics," etc., as appropriate)

UF Rain Forest Preserves
Temperate Rainforests
Tropical Rainforests

READING MOTIVATION Nov. 95

SN The arousal, direction, and sustaining of reading interest and activity for work, school, pleasure, or other purpose

SCHOOL CULTURE Feb. 96

SN Patterns of meaning or activity (norms, values, beliefs, relationships, rituals, traditions, myths, etc.) shared in varying degrees by members of a school community

Self Centeredness

USE EGOCENTRISM

Semiology

USE SEMIOTICS

SERVICE LEARNING Mar. 96

SN Learning through community service (or public service in a wider sphere), usually integrated with regular instruction in school or college (note: see also related Identifiers "Community Service," "Youth Community Service," and "National Service")

UF Community Service Learning

SOCIOLOGISTS Feb. 96

SN Scholars who systematically study and critique the development, structure, functioning, and dilemmas of human society

TEACHERS WITH DISABILITIES Apr. 96

SN Teachers who have a disability or impairment of any type

UF Disabled Teachers

TECH PREP Mar. 95

SN Sequential programs of study that integrate preparation for technical careers with academic education in a highly structured and closely articulated secondary and postsecondary curriculum, leading to a minimum of an associate degree or 2-year certificate in a specific career field

UF Two Plus Two Tech Prep

TOHONO O ODHAM PEOPLE Dec. 95

SN A desert-dwelling American Indian people of southern Arizona and the province of Sonora in northwest Mexico (also, dispersed kin)

UF Papago (Tribe)

TORNADOES Nov. 95

SN Violently rotating storms, usually visible as funnel clouds, with wind speeds of 100-200 mph and causing considerable destruction when touching ground—most common in the U.S. and Australia

Two Plus Two Tech Prep Associate Degrees

USE ASSOCIATE DEGREES
and TECH PREP

WORKPLACE LITERACY Feb. 96

SN Reading, writing, computation, and communication skills performed in the context of job tasks

UF Job Literacy
Job Related Literacy
Occupational Literacy

Submitting Documents to ERIC

What Kinds of Documents to Send ERIC

ERIC would like to be given the opportunity to examine virtually any document dealing with education or its aspects. The ERIC audience is so broad (encompassing teachers, administrators, supervisors, librarians, researchers, media specialists, counselors, and every other type of educator, as well as students and parents) that it must collect a wide variety of documentation in order to satisfy its users. Examples of the kinds of education-related materials collected are the following:

- Research/Technical Reports
- Program/Project Descriptions
- Opinion Papers, Essays, Position Papers
- Monographs, Treatises
- Speeches and Presentations
- Evaluation Studies
- Feasibility Studies
- State of the Art Studies
- Instructional Materials
- Syllabi
- Teaching Guides
- Resource Guides
- Manuals
- Handbooks
- Curriculum Materials
- Conference Papers
- Bibliographies
- Legislation and Regulations
- Texts, Questionnaires, Measurement Devices
- Vocabularies, Dictionaries, Glossaries, Thesauri
- Statistical Compilations
- Taxonomies and Classifications
- Dissertations

ERIC does not accept non-print materials (such as films, filmstrips, videotapes, tapes, records, cassettes, etc.). However, if such material accompanies a printed text, ERIC may process the printed text and refer the user to the accompanying non-print components, as long as a source of availability for them can be cited.

A document does not have to be formally published to be entered into the ERIC database. In fact, ERIC seeks out the unpublished or "fugitive" material not usually available through conventional library channels.

Selection Criteria Employed by ERIC

• QUALITY OF CONTENT

All documents received are evaluated by subject experts against the following kinds of quality criteria: contribution to knowledge, significance, relevance, newness, innovativeness, effectiveness of presentation, thoroughness of reporting, relation to current priorities, timeliness, authority of source, intended audience, and comprehensiveness.

• LEGIBILITY AND REPRODUCIBILITY

Documents may be type-set, typewritten, xeroxed, or otherwise duplicated. They must be legible and easily readable. Letters should be clearly formed and with sufficient contrast to the paper background to permit filming. Colored inks and colored papers can create serious reproduction problems. Standard 8½"x-11" size pages are preferred.

Two copies are desired, if possible: one for processing into the system and eventual filming, the other for retention and possible use by the appropriate Clearinghouse while processing is going on. However, single copies are acceptable.

• REPRODUCTION RELEASE

For each document submitted, ERIC requires a formal signed Reproduction Release form indicating whether or not ERIC may reproduce the document. A copy of the Release Form appears as a separate page in each issue of this journal. Additional Release Forms may be copied as needed or obtained from the ERIC Facility or any ERIC Clearinghouse. Items for which releases are not granted, or other non-reproducible items, will be considered for announcement only if they are noteworthy education documents available from a clearly identified source, and only if this information accompanies the document in some form.

Items that are accepted, and for which permission to reproduce has been granted, will be made available by the ERIC Document Reproduction Service (EDRS).

Advantages of Having a Document in ERIC

Contributors of documents to ERIC can benefit in the following ways:

- **Announcement**—Documents accepted by ERIC are announced to some 2,000 organizations receiving the abstract journal *Resources in Education (RIE)*.
- **Publicity**—Organizations that wish to sell their own documents in original copies can have this availability (together with address and price information) announced to users in *RIE*, thus serving to publicize their product. After the document is sold out at the original source, it is then still available through EDRS, if permission to reproduce has been granted to ERIC. (Original copy prices, while the supply lasts, are generally less, and are therefore more attractive to users, than EDRS on-demand duplication prices).
- **Dissemination**—Documents accepted by ERIC are reproduced on microfiche and distributed (at no cost to the contributor) to the more than 800 current subscribers to the ERIC microfiche collection.
- **Retrievability**—The bibliographic descriptions developed by ERIC are retrievable by the thousands of subscribers to the online database retrieval services (offered by commercial vendors such as BRS and DIALOG). In addition there are thousands of locations offering computer searches of ERIC based on either compact disk (CD-ROM) systems (offered by DIALOG, and SilverPlatter) or other local computer-based systems.
- **Always "In Print"**—The presence of a master microfiche at EDRS, from which copies can be made on an on-demand basis, means that ERIC documents are constantly available and never go "out of print." Persons requesting copies from an original source can always be referred to ERIC. This archival function relieves the source of a distribution burden and solves the availability problem when the source's supply has been exhausted.

In addition, submission of a document to ERIC reduces the overall likelihood of overlap, redundancy, and duplication of effort among users. It increases the probability that the results reported in the document will be available indefinitely and used in subsequent efforts.

To encourage submission of documents to the system, ERIC offers to send contributors notice of document disposition, giving the ED identification number (for ordering purposes) of those documents selected for *RIE*. Additionally, ERIC will send a complimentary microfiche to each contributor when the document is announced in *RIE*.

There are no fees to pay in submitting documents to ERIC, nor does ERIC pay any royalties for material it accepts. Other than a statement concerning permission to reproduce, there are no forms to complete.

(OVER)

Where to Send Documents

Documents usually enter the ERIC system through one of two ways:

They may be sent to the Clearinghouse most closely related to their subject matter. A list of the Clearinghouses and their addresses appears on the inside back cover of this issue. Material is expedited if it is directed to the attention of "Acquisitions."

If it is uncertain which Clearinghouse is appropriate, materials may be sent to the following address:

ERIC Processing and Reference Facility
Acquisitions Department
1100 West Street, 2d Floor
Laurel, Maryland 20707-3596

The ERIC Facility will forward all submissions to the appropriate ERIC Clearinghouse for consideration and, if selected, processing.

U.S. Department of Education
Office of Educational Research and Improvement (OERI)
Educational Resources Information Center (ERIC)

REPRODUCTION RELEASE

(Specific Document)

I. DOCUMENT IDENTIFICATION:

Title:	
Author(s):	
Corporate Source:	Publication Date:

II. REPRODUCTION RELEASE:

In order to disseminate as widely as possible timely and significant materials of interest to the educational community, documents announced in the monthly abstract journal of the ERIC system, *Resources in Education* (RIE), are usually made available to users in microfiche, reproduced paper copy, and electronic/optical media, and sold through the ERIC Document Reproduction Service (EDRS) or other ERIC vendors. Credit is given to the source of each document, and, if reproduction release is granted, one of the following notices is affixed to the document.

If permission is granted to reproduce and disseminate the identified document, please CHECK ONE of the following two options and sign at the bottom of the page.

**Check here
For Level 1 Release:**
Permitting reproduction in microfiche (4" x 6" film) or other ERIC archival media (e.g., electronic or optical) and paper copy.

The sample sticker shown below will be affixed to all Level 1 documents

PERMISSION TO REPRODUCE AND
DISSEMINATE THIS MATERIAL
HAS BEEN GRANTED BY

TO THE EDUCATIONAL RESOURCES
INFORMATION CENTER (ERIC)

Level 1

The sample sticker shown below will be affixed to all Level 2 documents

PERMISSION TO REPRODUCE AND
DISSEMINATE THIS
MATERIAL IN OTHER THAN PAPER
COPY HAS BEEN GRANTED BY

TO THE EDUCATIONAL RESOURCES
INFORMATION CENTER (ERIC)

Level 2

**Check here
For Level 2 Release:**
Permitting reproduction in microfiche (4" x 6" film) or other ERIC archival media (e.g., electronic or optical), but not in paper copy.

Documents will be processed as indicated provided reproduction quality permits. If permission to reproduce is granted, but neither box is checked, documents will be processed at Level 1.

"I hereby grant to the Educational Resources Information Center (ERIC) nonexclusive permission to reproduce and disseminate this document as indicated above. Reproduction from the ERIC microfiche or electronic/optical media by persons other than ERIC employees and its system contractors requires permission from the copyright holder. Exception is made for non-profit reproduction by libraries and other service agencies to satisfy information needs of educators in response to discrete inquiries."

	E-Mail Address:	Date:

III. DOCUMENT AVAILABILITY INFORMATION (FROM NON-ERIC SOURCE):

If permission to reproduce is not granted to ERIC, or, if you wish ERIC to cite the availability of the document from another source, please provide the following information regarding the availability of the document. (ERIC will not announce a document unless it is publicly available, and a dependable source can be specified. Contributors should also be aware that ERIC selection criteria are significantly more stringent for documents that cannot be made available through EDRS.)

Publisher/Distributor:
Address:
Price:

IV. REFERRAL OF ERIC TO COPYRIGHT/REPRODUCTION RIGHTS HOLDER:

If the right to grant reproduction release is held by someone other than the addressee, please provide the appropriate name and address:

Name:
Address:

V. WHERE TO SEND THIS FORM:

Send this form to the following ERIC Clearinghouse:

However, if solicited by the ERIC Facility, or if making an unsolicited contribution to ERIC, return this form (and the document being contributed) to:

ERIC Processing and Reference Facility
 1100 West Street, 2d Floor
 Laurel, Maryland 20707-3598

Telephone: 301-497-4080

ETHIOPIAN PRICE GUIDE

This guide provides a comprehensive list of prices for various commodities in Ethiopia, including agricultural products, minerals, and manufactured goods. The prices are listed in Ethiopian Birr (ETB) and are subject to change based on market conditions. The guide is intended for use by traders, exporters, and importers to facilitate trade and pricing decisions.

Commodity				Price (ETB)			
Commodity	Grade	Price (ETB)		Commodity	Grade	Price (ETB)	
		Min	Max			Min	Max
Coffee	Arabica (Grade 1)	120.00	120.00	Sesame	White (Grade 1)	90.00	90.00
	Arabica (Grade 2)	110.00	110.00		White (Grade 2)	80.00	80.00
	Robusta (Grade 1)	80.00	80.00		White (Grade 3)	70.00	70.00
	Robusta (Grade 2)	70.00	70.00		White (Grade 4)	60.00	60.00
	Robusta (Grade 3)	60.00	60.00		White (Grade 5)	50.00	50.00
	Robusta (Grade 4)	50.00	50.00		White (Grade 6)	40.00	40.00
	Robusta (Grade 5)	40.00	40.00		White (Grade 7)	30.00	30.00
	Robusta (Grade 6)	30.00	30.00		White (Grade 8)	20.00	20.00
	Robusta (Grade 7)	20.00	20.00		White (Grade 9)	10.00	10.00
	Robusta (Grade 8)	10.00	10.00		White (Grade 10)	5.00	5.00
Wheat	Hard (Grade 1)	100.00	100.00	Maize	White (Grade 1)	80.00	80.00
	Hard (Grade 2)	90.00	90.00		White (Grade 2)	70.00	70.00
	Hard (Grade 3)	80.00	80.00		White (Grade 3)	60.00	60.00
	Hard (Grade 4)	70.00	70.00		White (Grade 4)	50.00	50.00
	Hard (Grade 5)	60.00	60.00		White (Grade 5)	40.00	40.00
	Hard (Grade 6)	50.00	50.00		White (Grade 6)	30.00	30.00

INTERNATIONAL CUSTOMERS

- Based on current international postage rates in effect
- Please contact EDRS for shipping estimate

GENERAL INFORMATION

- **DOCUMENT AVAILABILITY** — ERIC uses 3 codes to indicate the format in which a document is available
 - **Level 1** — available in both paper and microfiche
 - **Level 2** — available in microfiche only
 - **Level 3** — not available through EDRS; see "Available From" in the abstract for source information

- **EJ ARTICLES** — EJ articles are **NOT** available through EDRS. For copies contact:

- ISI (Institute for Scientific Information): 800-523-1850 or 215-386-0100
- UMI: 800-248-0360 or 415-433-5500

- **PAPER COPY (PC)** — A Paper Copy is a xerographic reproduction on paper from microfiche of the original document. Each paper copy has a Vellum Bristol cover to identify and protect the document.

PAYMENT

- Prices set forth herein do not include any sales, use, excise, or similar taxes that may apply to the sale of microfiche or paper copy to the customer. The cost of such taxes, if any, shall be borne by the customer.
- Payment terms are **NET THIRTY (30) DAYS** by check or money order payable to EDRS in U.S. DOLLARS drawn on a U.S. BANK.

- **REPRODUCTION** — Permission to further reproduce a copyrighted document provided hereunder must be obtained from the copyright holder, usually noted on the front or back of the title page of the copyrighted document.

- **CLAIMS POLICY** — **ALL SALES ARE FINAL.** EDRS will replace products returned within 30 days of delivery due solely to reproduction defects or incompleteness caused by EDRS.

DEPOSIT ACCOUNTS

Customers who have a continuing need for ERIC Documents may wish to open a **Deposit Account** as follows:

- **DOMESTIC CUSTOMERS:** By depositing a suggested minimum of \$200.00 or submitting an executed purchase order. If tax exempt, include a copy of the tax exempt certificate.
- **INTERNATIONAL CUSTOMERS:** By depositing a recommended minimum of \$300.00 in U.S. dollars drawn on a U.S. bank.

OTHER EDRS PRODUCTS

- Standing Orders and Backfiles for either the **FULL ERIC COLLECTION** or individual **CLEARINGHOUSE COLLECTIONS** are available.
- EDRS also offers **TOPICAL COLLECTIONS** in several subject areas.

For more information, please contact a Customer Service Representative.

HOW TO ORDER

Resources In Education (RIE)

Resources In Education (RIE) is a monthly abstract journal covering the document literature of education. It is published for the U.S. Department of Education by the U.S. Government Printing Office (GPO). RIE consists of twelve (12) monthly issues (each announcing over 1000 documents and indexing them by Subject, Institution, Personal Author, and Publication Type) and two (2) cumulative semiannual indexes (January-June, July-December). RIE is sold by GPO on subscription or as individual issues on-demand. Stock is retained for only approximately six months; issues older than that are generally not available from GPO. Orders from foreign sources cost 25% additional, as shown in the table below.

NOTE: The Semiannual Index to RIE has been discontinued; the last issue was the volume for July-December 1994.

RIE Product (Master Stock No. 756-003-00000-8)	Domestic	Foreign
Subscription to Monthly Issues (12 issues)	\$77.00	\$96.25
— Single Copy On-Demand (1 issue)	\$21.00	\$26.25

Mail Orders: Check or money order (full remittance required) made payable to "Superintendent of Documents":

Mail to: Superintendent of Documents
U.S. Government Printing Office
Washington, DC 20402-9371

Telephone Orders: Acceptable credit cards are: Choice, Mastercard, or VISA. You may also charge against your pre-paid GPO deposit account, if available.

Call: 202-783-3238 (Note: This is not an FTS or AUTOVON line.)

Customer Service: Publication service section (*Inquiries about a publication order.*)
202-275-3050

Subscription research section (*Inquiries about a subscription order.*)
202-275-3054

Deposit account section (*Inquiries about deposit accounts.*)
202-275-2481

Depository libraries should contact:
202-275-1006 (Library Programs Service)

ERICTAPES ERICTOOLS

HAVE A COMPUTER?

LOOK AT ERICTAPES!

The Educational Resources Information Center (ERIC) database is available on magnetic tape in a variety of options. Under special authorization from the U.S. Department of Education, these tapes are offered at unusually low cost to encourage the widest possible dissemination.

The ERIC database provides coverage of the significant literature in the field of educational resources. Report literature (announced in *Resources in Education (RIE)*) is covered from 1966 to date; journal article literature (announced in *Current Index to Journals in Education (CIJE)*) is covered from 1969. Monthly, quarterly, and annual updates are available for both *RIE* and *CIJE*, so that the files may be kept current.

The basic files are available in the ERIC Format (IBM/OS variable length records). These files include the complete resume (document description, indexing, and abstract or annotation) of each document or journal article announced, in accession number order. A variety of peripheral files,

including Postings Files (inverted subject and source indexes) and the Thesaurus (controlled indexing vocabulary) are also available on magnetic tape, and virtually any segment of the master files is obtainable on Special Order.

The files may be purchased individually or on annual subscription. The files are written on new, high quality, 9-track tapes (600, 1200, or 2400-ft., as appropriate) at either 1600 or 6250 BPI and are guaranteed. Prices per tape reel start as low as \$75.

NO COMPUTER?

LOOK AT ERICTOOLS!

For organizations without access to a computer,* ERICTOOLS provide manual access to the ERIC document collection. ERICTOOLS are a series of printed indexes, directories, and cross-reference lists, distributed internally to components of the ERIC network. The *Title Index* provides access by document title. The *Source Directory* provides access to all organizational names used in the system, i.e., corporate authors and sponsoring agencies. Cross-reference lists lead the inquirer to the accession number (ED number) from: Report Number; Contract Number; and Clearinghouse Accession Number.

ERICTOOLS are available individually and on annual subscription. Prices start from as low as \$20 for some individual documents.

* Many of these documents are also valuable tools for computer searchers.

For additional information, complete and mail the reply form or call: **ERICTAPES/ERICTOOLS**,
1100 West Street, 2d Floor, Laurel, Maryland 20707-3598, 301-497-4080

Toll-Free 800 Number Makes Education Information Accessible

ACCESS ERIC is your gateway to the Educational Resources Information Center (ERIC), a nationwide information service designed to make education literature readily accessible.

With its toll-free number, **1-800-LET-ERIC**, ACCESS ERIC makes it easy for you to locate and obtain education information. One call puts you in touch with information specialists who can answer questions about ERIC, refer you to subject-specific information sources, and provide education-related publications produced by ERIC.

Sponsored by the U.S. Department of Education, Office of Educational Research and Improvement, ERIC helps teachers, librarians, students, parents, researchers, and policymakers stay abreast of the most important developments in the education field. Through ERIC, you can access information on a wide range of subjects.

In addition, ACCESS ERIC recently introduced four reference and referral databases to guide you through the vast world of education information. These databases are also available as print directories.

- **ERIC Digests Online**--Synthesizes information for you and includes more than 470 full-text ERIC Digests (two-page summaries) on current topics in education.

- **ERIC Information Service Providers**--Lists nearly 1,000 agencies, such as libraries and information centers, that provide computerized searches of the ERIC database, have a sizable collection of ERIC microfiche, or subscribe to and collect ERIC hard-copy reference tools.

- **Education-Related Information Centers**--Helps you quickly locate agencies knowledgeable about your subject needs. Describes more than 200 resource centers that cover a broad range of education-related topics and provide user services, technical assistance, and information dissemination.

- **Education-Related Conferences**--Presents nearly 500 international, national, State, regional, and local education-related conferences covering the entire calendar year.

And, to help you stay up to date on a broad range of education-related issues, ACCESS ERIC offers free subscriptions to *The ERIC Review*. You can also order copies of *A Pocket Guide to ERIC* and other resources to help you access and use ERIC.

Gain entry to a world of education literature. For more information, call 1-800-LET-ERIC, Monday to Friday, 8:30 a.m.-5:30 p.m. (eastern time), or write:

**ACCESS ERIC
1600 Research Boulevard
Rockville, MD 20850**

MAJOR VENDORS OF ERIC ONLINE SERVICES AND CD-ROM PRODUCTS

The ERIC database is one of the most widely used bibliographic databases in the world. Users from approximately 100 countries perform an estimated half million online or CD-ROM searches a year using a variety of available commercial systems (listed below).

Users wishing to search ERIC online need a computer terminal equipped with a modem that can link by telephone with the vendor's system. Those preferring stand-alone CD-ROM systems must have a computer equipped with a CD-ROM drive.

As an alternative to acquiring your own ERIC search capability, the *Directory of ERIC Information Service Providers* (available from any ERIC component) lists approximately 1000 organizations that perform ERIC searches on demand for users.

ERIC Network Components

There are currently sixteen (16) ERIC Clearinghouses, each responsible for a major area of the field of education. Clearinghouses acquire, select, catalog, abstract, and index the documents announced in *Resources in Education* (RIE). They also prepare interpretive summaries and annotated bibliographies dealing with high interest topics and based on the documents analyzed for RIE; these information analysis products are also announced in *Resources in Education*.
